Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1043
BID: $OPDX.1043
January 2, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, WO2N, N3QQ, NJ1Q & ARRL DX, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, K8GI, K8YSE, W8GEX (60m News), W0GJ, A35RK/A35A, AT International, DK8JB & The DX News Letter, DL1SBF, DL7AOS, DxCoffee.com, DX-World.Net, ES1CW, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, IK2QPR, OH2BH, ON4IA, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, SV1HER, VA3RJ & ICPO, VE2XB and VHF-DX-Portal for the following DX information.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jessi, daughter Katie and her husband Kevin and son Lliam), and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy New Year". Thanks to the many individuals who have provided DX information over the past year. Without them there would not be an OPDX Bulletin. Also, thanks to the individuals who sent holiday wishes to my family and me.....
73 and Have a Great/Safe/Healthy New Year de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT:
According to the AR-Cluster Network for the week of Sunday, 25th-December, through Sunday, 1st-January there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5Z, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3,

ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. Eric, OE4AAC, will be active as 3B9/OE4AAC from Rodrigues Island (AF-017) between February 14-21st. Activity will be on 40-10 meters CW. QSL via OE4AAC.

3DA, SWAZILAND (Update). Operators Phil/G3SWH and John/G3OLU (aka EA5ARC) will be active as 3DA0PW from the Hawane Resort in western Swaziland between February 21-29th. The Hawane Resort has a well equipped station with Elecraft K3 transceivers, ICOM IC2KL amplifiers, an A4S at 24m and an A3WS at 20m, a wire 4 square for 40m and a vertical for 80m complete with 30 x 20m long radials. Activity will be on CW only on all bands 80-10 meters. There will be no 160, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. QSL via G3SWH, either via the OQRS facility on Phil's Web site <www.g3swh.org.uk> (preferred), direct with SAE and adequate return postage, or via the Bureau. Subject to a good Internet connection, there will be an on-line log on Phil's Web site and daily uploads to LoTW. The 3DA0PW Web site is now up and running at: http://www.g3swh.org.uk/3da0pw.html

4G, PHILIPPINES (Special Event). Look for special event station 4G0LD to be active during 2012. Activity is to celebrate the 50th anniversary of the Philippine Amateur Radio League (PARL). QSL via the Bureau. Also, the PARL is sponsoring a commemorative Diploma for amateur radio stations that have established two-way communications with at least twelve (12) QSOs with PARL members. Look for more details at: http://www.dx1l.dxhams.net/events.htm

5H, TANZANIA. Maurizio, IK2GZU, will once again return to the "Mission Ilembula" to do some work at the new hospital and orphanage between March 4th and April 4th. He plans to be active during his spare time as 5H3MB on the HF bands. Maurizio will use his FT-100 and the mission's TS-850 into a tri-band 3 element beam (20/15/10m) fixed on Europe and a vertical or dipole for the other bands. QSL via IK2GZU, direct or by the Bureau. Also, LoTW (after his return home).

6Y5, JAMAICA. Gerhard, OE3GEA, will be active as OE3GEA/6Y5 from Jamaica (NA-097, WLOTA 0214) between February 2-12th. Activity will be holiday style, mainly CW, operating only 50 watts into an Outbacker antenna or dipole. QSL via his home callsign.

9A20, CROATIA (Special Event). Look for several Croatian stations to use the "9A20" prefix from now until December 31st. Activity is to celebrate the 20th anniversary of the 9A prefix for Croatia. Details for a special "9A 20" award are available at: http://www.hamradio.hr

9H, MALTA. Peter, G3PHO, will be active as 9H3C from Gozo Island (EU-023) between March 8-15th. Activity will be on 80-10 meters and possibly 160m. Look for him to be an entry in the RGSB Commonwealth Contest. QSL via his home callsign or LoTW.

A3, TONGA (News). Paul Kidd, A35RK/A35A, informs OPDX the following two news items from Tonga:
1) A35CT is no longer in Tonga....Craig left for the States, and he isn't coming back anytime soon...certainly not within the next year.

2) A35A (A35RK) is packing up to leave Tonga very soon. A final departure date is set for 16th January 2012, and there is no definite return date. Paul states, "I will be taking down antennas and packing radios for shipment to the States in 2 days (December 31st)." His last date of activity was December 30th. A35RK/A35A has been active from Tonga since 4th May 1994, but that is about to end for an indefinite period of time. Any lingering QSLs are good via LoTW or W7TSQ.

ARRL DXCC DIAMOND AWARD. During the year 2012, the ARRL's DXCC Award program will be celebrating their 75th anniversary, and as you know this is the world's preeminent DXing award. So reaching this "Diamond milestone", the ARRL decided to celebrate this event by going back to the roots of the award, and specifically reading the 1937 DXCC List (January 1937 QST, pages 52-53) to learn what countries were counted at the onset which led them to create the "Diamond DXCC Challenge". The country list that they will be using for the "Diamond DXCC Challenge" is based upon the list of 231 places shown in 1937. The list is available at: http://www.arrl.org/files/file/Diamond%20DXCC/QST_Jan_1937_p52-53.pdf The League has added some interesting twists to this award (ex. where working one country may count for two entities!). The "Diamond DXCC Challenge" is an "Honor Award" and will not require acquisition or inspection of QSLs or proof of confirmation. The Diamond DXCC certificate will be available for working 100 of the 226 entities and will be endorsable at 5 levels: 125, 150, 175, 200, and 225. If anyone works all 226, there will be a special award for that remarkable achievement! There will also be awards for the top finishers. For complete details and picture of the award, go to:
http://www.arrl.org/news/arrl-diamond-dxcc-challenge

CCF NEWSLETTER. Martti, OH2BH, reports that the latest and last 2011 issue of the Contest Club Finland's Newsletter, PileUp! - is now available online. This will also be the last publication by the current editorial team. The newsletter is in English (for most part) and includes interesting articles, and can be viewed at:
http://www.helsinki.fi/~korpela/PU/PU5_2011.pdf

CY0, SABLE ISLAND (Postponed!). The latest update, dated December 30th, states (edited): "Hi Everyone - Unfortunately, we had to postpone the Sable Island CY0 DXpedition due to the landing area on the island being under water. A winter storm with 20+ foot swells pushed water onto the sand 'runway' on Wednesday evening. Al Wilson, the OIC on Sable, made an assessment of the landing area yesterday. Ron and I talked with Al

and there was no possibility of a flight to the island in the next five days. After that, it would depend on how quickly the water would drain from the landing area and if any other storms affect the island. At that point, we decided to postpone the DXpedition.
Needless to say, we are extremely disappointed that we have had to postpone the DXpedition. We have learned first-hand there is really no season of the year that is ideal for flights. Late yesterday morning we met with Ted of Maritime Air. Ted advised it has been the worst year he has experienced as far as scheduling flights. Maritime Air provides logistical flight services to Environment Canada on the island.
Even though we are disappointed, we are not defeated. Maritime Air allowed us to store our gear to help facilitate our next attempt. We are discussing two options with the Sable Island station.
We appreciate your interest in the DXpedition. We have received a lot of encouragement from DX'ers around the world. Continue to check the DXpedition Web site for updates at: http://www.cy0dxpedition.com
73, Ron/AA4VK and Murray/WA4DAN"

IOTA NEWS.............
AS-014. Abdullah, A61AM/A41WW, will be active possibly as A41WW/M or A41WW/P from Masirah Island on January 1st. Activity will be on 80/40/20/17/15/10 meters SSB only. QSL via EA5ZD.

EU-125. Stefan, DL7AOS, will once again be using the special callsign 5P5K from Romo Island between March 10-24th. Activity will be on 80-6 meters using a FT-857 with a 1kW amp into a vertical antenna near the beach. Look for 5P5K to also be operating in the Russian DX Contest (March 17-18th) as a Single-Op/All-Band/High-Power entry. QSL via DL7AOS, direct using the QRZ.com address or by the Bureau. Last year's activity can be seen on Youtube at: http://www.youtube.com/watch?v&#65533;8lvxlOf9Q

NA-168. Operators Dana/AD5VC, Wayne/K5DF, David/K5DFD, Jim/N5IB, Jerry/W5AJD and David/W5XU will be active as W5GIX from Grand Isle, in the Louisiana State South East IOTA group between January 6-8th. Activity will be on 80-10 meters, possibly 6m, using CW, SSB and the Digital modes. QSL via W5GIX.

NA-240. (Reminder/Update/NEW IOTA!) Members of the Russian Robinson Club (RRC) and with the support of the Bethel Amateur Radio Club (BARK) will activate the last new IOTA in Alaska in the Bethel County IOTA Group around January 5-8th (estimated dates -- depending on weather and transportation availability). The callsign will be KL7RRC/p. The group's main reason for this winter activation is to help jump start the RSGB IOTA Marathon. See details at: http://www.rsgbiota.org/marathon/index.php
The current team members are: Yuri N3QQ and Tim/NL8F. QSL via UA9OBA (Europe/Russia) and N7RO; either manager can confirm any contact. For more details, updates and "real time team's location" can be seen at: http://www.na-234.com

OC-136. Operators Peter/VK3ZPF, Matt/VK2ADF and Kevin/VK3KAB will be
active as VK3SAT from French Island between January 7-8th.
Activity will be on 80/40/20/15/10 meters using wire antennas.
Suggested frequencies and times of band operations are available
on QRZ.com. They will carry most of the gear in backpacks and
will be joined by three or four others who will be kayaking
across from Stony Point. QSL via VK3SAA.

SA-028. Operators Orlando/PT2OP and Fred/PY2XB will be active as PV2PC
and ZX2S, respectively, from Sao Sebastiao Island (ARLHS
BRA-223, WLOTA L-1007, DFB SP-14) between February 23-27th.
QSL PV2PC via PT2OP and ZX2S via PT7WA.

ISWL CALLSIGNS (For January). The following ISWL club callsigns will be
used throughout the month of January:
GX4BJC/A - Operated /A from Stratton, near Bude in Cornwall, by Mike/
M0SMJ. (/A WAB Square ﷿S20 - England & IOTA ﷿U-005).

MX1SWL/A & MX1SWL/P - Operated /A from Hartford, in Cambridgeshire,
by Tom/G3RPV. (/A WAB Square ﷿L27 - England & IOTA EU-005). (/P WAB Details will be given at the time of the QSO).
For more information, see <http://www.iswl.org.uk> or QRZ.com and eQSL.cc

J7, DOMINICA (Update). Mike, VE2XB, will be active as J79XB from Dominica
(NA-101) starting January 5th (2012) for several weeks. Activity will be
holiday style on all bands 160-10 meters and possibly 6m if there are
openings. He states that he will be concentrating a bit more on 80/40/30
meters and of course the other bands including 17/12 meters as conditions
allow. QSL via VE2XB (see QRZ.com for address and details) with SASE and
CDN stamps or 2 IRCs or 2 greenbacks. The postal rates have gone up, so
take that into consideration before you send your QSL card. A Web page
is available at: http://j79xb.jimdo.com

KH2, GUAM. Take, JS6RRR, will be active as KH2/JS6RRR from Guam (OC-026,
USI GU003S, WLOTA L-0064) between February 10-14th. Activity will be on
160-6 meters using CW, SSB, FM, RTTY and PSK31. QSL via JS6RRR.

MALPELO AND PITCAIRN DXPEDITIONS (Coordinated Frequency Plan).....
Glenn Johnson, W0GJ, NCDXF Vice President (also HK0NA participant!),
reports (edited): "In less than 3 weeks two very visible DXpeditions will be
operational simultaneously from the Pacific:
VP6T - Pitcairn <www.vp6t.org> will be operational Jan. 20th–Feb 4th,
2012
HK0NA - Malpelo <hk0na.com> will be operational Jan. 21st–Feb. 8th, 2012

The leaders of each team have been in extensive band planning communica-
tions and have agreed upon the following coordinated frequency plan.

Band	HK0NA		VP6T	
	TX	RX	TX	RX
10M	CW	28024 up	28035 up	
12M	CW	24892 up	24903 up

NCDXF CHRISTMAS GIFT. Glenn Johnson, W0GJ, NCDXF Vice President, informed
OPDX on December 25th (edited): "Today, the Northern California DX
Foundation announced a 'Christmas gift' of 500 USDs to help rebuild and
re-equip the Radio Amateur Society of Thailand's (RAST) HS0AC Club station
that was destroyed by recent flooding.
By now, you may have heard about the severe floods in Thailand this
past fall, resulting in devastating damage everywhere -- including the

Radio Amateur Society of Thailand (RAST) and their famous 'HS0AC' club
station which were completely destroyed. This website shows it all in
horrific detail: http://www.qsl.net/rast
RAST is also part of the Asian Technical Institute. The HS0AC club
station is located within the Institute. http://www.ait.ac.th
Please help Thailand hams by donating any amount via PayPal at
donate@rast.or.th during this season of giving. All donations will go
entirely to rebuilding the station.
For the past 40 years, NCDXF had not only been funding major DXpeditions,
but is also committed to education and scholarships.
Merry Christmas to all and Healthy New Year filled with DX!!!"

PJ7, SINT MAARTEN. Paolo, IK2QPR, will be active as PJ7/IK2QPR from
Sint Maarten (NA-105) between January 8-16th. Activity will be holiday
style on the HF bands. QSL via IK2QPR at: Paolo Fava, via Bertani 8
46100 Mantova, ITALY.

9J2CA QSL MANAGER. Phil, G3SWH, reports, "I've just resumed QSL Manager-
ship for James, 9J2CA, in Lusaka, Zambia. James is mainly QRV on the
digital modes with the occasional foray onto CW. QSL direct only. There
is an on-line log search at: http://www/g3swh.org.uk/9j2ca.html "

SX100A. A special QSL card or Award plaque will be available on request
from the Radio Amateur Association of Greece. The anniversary plaque
cost is 30 Euro + 2 Euro Paypal expenses. The design of plaque can be
viewed at: http://www.qrz.com/db/sx100a

For any additional information, please send an E-mail to: sv1her@raag.org

QSL RECEIVED VIA LoTW: 4L4WW, 9V1RM, BD4FM, BU2AI, C6ANM, CN3A, CW5W, DL7VEE, DR1A, E51MAN, E51NOU, EA3QP, EA4TX, ED3A, EF8R, F5LQ, FO8RZ, FY5KE, GM7TUD, KH7Y, NP3CW, OK1BN, OQ5M, OS8A, PA3YH, PJ2/W9JUV, PJ4A, PJ4LS, PY1GQ, RN4ABD, ST2AR, T32J, TK4W, TM6M, UW2ZM, V51YJ, VE3MM, VE6WP, VP2MTA, XE1MM, XF3/IZ2LSC and YN2CC

QSLS RECEIVED VIA MAIL: 3XY1D, 5T0JL, 5W0OJ, 5X1GS, 7Q7GM, 7Z1AA, A52DL, A71A, A73A, BD4CQ, C21UF, C6ANM, CP4DR, EA8/DL3GCS, EI6S, J39BS, JT5DX, OY1CT, P29CW, PJ2/K8LEE, TA1CQ, TF8GX, TM0INT, UA2F, VK9CX, VP5/W5CW, XV4YY, ZB2FK, ZD7BG, ZD7VC and ZD8F

QSLS RECEIVED VIA THE BUREAU: 3D2CI, 3D2CY, 3D2DX, 3W9R, 4W6A, 4Z1UF, 6W/LA9DL, 9J2YO, 9K/SP4R, 9M2/LA9DL, 9M8DX/2, A23SL, A61AS, BT1OB, BT1OJ, C37URA, C36VM, CR2X, CU3AC, CU3CP, CU3CY, CU3EM, CU3FV, CU3HN, E41/OK1DTP, FT5GA, H7/K9GY, J88XF, JW1ECA, JW5X, JW7QIA, JW7XX, JW8DW, JW9DL, K4M, LW3DG, OJ0LA, OX/DF9TM, PJ2/DL5RDP, PJ2/K2NV, PJ4/W9NJY, PJ5/AH6HY, PJ5/SP6EQZ, PJ5/SP6IXF, SM3VAC, TB0DX, TC0DX, TF/LA9SN, TX5SPA, YM0DX, YU8HI, Z38AV and ZL4M

T8, PALAU (Update). Operators Mike/JA6EGL, Yasu/JA6UBY, Masa/JH6KXG and Yu/JE6DND will be active as T88SM, T88CP, T88BI and T88HK, respectively, from Koror Island (OC-009) between January 11-19th. Mike and Yu will only stay until January 16th. Activity will be 80-10 meters using CW and SSB. QSL via their home callsigns (direct only).

TN, CONGO (Update). Look for six operators to be active as TN2T from the Republic of the Congo between January 22-31st. Using three stations, the DXpedition will be active on 160-10 meters using CW, SSB and RTTY. Their suggested frequencies are available on the TN2T Web page, was well as a "most wanted" band survey. Operators mentioned are Patrick/ON4HIL/OT2A, Marc/ON6CC/OR3A, Luc/ON4IA/OR2M, Ronald/PA3EWP, Carlo/ON4BR/OO4T and Stefaan/ON4FG/OP4T. QSL Manager is M0URX. More details and updates are available on the TN2T Web page at: http://www.tn2t.be

V2, ANTIGUA. Operators YL Babs/DL7AFS and Lot/DJ7ZG will once again be active as V21ZG from Antigua (NA-100) between March 5-31st. Their holiday activity will be focused on 15-6 meters, looking for JA and QRP stations, operating mainly on SSB, RTTY and PSK. QSL via DL7AFS.

VP9,BERMUDA. Kurt, W6PH, will be active as VP9/W6PH for the 2012 ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry, and the ARRL DX SSB Contest (March 3-4th) as a Multi-Op (w/N6WIN)/Single/ Low-Power entry. QSL direct to his home callsign W6PH.

XU7, CAMBODIA. Operators Alex/UA9YAB and Alex/UA9YPS will be active as XU7YAB and XU7YPS, respectively, from Cambodia between January 3-6th. They are also planning a side trip to IOTA AS-133. QSL XU7YAB via his home callsign direct or LoTW. QSL XU7YPS via his home callsign direct.

YS3, EL SALVADOR. Luca, IW2CXJ, will be active as YS3/IW2CXJ between January 11-24th. Activity will be holiday style on 40-10 meters using

a Cushcraft R7 vertical and 100 watts. QSL via LoTW, eQSL or direct to
his home callsign.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 18th December 2011

Seasons Greetings & Happy Christmas 2011

The Officers and Committee of the Irish Radio Transmitters Society wish everyone seasons greetings and a happy Christmas. Thank you for your support in 2011 and we look forward to your continued support in 2012, as we continue to serve you in our 80th anniversary year. Good wishes to everyone for a good and prosperous New Year.

Athbhliain faoi mhaise daoibh!

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary next year. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at /irts / dot/ie

---

IRTS News Radio News Service

This is the last IRTS radio news bulletin for 2011. The next radio news bulletin will be January 8th 2012. The radio news editor thanks everyone who regularly submits items for

inclusion in the radio news service.

Revised HAREC Examination Format

Following recent consultations with ComReg on the renewal of the agreement under which IRTS administer the examinations for the HAREC qualification, we are pleased to announce that ComReg has approved a change in the format of the examination: it will, in future, consist of two sections, each containing 30 questions. The pass mark is 60% and a pass is required in each of the two main sections of the paper, Section A - Amateur Radio Regulations and Related Topics and Section B - Radio Theory and Related Topics. There have been no significant changes to

the content of the Syllabus and Notes for Candidates which was published in June 2010, however its layout has been adjusted to conform to the revised structure mentioned above. In addition, a new Annex has been included containing the principal national call sign prefixes for Europe and North America, knowledge of which is required for the examination. Intending candidates are advised to study the Syllabus carefully paying particular attention to the associated Notes for Candidates and the Annexes to the Syllabus The web page at www.irts.ie/downloads contains a link to the syllabus with the adjusted layout. This page also includes a link to an IRTS document Studying for the Harmonised Amateur Radio Examination Certificate which includes both the syllabus and a new Sample Paper. A revised CD Course Guide, which is closely aligned with the Syllabus topics and the revised examination format, is at an advanced stage of preparation and will be available in the New Year.

Tipperary Amateur Radio Group

The Tipperary Amateur Radio Group Would Like to wish all Radio Amateurs and Shortwave Listeners a Happy Christmas and a prosperous New Year and a thank you to Group members who read the news and helped out at the various events over the year.

Teenager Wins IRTS Contest Award

Lough Erne Amateur Radio Club is delighted that a teenage member, Jamie Nelson 2i0MFB won an Award in the IRTS Autumn 2 metre Counties Contest.

The results in the December issue of Echo Ireland show Jamie winning the OEI Award - best station outside EI - in the Low Power Portable section. His portable station was up on Carnmore, near the Club's Repeater GB3CP and not far from his Magheraveely home in south east Fermanagh. Lat year this same award was won by another radio amateur in that same part of the county, David Corbett MI0VKO.

Jamie at 17 years old was likely the youngest contest operator and had been a radio amateur for about 19 months at the time of the contest.

Jamie did the Club's Foundation course last year, then the examination for his Intermediate examination earlier this year. He has postponed study for the full license examination until after next summer's very important A-level examinations at Portora Royal School.

Jamie is a fine example of the kind of young people we need to recruit into amateur radio. Lough Erne Amateur Radio Club is very proud of his successes.

Global Data Traffic

An interesting statistic is that by 2014, global data traffic will increase by 39 times from current levels, reaching 3.6 exabytes (around 3.9 billion gigabytes) per month, according to wireless firm Cisco.

DX News

F4FOO will operate from Togo in West Africa during the period 19 December until 4 January. He will be on 20 - 10m using SSB. The callsign to look for is 5V7MA and QSLs go via his home call.

Gerry VE6LB is returning to Dubai in the United Arab Emirates for a 3 week stay. He will be active as A6/VE6LB from 20 December until 10 January. As before this is a part time vacation operation. He will run 100w to a G5RV antenna and concentrate mainly on working 12m and 10m. QSL is via the home call and Logbook of the World.

SM6CPY will be signing 9X0PY from Rwanda from 24 December until 7 January. Cards go via his home call.

At this time of year there are often special event stations on the air with a Christmas or New Year theme. Already on the air this year is PB11XMAS from Holland. The operator is PB5X and he will be workable until New Year's Day.

IC Chip Inventors Birthday

We celebrate the birthday of the late Robert Norton Noyce, nicknamed "the Mayor of Silicon Valley". Noyce and Gordon Moore founded Intel in 1968. The integrated circuit was one of the stepping stones toward what we take for granted today, the ubiquitous microprocessor. Noyce was born on December 12, 1927 and died in 1990 at the age of 62.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1043.1
BID: $OPDX.1043.1
January 1, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network and W0GJ for the following DX information.

HK0, MALPELO ISLAND (NCDXF Press Release). [dates Jan. 1st - edited]
The Northern California DX Foundation is pleased to announce a contri-
bution of 15,000 USDs to the HK0NA Malpelo DXpedition which will take
place from January 21st to February 5-6th, 2012. Malpelo is #12 on the
DX Magazine's Most Wanted List for 2011.
Team co-leader Bob Allphin, K4UEE, states that, "Malpelo is probably
the most physically challenging DXpedition I have ever participated in.
An advance team of four (HK1MW, HK1N, HK1T & HK6F) left Christmas day
with nearly 4 tons of gear to transport to the island. They will establish
two camps, one at the 300 foot level and another at near the top at the
800 foot level and set up antennas and stations which should be ready
when the main team arrives January 21st. Without major financial support
from NCDXF, DXpeditions like this to challenging or rare locations would
not be possible." No one has ever operated from the top of the island
before, hence the western North America and Asia/Oceana have a much
higher need for Malpelo. See http://hk0na.com
For the past 40 years the NCDXF has funded major DXpeditions to many
Most Wanted Entities. The credit for these large grants goes to the
NCDXF contributors who make DX like this possible. Have you contributed
yet? <www.ncdxf.org>
73 es Happy New Year!
Glenn Johnson, W0GJ
NCDXF Vice President

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Jan 03 2308 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
26 December - 01 January 2012

Solar activity was at low to moderate levels. Activity was moderate
on 26 December due to M-class flares from Region 1387 (S21, L = 227,
class/area Dki/290 on 27 December), the largest being a M2/Sf event
at 26/2030 UTC. Activity decreased to low levels during 27 - 28
December with most of the frequent C-class flares from Regions 1387
and 1389 (S23, L = 087, class/area Ekc/500 on 30 December). Activity
returned to moderate levels during 29 - 31 December due to M-class
flares from Region 1389. Activity decreased to low levels on 01
January with most of the flare activity from Region 1389.

No proton events were observed at geosynchronous orbit during the
period. However, a greater than 10 MeV proton flux enhancement
occurred during 25 - 26 December (peak flux 3 pfu at 26/0135 UTC)
associated with a M4/1n flare at 25/1816 UTC from Region 1387.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels.

The geomagnetic field was at quiet levels during 26 - 28 December.
Activity increased to quiet to unsettled levels on 29 December due
to weak CME passages associated with filament eruptions observed on
25 and 26 December. Field activity decreased to mostly quiet levels
during 31 December - 01 January.

Forecast of Solar and Geomagnetic Activity
04 January - 30 January 2012

Solar activity is expected to be at low levels with a slight chance
for isolated M-class activity.

No proton events are expected at geosynchronous orbit.
```

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during 04 - 07 January. Normal flux levels are expected during 08 - 30 January.

The geomagnetic field is expected to be at quiet to unsettled levels during 04 - 06 January due to recurrent coronal hole high-speed stream effects. Predominantly quiet conditions are expected during 07 - 30 January.

6. The ARRL Contest Update for January 4, 2012

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 4, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- ARRL RTTY Roundup Radio Rattler
- Barefoot on the Bands - NAQP CW
- Contest University Enrollment Opens
- Pileup! Magazine - New Issue
- New Do-It-Yourself Ham Radio Video
- Record-breaking 10 Meter Contest
- Naval Noises

- Find that Transmitter!

- Measuring Up

NEW HF OPERATORS - THINGS TO DO

Have you tried RTTY contesting yet? If not, the ARRL RTTY Roundup
<http://www.arrl.org/contests> is coming to town this weekend and will
be a great opportunity to see how your station plays on the digital
modes. Check out AA5AU's great website for tips on how to get started.
Should you have a little spare time on Sunday, dial up the Kid's Day
<http://www.arrl.org/kids-day> frequencies and put a smile on a young
operator's face!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

A relatively untarnished issue completed 2011 although K1QX points out
that the French custom for wishing someone a happy New Year requires
only "Bonne annee" - right back atcha, Craig!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section
```

7-8 January

- ARRL RTTY Roundup
- Kid's Day--Phone
- 070 PSKFest
- CWops Weekend Mini-CWT Test
- Original QRP Contest--CW
- DARC 10 Meter Contest
- Midwinter QSO Party
- ARS Spartan Sprint--CW (Jan 10)
- CWops Monthly Mini-CWT Test (Jan 11)
- SNS and NS Weekly Sprints--CW (Jan 13)

14-15 January

- North American QSO Party--CW
- Hunting Lions In the Air
- MI QRP Club Jan QRP Contest--CW
- WW Peace Messenger Cities
- EUCW 160 Meter Contest--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

There is lots of Dayton Hamvention contesting news to report - the 6th annual Contest University (CTU) <http://contestuniversity.com/> is now taking early-bird registrations through Jan 31. Held on May 17 at the Crowne Plaza in Dayton, Ohio, CTU offers the wit and wisdom of seasoned contest "professors" in a collegial all-day setting. New to the podium this year will be N6TR, K3NA, K7NV, XE1KK, W5WZ and K2RD along with familiar faces from years past. An additional incentive - if you have given (or will give by Dayton 2012) a talk about Amateur Radio Contesting to any club, hamfest or group since May 20, 2011 - you qualify for a $10.00 registration fee discount!

Along with Contest University, the 20th Annual Dayton Contest Dinner <http://contestdinner.com/> is now taking ticket orders, as well. This is the venue at which the year's inductees to the CQ Contest Hall of Fame are announced. The Contest Dinner is held at the Dayton Crowne Plaza on Saturday night - May 19th this year - and always features a great keynote speakers and many prizes. While you're in Dayton, don't miss the Contest Super Suite <http://contestsupersuite.com/> held on FOUR straight nights (Thursday - Saturday) in the Miami Ballroom of the Crowne Plaza. (Thanks, Tim K3LR)

David K2DSL has create a web application <http://www.k2dsl.com/2011/12/17/create-a-google-map-of-your-adif-contacts/> that reads an ADIF file generated from your logging program and creates a Google map of the contacts. You upload the ADIF file and the application displays a map in return. Each contact must include a latitude/longitude or grid square in order for it to show up. That information is available from QRZ.com <http://qrz.com/> or Hamcall <http://hamcall.net/call>. See the website and the FAQ for more information on this creative service.

Working in parallel with David, Sebastian LW4HR has developed GeLog <https://sites.google.com/site/sdimunzio/english>, an online tool for visualizing contacts on a Google map globe from an ADIF file. To use the tool, you'll need a QRZ.com <http://qrz.com/> data subscription for the lat/lon coordinates. Not only do the contacts appear on the globe, but so do the daylight and nighttime areas and the Sun zooms around the globe, too! Very nice work!

An updated and edited version of the upcoming ARRL International DX Contest rules has been published and the ARRL is looking for volunteers to translate the rules into other languages. If you can help, please contact ARRL Contest Branch Manager, Sean KX9X <kx9x@arrl.org>.

Time for a new calendar - how about this 2012 Old Tyme Radio Calendar from KB6NU's Ham Radio Blog <http://kb6nu.com/>? It's available for free downloading from WA1KPD's Boat Anchor Collection <http://home.comcast.net/%7Echnord/wa1kpd.html> website. (Thanks, Jeff K1NSS)

All your dots are belong to us! Here's a story about the first wireless hacker
<http://www.newscientist.com/article/mg21228440.700-dotdashdiss-the-gentleman-hackers-1903-lulz.html>
from the "That Didn't Take Long Department". Maybe some things never change! (Thanks, Doug K1DG)

In case you were wondering, KG4 stations with two letters in their suffix are in Guantanamo Bay. KG4 stations with one or three letters in their suffix are in the continental United States. (Thanks, Daily DX <http://dailydx.com/>)

Bob N6TV has been busy programming, too, and has analyzed spots from the Reverse Beacon Network <http://www.reversebeacon.net/> during the 2011 CQ Worldwide CW contest. Who were the most-spotted single-operators
<http://reversebeacon.blogspot.com/2011/12/most-spotted-single-ops.html>?
And the most-spotted stations
<http://reversebeacon.blogspot.com/2011/12/what-effect-does-full-frequency.html>
of any type?

They do everything big in...not Texas...Jupiter! Take a look at the Jovian auroras
<http://science.nasa.gov/science-news/science-at-nasa/2007/29mar_bigauroras/>
in this 2007 story from the NASA Science news. Consider the QRN implications! (Thanks, Glenn K6NA)

Those of you who tried QRP in the recent Stew Perry Topband Distance Challenge will identify with Peter K3ZM's amusing m&#65533;lange of Dickens and radiosport
<http://lists.contesting.com/archives/html/3830/2011-12/msg02465.html>.
(Thanks, Ralph N5RZ)

In the last issue, the availability of the 73 Magazine issues online in the Internet Archive <http://www.archive.org/details/73-magazine> drew

a lot of interest. Marty K1OYB pointed out that this was a voluntary contribution to the public domain by 73 magazine publisher, Wayne Green W2NSD who deserves a tip of the collective cap in this regard.

Web Site of the Week - The latest issue of Contest Club Finland's PileUP! magazine <http://www.helsinki.fi/%7Ekorpela/PU/PU.html> was published online Dec 29, 2011, containing 68 pages of contest reporting. It includes numerous extended writeups on SAC 2011 from different viewpoints. Ever wonder what it is like to work SAC from JW5, OH0, OH8, or K1, or what it is like to mobilize national troops for the Polar Battle or to organize an international contest? The Last Blast sheds light on SDR & RBN, and has the usual eccentric humor. (Thanks to the Pileup! editorial team - OH1WZ, OH2BH, OH6KZP, OH7WV)

WORD TO THE WISE

Confirmation - make SURE you get the expected confirming response from an email-handling robot after emailing your contest log. No response probably means that your log email bounced or was delayed or was sent to the rong address or...had something happen to it other than what you intended! A bounced email might also wind up in your "spam" or "junk mail" folder so don't assume that no news is good news. Oh, and read the robot's response, too - be sure the robot got your call right, the contest right, the category right, the number of contacts right, etc. (Thanks, Rich KL7RA)

==> SIGHTS AND SOUNDS

A new promotional video <http://www.youtube.com/embed/vlDwVhx7miQ?feature=player_embedded> by the ARRL touting the Do It Yourself (DIY) <http://www.arrl.org/diy> nature of ham radio has been released to attract hackers, makers and innovators to the service. The video features well known hacker and maker Diana Eng KC2UHB along with Ham Nation's <http://twit.tv/shows> Bob Heil K9EID and ISS Astronaut Doug Wheelock KF5BOC. It's fast-paced and focuses on the innovative, imaginative and fun ways "hams" use radio technology in new and creative ways and points out that amateur radio clubs are similar to hacker groups. Materials to support the movie are available on the ARRL's Do It Yourself <http://www.arrl.org/diy> website. (Thanks, ARRL Media & Public Relations Manager, Allen W1AGP)

Those of you who enjoy Tim Allen in various sitcoms will want to be watching "Last Man Standing <http://beta.abc.go.com/shows/last-man-standing>" on ABC on Tuesday nights. One aspect of Tim's character, Mike Baxter, is that of ham radio operator - he's been "assigned" the call sign KA0XTT and even has a Facebook page <http://www.facebook.com/#%21/KA0XTT>. The ham shack and occasional snippets of ham radio action are being worked into the story every week. This week's episode showed the station in the back of Mike's office. Browse to Mike's Facebook page and give it a "Like" for more radio action!

Geoff W0CG/PJ2DX has updated the PJ2T website <http://www.pj2t.org/ccc/cqww.cw.2011.htm> with a CQ Worldwide CW contest summary and photos.

>From the days before presentations featured "Here we are at the airport..." come these amazing pictures <http://hamgallery.com/qsl/country/Tanzania/vq3hge2.htm> of the VQ3HGE expedition in the late 1940's featuring Bob W7LR. No switching power supplies here! (Thanks, Tim K3LR)

Here's a useful, but very bad, example <http://tinyurl.com/843mlpl> of literally interpreting grounding rules. (Thanks, Lynn N7CFO)

==> RESULTS AND RECORDS

Wow - keep those cards and letters coming in! Digging out from the log deluge, ARRL Contest Branch Manager, Sean KX9X reports, "As of January 3, we've received 5,102 logs for the 2011 ARRL 10 Meter Contest, including those on paper. This is unprecedented! We've shattered the 10 Meter Contest submission record by 2,200 logs and still have over a week to go before the submission deadline passes!" In addition, results for the December 2011 Rookie Roundup <http://www.arrl.org/rookie-roundup> are available and certificates have been emailed to all Rookies thanks to the support of Bruce WA7BNM.

Don AA5AU writes in to announce the results <http://www.rttycontesting.com/tenmeterrttycontest/results/2011-index.html> of the brand-new 2011 Ten-Meter RTTY Contest, less than a month after the contest! It looks like that new contest got off to a fast start!

The DX results for the 2011 ARI DX International Contest are available at the ARI website <http://www.ari.it/> or you can download a PDF version <http://www.ari.it/images/stories/diplomi/ARI-DX-2011-DX-RESULTS.pdf>, if you prefer. UBN reports are being prepared and will be emailed to participants. Contest Manager, Bob I2WIJ, notes that there will be rule changes for the 2012 contest - a new start and end times and a shorter log submission deadline.

OPERATING TIP

Jeff K8ND has assembled a Topband operating aid <http://www.k8nd.com/Radio/Planning/CQWW160/TopbandBadFreqs.pdf> for providing guidance in selecting operating frequencies on 160 meters. This is very handy, particularly to operators new to 160 meters. Jeff is in the process of updating the guide and if you have comments or corrections, please contact him as described in the publication.

==> TECHNICAL TOPICS AND INFORMATION

John G3JVC/GM3JVC recommends a useful publication for your bookshelf on fighting EMI developed by the US Naval Postgraduate School, "The Mitigation of Radio Noise From External Sources at Receiving Sites <http://edocs.nps.edu/npspubs/scholarly/TR/2007/NPS-EC-07-002.pdf>".

It's a tour-de-force on problems hams know well.

Speaking of locating noise sources, Phil W0XI has put an ultrasonic detector kit <http://www.midnightscience.com/ultrasonics.html> on the market that is quite useful for power-line noise. In addition, there are a couple of good construction articles by W1TRC in QST by Jim Hanson, W1TRC; "A Home-made Ultrasonic Arc Detector" in Apr 2006 and "Adapting a Three Element Tape Measure Beam For Power LIne Noise Hunting" in May 2007. (Thanks, Lee K0LW and Mike K4PI)

Todd KF7SIS likes basic Rustoleum paint for protecting antennas against UV. To avoid overspray and waste, an inexpensive foam brush does a fine job with a can of flat black to apply two or three coats of paint.

For those of you who like to build your own station accessories, check out K5LXP's version <http://www.qsl.net/k5lxp/projects/CoaxSwitch/CoaxSwitch.html%20> of the 6 x 2 coax switch. There is plenty of technical detail and some good reasons why these devices cost what they do! (Thanks, Brian N9ADG)

It's very hard to see a butane flame outside and up on the tower when trying to solder. Mike K6BR takes along a small cardboard box with two sides cut out. It keeps the wind out while making it possible to see the flame. This avoids damage to the cable as well as to Mike!

Scott KB0FHP discovered a program called PolarPlot <http://www.g4hfq.co.uk/plphelp/plphelp.htm> that can help map out an antenna radiation pattern fairly easily. "All you need is a constant RF source at the frequency desired, you rotate your beam, and the pattern is measured."

What's the velocity factor (VF) of your coax? Would that be on the inside or the outside? VF is well-specified for RF inside the cable but the outside of the shield is completely different, electrically. That conducting surface acts like a fat, insulated wire with a VF around 95%! (Thanks, Steve G3TXQ)

Although the half-sloper is a well-known antenna, it seems that everybody has a different way of installing them on the tower. Roger K8RI has developed what looks like a very robust method of getting the job done while keeping the coax-wire connections waterproof and secure. It starts with an aluminum bracket and SO-239 connector <http://www.rogerhalstead.com/ham_files/tower46.htm> then waterproofs the assembly for tower-mounting <http://www.rogerhalstead.com/ham_files/tower47.htm>.

The Instructables web site recently posted a series of guides on basic electronics <http://www.instructables.com/id/Basic-Electronics/>. These cover the fundamentals and might be useful for someone learning about ham radio or general electronics. Another neat Instructable shows how to "hack" a broadcast band radio <http://www.instructables.com/id/RadioShell-Hacking-a-radio-for-backpacking/> for use in the great outdoors with a custom enclosure and offers some

good ideas for portable operating and QRP rigs! These make great accompaniment to the new ARRL Do-It-Yourself video mentioned above.

Technical Web Site of the Week - A common source of interference, particularly on 160 meters, is a mixing product from two or more AM broadcast stations. While it may sound like harmonics, "intermod" is not usually the fault of the broadcaster. If you suspect mixing you can use the Radio-Locator <http://radio-locator.com/> transmitter locating service by entering your location and looking for strong stations in your area. You can tell whether the products are being generated in your radio by switching in some attenuation. If you add 10 dB of attenuation and the products drop in strength by more than 10 dB, your receiver front end is likely being overloaded - try a broadcast-band reject filter (such as in the ARRL Handbook). Otherwise, the hunt outside is on! (Thanks, Doug K1DG)

==> CONVERSATION

Measuring Up

A couple of days ago my January-February issue of National Contest Journal <http://ncjweb.com/> showed up in the mail - the first issue under the editorship of Kirk K4RO. Kirk's first editorial struck a chord with me as he talked about ham radio and contesters being a good influence on him in his younger days. (No word on whether we're still a good influence!) That got me thinking.

There are a lot of activities we encountered growing up but one aspect of ham radio that I found compelling - and still do - is that everyone has to play not only by man-made rules but by the natural rules of electronics and radio. You can't just bluster your way into the log. Either you make the contact or you don't.

Later in life during my days in product development I often encountered wishful thinking (sometimes my own) that somehow the circuits would just work or the code would just run without doing the dirty work or acquiring the necessary understanding. I'd say it was a safe assumption that was rarely a successful strategy and the same goes for ham radio.

Contests are perhaps the sternest test ham radio has to offer. It is not enough to just talk a good game. When the starting bell sounds, you have to be on the air with enough skill and signal to get through and you have to persevere from beginning to end. The log checking report is an unblinking mirror to our operating in which excuses don't count. You can say the same for emergency communications, too, in that when the day is done either you got the message through or you didn't.

By taking part in radiosport competitions, we can measure ourselves against any number of public standards - the Top Ten, the record tables, the plaque winners - and success counts for a lot because you do it yourself as a single-op or in a team. These are all very good things to learn when you're still trying to sort out how the world

works and the earlier you learn those principles, the better.

Measuring up is why ethics are so important in radiosport. What happens on the air is a matter of public record but it has to be backed up by personal behavior in the shack where nobody is watching - it's easy to be ethical in public. The meritocracy of radiosport is not often mentioned but it is a fundamental element of what makes it popular and stimulating - otherwise why would a Novice reading the contest results want so badly to be part of that community?

If you're looking for a good New Year's resolution, helping to promote and maintain ethics on the air and in the shack would be an excellent use of one's time and energies. By maintaining high standards for "playing well with others" we also keep radio's Good Arrow pointed in the right direction. To the younger members of our communities, there is no better message we can send.

73, Ward N0AX

==> CONTESTS

4 January to 17 January 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL RTTY Roundup--Digital, from Jan 7, 1800Z to Jan 8, 2400Z. Bands (MHz): 3.5-28. Exchange: RST, state/province/serial. Logs due: Feb 7. Rules <http://www.arrl.org/contests>

Kid's Day--Phone, from Jan 8, 1800Z to Jan 8, 2400Z. Bands (MHz): 3.5-28. Exchange: Name, age, location, favorite color. Rules <http://www.arrl.org/kids-day>

North American QSO Party--CW, from Jan 14, 1800Z to Jan 15, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/naqprules.php>

070 PSKFest--Digital, from Jan 7, 0000Z to Jan 7, 2400Z. Bands (MHz): 3.5-28. Exchange: Call sign, RST, S/P/C . Logs due: Jan 21. Rules <http://www.podxs070.com/>

CWops Weekend Mini-CWT Test--CW, from Jan 7, 1300Z - multiple operating periods. Bands (MHz): 1.8-28. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Original QRP Contest--CW, from Jan 7, 1500Z to Jan 8, 1500Z. Bands (MHz): 3.5-14. Exchange: RST, serial, and category. Logs due: Jan 31. Rules <http://www.qrpcc.de/>

DARC 10 Meter Contest--Phone,CW, from Jan 8, 0900Z to Jan 8, 1059Z. Bands (MHz): 28. Exchange: RS(T), serial, DOK code. Logs due: 3 weeks. Rules <http://www.darc.de/referate/dx/contest>

Midwinter QSO Party--Phone,CW, from Jan 8, 1000Z to Jan 8, 1400Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial. Logs due: Feb 15. Rules <http://trafficbureau.veron.nl/>

ARS Spartan Sprint--CW, from Jan 10, 0200Z to Jan 10, 0400Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

CWops Monthly Mini-CWT Test--CW, from Jan 11, 1300Z - multiple operating periods. Bands (MHz): 1.8-28. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

SNS and NS Weekly Sprints--CW, from Jan 13, 0200Z to Jan 13, 0300Z. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

Hunting Lions In the Air--Phone,CW,Digital, from Jan 14, 0000Z to Jan 15, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or name, club name, district. Logs due: Feb 28. Rules <http://lionshuntingintheair.lionwap.org/>

MI QRP Club Jan QRP Contest--CW, from Jan 14, 1200Z to Jan 15, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP number or power. Logs due: Feb 10. Rules <http://www.miqrp.org/>

WW Peace Messenger Cities--Phone,CW, from Jan 14, 1200Z to Jan 15, 1200Z. Bands (MHz): 3.5-28. Exchange: RS(T) and PMC ref number or CQ zone. Logs due: 30 days. Rules <http://www.s59dcd.si/>

EUCW 160 Meter Contest--CW, from Jan 14, 2000Z - multiple operating periods. Bands (MHz): 1.8. Exchange: RST, serial, club name, member nr or "NR". Logs due: Feb 15. Rules <http://www.uft.net/>

VHF+ CONTESTS

MI QRP Club Jan QRP Contest--CW, from Jan 14, 1200Z to Jan 15, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP number or power. Logs due: Feb 10. Rules <http://www.miqrp.org/>

==> LOG DUE DATES

4 January to 17 January 2012

- January 5, 2012 ARS Spartan Sprint <http://adventure-radio.org/wiki/index.php?title=Spartan_Sprint_Rules>
- January 8, 2012 AWA Bruce Kelley Memorial CW Contest <http://www.antiquewireless.org/hamevents2010.htm>
- January 10, 2012 ARRL 10-Meter Contest <http://www.arrl.org/10-meter>
- January 10, 2012 CQC Great Colorado Snowshoe Run <http://www.cqc.org/contests/snow2011.htm>

- January 10, 2012 DARC Christmas Contest

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

9A, CROATIA
The prefix 9A was allocated to Croatia 20 years ago. All private and
clubstations may add the number "20" to their callsign to celebrate
this jubilee from Jan 1 until Dec 31 (e.g. 9A0Z&#65533;200Z, 9A1MM&#65533;20
1MM,
9A2AA&#65533;202AA). There is also a special award "20 years 9A prefix".
Find more information at: http://www.hamradio.hr

CY0, SABLE ISLAND, NA-063
The DXpedition announced in the last DXNL has been postponed due to
weather problems.

DL, GERMANY
The city of Bad Honnef celebretes 150 years of city rights in 2012.
The special event station DL150BH will be QRV in all modes on all bands
from Jan 1 until Dec 31. The special DOK BAHO150 is handed out also by
the clubstation DL0AD. QSLs via bureau.

DU, PHILIPPINES
The Philippine Amateur Radio League (PARL) is celebrating its 50 years
anniversary and will activate the special event station 4G0LD in 2012.
There is a commemorative diploma at least 12 QSOs with PARL members.
See: http://www.dx1l.dxhams.net/events.htm
QSL via bureau.

HK0/M, MALPELO ISLAND, SA-007
The advance team for the upcoming DXpedition is formed by HK1N, HK1T,
HK6F and HK1MW, also called "Fantastic Four". They are setting up
11 stations and 18 antennas in two different camps. Donations welcome.
See also: http://www.hk0na.com

J7, DOMINICA NA-101
Mike,VE2XB, is working holiday style as J79XB from Dominica (NA-101)

on 160m-10m and maybe also on 6m from Jan 5-26. His equipment includes
TS-590s, Elecraft K3/100, Icom IC2-KL and Tokyo High Power HL-550. He
is using a windom for 30m/40m/75m/160m, a 2el Moxon for 40m and maybe
also a Hexbeam for the WARC bands and 6m but his main antenna is a
Mosley TA-33SR WARC on a 12m mast. QSL via VE2XB.
His website is: http://j79xb.jimdo.com

KH0, MARIANA ISLANDS, OC-086
Buchi,JO3FRH (KH0UY), and Masa,JE4SMQ (KH0K), are going to visit
Saipan (OC-086, USi NI002S, WLOTA 1333, Loc QK25uf) from Jan 7-10.
They will be active on 80m-6m and via satellites. QSLs via homecalls.

PJ2, CURACAO, SA-099
Ron,N6EE, and Chet,W6XK, are members of the "NN6NN RTTY Team" and will
sign PJ2N from Signal Point Station (PJ2T) on Curacao (SA-099, LH-0942)
during the ARRL RTTY Round-Up on Jan 7/8.
They are holding the world record since their VP5NN operation in 2003.
The are signing PJ2/N6EE and PJ2/W6XK before and after the contest.
QSLs only direct via NN6NN & LoTW.

PJ4, BONAIRE, SA-006
Peter,PA8A, will be QRV as PJ4B working holiday style from Jan 8-22.
QSL via homecall, unfortunately only direct (no IRCs, only SAE + 2 $).

PJ7, SINT MAARTEN, NA-105
Paolo,PJ7/IK2QPR, will show up also in holiday style from Sint Maarten
(NA-105) from Jan 8-16. QSL via homecall.

VP9, BERMUDA ISLAND, NA-005
Jamie,VP9/WW3S, will be active from Bermuda (NA-005) from Jan 5-10.
He also plans to take part in the ARRL RTTY Round-Up as well.
QSL via homecall, unfortunately only direct and LoTW.

XU, CAMBODIA
Alex,XU7YAB (UA9YAB), and Alex, XU7YPS (UA9YPS), are working from
Cambodia from Jan 3-6. They are also planning a side-trip to AS-133.
QSLs via homecalls, unfortunately only direct, XU7YAB also LoTW.

ANTARCTICA
Mika,OH2FFP, is going to hit the airwaves from several Antarctic bases
between mid January and mid February. He plans to show up on the bands
as OH2FFP/p from the Nordenskiold Multinational Camp,
as OJ1ABOA from the Finnish base "Aboa" and
as SM/OH2FFP from the Shwedish base "Wasa".
QSLs via homecall.

SOUTH PACIFIC TOUR
HA5AO and HA5UK will be on DXpedition again from Jan 8 until Feb 27:
Jan 12-26 T2HA from Tuvalu
Jan 27-30 3D2HA from Fiji
Jan 31-Feb 23 T30HA from Tarawa, Western Kiribati
Feb 2-23 T33HA from Banaba (for 7-10 days)
QSLs via HA5UK - via bureau, OQRS or LoTW.

ARRL DIAMOND DXCC CHALLENGE
The ARRL celebrates the 75th jubilee of the DXCC award by issuing the special "Diamond DXCC Challenge Award" based on the DXCC countries list of 1937 with 231 DXCC entities. QSLs are not needed, the ARRL trusts in your Ham Spirit. See also: http://www.arrl.org/diamond-dxcc

QRT: Craig,A35CT, has returned to the USA. Paul,A35A (A35RK), has shut down his station as well and is going to leave Tonga on Jan 16. If you still need a QSL please request it via LoTW or W7TSQ.

Reorganization:
After four years of cooperation Vertex Standard Co. Ltd. transfers the division Land Mobile Radio (LMR) to Motorola and they return to the old name YAESU MUSEN. See also: http://tinyurl.com/YaesuMusen20111227

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
After the outstanding success of the Contest University (CTU) with more than 1.000 participants the new DX University (DXU) has been launched. More information can be found at: http://www.dxuniversity.com
---
The ARRL website and YouTube have linked a nice video about the fascination of homebrewing: http://www.youtube.com/user/ARRLHQ and http://www.arrl.org/diy
---
All 511 editions of the discontinued magazine "73" can be found online: http://www.archive.org/details/73-magazine
---
The Commonwealth Century Club issues the CCC Jubilee Award to celebrate the Diamond jubilee of Queen Elizabeth II. QSLs are not needed.
See also: http://www.beru.org.uk/CCCaward/CCCindex.html

The regulations for guest licences in South Korea improved very much in the lastest time. For more information check: http://www.karl.or.kr
---
The Finnish newsletter PileUP! (mainly in English) can be downloaded at http://www.helsinki.fi/~korpela/PU/PU.html

UPCOMING CONTESTS

Jan 7/8 Original-QRP-Contest
Jan 7/8 ARRL RTTY Round-Up
Jan 7/8 EUCW 160m Contest
Jan 8 DARC 10m Contest
Jan 8 VERON Midwinter QSO-Party

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:

NA-168, W5, Louisiana State South East group: The "Baton Rouge Amateur
Radio club" and the "Red Stick DX Association" intend to activate
Grand Island (USi LA003S) from Jan 6-8. The OPs W5XU, N5IB, K5DF,
K5DFD, W5AJD and AD5VC will use the call W5GIX in SSB, CW and PSK-31
on 80m-10m and maybe also on 6m. QSL via W5GIX (bureau/direct).

NA-240 (NEW IOTA), KL7, Bethel County group: Members of the Russian Robinson
Club (RRC) are assisted by the Bethel Amateur Radio Club (BARK) when
activating the last new IOTA group of Alaska. Depending on the weather
and transportation they plan to show up as KL7RRC/p from Jan 5-8. They
are also supporting the begin of the RSGB IOTA Marathon with this
winter time activity. The team includes Yuri,N3QQ, and Tim,NL8F.
More details are available on their homepage: http://www.na-234.com
QSLs for Europe and Russia via UA9OBA, all others via N7RO.

OC-136, VK3, Victoria State Centre group: Peter,VK3ZPF, Matt,VK2ADF, and
Kevin,VK3KAB, are members of the "Scout Association of Australia VIC"
(VK3SAA) and will sign VK3SAT 80m/40m/20m/15m/10m from French Islands
on Jan 7/8. They will use wire antennas for the single bands. A more
detailed plan with frequencies and times is listed at the website of
VK3SAT at QRZ.com. QSL via VK3SAA (bureau/direct).

SA-078, HK1, Cordoba/Sucre Division group: Eduardo,HK6PRO/1, will show up
from Palma Island (WLOTA 0874) from Jan 8&#65533;12. QSL via EA5KB.

Lighthouse activities

GX4BJC/A LH 1841 Jan 1&#65533;31
KH0K LH 1333 Jan 7&#65533;10

==> + BPL PROVIDER IBEC ANNOUNCES SHUTDOWN

IBEC -- one of the very few remaining operators of Access BPL
systems -- has announced that it is closing down. In an undated
announcement that appeared on the IBEC website, the company announced
that it has "no other option than to close our doors and cease
```

operations." IBEC claims that it cannot recover financially from the April 2011 tornadoes in Alabama that "ravished [sic] some of our major service areas." IBEC provided Internet service via broadband over power lines (BPL) to rural communities.

<http://www.arrl.org/images/view/News/IBEC_Letter_to_Customers.jpg>
"While we regret the loss of jobs brought about by IBEC's BPL business failure, in the long run the rural areas that IBEC was trying to serve will be better served by broadband technologies that are superior to BPL and do not pollute the radio spectrum," said ARRL Chief Executive Officer David Sumner, K1ZZ. "While initially IBEC was cooperative in addressing the ARRL's concerns about interference to licensed radio services -- including Amateur Radio -- the ARRL was dismayed to find that the systems as actually deployed fell short of meeting even the inadequate requirements of the FCC's rules. We hope that this latest in the long string of Access BPL failures will persuade the few remaining fans of BPL to turn their attention elsewhere." Read more here <http://www.arrl.org/news/bpl-provider-ibec-announces-shutdown>.

==> + ON THE AIR: ARRL ANNOUNCES DIAMOND DXCC CHALLENGE

2012 is the 75th anniversary of the ARRL's DXCC Award, the world's preeminent DXing award. To celebrate this important milestone, the ARRL has gone back to the beginning -- the 1937 DXCC List.The Diamond DXCC Challenge will test DXers ability to contact all the 231 entities on the original DXCC List.

We tried to find corresponding entities today that would represent the places listed in 1937, and we were mostly successful. There are a couple of places that were merged, like French and British New Hebrides, and the Papua and New Guinea Territories. In those places, for 2012 if you work a YJ or a P29 (on the main island of New Guinea) you will get credit for working two entities! Many other oddities are sprinkled throughout the list, too. Returning to the air in 2012 will be the Canal Zone (any HP operating within 8 kilometers of the Panama Canal), the Cities of Gdansk, Poland, as well as Ifni, Morocco and Balochistan.

For some entities that now consist of multiple countries, you may work any of today's entities to qualify for that single 1937 country. For example, French Equatorial Africa will be considered worked if you log a station in TL, TN, TR or TT in 2012. The Diamond DXCC country tables show the current entity names and prefixes that qualify for the 1937 countries. Read more here <http://www.arrl.org/news/arrl-diamond-dxcc-challenge>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 RE-ENTERS EARTH'S ATMOSPHERE, FALLS SILENT

According to AMSAT <http://www.amsat.org/amsat-new/index.php>, ARISSat-1 stopped transmitting <http://www.arissat1.org/v3/> on the morning of January 4. It is believed that the satellite re-entered the

Earth's atmosphere around 0700 UTC (+/- three hours) and was destroyed soon after. Telemetry reports showed that the temperature aboard ARISSat-1 had been rising as the atmospheric drag began to affect the satellite The predicted decay location is an open part of the South Atlantic, well west of Angola.

The last telemetry reports indicated that the internal temperature had topped 167 degrees Fahrenheit and was rising rapidly. Konstantin Vladimirovich, RN3ZF, sent a reception report of a pass at 0842 UTC and stated, "The telemetry was absent, voice messages were not legible, very silent and interrupted. Most likely, I saw the last minutes in the life of the satellite." The last full telemetry captured was received from ground stations as the satellite passed over Japan at 0602 UTC on January 4.

ARISSat-1 was deployed <http://www.arrl.org/news/arissat-1-finally-deployed-from-iss> from the International Space Station on August 3, 2011 during EVA-29 on by Cosmonaut/Flight Engineers Sergei Volkov, RU3DIS, and Alexander Samokutyaev. The satellite carried a student experiment from Kursk State University in Russia that measured atmospheric density. Students from around the world provided the voices for the FM voice announcements.

AMSAT President Barry Baines, WD4ASW, said that ARISSat-1 marked a new type of satellite that captured the attention of the national space agencies around the world. "With ARISSat-1, we have we have been able to design, launch, and operate a unique educational opportunity," he explained. "By designing an educational mission aligned with NASA's Science, Technology, Engineering and Mathematics goals, radio amateurs around the world have been able enjoy a new satellite in orbit."

ARISSat-1 achieved several "firsts" for Amateur Radio in space, including the first flight test of the AMSAT Software Defined Transponder, which included an FM voice downlink cycling between student messages, spoken telemetry and SSTV; a 16 kHz bandwidth linear transponder; a CW beacon carrying telemetry and call signs of radio amateurs (noting their significant contributions to Amateur Radio in space) and a robust, forward-error-corrected 1kbps BPSK digital downlink carrying satellite telemetry and Kursk experiment telemetry.

==> + HAM RADIO IN HOLLYWOOD: AMATEUR RADIO MAKES ITS DEBUT ON LAST MAN STANDING

If you watched the January 3 episode of Last Man Standing -- the ABC hit situation comedy starring Tim Allen as Mike Baxter, KA0XTT -- you were in for a treat. While this episode didn't feature Amateur Radio per se, it did show Mike's shack in the background. Viewers could see the DXCC, Worked All States, Worked All Continents and the Morse Code Proficiency Certificate -- all provided by the ARRL -- in the first scene. Later on in the show, Mike records his video blog. Sharp-eyed viewers spotted the 2011 ARRL Handbook underneath the mini-tripod, next

to issues of QST!

The episode airing on January 17 will introduce Mike Baxter as KA0XTT. According to Last Man Standing Producer John Amodeo, NN6JA, Mike will have a QSO on the show. "We had two Amateur Extra class staff members complete a QSO on 10 meters and we recorded it," Amodeo explained. " Unfortunately, we were set up on a stage that is basically a Faraday cage. The very QRP signal made it radio-to-radio. We varied the RIT [receiver incremental tuning] to give it a little extra SSB sound, but I don't think the signal made it much past the stage walls. The recording will be on the show. We thought our ham viewers would get a kick out of it. Non-hams will think it's just distorted." Read more here <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-amateur-radio-makes-its-debut-on-em-last-man-standing-em>.

==> ON THE AIR: ROUND UP THOSE DIGITAL QSOS IN THE 2012 ARRL RTTY ROUNDUP

We're in the heart of the 2011-2012 contest season and this weekend offers the first major event of 2012: The ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, participation in the digital modes has been growing at an amazing rate. "It's not difficult to get on the digital modes," he explained. "All it takes these days is a computer, a piece of free software and an interface to connect your computer to your rig. It's never been easier!"

Because of that ease, log submissions for the RTTY Roundup have increased about 33 percent since 2007, with 1539 logs received in 2011. "There are plenty of stations to work, including lots of DX," Kutzko said. "Many stations have achieved RTTY DXCC <http://www.arrl.org/dxcc> and RTTY WAS <http://www.arrl.org/was> in a weekend. You can work toward other awards as well, such as the ARRL Triple Play Award <http://www.arrl.org/triple-play>, earned for working all 50 states on CW, SSB and digital modes (including RTTY) and confirming all of those QSOs via Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>). Do you think you have what it takes to set a new record score for your ARRL Division or Section? Check the record scores <http://www.arrl.org/contest-records> for the RTTY Roundup and see if you can beat the best!

The 2012 ARRL RTTY Roundup runs from 1800 UTC Saturday, January 7 through 2359 UTC Sunday, January 8. Logs may be submitted electronically via e-mail <rttyru@arrl.org>. Paper logs should be sent to ARRL RTTY Roundup, 225 Main St, Newington, CT 06111. All logs must be postmarked no later than 2359 UTC Tuesday, February 7, 2012.

==> DIY: ARRL LAUNCHES NEW DIY CAMPAIGN

The ARRL Public Relations Department has released the Do-It-Yourself (DIY) suite of interrelated promotional materials aimed at exposing the

growing Do It Yourself/Maker community to Amateur Radio opportunities. The DIY movement is nothing new to Amateur Radio. For more than a century, hams have been working in basements and attics, taking things apart and putting them back together in new ways, just for the fun of it. Meanwhile, there has been a growing population of DIY hobbyists who do not know about the opportunities of Amateur Radio.

To reach this growing group, the ARRL Public Relations Department has created an entirely new set of campaign materials for ARRL Public Information Officers, groups and individual hams to use in reaching out to the DIY/Maker community. Bill Pasternak, WA6ITF, and Dave Bell, W6AQ, were recruited to create the new video. Recruiting volunteers throughout 2011, the duo shot more than 65 hours of high-definition video, and then edited it down to a mere 8 minutes. Titled The DIY Magic of Amateur Radio, it shows ham-makers projects from around the country. Read more here <http://www.arrl.org/news/arrl-launches-new-diy-campaign>.

==> + YAESU'S AMATEUR RADIO DIVISION BREAKS WITH MOTOROLA, CHANGES NAME TO YAESU MUSEN

After four years under the Motorola umbrella, Yaesu has split from that company. According to Vertex Standard President and Chief Executive Officer Jun Hasegawa, effective January1, 2012, Motorola will keep the Vertex Standard Land-Mobile Division, while the amateur, marine and air-band will be under the Yaesu Musen banner. The new company will be known as Yaesu USA in the US. Read more here <http://www.arrl.org/news/yaesu-s-amateur-radio-division-breaks-with-motorola-changes-name-to-yaesu-musen>.

==> + ON THE AIR: ARRL 10 METER CONTEST SETS RECORD

As of January 5, almost 5200 logs have been received for the ARRL 10 Meter Contest <http://www.arrl.org/10-meter>. Contest Manager Sean Kutzko, KX9X, is happy to have sunspots back: "This just goes to show what sunspots can do for activity. When the solar flux climbed to 190 in September, it was like the first warm day after a long winter; people came out to play -- and play they did, in unprecedented numbers! Activity during this contest season has been nothing short of tremendous, and it seems to have reached a zenith for the ARRL 10 Meter Contest. Old Timers and new licensees from all around the world got on the air and had one heck of a good time on 28 MHz the second weekend in December, shattering the participation record by more than 2300 logs. And we still have a week to go before the log submission deadline!"

==> + DXCC NEWS: 2011 SEES TREMENDOUS INCREASE IN DXCC APPLICATIONS

With the coming of more sunspots, comes more DX. And when more amateurs are working DX, that means the ARRL's Membership and Volunteer Programs Department -- especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear.

"In 2011, we saw an increase in the number of cards we received from ARRL members that were sent to foreign QSL bureaus, as well as the number of cards we sent out to the bureaus," said DXCC Manager Bill Moore, NC1L. "In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased."

As the number of QSL cards has increased, so have the number of DXCC applications. In 2010, the DXCC Desk processed 7134 applications for initial awards and endorsements; these 2010 applications included 853,462 QSOs. In 2011, the DXCC Desk processed 11,175 applications, containing 1,250,864 QSOs. "Comparing 2010 to 2011, this represents a 47 percent increase in the number of QSOs and a 57 percent increase in the number of applications," MVP Administrative Manager Sharon Taratula explained. "With all of the year's applications not yet fully processed, we've seen a substantial increase in the number of QSOs over 2010."

"Through December 31, 2011, the ARRL Outgoing QSL Bureau received 802,500 cards destined for foreign QSL bureaus from ARRL members in the US," Taratula said. "This represents an increase of 4 percent over the 2010 number of about 771,900 cards. In 2011, the ARRL shipped 799,675 cards -- or close to 5400 pounds of cards -- to foreign bureaus." Read more here <http://www.arrl.org/news/2011-sees-tremendous-increase-in-dxcc-applications>.

==> + ON THE AIR: ARRL REQUESTS FEEDBACK FOR 60 METER BAND PLAN

In November 2011, the FCC released a Report & Order detailing new rules for the 5 MHz (60 meters) Amateur Radio band. These rules have not yet been published in the Federal Register. In order to be official, the rules must be published in the Federal Register and will take effect 30 days after the publication date. The R&O brings with it a number of changes for 60 meter operators. Considering the expected increase in 60 meter activity when the R&O finally takes effect, the ARRL is asking for feedback to assist in crafting a proposed band plan. Read more here <http://www.arrl.org/news/arrl-requests-feedback-for-60-meter-band-plan>.

==> HAM RADIO IN HOLLYWOOD: AMATEUR RADIO A PLOT POINT IN MAJOR MOTION PICTURE

According to previews, the plot of the movie Journey 2: The Mysterious Island -- set to be released February 10 -- hinges on Amateur Radio. The movie's hero Sean Anderson (played by Josh Hutcherson) receives a coded distress signal that comes from a mysterious island where no island should exist. Sean decides to follow the signal with the unwilling assistance from his stepfather Hank (played by Dwayne "The Rock" Johnson).

Sean explains to Hank why he wants to hunt down the signal: "A few nights ago, a radio signal got sent out from these coordinates. It could be the mysterious island that Jules Verne wrote about." Hank replies: "You think you're gonna travel halfway around the world and

meet up with some lunatic who's messing around on a ham radio?" "That's not some lunatic," Sean says. "That's my grandfather." Read more here <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-amateur-radio-a-plot-point-in-major-motion-picture>.

==> HAM RADIO IN HOLLYWOOD: CAN I HAVE "AMATEUR RADIO" FOR $800, ALEX?

If you were watching the popular television game show Jeopardy! <http://www.jeopardy.com/> -- where contestants have to answer in the form of a question -- on December 15 <http://www.j-archive.com/showgame.php?game_id=3783>, you might have noticed there was a question featuring Amateur Radio. In the first round, returning champ Boomie Aglietti was playing the category "Pastimes" when he encountered this "answer" worth $800: "The FCC assigns call signs, like N8DNR, to use in this hobby." Aglietti answered correctly with "ham radio."

N8DNR is the call sign of Debbie Dorfman of West Bloomfield, Michigan. Debbie is the mother of Stephen Dorfman, N6DIW (SK) <http://www.vanityhq.com/bin/chistSO.php4?call=N6DIW&type=single>. Stephen was a writer for Jeopardy! from 1984 until he passed away in 2004 at age 48 due to complications from cancer. According to the New York Times <http://www.nytimes.com/2004/01/09/arts/television/09DORF.html>, Dorfman was Jeopardy!'s longest serving and most prolific writer, with more than 50,000 clues to his credit. As part of a team of writers, he won six Daytime Emmy Awards for special-class writing, given for shows that do not fit into traditional categories. On the Jeopardy! episode that aired January 3, 2008 <http://www.j-archive.com/showgame.php?game_id=2269>, another Dorfman call sign was featured -- this one of Stephen's father Neil -- also for $800, in the category "If You're...": "...using a call sign like K8RX, you're engaged in this hobby."

==> SOLAR UPDATE

Tad "We all live for the Sun <http://www.youtube.com/watch?v=Yus7IvioR_A>" Cook, K7RA, reports: We're continuing to see good conditions, although sunspot activity has declined a bit. The average daily sunspot numbers for December 29-January 4 declined nearly 20 points (when compared to the previous seven days) to 88.1; this is the lowest reported weekly sunspot number average since September 2011 <http://www.arrl.org/news/the-k7ra-solar-update-180>. The average daily solar flux was off 6.4 points to 143.1. Another problem seems to have cropped up with NOAA reporting of data that we use in this bulletin. Last month, the sunspot numbers had to be corrected. Now it appears that some of the geophysical data does not check out. Check the planetary A index for the last few weeks of December 2011 here <http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt> and check the same dates here <http://www.swpc.noaa.gov/ftpdir/indices/old_indices/2011_DGD.txt>.

They should match, but they don't (unless the problem has been corrected by the time you read this). But the numbers for all of 2011 match what we have reported in the bulletin, and I suspect it is the correct version. The near term outlook is for solar flux at 140 on January 5-6, 135 on January 7-8, 130 on January 9-11, 125 and 135 on January 12-13, and then back to 140 on January 14-21. The next short term peak is expected at 150 on January 24-26. The expected planetary A index for January 5-9 is 5, 8, 15, 10 and 8, then back down to 5 on January 10-27. That predicted A index of 15 on January 7 -- if accurate -- will be the highest since October 25, when it was 27, and 31 the day before. That activity was sparked by a coronal mass ejection that affected earth around 1800 UTC on October 24. Look for more information on the ARRL website on Friday, January 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Sunrays' I Live for the Sun <http://en.wikipedia.org/wiki/I_Live_for_the_Sun>.

==> ARRL CONGRATULATES: ASHRAF ABUELHAIJA AND KLAUS SOLBACH, DK3BA, WIN DECEMBER QST COVER PLAQUE AWARD

The winners of the QST Cover Plaque Award for December are Ashraf Abuelhaija and Klaus Solbach, DK3BA, for their article "An Inverted V Wire Yagi with Switchable Pattern Rotation for 14 MHz." Congratulations Ashraf and Klaus! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the January issue today.

==> DAYTON HAMVENTION: NOMINATION DEADLINE FOR DAYTON HAMVENTION AWARDS APPROACHING

It's not too late to nominate individuals and clubs for the 2012 Dayton Hamvention® awards. The deadline to make your nominations for the Amateur of the Year Award, Special Achievement Award, Technical Excellence Award, and the Amateur Radio Club of the Year Award is Sunday, January 15. The winners will be recognized at the 2012 Dayton Hamvention, May 18-20. Read more here <http://www.arrl.org/news/nomination-deadline-for-dayton-hamvention-awards-approaching>.

==> THIS WEEK IN RADIOSPORT

This week:

- January 6 -- NCCC Sprint Ladder
- January 7 -- PODXS 070 Club PSKFest; QRP ARCI Pet Rock Celebration
- January 7-8 -- ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>; CWops Mini-CWT Test; Original QRP Contest; EUCW 160 Meter Contest
- January 8 -- ARRL Kids Day <http://www.arrl.org/kids-day>; SKCC

Weekend Sprint; DARC 10 Meter Contest; Midwinter Contest
- January 11-12 -- CWops Mini-CWT Test

Next week:

- January 13 -- NCCC Sprint Ladder
- January 14-15 -- North American QSO Party (CW); WW PMC Contest;
Michigan QRP January CW Contest
- January 16 -- Run for the Bacon QRP Contest
- January 19 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8 -- ARRL New York/Long Island Section Convention
<http://www.arrl.org/hamfests/new-york-long-island-section-convention-ham-rad
io-university-2012>,
Bethpage, New York
- January 27-28 -- ARRL Mississippi State Convention
<http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfe
st-1>,
Jackson, Mississippi
- February 4 -- ARRL Virginia State Convention

WIANEWS WEEK COMMENCING JANUARY 08 2012.

ARISSat-1 DOWN

REBUILD OF HS0AC

ARRL KIDS DAY TODAY JANUARY 8

Dot-dash-diss: The gentleman hacker OF 1903

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JANUARY 8 2012.

Allan VK2CA has let it be known VK Classifieds has a new look to welcome in
2012!

It's still FREE and is compatible with all the latest browsers but has many
new features.

One of the new features is that you can now add up to 5 pictures to each
advert. Even video and audio files can be used!

This service is free to all but adverts to purchase amateur transmitting
equipment are only permitted by licensed amateurs.

Check it out at http://www.vkclassifieds.com.au

Thailand's famed HS0AC submerged

The slow restoration continues of the Radio Amateur Society of Thailand (RAST) HS0AC Club station that was destroyed by recent flooding.

Thailand's worst floods in half a century have killed 610 people, destroyed millions of tonnes of crops and badly damaged industrial production.

Almost five months have passed since the flooding began in the northern hills and then spread slowly to inundate parts of Bangkok.

At the height of the flooding radio amateurs had roles that included helping to co-ordinate relief and rescue work.

The devastation to HS0AC left after the flood hit the Asian Technical Institute, home of the HS0AC club station, all the transceivers and equipment were submerged.

RAST intends to request a regulations waiver to allow importation of new HF equipment following the natural disaster, given the loss of HS0AC equipment.

We will have more on Thailand's floods in this bulletin from Jason VK2LAW and also Amateur Radio Newsline's Don Carlson, KQ6FM,

(Jim Linton VK3PC)

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Police Roundup http://www.vicpolicenews.com.au/

If you only attend one radio event in 2012, then it must be the Centre Victoria RadioFest No. 5 at the Kyneton Racecourse on Sunday the 12th of February, just an hour from Melbourne, Ballarat and Bendigo.

The biggest of its type in Victoria and the only one that has been supported by all the major commercial traders since it began in 2007.

The Centre Victoria RadioFest also offers three different ways people can sell second-hand radio equipment and accessories, non-commercial lots, bits and pieces

The traditional table sales continue to be popular. The other options are car-boot sales or trailer and van loads. It's your choice!

Add to this interesting program including the mini-lecture series and this is truly a major event and great social occasion for anyone with an interest in radio.

The Centre Victoria RadioFest, Kyneton Racecourse on Sunday 12 February.

Points are contact are:
Commercial Traders Liaison, Barry Robinson VK3PV 0428 516 001
Second hand tables are space, Ross Pittard VK3CE 0408 533 107
Club Corner Precinct, Tony Hambling VK3VTH 0423 635 152

(Bruce Lees VK3FFF)

VK4 QNEWS

VK4 SILENT KEYS @ 2011 - 2012 QAC YEAR

Sad news in that Jean Bowden VK4MUJ has gone Silent Key
after a prolonged battle with illness.
Jean passed away on Monday 2nd January 2012 in Brisbane aged 83.
Jean and husband Tom/VK4MWT (SK) were members of The Townsville
Amateur Radio Club during their time in the North and also for
a while when they moved to Strathpine in Brisbane in February 1999.

Welcome to QNews from VK4WIA. I'm Geoff Emery and I've been thinking.

Where I live is the proverbial fly speck on the map. It is a small region between two regional cities. Of course I have access to the highway and the railway does pass in hearing distance. Because the copper telephone lines have been neglected for so long, I have access to satellite internet service.
The 3G networks all provide good signal strength, now.

Recently I have been called to visit the Big Smoke, Brisbane, a little more than I would like. However, in planning appointments it is very hard to convince people that we have a journey of 50Km to get to public transport and then there are only 2 rail services per day in each direction. Aerodromes are 100 to 150Kms away.

Likewise, the use of the internet for streaming audio and video has attracted more and more broadcasters. The technology is great but effective access is less so, out in the boonies. What I pay for satellite access is about 8 times as expensive as advertised ADSL "unlimited" plans.
Wireless via 3G is more expensive still.

What I am driving at is that many of our country colleagues face a more difficult time, certainly more inconvenient and expensive, accessing services which city people take for granted. When we know that many country amateurs volunteer their time and facilities in supporting the hobby, the rest of us owe them a big "thank you".

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING

Submitting news items

If you would like to submit news items for inclusion in the
QNEWS broadcasts, please email your item in text to qnews@wia.org.au

Submit audio, read "how to submit items" on the weekly WIA news page.
http://www.wia.org.au/members/broadcast/upload/

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of QNEWS.

Bunya Mts & District AmCom
Hi to all, I'm Neil VK4NF representing the Bunya Mts & District Amcom Inc.

We have a date claimer, Saturday the 4th February 2012

We are again holding our Ham & wine Hamfest in the Maclagan hall in
down town Maclagan from 0900 to 1400hrs. So we invite you to come to a
Hamfest towards the west and join in the fun.

Table bookings are just $10 each and stall holders will be allowed in after
0700hrs to set up.

For more info, or to receive a flyer with the details, please send an Email
to myself, holmzie@bigpond.com or Ricky, vk4nrl@wia.org.au

Be there or be square we would love to see you there.

The proceeds from the day will be put towards promoting Amateur radio, IRLP,
APRS, etc., and recruiting new amateurs to the great hobby.

So put the date in your diaries, Saturday the 4th February doors open at
0900hrs.
Remember it is towards the west, and not way out west, being about a
50 minute drive north west of Toowoomba.

Regards to all and as Graham would say, walk softly.

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
Web - www.vk4wip.com
Email - vk4wip@wia.org.au
Main 2 meter repeater - 146.900, linked to 438.375 and 439.300

Now a roundup of news from the Ipswich and District Radio Club.

In 2012 the club celebrates half a century, having been established in 1962
to foster the aims and ideals of amateur radio in the local community.

Throughout the year we will bring you a number of highlights from those
50 years. It's been an amazing period for technology development, and
through it all the hobby of amateur radio and the club has remained strong.

If anyone is considering sitting for the entry level Foundation Licence, the club conducts regular courses and exams. Please contact the club to express your interest.

The club meets twice a month at 7.30pm on the second and fourth Mondays, with the second Monday a social meeting and the fourth being the business meeting. The first social meeting for the year is tomorrow night, Mon 9 at the clubhouse.

The main Ipswich 2 meter repeater has been upgraded with the output power increased to 100 watts.

Additional enhancements to 146.900 now include automated relaying of the weekly WIA and QNEWS from VK4RGC Gold Coast every Sunday morning at 9am local time.
Special thanks to Rob VK4HW and Andrew VK4JV for their work on the upgrade.

Don't forget you can also keep up to date on news and events at the club website vk4wip.com

Reporting from Ipswich, this is Allan VK4FABR.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

A very happy and exciting New Year to all, from the members of the Redcliffe Club

Since last December, club members have been busy especially on 10, 6 and 2 metres in the last week or so with a 2 metre path to Adelaide open just recently.

Last December Darren, VK4DJH, James, VK4TJF, David, VK4PDR and Scotty, VK4NUT, participated in the ARRL 10 metre contest. The guys set up a portable station at historic Watts Bridge airfield, near Toogoolawah, using a trailer mounted tower provided by Kev, VK4UH and the club's 4 element wide spaced 10 metre beam made by John, VK4YJV and designed by Andy, VK4KY.

There were 381 contacts made with some 55 states and provinces of the US and Canada worked, and a total of 44 different DX countries. The team collected over 100,000 points for the contest. One of the contacts made by Darren, VK4DJH, was a QRP contact to Italy, using 5 watts and you can see and hear the contact on YouTube at 1900DAZZA. Darren was using a Yaesu 817 to make the contact.

Just after Christmas about 20 club members participated in a fund raising activity at the local Bunning's store. Just over $900 was raised with their organising efforts of John, VK4YJB and Charlie, VK4YZ.

The club has been advised that it scored 3 rd. place in the national VHF/UHF field day. Kev, VK4UH, John, VK4YJB, David, VK4DC and Phil, VK4IIA set up a portable site at the Camp Mountain lookout. Well done to all involved.

Roger, VL4ZLQ, advises that classes for Foundation, Standard and Advanced licences will commence in early March and the Advanced licence course will run until September. Roger can be contacted if you are interested in any of the courses via the club's web site, www.redclifferadioclub.org.au/.

The next technical talk will be on 16 Jan 2012 and will be by Steve, VK4CZ, and will cover the topic of 6 metre DX.

Two of our favourite visitors, Anita and Lauren, VK4FLMC visited the club last Monday night and all being well Lauren will be returning to Brisbane to undertake further study in 2012.

Well this is about all at the moment and so it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

VK7
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com
http://groups.yahoo.com/group/vk7regionalnews/

Airservices Australia Accreditation.

In yet another sign of the times in which we now live, Airservices Australia has asked that N.T.A.R.C. personnel accessing the Mt Barrow site now undertake formal induction training.

This is a two-step process.

First the individual needs to be formally nominated by NTARC. Once that is achieved, the individual needs to undertake the on-line Airservices training course and then successfully complete an on-line examination. At that point, a temporary certificate will be issued, with the definitive certificate to follow within 30 days.

The better news is that the certification process is not all that arduous. NTARC has successfully nominated three members in the initial round and two of those have sat the test promptly qualified.

DISCUSSION POINT

What use is an f-call?

Recently I was talking to a non-amateur about Amateur Radio.
You know the kind of conversation, sitting around a coffee-table, talking about life, hobbies, etc.

I mentioned that I was getting out and about meeting people in Amateur Radio, participating in events, learning and generally having a great time. The person I was talking to immediately responded with: "That's all too technical for me, I could never do that."

And thus began a conversation that went for an hour or so on how radio works, what wave-length and frequency were, how sound is transmitted, how an antenna works, how you get a license, how much it costs and many of the mechanics related to our hobby.

At no point did we talk about Ohms, or impedance or electronics as such, it was more along the lines of throwing a pebble into a lake, but at the end of the discussion there was a great deal of demystification that had taken place.

It has taken a little while for me to realise, but the demystification is what hooked me in the first place. My introduction to Amateur Radio was sitting at a dinner table with a bunch of computer geeks one of whom was, and still is, an Amateur.

I'll protect her identity - she knows who she is - Hi Hi - but the introduction to the hobby was sideways, in that we started with Wi-Fi to control a quad-copter and the potential for using an Amateur Radio license to increase power and control this device from further away.

The quad-copter Wi-Fi project is still in the back of my mind - and I must stress that I've not investigated in any way, bands, power, etc.

My point is that I came across a hobby while I was looking elsewhere.

I know that some feel that our hobby is in decline, that the average age of Amateurs is increasing, but I'd like to point out that we as a society are getting more and more technology in our lives, more and more exposure to ideas and inventions that have a basis in Amateur Radio, more and more accessible to more and more people.

Our hobby isn't in decline.

It's easy to talk to other Amateurs, it's hard work talking to the rest of the world. Navel gazing is less work than standing up and looking around. I'd encourage you to consider other groups you're a member of, be it sailing, caravanning, computers, golf or fishing. People are social beings. They want to talk about things that are new and exciting, interesting, captivating. Share your experiences around, be as enthusiastic as you are in your shack, share the twinkle in your eye.

You might be surprised.

I'm Onno - vk6flab

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

First Foundation course for 2012 conducted by ARNSW

ARNSW will conduct six [6] Foundation courses this year on Sunday of the odd months.

The first will be on January the 22 nd.

Others will be March 18; May 20; July 22; September 23 and November 18.

Assessments will be the following Sundays.

Location VK2WI at 63 Quarry Rd. Dural, Sydney. Contact by email education@arnsw.org.au

or

telephone 0400 445 829.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

ARRL KIDS DAY TODAY JANUARY 8

The first of two Kids Day operating events for 2012 takes place today Sunday January 8.

Kids Day is a twice yearly on-the-air happening to encourage young people, licensed or not, to learn about our wonderful world of amateur radio and the fun it has to offer.

Kids Day is not a contest. Rather, it is a way to tell young people worldwide about the magic and mystery of two way hobby radio communications. To accomplish this, amateur radio stations are being asked to devote this short time window to promote both terrestrial and satellite operations to youngsters by providing a place to make contacts with other Kids Day stations around the world.

More information about Kids Day is on-line at www.arrl.org/kids-day

The Netherlands on 4m this year.

OZ 2 M reports that all radio amateurs in The Netherlands have access to the 4 metre band as of One January.

The frequency allocation is 70 to 70.5 MHz with a maximum power of 50W.

Cross band and duplex contacts are not permitted.

Glenn Johnson, W0GJ, NCDXF Vice President, reports: and I quote

"Today, the Northern California DX Foundation announced a 'Christmas gift' of 500 US Dollars to help rebuild and re-equip the Radio Amateur Society of Thailand's (RAST) HS 0 AC Club station that was destroyed by recent flooding.

RAST is part of the Asian Technical Institute. The HS 0 AC club station is located within the Institute precinct.

For the past 40 years, NCDXF had not only been funding major DXpeditions, but is also committed to education and scholarships."

==========

NEWS FROM ARNEWSLINE USA

DONATIONS AND COORDINATION ASSISTANCE NEEDED TO HELP REBUILD RAST STATION DEVASTATED BY FLOODING

Ham radio groups from around the world are being asked to assist the Radio Amateur Society of Thailand which is seeking help to rebuild its headquarters station, HS0AC. This following massive flooding that recently hit that nation

not long ago. Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

According to Dick Flanagan, K7VC, in Minden, Nevada, there have already several offers of equipment to the Radio Amateur Society of Thailand from members of the Northern California Contest Club. Also Rusty Epps, W6OAT, reports that the Yasme Foundation sent the Radio Amateur Society of Thailand a $2,000 donation to assist in the HS0AC rebuilding effort. But that will be only the beginning of what's required to bring the station back on the air.

Flanagan says that what is probably needed most right now is someone or some organization to coordinate the assistance effort, solicit the offers and manage the shipping and paperwork. He speculates that perhaps that administrative role could be taken on as a cooperative effort between the Northern California Contest Club, the Northern California DX Club, the International DX Association and perhaps the ARRL.

K7VC notes that this would be a wonderful way for individuals and clubs to express their holiday feelings of generosity to our fellow hams in need, He adds that we can use this opportunity to demonstrate to our Thai ham radio brothers and sisters what a coordinated effort can do to help them rebuild their wonderful station. Those with suggestions can contact Dick Flanagan by e-mail to dick@k7vc.com

AUSTRALIA SAYS OK ON CODEC 2 INTERNATIONAL COOPERATION

An emerging technical development is safe down-under. This with word from David Rowe, VK5DGR, that he has received confirmation that the amateur radio Codec 2 project is not controlled under the Australia's Defence Strategic Goods List.

For those of you not aware, Codec 2 is an open source low bit rate speech codec designed for communications quality audio at 2400 bits per second and below.

Applications include low bandwidth HF and VHF digital radio and VoIP trunking.

Concerns had been raised that Codec 2 might be subject to Australian government restrictions. As reported in the past, some countries impose severe limitations on certain aspects of amateur radio international cooperation in the area of technical experimentation. A good example is that of the amateur radio satellite community which has been negatively affected by United States Federal Government International Traffic in Arms Regulations. These threaten radio amateurs with heavy fines or even jail sentences if they collaborate with other radio hams in the rest of the world on certain aspects of ham radio satellite projects. It was feared Codec 2 might also be affected.

Now however, Rowe says he has received an e-mail from the Australian agency that deals with export control. It says that the specifications of CODEC 2 have been assessed as not controlled under the that nations Defence Strategic Goods List. Also that a Control Status Advice stating this will be released shortly.

While this clears the way for Australian cooperation on the CODEC 2 project it also begs the question of what other nations might decide to place CODEC 2 under its strategically prohibited information exchange list. Ultimately, the amateur

radio community in every nation involved in CODEC 2 and other technical development projects may have to sort this out on a case by case basis.

More about CODEC 2 is on line at codec2.org

(Southgate, others)

HAMS IN LEGANES SPAIN TURN TO FACEBOOK TO SAVE ANTENNAS

Hams in the city of Leganes, Spain are taking to Facebook in an attempt to try to retain the right to install and maintain their antennas.

Leganes is located about 11 km southwest of Spain's capital of Madrid. It's also where the city council has practically banned local radio amateurs from installing or retaining antenna systems. To bring this situation to the attention of the worlds of amateur radio outside Leganes, hams there have created a Facebook page at tinyurl.com/save-leganes-antennas

The page is in Spanish but they ask that hams worldwide who have a Facebook account to go to it and click the "Like" button. The ham radio community of Leganes, Spain, hopes that a large turnout of support will help convince the town council to reverse its highly restrictive rulings.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Philippine Amateur Radio League 50th anniversary special event

Look for special event station 4G0LD to be active during 2012.

Activity is to celebrate the 50th anniversary of the Philippine Amateur Radio League (PARL).

QSL via the Bureau.

Also, the P.A.R.L. is sponsoring a commemorative Diploma for amateur radio stations that have established two-way communications with at least 12 QSOs with PARL members.

Look for more details at:
http://www.dx1l.dxhams.net/events.htm

GB80PW Practical Wireless 80th year

In the UK Ofcom have issued the special callsign GB 80 PW to Practical Wireless magazine. This special callsign is to celebrate the publication's 80th year in print.

Practical Wireless Magazine
http://www.pwpublishing.co.uk

DL1ZU is in Namibia through Jan 13th. His primary operating modes will be CW plus PSK, RTTY and SSB. QSL via his home call.

EA1CYK/P will be operational from Deception Island in the South Shetland group during his spare time until March of 2012. He has been spotted with a good signal on 10 meters.

G3SWH and G3OLU will be active from the Hawane Resort in western Swaziland between February 21st to the 29th. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Operation will be on CW only on 80 through 10 meters. QSL via G3SWH

Lastly, An international group of operators plan to visit Pitcairn Island and operate as VP6T between January 20th and February 4th. WIA National News is always wary of promoting DXpeditions but according to a web posting the operation hope to make at least 30,000 contacts while on the island.

Operations will be on 160 through 10 meters including the 30, 17 and 12 meter bands. Modes to be used include CW, SSB and RTTY.

The VP6T log will be uploaded to Logbook of the World during the operation QSL Manager is G3TXF. In addition to the usual routes they will also be using the new Online QSL Request Service provided by ClubLog.

www.vp6t.org

I mentioned how we are DXpedition "wary", a reason? well it's now official, Sable Island DXpedition has been postponed!

The latest update, dated December 30th, stated

Sable Island CY0 DXpedition postponed due to the landing area on the island being under water. A winter storm with 20+ foot swells pushed water onto the sand 'runway'. Al Wilson, the OIC on Sable, made an assessment of the landing area and there was no possibility of a flight to the island in the next five days

after that, it would depend on how quickly the water would drain from the landing area and if any other storms affect the island. At that point, they decided to postpone the DXpedition.

Dot-dash-diss: The gentleman hacker's 1903

A century ago, one of the world's first hackers used Morse code insults to disrupt a public demo of Marconi's wireless telegraph.

Late one June afternoon in 1903 a hush fell across an expectant audience in the Royal Institution's lecture theatre in London.

Before the crowd, the physicist John Ambrose Fleming was adjusting arcane apparatus as he prepared to demonstrate an emerging technological wonder: a long-range wireless communication system developed by his boss, the Italian radio pioneer Guglielmo Marconi.

Yet before the demonstration could begin, the apparatus in the lecture theatre began to tap out a message. At first, it spelled out just one word repeated over and over. Then it changed into a poem accusing Marconi of "diddling the public". Their demonstration had been hacked - and this was more than 100 years before the mischief playing out on the internet today.

Who was the Royal Institution hacker? How did the cheeky messages get there? And why?

MEDIA WATCH
www.cq-amateur-radio.com/WorldRadio.html
VK Club Bulletins http://groups.yahoo.com/group/aarnie/

Why keep the WIA web with old broadcasts available?
Does anyone access these older broadcasts?

YES THEY DO.

We are holding and make available to everyone, VK1WIA National News Services from 2012 back to and including 2009.

The highest download of audio was on July 19 2009 with some 1220 playbacks.
The highest read of the text was on July 12 2009 with 2,521 downloads

Now when a new broadcaster comes on line they are encouraged to subscribe to the wiabroadcasters at yahoogroups.com webservice.

Twice a week you receive emails, the first is posted detailing that weeks news broadcast, duration and where the audio can be downloaded from.

The 2nd email is a detailed tally sheet from all the official rebroadcast stations across VK. Remember the only rebroadcast stations of this news shown on the WIA "where to hear us" web page are the ones regularly sending us the number of call-backs each week.

If you wish to join and are a rebroadcaster drop us an email now, to nationalnews@wia.org.au

Also when sending National News Material PLEASE read the "how to submit items" on the weekly news page at wia.org.au

Don't send us just url's and please post your audio onto the news area, not by email.

qdg.org.au

Visualising HF Propagation

Mike Clarke VP8DMH, at the Halley Research Station, Antarctica, has been using WSPR and video to produce a simple visualisation of HF propagation.

He's been running WSPR using an FT-817 at 5W connected to one of the base antennas; running on each band of interest for just over 24 hours.

A relatively straightforward Perl script then automates the process of merging the database downloaded from wsprnet.org into a single 'virtual' day and creating the video:

Watch his video and read his post at
http://clarkema.org/posts/2011-12/2011-12-12-propagation-videos.html

Narrow Band ATV video

Chris Long VK3AML has produced a youtube.com video showing amateur radio narrow band TV which uses just 10 kHz bandwidth.

VK3AML starts with a raw and rather fuzzy 32 line image, generated within a 10 kHz bandwidth. Improvements are introduced -
(1) raising gamma to improve grey scale,
(2) sharpening applied to webcam software prior to standards conversion to 32-lines,
(3) high frequency boosting of 32 line wav file after standards conversion by applying FFT protocol in AdobeAudition V3 software.

The Standards Conversion Freeware necessary for converting video, avi or webcam to 32-line NBTV pictures can be found on Gary Millard's web page:
http://users.tpg.com.au/users/gmillard/nbtv.htm

Gary's software is excellent, and has been used to excellent effect by the Narrow Band Television Association for several years.

Chicken Little Contest update

According to AMSAT ARISSat-1 stopped transmitting on the morning of January 4. It is believed that the satellite re-entered the Earth's atmosphere around 0700 UTC (+/- three hours) and was destroyed soon after.

The predicted decay location is an open part of the South Atlantic, well west of Angola.

RN3ZF, sent a reception report of a pass at 0842 UTC and stated, "The telemetry was absent, voice messages were not legible, very silent and interrupted. Most likely, I saw the last minutes in the life of the satellite." The last full telemetry captured was received from ground stations as the satellite passed over Japan at 0602 UTC on January 4.

www.amsat.org/amsat-new/ARISSat/ARISSatContest

You can see how you in in the competition!

Creation of AMSAT-Francophone

A new amateur radio satellite organisation, AMSAT-Francophone, has been formed.

Following the disappearance of AMSAT-France a few months ago, some of the members who originally created AMSAT-France 16 years ago, thought it was still necessary to have a structure for the French amateur space activities and have created AMSAT-Francophone.

To find the AMSAT-Francophone website in English Google AMSAT-Francophone

http://tinyurl.com/AMSAT-Francophone

Trevor M5AKA says FUNcube's Launch details and time frame has been finalised.

An agreement has now been reached with ISIS Launch Services BV, who are based in the Netherlands, for them to provide a launch of the FUNcube-1 CubeSat.

It is anticipated that FUNcube-1, which has been created by a team of volunteer radio amateurs and other specialists over the past two years, will be launched in the third quarter of 2012.

The flight is planned to take place from the Yasny launch facility in southern Russia.

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Amateur Radio Newsline(tm) Report 1795 - January 6 2012

Amateur Radio Newsline report number 1795 with a release date of
January 6th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISSat One falls from orbit after bringing
the delight of ham radio to peoples world-wide; the last B-P-L system
in the USA to use the ham bands shuts down; the ARRL seeks input on a
new bandplan for 60 meters; Samoa and Tokelau cross the International
dateline and ham radio honors inventors Reginald Fessenden and Raymond
Heising, Find out the details are on Amateur Radio Newsline(tm) report
number 1795 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ARISSAT ONE MISSION COMES TO A CLOSE

The mission of ARISSat-1 has come to an end. Bill Pasternak, WA6ITF,
is in the newsroom with the details:

--

Reception reports indicate that ARISSat-1 fell from the sky on
Wednesday, January 4th. Its predicted impact point was in an open area
of the South Atlantic west of Angola.

The last full telemetry captured and uploaded to the ARISSatTLM web
site was at 6:02 UTC as the satellite passed over Japan. These reports
showed that the temperature aboard ARISSat One had been rising as
atmospheric drag began to affect the satellite. Final temperatures
received showed that the Internal Housekeeping Unit was at 167 degrees
Farenheight and was rising.

The last time ARISSat One was heard at the Amateur Radio Newsline
studio facility in California was on January 2nd at about 18:15 Pacific
Standard Time. During that transmission the satellite was at about 127
statute miles in altitude and several hundred miles West of Los
Angeles. Its signal sounded like this:

--

ARISSat-1 audio

--

Two days later, during the 8:42 UTC pass over Russia, RN3ZF sent in a reception report to the ARISSat-1 monitoring website. That posting stated telemetry was absent, voice messages were not legible and interrupted. It is pretty much assumed that RN3ZF most likely witnessed the last minutes in the life of satellite.

ARISSat-1 was deployed from the International Space Station on August 3, 2011 during a space walk by two Russian Cosmonauts. It marked the first ever test flight of an AMSAT designed Software Defined Transponder. One with the ability to transmit simultaneous FM voice on its downlink cycling between student messages, spoken telemetry and SSTV from cameras on the spaceframe. Students from around the world provided the voice announcements. The satellite also carried a student experiment from Kursk State University in Russia which measured atmospheric density.

ARISSat-1 was likely one of the most popular ham radio satellites ever placed on orbit and its one that is definitely going to be missed.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

ARISSat-1 was originally to be named Suitsat 2. The entire project was re-engineered after the Russian spacesuit that was to become Suitsat 2 was prematurely jettisoned from the International Space Station before it could be fitted with ham radio gear. (ANS, WA4SCA, ARNewsline(tm))

**

THE BPL FIGHT: IBEC CLOSES DOWN BPL OPERATIONS DUE TO FINANCIAL LOSSES

One of the very few remaining United States operators of a Broadband over Powerline Internet access system has announced that it is shutting down. A notice that appeared on the International Broadband Electric Communications web site said that due to its inability to overcome financial damage from the April 27th 2011 tornadoes that ravaged some of its service areas in Alabama, it regrets that it has no other option than to close its doors and cease operations.

International Broadband Electric Communications better known by the acronym IBEC went on to say the customer support would cease on January 16th and urged its customer base to seek alternative Internet access as soon as possible. It also stated that it sincerely cares about the Internet needs of rural America and detests watching the national carriers ignore the communications needs of so many hard working families across the nation.

IBEC was headquartered in Huntsville, Alabama. It provided Internet service using broadband over power line technology to rural communities in several states including Virginia, Pennsylvania, Indiana as well as Alabama. With is departure, the ARRL says that there is no other Broadband over Powerline system in the United States that uses the

amateur bands in their deployments. You can read the IBEC closure announcement on its website at www.ibec.net. (Various news reports)

**

RESTRUCTURING: ARRL SEEKING INPUT ON A 60 METER BANDPLAN

The ARRL is seeking input on a proposed new bandplan for the 5 MHz or 60 meter band.

As previously reported, last November the FCC released a Report and Order detailing new rules for the 5 MHz Amateur Radio band. This announcement brought with it a number of changes for 60 meter operators.

Changes include substituting a channel at 5 point 358 point 5 MHz for 5 point 368 MHz previously authorized. The effective radiated limit in the 60 meter band will be raised by 3 dB to 100 W Peak Envelope Power relative to a half-wave dipole. Also, three additional emission types are authorized. These are Data, RTTY and CW will be authorized as soon as an effective date for a rules change is announced.

The ARRL says that considering the expected increase in 60 meter activity when the FCC's Report and Order finally takes effect, the League is asking for feedback to assist in crafting a proposed band plan. If you're a 60-meter operator, e-mail your suggestions to hf-band-plan (at) arrl (dot) org. You can also participate in an online survey at tinyurl.com/60-meter-plan. (ARRL)

**

TIME TRAVEL: SAMOA AND TOKELAU JUMP INTERNATIONAL DATELINE

The tiny South Pacific nation of Samoa and its neighbor Tokelau have jumped forward in time crossing westward over the International Date Line. This, to align themselves with their other 21st century trading partners throughout the region.

At the stroke of midnight on December 29th time in Samoa and Tokelau leapt forward to December 31st which was New Year's Eve. For Samoa's 186,000 citizens, and the 1,500 in Tokelau, Friday December 30, 2011 simply ceased to exist.

Of coarse this does complicate the QSL'ing process for ham radio contacts made with either of these entities on the dates that were simply cast away. It will be interesting to see how the DXCC and pother awards operations handle this situation. (Media Network)

**

NCDXF CONTRIBUTES $15000 TO HK0NA OPERATION

The Northern California DX Foundation has made a $15,000 (dollar) contribution to the HK0NA Malpelo Island DXpedition which is scheduled take place from January 21st to February 5th or 6th.

According to team co-leader Bob Allphin, K4UEE, an advance team of four members departed on Christmas day with nearly 4 tons of gear to transport to the island. They will establish two camps and set up antennas and stations which should be ready when the main team arrives January 21st.

Allphin says that no expedition has ever operated from the top of the island before. Because of this western North America, Asia and Oceana have a much higher need for it.

For the past 40 years the Northern California DX Foundation has funded major DXpeditions to many of the worlds most wanted entities. Malpelo was rated as number 12 on the DX Magazine's Most Wanted List for 2011. More about this massive DX operation is on-line at HK0NA dot com.

The Northern California DX Foundation has also sent a $500 Christmas gift to the Radio Amateur Society of Thailand's HS0AC Club This to help rebuild and re-equip the HS0AC station that was destroyed by recent flooding.

We will have more DX related news later on in this weeks Amateur Radio Newsline report. (NCDXF, W0GJ)

RESCUE RADIO: FEMA PLANS MORE AND LONGER EAS TESTS

FEMA and the FCC plans to conduct more, longer, national EAS tests. This, according to Damon Penn who is the assistant administrator for National Continuity Programs at the Federal Emergency Management Agency. Amateur Radio Newsline's Cheryl Lasek, K9BIK, is here with the details:

--

According to news reports FEMA's Damon Penn recently told a congressional panel that after broadcasters report their E-A-S results to the FCC that his agency will be able to determine the extent of the successes and limitations of the November 9th 2011 national test. It will also let FEMA lay plans for future system testing.

Reports say that much of Penn's testimony centered on how to improve the Integrated Public Alert and Warning System known by the acronym IPAWS. This includes making it accessible to people with disabilities. To accomplish this, FEMA has partnered with organizations like National Public Radio to demonstrate that incorporating Common Alerting Protocol

enabled technologies to alert persons with access and functional needs. Penn says that National Public Radio is working on using Common Alerting Protocol compliant messages to deliver alerts through N-P-R's digital radio to prototype devices that activate a bed shaker, display an audio alert in text and output the text to a Braille printer.

Penn also noted that FEMA continues to expand and harden Primary Entry Point stations, going from 36 in 2009 to a current level of 63 with three more under construction. Primary Entry Point stations are those used by the government to originate a nationwide alert. Penn says that by the end of 2012, some 77 Primary Entry Point stations will cover more than 90% of the nation's population.

In his testimony Penn noted that new Primary Entry Point stations all use a standard configuration. This he says means savings in maintenance costs and ensuring ease of movement between these operations. New stations also have the ability to operate under extreme conditions and possess backup equipment and power.

For the Amateur Radio Newsline, I'm Newsline's Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Penn said that legacy Primary Entry Point stations will be retrofitted to meet the current Primary Entry Point station resiliency standards. (RW)

**

RADIO DAMAGE: FIRE TAKES PENNSYLVANIA AM STATION OFF THE AIR

A Carlisle, Pennsylvania radio station has been taken off the air due to a fire. WIOO AM Program Director Ray Thomas told W-H-T-M news that everything was fine when he left the building to get lunch at around 1 p.m. on Monday, January 2nd. When he returned sometime later he found the building was on fire.

Operations Manager Eric Swidler says station personnel need to determine how much of the facility's equipment is salvageable and time to locate new studio space. Right now, It's unclear when WIOO will be back on the air. An electrical malfunction has been blamed for the blaze. (RW)

**

ENFORCEMET: POPULAR FT. MYERS FLORIDA UNLICENSED STATION SHUT DOWN

Another crackdown on unlicensed radio operations in Florida. Jim Davis, W2JKD, reports:

--

A Lee County, Forida, man has been arrested for broadcasting gospel and public service announcements over 107.5 mHz without a license.

The station called itself Dunbar Community Radio, which catered to the Ft. Myers area. It was shut down on December 9th after its operator, Al Knighten, was arrested for illegally broadcasting shows and music.

Fort Myers Police helped with the FCC bust but Captain Dennis Eads admitted it was a difficult task. He told the local press that the station was providing a service, but the bottom line is that it's operation was illegal.

For his part, station owner Knighten says he doesn't have any regrets. In an interview with WBBH television news he was quoted as saying he believes it was worth it in letting people know we can create something in this community that we can be proud of.

Im Jim Davis, W2JKD.

--

What further action will be taken against Knighten by the FCC or the state of Florida is unknown as we go to air. (RBR.com, FCC)

**

PUBLIC SERVICE: OPERATORS NEEDED FOR CANADIAN SKI MARATHON

Volunteer operators are needed for the 2012 Canadian Ski Marathon will be held on February 11th and 12th. According to Harold Hamilton, VA3UNK, the event will be held in Western Quebec Province's Ottawa Valley running eastward between Buckingham and Lachute. VA3UNK notes that the marathon depends on ham radio volunteers to provide safety and logistical communication for the benefit of the skiers. If you would like to take part, please e-mail VA3UNK to radio1 (at) admin2 (dot) ca. More information on this event is on-line at www.radio-1.ca. (VA3UNK)

HAM RADIO ON THE WEB: ARVN RELEASES ARRL/TAPR DCC VIDEO

Gary Pearce, KN4AQ, of Amateur Radio Video News has released video of the entire 2011 ARRL and Tucson Amateur Packet Radio Digital Communications Conference on the World-Wide-Web. Amateur Radio Video News says that it is also trying a shareware approach to the funding of these videos. It is trusting that those who view them will in turn make a contribution to cover their production costs. You can screen these videos and get information on how to support this and future Amateur Radio Video News projects by taking your web browser to www.arvn.tv. (KN4AQ)

**

NAMES IN THE NEWS: YOUR HELP NEEDED TO KEEP W5KUB NETCASTS ON THE WEB

One of the true good-guys of ham radio says that he needs the financial support of those who watch his live video coverage of the Dayton Hamvention and other major ham radio events at W5KUB dot com to keep these Netcasts coming their way.

Tom Medlin, W5KUB, has been Netcasting the Dayton Hamvention and Huntsville Hamfest for the past 10 years. He says that covering such events is a major undertaking for him that requires several months of preparation for each one that is live streamed. And during the decade he has provide this service he has done so paying almost every penny himself.

Medlin lives in the Memphis, Tennessee area. According to W5KUB, it now costs him close to $1500 to live stream any of these shows to viewers worldwide. Using the Dayton Hamvention as an example, some of his expenses include over $500 in hotel charges; $200 or more in gasoline for his mobile unit and another $210 for his flea-market parking spaces.

But that's not all. As Tom points out, his video streaming service is not a part of the Hamvention he gets no subsidy from it. So he has to pay another $70 for tickets for himself and his crew plus about $400 for food and expendable items such as batteries and the like. And in the end it works out at about $1500 each time he provides the video streaming service.

According to a posting on his W5KUB.com website, expenses have climbed through the roof over the past few years. As such, he is asking those who view his Netcasts to please consider donating a little to help defray his expenses in providing this service. He says that his goal is to try to raise at least $1000 in donations this year to go towards the $1500 expense. If he can get that, he will continue to subsidize the difference.

Tom adds he never wanted to ask for donations but that may be what it takes if he is to continue broadcasting these events. More information on how to support this worthy cause is on-line at tmedlin.com/donate.html. (ARNewsline(tm) from W5KUB.com posting)

HAM HAPPENINGS: CONTEST UNIVERSITY 2012 - MAY 17 IN DAYTON OHIO

The 2012 Contest University will be held May 17th at the Crowne Plaza Hotel in Dayton, Ohio. This in concurrence with this years Dayton Hamvention.

This years scheduled instructors include such notables as N6TR, K3NA, K7NV, XE1KK, W5WZ and K2RD to name only a few. Also, several past professors will present papers as well.

Early bird registration is open through January 31st. More information is on liner at www.contestuniversity.com. (Contest University)

**

HAMVENTION 2012: AWARDS NOMINATIONS DEADLINE IS JANUARY 15

January 15th is the deadline to submit nominations for the Dayton Hamvention 2012 awards for Amateur of the Year, Special Achievement,

Technical Excellence and Club of the Year.

The Amateur of the Year Award goes to an individual who has made a long-term, outstanding commitment to the advancement of amateur radio. The Technical Excellence Award is for the person who has made an outstanding technical advancement in the field of amateur radio. The Special Achievement Award honors someone who has made an outstanding contribution to the advancement of amateur radio, usually someone who has spearheaded a significant project. The Club of the Year award goes to a club which has made a significant contribution to the advancement of amateur radio.

All amateur radio operators are eligible. The Hamvention Awards Committee makes the decision on all awards based in part upon the information it receives. Documentation that informs the Awards Committee of a nominee's accomplishments may include magazine articles, newsletters, newspaper clippings, and even videos. These materials become the property of Hamvention and will not be returned.

Additional details on these awards and a nomination form are available on the Dayton Hamvention Website located in cyberspace at www.hamvention.org/awards.php. Nominations also are accepted via US mail to Dayton Hamvention Awards, PO Box 964, Dayton, Ohio, 45401.

The winners will be recognized at the 2012 Hamvention, which runs May 18th to the 20th at the HARA Arena in the Dayton suburb of Trotwood, Ohio. Hamvention planners say that they hope to see you there. (Hamventionr)

RADIO FROM SPACE: SETI SEARCH BEGINS ANEW

Researchers have once again undertaken the search for intelligent life on other planets. After lying dormant for more than seven months, radio telescopes run by the SETI Institute have once again begun listening for radio signals from the many alien planet candidates discovered by NASA's Kepler space telescope. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

S-E-T-I or SETI is an acronym that stands for the Search for Extraterrestrial Intelligence. On Monday December 5th, Jill Tarter, who is the director of the Center for SETI Research at the SETI Institute announced that the group has begun re-observing the Kepler worlds using a ground-based radio telescope system.

SETI's Allen Telescope Array or A-T-A is a set of 42 dish type antennas located about 300 miles northeast of San Francisco, California. It began scanning the heavens for electromagnetic signals that could betray the presence of an intelligent alien civilization back in 2007. In January of 2011 the SETI team started training the Allen array on the 54 planet candidates Kepler had detected what is described by astronomers as the first habitable zone to date. Then it was shut down due to budgetary constraints.

Once funds became available, SETI researchers reactivated the Allen Telescope and have begun using Kepler's discoveries to guide its activities. The Kepler space telescope was placed on-orbit in March 2009. Its mission is to hunt for Earth-size planets in their parent stars' habitable zone. That would position such planets at just the right range of distances from their home star where liquid water and perhaps life as we know could exist.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburgh, Pennsylvania.

--

SETI and ham radio have had a long association with one another going back several decades. (Space.com)

**

HAM RADIO IN SPACE: AMSAT FRANCOPHONE FORMED TO REPLACE AMSAT-FRANCE

Amsat-Francophone is the name of a new organization that hopes to replace AMSAT-France which was dissolved in late 2011. Formed in late December, AMSAT-Francophone lists among its goals the development of amateur satellites, technology and systems useful for the construction and / or use of amateur satellites and participation in national and international non-commercial projects in space. The hams behind AMSAT-Francophone are said to be some of the people who originally created AMSAT-France 16 years ago. More in Google translated English is at tinyurl.com/AMSAT-Francophone. (Southgate)

**

HAM RADIO IN SPACE: AGEING FO-29 RECOVERED FROM SHUTDOWN

The Fuji Oscar 29 Command Team reports from Japan that they have recovered the satellite after it had experienced a shutdown. This, due to longer eclipse periods causing an under-voltage condition.

Ground station operators have placed FO-29 in a temporary, but stable configuration for further testing and recovery operations. They were to

test FO-29 while it is over Japan between December 23rd and the 25th. If no problems occur the Command Team will announce an operating schedule for the satellite for the early part of 2012. (JE9PEL)

**

HAM RADIO IN SPACE: NO 40 METER CONTACTS POSSIBLE WITH THE ISS

According to a note from the Amateur Radio on the International Space Station team, rumors that the ISS was having direct contacts on the 40 meter band are false. The reason that this is not possible is that there is no high frequency radio gear on board the orbiting outpost. What is likely being heard is space station audio being retransmitted by an amateur station on the ground. ARISS notes that WA3NAN which is the club station at the Goddard Spaceflight Center in Greenbelt, Maryland, is among those that retransmit shuttle audio. (ANS)

**

DX

In DX, word that the long planed Sable Island DXpedition has been postponed. According to AA4VK and WA4DAN, a recent winter storm with twenty foot swells pushed water onto the sand runway making it unusable. Al Wilson, the Officer in Charge of Sable Island made an assessment of the landing area and reported there was no possibility of a flight to the island at that time. Also, resumption of air operations to Sable would depend on how quickly the water would drain from the landing area and if any other storms affect the island. At that point, the DXpedition planners decided to postpone the operation. For the latest on when the operation might be rescheduled please check www.cy0dxpedition.com on the World Wide Web.

Keep an ear open for special event station 4G0LD to be active during 2012. This operation is to celebrate the 50th anniversary of the Philippine Amateur Radio League. QSL only via the Bureau.

Lastly, listen out for six operators to be active as TN2T from the Republic of the Congo between January 22nd and the 31st. Using three stations, the DXpedition will be active on 160 through 10 meters using CW, SSB and RTTY. QSL Manager is M0URX. More information is on-line at www.tn2t.be.

(Above from various DX news sources)

**

THAT FINAL ITEM: HONORING FESSENDEN AND HEISING NEAR 500 KC

And finally this week, in honor of inventors Reginald Fessenden and Raymond Heising, a special operation is taking place on 472.5 kHz. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of the details:

--

As early as 1900 Reginald Fessenden was experimenting with the direct transmission of human speech. A bit later, during WW1, Raymond Heising was developing a method of constant-current modulation that was one of the earliest forms of Amplitude Modulation.

Brian Justin, WA1ZMS/4 is part of the ARRL's Low Frequency WD2XSH Experimental License. With the cooperation of commercial coastal CW station WNE and the FCC's Office of Engineering Technology Justin has received a Special Temporary Authority with call sign WF9XIH. This to permit AM transmissions with a center carrier frequency of 472.5kHz until March 1st.

Reginald Fessenden is best remembered for his Christmas Eve 1906 transmission. It was comprised of him playing the violin, playing a recording and him reading a Bible verse. Justin began his operation the week of December 18th of 2011 with a special recreation of that 1906 Christmas Eve transmission:

--

Actual transmission audio.

--

According to Justin, WF9XIH is licensed for up to 20 watts Effective Radiated Power and he says that every effort is being made to run as close to that ERP as possible. The antenna is a 160 meter dipole that tends to be very lossy when fed by a 600 meter signal. This is the same antenna that he has been using for his WD2XSH/31 operation.

WF9XIH transmissions are being coordinated with W-N-E and any changes to the WNE schedule will alter the WF9XIH operating times. The current plan is to make at least one Heising modulated AM transmission most evenings at 02:00 UTC. Audio loops of speech and a series of stepped audio tones will be used most of the time. The stepped audio tones should make it easier for DX listeners to demodulate them in CW or SSB mode even when they are well beyond the range of the AM signal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

If you happen to copy a WF9XIH transmission, WA1ZMS requests that you log it at www (dot) 500kc (dot) com. Information about the ongoing WD2XSH/31 operation can be found at tinyurl.com/wd2xsh31 (WA1ZMS/4)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from

the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 *

The MMMonVHF VHF-DX-Portal is happy to invite all VHF enthusiasts and VHF-DX'ers to join the new survey to identify the "The Best VHF DX Expedition of the Year 2011". The aim of the survey is to thank the very hard efforts of those who organized and carried out so many nice expeditions and trips all around the world on the VHF bands in the past year 2011.
Participation period: 01. January to
31 December - Voting period: 01. January 2012 - 21. January 2012 :
Persons or Groups who organized and carried out some kind of exped.
in the 144 MHz band segment via Meteor Scatter or Earth-Moon-Earth propagation. Expeditions / Activities have had to be spread out on the VHF-DX-Portal Make More Miles on VHF in the year 2011 and must have found their way into the "REVIEW" section of MMMonVHF.
You will be able to vote by selecting a maximum of 5 expeditions alltogether in TWO categories (MS and EME) by ticking the box in front of the expeditions. The voting page will be available by direct link at http://www.mmmonvhf.de/voting.php from up 1 st of January 2012 until 21 st of January 2012. Results in February 2012.

Pitcairn Island Dxpedition VP6T - January 20 - February 4, 2012
2012-01-06

There is going to be a Dxpedition to Pitcairn Island (OC-044, CQ Zone 32) between January 20th and February 4th, 2012. The operator lineup is made of Jacques F6BEE, Gilles VE2TZT, Nigel G3TXF, Michel FM5CD and Vincent F4BKV

They will be on all bands 160-10 metres including the WARC bands during their stay.

They will try and upload the VP6T log to LoTW during the operation if they can. if not, they will upload the logs after their arrival home. They will try to update their VP6T log on "ClubLog" as often as they can during the operation.

For their operating plans, QSL information and other information, take a look at the Dxpedition web site at: http://www.vp6t.org/

SARL NEWS - SUNDAY 08 JANUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

SARL WEB NOW FULLY WITH NEW ISP

ARRL DIAMOND DXCC CHALLENGE

ARISSAT-1 RE-ENTERS EARTH'S ATMOSPHERE, FALLS SILENT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL WEB NOW FULLY WITH NEW ISP

The final change over of the SARL web and sarl.org.za addresses to the new ISP on 31 December was not painless. Despite earlier requests the domain registration authority did not make the changes before they closed for the New Year weekend so we entered the New Year without the SARL web and working email addresses. The process restarted on 3 January and required a lengthy administrative process which finally culminated in the domain being transferred to the new ISP, Altech Technology Concepts, on 4 January 2012.

The SARL apologizes for the interruption. A team led by Peter Hers, ZS6PHD, continue to work on the web. Details were shared with members in a recent SARL letter which is now also available for download on the web should you have missed it.

Many thanks to Peter and his team for their unselfish work.

ARRL DIAMOND DXCC CHALLENGE

During 2012 the ARRL will be celebrating the 75th anniversary of the DXCC. To celebrate this important milestone, the ARRL has gone back to

the beginning -- the 1937 DXCC List. The Diamond DXCC Challenge will test DXers' ability to contact all the 231 entities on the original DXCC List.

The ARRL tried to find corresponding entities today that would represent the places listed in 1937. There are a few places that were merged, like French and British New Hebrides, and the Papua and New Guinea Territories. In those places, for 2012 if you work a YJ or a P29 (on the main island of New Guinea) you will get credit for working two entities! Many other oddities are sprinkled throughout the list, too. Returning to the air in 2012 will be the Canal Zone (any HP operating within 8 kilometers of the Panama Canal), the Cities of Gdansk, Poland, as well as Ifni, Morocco and Balochistan.

For some entities that now consist of multiple countries, you may work any of today's entities to qualify for that single 1937 country. For example, French Equatorial Africa will be considered worked if you log a station in TL, TN, TR or TT in 2012. The Diamond DXCC country tables show the current entity names and prefixes that qualify for the 1937 countries. For more information visit www.arrl.org.

ARISSAT-1 RE-ENTERS EARTH'S ATMOSPHERE, FALLS SILENT

AMSAT reports that ARISSat-1 stopped transmitting on the morning of January 4. It is believed that the satellite re-entered the Earth's atmosphere around 07:00 UTC (+/- three hours) and was destroyed soon after. Telemetry reports showed that the temperature aboard ARISSat-1 had been rising as the atmospheric drag began to affect the satellite. The predicted decay location is an open part of the South Atlantic, well west of Angola.

The last telemetry reports indicated that the internal temperature had topped 75 degrees Celcius and was rising rapidly. Konstantin Vladimirovich, RN3ZF, sent a reception report of a pass at 08:42 UTC and stated, "The telemetry was absent, voice messages were not legible, very silent and interrupted. Most likely, I saw the last minutes in the life of the satellite." The last full telemetry captured was received from ground stations as the satellite passed over Japan at 06:02 UTC on January 4.

ARISSat-1 was deployed from the International Space Station on 3 August 2011 during EVA-29 on by Cosmonaut/Flight Engineers Sergei Volkov, RU3DIS, and Alexander Samokutyaev. The satellite carried a student experiment from Kursk State University in Russia that measured atmospheric density. Students from around the world provided the voices for the FM voice announcements.

AMSAT President Barry Baines, WD4ASW, said that ARISSat-1 marked a new type of satellite that captured the attention of the national space agencies around the world. "With ARISSat-1, we have we have been able to design, launch, and operate a unique educational opportunity," he explained. "By designing an educational mission aligned with NASA's

Science, Technology, Engineering and Mathematics goals, radio amateurs around the world have been able enjoy a new satellite in orbit."

ARISSat-1 achieved several "firsts" for Amateur Radio in space, including the first flight test of the AMSAT Software Defined Transponder, which included an FM voice downlink cycling between student messages, spoken telemetry and SSTV; a 16 kHz bandwidth linear transponder; a CW beacon carrying telemetry and call signs of radio amateurs (noting their significant contributions to Amateur Radio in space) and a robust, forward-error-corrected 1 kbps BPSK digital downlink carrying satellite telemetry and Kursk experiment telemetry.

MATERIAL FOR RADIO ZS

The editor of Radio ZS requests members to provide articles and photographs for the 2012 issues of Radio ZS. Suitable photographs are required for the front cover and should show radio amateurs in action. Articles can be of a technical nature, or about a club project or club activities, a DXpedition or related activities.

Articles can be sent in MS Word, OpenOffice or RTF format, pictures should be sent as JPG files. Material can be sent by e-mail to radiozs@sarl.org.za or by post to PO Box 12104, Brandhof, 9324.

PEARS VHF CONTEST TO INSPIRE CONTACTS BETWEEN DIVISIONS

The PEARS National VHF/UHF Contest will take place on 20-22 January 2012 and will feature SSB, CW, FM and digital modes. The first session commences on Friday at 18:00 CAT until Saturday at 16:00 CAT. The second starts immediately thereafter and ends Sunday 14:00 CAT.

The main objective for the PEARS National VHF/UHF contest this year will be to inspire VHF contacts between the divisions in the RSA and promote VHF activity. They wish to appeal to all the Radio Clubs in the RSA to encourage field and base stations in their area for this VHF contest and make it successful. This can also result in a special competition between Club stations country-wide.

The main long distance contest frequencies are on 50,200 MHz SSB and 144,200 MHz SSB. In recent contests weaker distant stations have been drowned out by strong local stations and long conversations. To avoid this problem in the future, VHF stations are kindly requested to work all local stations, which are within 100 km from them, on the FM contest channels of 50,400 MHz and 144,400 MHz where they can compare notes and have short chats. If the SSB contest frequency is occupied then QSY 5 or 10 kHz higher in frequency.

Wishing you good luck and help to make it a real national VHF contest.

HAMNET GAUTENG SOUTH MEETING

All persons with a passion for community service and emergency communications are invited to the first HAMNET Gauteng South Meeting for 2012.

Details are as follows: >Date: Thursday 12 January 2012 Time: 19:00 - 21:00 Venue: 9th Benoni Scout Hall, Arrowe Park Benoni.

Community Activities and your possible involvement will be discussed for 2012. We will be QRV on 145,675 MHz FM and 438,700 MHz FM.

Take biscuits along, HiHi.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP reports that the solar activity is expected to be at low levels with a slight chance for isolated M-class activity. Currently all the sunspots on the earth facing side of the sun are magnetically simple and quiet.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 88.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

8 January - ARRL Kids Day events, information on www.arrl.org/kids-day. 12 January - HAMNET Gauteng South Meeting at 19:00. 15 January - Last day for submission of summaries of proposed papers for the Radio Technology in Action Symposiums 2012 to artoday@sarl.org.za. 20-22 January - PEARS National VHF/UHF Contest. 31 January - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January - Closing date for submitting papers for SA AMSAT Space Symposium. Remember also to submit nominations for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, Z6SNE.

Thank you for listening, 73. /EX

RAC Bulletin 2012-001E - Trustee wanted for Defence of Amateur Radio Fund (DARF)
2012-01-08

RAC is looking for a person to fill the recently vacated trustee position in DARF. The DARF trustee must be a licensed amateur and may not be an officer, employee, director or agent of RAC. DARF is a Trust Fund established in the early 90's to provide financial support for travel expenses of an Amateur representative on the Canadian delegation to World Radio Conferences to defend the Amateur Radio Bands.

The World Radio Conferences occur under the aegis of the International Telecommunications Union, a United Nations agency responsible for information and communication technologies and managing the radio spectrum. Moving the short wave broadcasting allocation out of the 40 Metre band was accomplished at a WRC and was a major victory for amateur radio.

As a Trust, DARF's role is to raise and manage donated funds. These funds can only be used for the stated purposes. All decisions by the trustees must be unanimous to ensure that the purpose of the DARF trust is upheld. Funds are held in a trust account at a major chartered bank and can only be withdrawn with two of three trustees. signatures. The current trustees are Gerry Hohn, VE6LB, Dave Snydal, VE4XN, and one vacancy. DARF has no policy role. The Board of Directors of RAC set policy and nominates the amateur representative on the Canadian delegation.

If you are interested please provide your name and a brief resume [no more than 500 words in French or English] email communication preferred to:

Paul Burggraaf, VO1PRB
51 Greenspond Drive
St. Johns NL, A1E 5Z9

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 8th January 2012

IRTS AGM & Rally 2012

The IRTS AGM, Annual Dinner and Rally this year is hosted by Dundalk Amateur Radio Society at the Fairways Hotel on the weekend of April 21st & 22nd 2012. Please keep your diaries free for this special event in our 80th year Anniversary celebrations. More details to follow.

Counties Contest

The IRTS 80 metres counties contest, held on Monday 2nd January was well supported, with plenty of activity right up to the last minute of the contest. Most counties appeared to be represented, although some made only a brief appearance. Our reporters tell us that Carlow, Cavan and Kerry were top of the "most wanted" list, with other sizeable counties like Tipperary and Waterford not far behind.

This year there was a reasonable level of activity on the CW portion of the band. As darkness fell, CW ops benefited in particular from the improved propagation between Ireland and mainland Europe, allowing some Scandinavian and Eastern European stations to answer their contest calls.

Logs should be submitted as soon as possible to contestmanager/ at/ irts /dot/ ie

---

Happy New Year

Our President, Paul Martin, EI2CA, wishes all of us a very happy new year. He writes, "I thank the large number of stations who turned out to participate in the 80m Counties contest last Monday. While we must await the final receipt of logs, it would appear that just over one hundred separate EI and GI stations were active for the event. This is a great start for the 80th anniversary celebrations and we look forward to an exciting 2012."

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary this year 2012. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at /irts / dot/ie

---

The South Eastern Amateur Radio Group (SEARG)

The South Eastern Amateur Radio Group's APRS node and weather station is back up and running having been off-air for a time due to sensor problems. It is now located at the Waterford City River Rescue HQ which is on the river Suir in Waterford City. The output from it can be viewed onwww.aprs.fi, callsign is EI2WCP-2. Data (including graphs) are also available on the clubs web site atwww.searg.com/weather.php. The club would like to thank Waterford City River Rescue for hosting the equipment.

The next meeting of South Eastern Amateur Radio Group will take place on Monday 30th of January at 8:30 p.m. in the Roanmore GAA centre, Cleaboy Road, Waterford and all are welcome to attend. The meeting will be preceeded by a committee meeting at 8:00 p.m., committee members are asked to attend.

For latest news from the group, visit www.searg.com and you can also follow South Eastern Amateur Radio Group on Facebook and Twitter.

Shannon Basin Radio Club

The Shannon Basin Radio Club will be holding its AGM on the 27 January 2012 at 8.30pm in Hannons Hotel Roscommon. All members are requested to attend and all newcomers are welcome to attend. For more info please see www.shannonbasinradioclub.com.

Limerick Radio Club

The next club meeting of Limerick Radio Club will take place on Wednesday 11 January 2012 at the Limerick Institute of Technology at 7.30pm. A talk will be given by Ger McNamara EI4GXB on Log Book of the World LOTW. Annual club dues can also be paid on the night to Hon. Treasurer Tony Condon EI2AW. As always, new members are welcome to attend.

RSGB Commonwealth Century Club Jubilee Award 2012

The year 2012 is the Diamond Jubilee of Queen Elizabeth II of the United Kingdom. To qualify for an attractive certificate all you need to do is to work as many different countries and call areas on the Commonwealth Century Club list during 2012.

Certificates will be awarded for working 60 and 100 different call areas. Use any mode or bands you like and QSL cards are not required. For more details follow www.beru.org.uk

---

DX News

Several German operators have been active from Namibia during the past few weeks. Some have returned home but those still active include V5/DJ2BQ, V5/DL1ZU and V5/DJ2HD. QSLs go via their home calls.

For those wishing to top up their logs with more Eastern Kiribati contacts following on from the very successful T32C expedition last year - which included our own intrepid DXpeditioners Paul EI5DI and Dave EI9FBB - look out for another group who will be active later this month. Six operators from USA/Canada will be active from 17 January until 2 February. Callsigns to look for are T32AU, T32CO, T32LJ, T32TR, T32TX, T32WW and in the CQ WW 160m Contest they will use T32XX.

Mike VE2XB will be QRV from the island of Dominica in the Caribbean from now until the end of January. As with previous visits there he will use the callsign J79XB.

The Pacific island of Tuvalu will be activated by two Hungarian operators, HA5AO and HA5UK, from 12 - 26 January. The call to be used is T2HA.

Prefix hunters will be interested to know that Croatia is marking the 20th Anniversary of the allocation of the 9A prefix. Operators there are permitted to insert the figures '20' into their callsigns. For example 9A2AA will become 9A202AA and 9A1MM will become 9A201MM. These prefixes are available throughout 2012.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, K3LP, N3SL, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, W4VQ, KH6BZF, K7BV, AA8LL, K8BL, K8CX, K8GI, K8YSE, KG8CO, KG8P, W8GEX (60m News), W9OL, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, GM3WOJ, HB9BCK, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, RSGB IOTA Web Site, VA3RJ & ICPO, VE2XB and VHF-DX-Portal for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st-January, through Sunday, 8th-January there were 223 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 6W, 6Y, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2011 DX SOUND BITES! Tom, K8CX, has done it again. He has provided DXers with 130 memorable DX sound clips from 2011. Visit Tom's famous "HAM GALLERY" Web at: http://hamgallery.com/dx2011
While there also check out some of his other features on his Web page,

such as: 14 years of "Rare DX Sound Clips" of the past (as well as some clips from the 1960's and 1970's), QSL Card Museum, Dayton Photo Galleries and Tribute to Silent Key Ham Operators. Tom states, "If anyone has any old HF recordings, I would be interested in hearing from them."

60 METER (NEW) WEB SITE. Joe, W8GEX, (from 60m News) informs: "I just want to let you know that our old Web site shut down on Dec. 31st. We want to thank Tom, K4MM, for his help on the former site for so many years. It was a challenge and he did a fine job. With the help of K3ZXL, K5YY and myself, we have a new 60m Web site at: http://60metersonline.net Here you will find a collection of information about current events and upcoming DXpeditions, plus more. The new site is hosted by Dan Schaaf, K3ZXL of Punta Gorda, Florida. Dan has been on 60 meters since 2003 when we were given the new band. An avid DXer, you can find Dan in the pileup on any band, and any mode. Dan will bring his DXing experience and enthusiasm to the new Web site. Dan already has the new site activated, and it is still a work in progress. While he updates info from the former site, he invites news from all of you. This is our forum to keep everyone interested in 60m up-to-date on the activities, and the when and where to look for DX. So if you have anything to report, please forward it to Dan, K3ZXL at: dan-schaaf@att.net -- We certainly thank Dan for accepting the challenge of keeping all of us happy DXers!"

8P, BARBADOS. Operators Mike/W1USN and Bob/AA1M will be active as 8P9CI and 8P9CK, respectively from Barbados (NA-021) between February 23rd and March 8th. Activity will be on CW, SSB and PSK31. There will be uploads daily to LoTW for 8P9CI. QSL 8P9CK via AA1M, by the Bureau or direct.

9M0, SPRATLY. Members of the Malaysian Amateur Radio Transmitter Society (MARTS) and the 9M4SDX Team will be active as 9M0L from Pulau Layang Layang Island (Swallow Reefs - AS-051) near Sabah, East Malaysia, during the first two weeks of April 2012. Tentative dates are between April 5-17th, with operations divided between 3 teams of operators:
Team A: April 5-17th Team B: April 5-11th Team C: April 10-17th
The current team consists of Tex-san/9M2TO (Project Coordinator), Neoh/ 9M2CLN (Team Leader Malaysia), Tack-san/JE1CKA (Team Leader Japan), Legend/9W2SWC (Web Master), Chuan/9W2AVI (T-Shirt Designer) and the logistics are by Bluemarlin Ventures. More details will be forthcoming. A Web page is up but still under constructions at:
http://9m0l.legendchew.com

9N, NEPAL. Toshi, JA8BMK, will be active as 9N7FOX from Nepal between February 29th and March 9th. Activity will be holiday style on 80-10 meters using CW, SSB and RTTY. QSL via JA8UWT, direct or by the Bureau.

9Q, DEM. REP. OF CONGO. A couple of sources are reporting that Sergiy, UV5EVJ (ex-5X1VJ), will be active from the Province of Katanga between January 12th and May 9th. He is there as part of a UN peace-keeping mission (MONUSCO). Sergiy is currently waiting for a callsign. Activity will be limited due to his work duties, but look for him on 80-10 meters using CW and SSB. QSL via his home callsign, direct or by the Bureau.

ARRL DXCC DIAMOND AWARD (Update to OPDX.1043). During the year 2012, the ARRL's DXCC Award program will be celebrating their 75th anniversary with the "Diamond DXCC Challenge". For complete details and picture of the award, go to: http://www.arrl.org/news/arrl-diamond-dxcc-challenge
ADDED NOTE: It is "highly recommended" to watch for updates to the award's Entities List at:
http://www.arrl.org/files/file/Diamond%20DXCC/DXCC75_Entity%20List%20TABLE_1_3x.pdf
In fact, there has been 8 changes from the original Entity List of 12/30/2011. The current date of the list is 1/3/2012.

DAYTON EVENT. The North Coast Contesters are proud to announce (edited): "The 20th Annual Dayton Contest Dinner (2012 Contest Dinner tickets are on sale now exclusively via our web site). Thanks to Scott, KA9FOX, and <QTH.com> for designing, building and running the Contest Dinner Web site at: http://contestdinner.com
Master of Ceremonies for the Dayton Contest Dinner is CQ Contest Hall of Fame member and World Wide Radio Foundation Chairman John Dorr, K1AR. The 2012 CQ Contest Hall of Fame Inductions will be formally announced by the CQ WorldWide Contest Director Bob Cox, K3EST. Our excellent keynote dinner speaker will be announced later.
The Contest Dinner will be held on Saturday night, May 19th, at 6:30 PM Cash bar opens at 5:30 PM. Located at the Crowne Plaza Hotel (Official Contester Hotel) 5th and Jefferson Streets (Next to the Convention Center) Dayton (Downtown), Ohio, in the VAN CLEVE BALLROOM. Seating is random. Tables are set in rounds of 10. You can purchase an entire table for your group (group tables are set for 8). Tickets are only available on: http://contestdinner.com
Many contest operators from around the world attend this event. If you enjoy radio contesting, you do not want to miss the Contest Dinner in Dayton, Ohio.
You are also invited to attend the Contest Super Suite in the Miami Ballroom which is open for FOUR nights during the Dayton weekend. See <http://contestsupersuite.com> for all of the nightly activities, sponsors and details.
We expect another sold out event for the Contest dinner. Get your tickets early! ....73! Tim, K3LR, (Dayton Contest Dinner Chairman - North Coast Contesters)"

DXCC SEES AN INCREASE IN APPLICATIONS. In this week's "ARRL Letter", they report that more amateurs are working DX, which means the ARRL's Membership and Volunteer Programs Department, especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus, are working very hard in processing applications (for initial awards and endorsements) and sending out cards via the different QSL Bureaus. In 2010, the DXCC Desk processed 7134 applications for initial awards and endorsements; these 2010 applications included 853,462 QSOs. In 2011, the DXCC Desk processed 11,175 applications, containing 1,250,864 QSOs. "Comparing 2010 to 2011, this represents a 47 percent increase in the number of QSOs and a 57 percent increase in the number of applications," MVP Administrative Manager Sharon Taratula explained. To learn more about this increase, go to:
http://www.arrl.org/news/2011-sees-tremendous-increase-in-dxcc-applications

E51, NORTH COOK ISLANDS. Operators (and members of the 3D20CR) Jan/DJ8NK, Uwe/DJ9HX, Werner/DJ9KH, Hawa/DK9KX, Hans/DL6JGN, Ron/PA3EWP and Leszek/ SP3DOI will be active as E51M from Manihiki (OC-014) between March 27th and April 10th. Activity will be on 160-6 meters using CW, SSB and RTTY. Flights are booked and paid for. All equipment, except the transceivers, are already on Manihiki. In all they have eleven vertical antennas and a small 4 element beam for 6m. They plan to set up 5 stations using K3's with 500W amplifiers. QSL via DJ8NK, direct or by the Bureau. Online QSL Requests Service (OQRS) for the Bureau and direct cards can be made after April 20th. The E51M Web page is available at:
http://www.manihiki2012.de/index.html

HK0NA DXPEDITION (Latest News Dated January 6th). From the HK0NA Web page: " 'The fantastic four' are working very hard and doing a great job on the Island! We are in daily contact with them. They are tired but in high spirits. Most of the camp infrastructure and antennas for Op.B (bajo) is now complete. Two antennas require further testing.
Today, they made the climb to the top of the mountain (300m), this will be the location for Op. A (alto). The purpose was to survey the antenna and operating locations. It is a fairly strenuous climb, and it took about 40 minutes to get to the top. Afterward, a decision was made to place the operating position and sleep tent at the very top of the mountain and schedule operators for 2 day shifts to minimize transit risks. Set up of the camp infrastructure and antennas at OP A will begin in a couple of days. We plan another press release prior to our departure to Bogota on Jan. 18th." For more details and updates, visit: http://hk0na.com
LATE ADDED NOTE: THE HK0NA team has asked two prominent DXers to act as pilots for the Malpelo 2012 Dxpedition. They are Dr. San Hutson, K5YY, and Col McGowan, MM0NDX.

IOTA NEWS.............
NA-076. Operators Wade/AA8LL and Roger/K0RMK will be active as home-call/4 from Cedar Keys (USI FL041S, GRID EL88, Levy County) between January 10-16th. Activity will be holiday style on 40-10 meters, using CW, SSB and RTTY, and with 200w and wire antennas. Suggested frequencies are:
CW - 28040, 24910, 21040, 18098, 14040, 10114 and 7030 kHz
SSB - 28460, 24950, 21260, 18128, 14260 and 7155 kHz
RTTY - 28082, 24925, 21079, 18102, 14079, 10139 and 7039 kHz
QSL both callsign via their home callsigns. Wade will upload the AA8LL/4 log via the LoTW, EQSL and ClubLog.

NA-240. NEW IOTA OP CANCELLED! Operators Yuri/N3QQ and Tim/NL8F have cancelled their DXpedition to the Bethel County IOTA Group, due to extreme cold conditions. Equipment and supplies are stored in Bethel and they plan to go back soon.

OC-233. Scott, VK7HVK, is once again active as VK7HVK/p from Bruny Island until January 12th. He states that this island is his holiday home which is 60 kilometers southeast of Hobart off the mainland, and he mainly operates portable DX mostly on the HF bands. See his set up on the island at:

http://www.qrz.com/db/vk7hvk

SA-018. Look for a DXpedition to Chiloe Island to take place this
April. The callsign is expected to be 3G7C. More details
should be forthcoming.

J7, DOMINICA (Reminder). Mike, VE2XB, is now active as J79XB from Dominica
(NA-101) as of January 5th (2012) for several weeks. Activity will be
holiday style on all bands 160-10 meters and possibly 6m if there are
openings. He states that he will be concentrating a bit more on 80/40/30
meters and of course the other bands including 17/12 meters as conditions
allow. QSL via VE2XB (see QRZ.com for address and details) with SASE and
CDN stamps or 2 IRCs or 2 greenbacks. The postal rates have gone up, so
take that into consideration before you send your QSL card. A Web page
is available at: http://j79xb.jimdo.com

KG4, GUANTANAMO Bay. Look for the following operators to be active from
Guantanamo Bay (NA-015) during the mopnths of February and March:
February 4-18th - Ed/KN4KL (KG4KL); activity on SSTV, RTTY, SSB, PSK
and possibly CW.
February 6-14th - Gary/WB4DNL (KG4DL); activity will be mostly on CW.
February 6-23rd - Bill/W4WV (KG4WV); activity on SSB, PSK, RTTY and
possibly CW.
February 18-25th - Tip/N4SIA (KG4AS); activity on CW, SSB, RTTY and PSK.
February 25th-March 3rd - Emmett/KD4OS (KG4OS); activity on CW and SSB.
February 25th-March 10th - Stu/K4MIL (KG4SS); activity on CW, SSB and
RTTY.
QSL all callsigns via their home callsigns.

KH0, MARIANA ISLANDS. Albert, HB9BCK, will be active as KH0/HB9BCK from
the Mariana Island between January 22-28th. Activity will be on 80-10
meters including 30/17/12m using CW, SSB and possibly PSK/RTTY. He will
use 500 watts into a beam and vertical antennas. QSL via HB9BCK, by the
Bureau or direct to: Albert Z�hner, Sonnenstrasse 3, CH8575 B�rglen/TG,
Switzerland (w/2 USDs).

KH6, HAWAII. Before his April trip to Tonga (see OPDX.1036), Haru, JA1XGI,
will be active as W8XGI/KH6 from Hawaii between January 31st and February
4th. Activity will probably be on 20-6 meters (especially 30/17/12m)
using mainly CW, with some SSB and the Digital modes. QSL via JA1XGI,
direct or by the Bureau. QSOs will be uploaded to LoTW.

MIDDLE EAST TRIP. Don, N1DG, will once again returns to the Middle East on Monday, January 9th. Activity will limited because this is a business trip. First trip will be to Qatar, and his hotel is one block from the Qatari Amateur Radio Society (QARS). Don hopes to be on air as A71A during his evening hours. On Friday, January 13th, Don will returns to Dubai, U.A.E., where he will activate A61AD for 3 days. QSL via his home callsign.

NCDXA AWARD ANNOUNCEMENTS (2011 DXpedition and DXer of the Year). David, K3LP, NCDXA President, is pleased to announce the following 2011 National Capitol DX Association's awards:
1) Dr. Hrane Milosevic, YT1AD - DXpedition of the Year Award 2011; "Leadership & Youth Development" -- For Excellence in DXpedition Leadership, Team Work and Operational Effectiveness: 3D2R- Rotuma Island ? October 2011; Outstanding DXpedition Operation and Amateur Radio Youth Development Program with Rotuma High School.
See: http://www.k3lp.com/3d2r_2011.htm
2) Sid May, ET3SID - DXer of the Year 2011 -- Recognized for individual effectiveness, abilities and contributions to the DX Community; Exceeding expectations as Mentor and providing effective Youth Development Leadership at ET3AA.
See: http://www.k3lp.com/et3aa_december_2011.htm

NCDXA DXCC-EAST CONVENTION 2012. The National Capitol DX Association's (NCDXA) has announced their new "DXCC-EAST Convention" for Saturday, August 25th, 2012. It is their goal to make this an annual event there on the east coast of the United States. The DXCC-EAST Convention will include presentations by well known DXers and principles that are knowledgeable of the DX community including participation by the American Radio Relay League (ARRL). For complete details, visit: http://www.dxcceast.com

NH7, HAWAII. Operators "Yukon John"/KL7JR and XYL Claire/WL7MY will once again be active from Hawaii, but this time from the Big Island (OC-019, HI-025S) late March to mid-April and using the callsign NH7DX. QSL via KL7JR (QRZ.com address).

PJ4, BONAIRE (Press Release). The French F6KOP Team sent out the following press release on January 4th (PJ4C 2012 - Official Bulletin No. 3) [edited]: "All of the team wishes you a Happy New Year 2012. We are now a few days from departure and all of the team is very enthusiastic. In mid-December, around 600Kg of equipment has left Europe to Bonaire. Peter, PJ4NX, will take care of it until our arrival. Jeff, F6AOJ, has repaired the equipment that was damaged in TJ9PF last year. Mat, F5PED, has prepared the 30m 4sq, and Yann, F1NGP, has configured all the computer networking. Thanks to all, the F6KOP team has everything prepared and packed on time. Eric/ON7RN and

Peter/PJ4NX have organized everything with the shipper. We will use the
following equipment:
5x FT 450 1x 5ELEMENT 50 MHz I0JXX
1x ICOM IC7200 & 7000 1x VERTICAL 20m
1x K3 1x FOUR SQUARE 30m
6x ACOM 1010 1x FOUR SQUARE 40m
1x 50 MHz PA 2x VERTICALS 80 (CW and SSB)
4x SPIDERBEAM 5 BANDS 1x VERTICAL 40m
1x SPIDER 3 BANDS 1x L 160m
1x SPIDERBEAM WARC BEVERAGES
We have also in-band filters for 80 and 75m for simultaneous operations.
Jean Paul, F8BJI, made the operating schedules. The 7th station will be
used on 6m (sometimes as a beacon on 50.104 MHz, please let us know if
there are any openings). Team leaders are Frank/F4AJQ (leader), Alain/F6ENO
(co-leader), Yann/F1NGP (SSB leader), Jean Paul/F8BJI (Digi-leader) and
Bernard/F9IE (CW leader). Sebastien/F5UFX will be our pilot and Webmaster.
Maurice/F5NQL will be in charge of communication and Bernard/F9IE is our
QSL manager. Logs will be uploaded as frequently as possible. Departure
is scheduled from Paris, January 12th, morning, and arrival in Bonaire late
in the evening. We would like to thank our sponsors for their help. Of
course you could help us to cover the expense for shipping all equipment,
even small contributions are very appreciated, you could use paypal on
our Web site or send an email to: f6eno@wanadoo.fr
See you in the pile-up..... Best 73's from all the team." The team will
be active until January 23rd. The complete list of operators are Franck/
F4AJQ, Peter/PJ4NX, Gabriele/I2VGW, Nobert/DJ7JC, Heye/DJ9RR, Hans/DL1YFF,
Guenther/OE3GCU, Karl/OE3JAG, Eric/ON7RN, Henri/F1HRE, Yann/F1NGP, Jimmy/
F4DLM, Michel/F5EOT, Jean/F5NKX, John/F5VHQ, Jean-Luc/F6BIV, Alain/F6ENO,
Joel/F6JMT, Jean-Paul/F8BJI, Bernard/F9IE, Rein/PA0R, Kenneth/OZ1IKY,
Gerard/F2VX, Francis/F5QF and Tony/F8ATS. More details and updates can
be found at: http://www.pj4c.com
ADDED NOTE: Norbert, DJ7JC, plans to continue the activity from Bonaire
following his participation with the PJ4C operation. Look for him to
sign PJ4M between January 23-30th. QSL via DJ7JC.

E44PM LOTW. Peri, HB9IQB, reports on January 3rd: "I've uploaded the E44PM log onto LoTW today. The file has been processed within a few minutes and 2279 of the 7415 Qs showed an immediate match."

IRCS AVAILABLE. Steve, N3SL, has a cache of current IRCs (over 200) for sale. The price is 1.75 USDs each, postage paid (to US stations). Please E-mail to arrange purchases at: n3sl<at>arrl.net.

JW8AJA QSL REQUESTS. QSL Manager Trond, LA9VDA, reports on <QRZ.com> [edited]: "QSL cards can be requested via E-mail to la9vda (at) gmail.com. For a direct QSL, please add 3 USDs or 1 new and stamped IRC and SAE. Cards without this will be sent through the bureau. Postage is now 15,- Nkr. One U.S. dollar is worth little over one Norway dollar. This is after the bank has taken their fee and stuff..... two USDs does not cover to buy a stamp for overseas mail. For many years I have sponsored the DX world, but I can't do this any more."

PV0F BROKEN CALLSIGN IN NOVEMBER 2011. Dennis Motschenbacher, K7BV, reports: "I have received a number of QSLs for a PV0F operation during November, 2011. I am certain there was no operation using that call at that time; however I note that P40F was extremely active by R5GA for the CQ WW contest. I will gather November 2011 PV0F cards sent to me for a awhile and then send them off to R5GA assuming the senders miscopied his P40F callsign."

TIME TO UPDATE YOUR GS-IRC CHART. Bill, W9OL, states that this is the 14th year for his GS/IRC Chart and it's time to update the information/ data again. (US Postage rates increase effective January 22, 2012)
The current chart (recently updated), resides at:
http://www.qsl.net/w9ol/IRC_Chart.htm
If you wish to download the whole file, go to:
http://www.qsl.net/w9ol/IRC_Chart.xls

QSL RECEIVED VIA LoTW: 9V1YC, C6ANM, E44PM, F6BWJ, FY5KE, GI0KVQ, HA3NU, HG6N, I2EAY, KH6ZM, KH7Y, MU/DL3OCH, SM7EHU, ST0R, TM9R, V25RV, VE3EJ, VE3JM, VP2V/K6TOP and Z30M

QSLS RECEIVED VIA MAIL: 3A2LF, 5T0JL, 6W/AA1AC, 9H9OB, A52ATV, BY1RX/4, C21UF, CE0Y/LA5UF, EL2A, EL2DT, HP1WW, HR9/AI5P, HZ1FS, HZ1MD/p, JW8AJA, MU/PA9M, OJ0X, PJ4/K4BAI, PJ4J, RI1FJA, ST0R, SU/HA3JB, TU2T, UJ8JMM, V55A, VK2IR, VK7ZX, VK9CX, VR2UW, XR0ZA, XU7MDY, XV2RZ and ZK2V

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

T32, EASTERN KIRIBATI (Update to OPDX.1037). Six operators from the U.S. and Canada will be active from Kiritimati Island (OC-024) between January 17th and February 2nd. The Dxpedition now has a Web page at: http://www.t32kiritimati2012.com

VP8, FALKLAND ISLANDS. Zorro, JH1AJT, will be visiting and operating as VP8DNT from the QTH of Bob/VP8LP on the Falkland Islands between January 21-28th. Activity will be holiday style on 80-10 meters. QSL via JH1AJT.

VU17, INDIA (Special Event). Members of the Indian Institute of Hams (VU2IIH) of Bangalore and the Mangalore Amateur Radio Club (VU2RDO) will activate special event radio station VU17NYF between January 12-16th, during 17th National Youth Festival. Activity will be on the HF and VHF bands. QSL via direct (w/3 IRCs - see address on QRZ.com) or by the Bureau. Details of the event are on: http://www.nyf2012.in/nyf

XU7, CAMBODIA (Update/Change). Operators Alex/UA9YAB and Alex/UA9YPS were active as XU7AEQ and XU7AEP (not XU7YAB and XU7YPS as first mentioned), respectively, this past week. QSL XU7AEQ via his home callsign direct or LoTW. QSL XU7AEP via his home callsign direct.

XT, BURKINA FASO. Jon, K3QF, is now active as XT2RJA from Ouagadougou until January 18th. He has already been active on 20m CW, but hopes to be other bands too. There is no room for a 160m antenna. QSL via K3QF.

XV2, VIETNAM. Take, JA6CNH, will be active as XV2CNH from Ho Chi Minh City between February 10-15th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via JA6CNH direct only.

XW, LAOS. Bruce, 3W3B/HS0ZCY/XU7ADF/XW1B/AA4XR, has renewed his Laos license, but was issued a new callsign XW4XR. Bruce is expected to be active again from Vientiane next month sometime, especially during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry. ONLY QSL via E21EIC.

XW, LAOS. Larry, 3W3X/HS0ZJZ/KJ4ZRO/XW1A, has renewed his Laos license, but was issued a new callsign XW0ZJR. Larry is expected to be active again from Vientiane next month sometime, especially during the CQ WW WPX RTTY Contest (February 11-12th) as a Single-Op/All-Band/Low-Power entry. ONLY QSL via E21EIC.

YX6, VENEZUELA (Op Cancelled!). Members of the Radio Club of Venezuela planned to be active as YX6AJ from Angel Falls waterfall (the world's tallest - 979m) this past week, but the operation was cancelled until further notice due to transportation problems.

ZK2V 2011 DXPEDITION WRAP-UP. Chris, GM3WOJ/ZK2V, informs OPDX: "The ZK2V 2011 DXpedition finished on 19th December - a total of 47999 QSOs were made by ZK2X and ZK2V over 8 weeks. I've posted a brief write-up on our Web site <www.zk2v.com> - all QSOs have been uploaded to LoTW and our QSL Manager Steve, N3SL, is handling all direct and bureau QSL cards. Thanks to everyone who worked and supported ZK2V."

ZL7, CHATHAM ISLANDS. David, VO1AU, a member of the upcoming Kiritimati, Eastern Kiribati, DXpedition (see OPDX1037), will be active as ZL7/VO1AU from the Chatham Islands (OC-038) between March 8-13th. Activity will be on CW and SSB, but he will also participate in the Commonwealth Contest [BERU] (March 10-11th). QSL via VO1MX.

>leapt forward to December 31st which was New Year's Eve. For Samoa's
>186,000 citizens, and the 1,500 in Tokelau, Friday December 30, 2011
>simply ceased to exist.
>
>Of coarse this does complicate the QSL'ing process for ham radio
>contacts made with either of these entities on the dates that were
>simply cast away. It will be interesting to see how the DXCC and
>pother awards operations handle this situation. (Media Network)

Except, of course, that one either logged the contact in UTC, or can convert the time of the contact at each end to UTC, to confirm the contact was logged at the same time at each end.

While the *local* time may show a discontinuity/gap, UTC plugs on unchanged through the event. There was no time that didn't exist. Thus, there is no issue with contacts on dates cast away.

- - - -

Looked at a different way, December 30 didn't exist in those places. Thus, nobody there could have made a contact on that day, so (again) no problem could occur.

Alan
wa6azp

GB2RS NEWS

Sunday 8th January 2012

The news headlines:

* Happy New Year

* ARISSat-1 falls to Earth

* Prestigious award for IOTA heads

The news team and all the staff at RSGB HQ would like to wish our newsreaders, listeners and online readers a very Happy New Year. We would like to remind listeners that some of the arrangements for GB2RS have changed. Now that postal copies are no longer being sent, the deadline has been changed to 10am on Thursday morning. The GB2RS Script will now be uploaded to the Members Only area of the RSGB website on Friday afternoons, and placed in the public area on Mondays. These changes mean that GB2RS will be able to being you much fresher news than ever before.

According to the AMSAT website, ARISSat-1 stopped transmitting shortly after 0600UTC on Wednesday 4 January. It is believed that the satellite re-entered the atmosphere and burned up at around 0700 over the South Atlantic. Full details are at www.arissat1.org.

Roger Ballister, G3KMA and Martin Atherton, G3ZAY are recipients of the Yasme Excellence Award for 2011. This award is for their dedicated work for the Islands on the Air programme. The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to amateur radio, including DXing and the introduction and promotion of amateur radio in underdeveloped countries. Everyone at the RSGB would like to congratulate both Roger and Martin on this well deserved award.

Two UK amateurs have reported hearing strong echoes on their 80m CW signals in the evening last week. Tony, G3ZRJ in Herefordshire and Andrew, GW3OQK in Swansea were in QSO on 1 January when they could hear another signal underneath theirs. It turned out to be an echo of their own signals. Tony said the echoes were initially so strong that he had trouble monitoring his CW keying. The delay in the echoes was of the order of 0.25 to 0.5 seconds and the echo strength hit S9. Tests by Andrew on the evening of 3 January revealed the same phenomena at around 2100Z, albeit weaker. Steve, G0KYA, chairman of the RSGB's Propagation Studies Committee, said that these were unlikely to be

round-the-world echoes, but could be due to a form of magnetospheric ducting where signals follow the earth's magnetic field lines down to the southern hemisphere before being bounced back along the same duct. Steve said that this was quite rare and not really understood. UK amateurs are being urged to look out for any echoes on their 80m signals and report any findings to G0KYA@QSL.NET.

An agreement has now been reached with ISIS Launch Services BV, who are based in Delft in the Netherlands, for them to provide a launch of the FUNcube-1 CubeSat. It is anticipated that FUNcube-1 will be launched with a number of other spacecraft from a DNEPR rocket, sometime in the third quarter of 2012. The orbit is still to be defined precisely but it is expected to be nearly circular and approximately sun synchronous. The FUNcube-1 spacecraft will transmit signals that can be easily received directly by schools and colleges for educational outreach purposes. In addition to providing educational outreach for schools and colleges around the world, the spacecraft will also provide a U/V linear transponder for radio amateurs during local night, at weekends and during holiday periods. The production and testing of the spacecraft itself has already been funded via a legacy and other sources. For more information, check out www.funcube.org.uk.

Dutch amateurs have been granted access to two new bands. They now have 501kHz to 505kHz on a secondary basis with power and mode restrictions, plus 70 to 70.5MHz, also on a secondary basis with power restrictions.

Denmark has the Presidency of European Union from 1 January to 30 June 2012 and the callsign 5P12EU will be activated during this period. QSL cards will be available and there is an award scheme for working or hearing this callsign. For all details on QSLing, the award scheme and logs, check out www.5p12eu.dk.

Using the new OPERA datamode, Gary, G4WGT successfully transmitted a signal to Joe, VO1NA on 137.5kHz, a distance of 3,500km. Gary transmitted six full callsigns in a two hour period, which is a big time saving over modes like QRSS. The OPERA mode was envisaged by Graham, G0NBD and coded by Jose Ros, EA5HVK, as a way of providing data operations for stations who only had the CW capability. The most up to date information on this mode can be found at http://groups.yahoo.com/group/O_P_E_R_A_/.

The Winter edition of the 5MHz Newsletter has just been published and includes news and features about 5MHz, including a chart of the current 5MHz allocations worldwide. You can freely access this latest edition of the 5MHz Newsletter from Google Documents at http://tinyurl.com/72mozfx. Although originating in the UK, the 5MHz Newsletter invites worldwide interest, both in readers and contributors. For those without internet access who want a paper copy, send a self-addressed envelope big enough to take folded A4 sheets, together with adequate postage, or IRCs in the case of outside of the UK. Requests should be addressed to the Editor, G4MWO, who is QTHR in the UK Callbook and on QRZ.com

The International Museums Weekend special event will this year take place on the double weekends of 16 & 17 and 23 & 24 June. Radio amateurs are encouraged to participate in this event by setting up stations in their local museums. Organiser Harry, M1BYT asks that all those intending to take part in the event should register their museum via the from on the International Museums Weekend website, www.ukradioamateur.co.uk/imw. He can be contacted via e-mail to harry.m1byt@tiscali.co.uk, or on 075111 28933.

And now for the details of rallies and events for the coming week

The Red Rose Winter Rally will take place on 15 January at George H Carnall Leisure Centre, Kingsway Park, M41 7FJ. The venue is easily accessible from Junction 9 of the M60, opposite the Trafford Centre. Doors open at 11am. There is free car parking, traders, a Bring & Buy, special interest groups and an RSGB bookstall. Details from Steve, on 07502 295 141.

Also on 15 January the Dover Amateur Radio Club Rally will take place at Whitfield Village Hall, Dover CT16 3LY. There will be trade stands and a Bring & Buy. Now for the news of special events

Orkney Amateur Radio Club is supporting the SOS fundraising week from 21 to 29 January. There will be a special event station at or near each of the Islands' three lifeboat stations. GB1OL will be in Stromness; GB2OL will in Longhope, based at the old lifeboat station; and GB4OL will be at Kirkwall Bay. QSLs should be sent direct with the information on the website. http://eu009.webplus.net/gb1ol.html. The stations will be active on most bands, mainly at the weekends, and will concentrate on 80, 40 and 20m.

And now the HF DX news compiled from 425 DX News and other sources

PA8A will be active as PJ4B from the island of Bonaire. Listen out for him between 8 and 22 January. His operation will be holiday style on the high frequency bands only. QSL direct only via PA8A.

VE2XB will be active as J79XB from Dominica for several weeks. His operation will be holiday style on all bands from 10 to 160m and possibly 6 meters if there are openings. QSL via VE2XB as listed on QRZ.com.

On 12 January the VP6T team will start the journey to French Polynesia, with the first stop in Tahiti, which is IOTA OC-046, for 3 days. They will then take a small airplane to Mangareva Island, OC-063. They plan to be active from Tahiti and, if time permits, also from Mangareva as TX6T. QSL via G3TXF.

Now the contest news

This weekend the ARRL RTTY Roundup will be making the datamode portions of the HF bands busy. Activity is on all datamodes. Check out the ARRL website for full rules.

10 January sees the 430MHz UK Activity Contest take place from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

On Sunday 15th the Super League series continues with 80m CW Affiliated Societies Contests takes place from 1400 to 1800UTC. Using CW only the exchange is signal report and serial number.

And now for the solar factual data for the period from Friday 30 December to Thursday 5 January, compiled by Neil Clarke, G0CAS, on the 6th January.

The solar disc had numerous sunspot groups visible every day. Most were stable and quiet but a couple of groups produced small C class solar flares every day except for the two days when none took place. These flares had very little effect on propagation. Solar flux levels declined from 141 units on the 30th to 130 by the 1st but then recovered to 136 by the 4th. The average was 135. The 90 day solar flux average on the 5th was 144, that's two units down since the last report. X-ray flux levels declined slightly from B5.6 units on the 30th to B3.9 by the 4th. The average was B4.3 units. Geomagnetic activity was quiet with the Ap index in single figures every day. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 310 and 430 kilometres per second. Particle densities on some days were moderate, with levels of 20 particles per cubic centimetre on the 30th and 3rd. Bz varied between minus and plus 9 nanoTeslas on the 30th and the 2nd and less than that on the quieter days.

And finally, the solar forecast. This week the quiet side of the sun is expected to be looking our way. Solar activity should be mostly at low levels, with C class solar flares taking place on most days. Solar flux levels should be around the 120s every day. Geomagnetic activity is expected to be at quiet levels every day. MUFs during daylight hours at equal latitudes are expected to be around 27MHz. Darkness hour lows should be around 8MHz. Paths this week to India should have a maximum useable frequency with a 50 percent success rate of around 29MHz. The optimum working frequency with a 90 percent success rate will be about 23MHz. The best time to try this path will be between 0900 and 1200 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 9 January Gloucester Amateur Radio & Electronics Society is having a talk on SETI by Chris Martin, M6CJM. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 9 January South Birmingham Radio Society is planning rally visits for 2012. Contact Don, on 01214 581 603.

On Monday 9 January Stratford Upon Avon District Radio Society is visiting Hack Green Nuclear Bunker with John, G8HJS. Contact G0CHO, on 01608 664 488.

On Tuesday 10 January Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 10 January Lincoln Short-Wave Club is putting G6COL on the air for the VHF/UHF/SHF Cumulative Club Contest. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 10 January Loughborough & District Amateur Radio Club is having a talk on coaxial feed lines by Andrew, G7SEG.. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 10 January Worcester Radio Amateurs Association is having a talk on satellites. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 10 January Wythall Radio Club is holding a committee meeting. Details from Colin, M0GJM, on 07598 540 507.

On Wednesday 11 January Lincoln Short-Wave Club is holding its AGM. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 11 January Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Thursday 12 January South Birmingham Radio Society is having training classes with Dave Murphy, G80WL. Contact Don, on 01214 581 603.

On Friday 13 January Bromsgrove & District Amateur Radio Club is having a VHF night. Contact Chris, M0BQE on 01905 776 869.

On Friday 13 January Coventry Amateur Radio Society is holding its annual dinner. Contact John, G8SEQ, on 07958 777 363.

On Friday 13 January South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603. On Saturday 14 January Lincoln Short-Wave Club is in the shack and holding its Saturday surgery. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Sunday 15 January Leicester Radio Society is taking part in the AFS contest. Details from John, G0IJM, on 07939 121 132.

NEWS FOR THE NORTH OF ENGLAND On Monday 9 January Angel of the North Amateur Radio Club is enrolling students for the Advanced and Intermediate courses. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 9 January Sheffield Amateur Radio Club is holding a QSL card competition. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 9 January Thornton Cleveleys Amateur Radio Society club is on the air. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 10 January Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343825.

On Tuesday 27 December Halifax & District Amateur Radio Society is on the air. Details from Anthony Vinters, G0WFG, on 01422 822636.

On Tuesday 10 January Stockport Radio Society is having a presentation, Whiskey Galore Revisited, by Ray, M1REK and Andy, M1LOL. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 11 January Chorley & District Amateur Radio Society returns after the festive period. Details from Nessie, M0NES, by email to nessie68@hotmail.com.

On Wednesday 11 January Hornsea Amateur Radio Club is taking part in the 80m CC SSB contest and watching a DVD. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 11 January Maltby & District Amateur Radio Society is having a talk on the Rediffusion days by Barry, M1CYJ. Details from Keith, G1PQW, on 07801 156 678.

On Wednesday 11 January Sheffield Amateur Radio Club is taking part in the RSGB 80m Club Contest SSB from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday 12 January South Manchester Radio and Computer Club is having a talk on mobile antenna installation by Brian, G4LUL. Details from Ron, G3SVW, on 01619 693 999.

On Friday 13 January East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 13 January Tynemouth Amateur Radio Club is listening to Noises Off. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Sunday 15 January Hornsea Amateur Radio Club is taking part in the AFS Contest CW. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

NEWS FOR NORTHERN IRELAND On Wednesday 11 January Mid Ulster Amateur Radio Club commences its 12 week Intermediate course. For more information send an email to cqmuarc@gmail.com.

NEWS FOR SCOTLAND On Sunday 8 January Aberdeen Amateur Radio Society is taking part in the RSGB Affiliated Societies 80m CW Contest. More

information from Lewis, GM4AJR, on 01224 575 663.

On Tuesday 10 January Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946 192.

On Wednesday 11 January Lothians Radio Society is having a video evening with Peter Dick, GM4DTH. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 12 January Aberdeen Amateur Radio Society is on the air and having Morse tuition with James Mackinnon, GM4EKC. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 13 January Borders Amateur Radio Society is holding a discussion night. Details from MM0YLG on 07944 912 751.

On Friday 13 January Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

On Saturday 14 January Aberdeen Amateur Radio Society is taking part in the RSGB Affiliated Societies 80m SSB Contest. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Chelmsford Amateur Radio Society has announced that its January Foundation course was oversubscribed. A further course will be announced shortly. The club has run 43 courses since its first, in January 2002, and has trained over 300 people. For more information contact Clive, G1EUC, on 01245 224577. On Monday 9 January Coulsdon Amateur Transmitting Society is holding its annual dinner at The Fox, Coulsdon Common. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 9 January East Kent Radio Society is having a gadget evening. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 9 January Southdown Amateur Radio Society is holding its AGM at Chaseley. Details from John, G3DQY, on 01424 424 319.

On Monday 9 January Surrey Radio Contact Club is having a fix-it, move-it-on, advice clinic and chin-wag led by John, G8MNY. Contact John, G3MCX, on 02086 883 322.

On Monday 9 January Swale Amateur Radio Club is having a presentation on railway communications by Phil, G0JBA. Non-club members are welcome. Detains form Phil, G0JBA, on 01233 330 127. On Monday 9 January West Kent Amateur Radio Society Club is planning activities for 2012. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 10 January Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 10 January Harwell Amateur Radio Society Radio is having a quiz and preparing for the rally. Contact Malcolm, G8NRP, on 01235 524

844.

On Wednesday 11 January Chesham & District Amateur Radio Society is holding a members forum and following up on the Foundation training course. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 11 January South Essex Amateur Radio Society is preparing for the Canvey radio rally. Details from Dave, G4UVJ, on 01268 697 978.

On Wednesday 11 January Southgate Amateur Radio Club is looking at EMC. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 11 January Southgate Amateur Radio Club David is having a talk on the rise and fall of radio paging by M0XDS. Contact Mr D F Berry, G4DFB, by email to dfberry@eggconnect.net.

On Thursday 12 January Bittern DX Group is having an informal meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 12 January Echelford Amateur Radio Society is having a natter night, CW practice and Bring & Buy. Contact John, G4GSC, on 01784 451 898.

On Thursday 12 January Edgware & District Radio Society is holding its AGM. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 12 January Lowestoft & District PYE Amateur Radio Club is holding its annual dinner. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 12 January Reading & District Amateur Radio Club is having a talk on police CCTV by Alison Wilkins, G8KSH. Details from Pete, G8FRC, on 01189 695 697.

On Friday 13 January Cambridge & District Amateur Radio Club is having at talk on a homebrew Geiger counter by Mark, M1MPW. Contact Ron, G3KBR, on 01223 501 712.

On Friday 13 January Loughton & Epping Forest Amateur Radio Society is having a film night. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Friday 13 January Wimbledon & District Amateur Radio Society is having a roundup of members' Christmas activities by Eric, G0KRT. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Sunday 15 January Loughton & Epping Forest Amateur Radio Society is having its New Year's carvery dinner. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Sunday 15 January Southdown Amateur Radio Society is taking part in the CW AFS contest. Details from John, G3DQY, on 01424 424 319.

NEWS FOR THE SOUTH WEST The Cornish Amateur Radio Club has launched a new club website at www.GX4CRC.com and can also be found on Facebook. More information from Steven, G7VOH, on 01209 844 939.

On Monday 9 January Exeter Amateur Radio Society is having a club night at the Moose Centre. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday 10 January Mid Somerset Amateur Radio Club is having a talk on the use of FM broadcast in disaster response by Mike Adams of The Far East Broadcasting Company. Contact Nick, M6NJB, on 01749 346 320.

On Tuesday 10 January Plymouth Radio Club is preparing for its AGM. Details from Chris, M0ZCP, on 07834 767 161.

On Wednesday 11 January Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 12 January South Bristol Amateur Radio Club is having a talk on battery charging by Dave, G7BYN. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 12 January Swindon & District Amateur Radio Club is watching the FSDXA 3B7C St Brandon Island DVD. Contact Den, M0ACM, on 07810 317 750.

On Thursday 12 January Yeovil Amateur Radio Club is having a photo quiz with M0WOB. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 13 January Torbay Amateur Radio Society is holding an operating night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Sunday 8 January Aberystwyth & District Amateur Radio Society is holding a junk sale. Details from Ray, GW7AGG, on 01970 611 853.

On Friday13 January Blackwood & District Amateur Radio Society is beginning its Advanced training course. Details are on the web at www.GW6GW.co.uk.

HK0, MALPELO ISLAND (FOR IMMEDIATE RELEASE-Malpelo DXpedition 2012).
[dated Jan. 9th - edited] "The advance team to Malpelo, commonly referred
to as the 'Fantastic Four', are working very hard and doing a great job
on the Island, despite several days of heavy rain and wind. All of the
camp infrastructure and antennas for OP.B (bajo) is now complete and the
guys have tested all the antennas. They appear to be working as planned
with good signal reports from around the world, including Asia long path.
The next step in the project is to make safe the climb to the top of the
mountain where OP. A (alto) will be situated. Safety lines are being
installed along the most treacherous sections of the trail. Once in place,
construction will begin. There will be an operating tent with four radios
and 500 W amps and six antennas. There will also be a sleeping tent, as
the decision has been made to send crews to the top for 48 hour shifts.
This is to minimize the risks of transit up and down. Under the current
scheduling plan devised by W0GJ, each team member will serve on four 48
hour shifts during our stay on the island. Beginning at 0001 Zulu,

January 10, 2012, the advance team will begin using the HK0NA callsign.
Please understand that their primary purpose on the island is to prepare everything for the team arriving in about 10-12 days. In their off time, they may be QRV.
Any contacts made with the men using their home calls should count as valid contacts with Malpelo and will be confirmed through the team's QSL Manager N2OO. Keep in mind their logs won't be sent to N2OO until after the DXpedition and those QSOs will not show in the HK0NA 'log lookup'.
The team has asked two experienced DXers to act as team 'Pilots'. San, K5YY, is chief pilot and all communications to the team will go through him. Col, MM0NDX, will act as the European Pilot. Please check the Web site for their 'guidelines.' And please, do not contact them prior to the beginning of the DXpedition which should be on the afternoon of January 21st if all goes well. We want to thank all of our sponsors for their generosity. This includes DX Foundations, DX Clubs and hundreds and hundreds of individual DXers who have contributed toward our expenses.
Contributions can be made via our Web site at:
http://www.hk0na.com/sponsors
We plan periodic uploads of pictures and updates from the island. Watch the website for ongoing news.

Thanks,
Jorge Prieto, HK1R: DXpedition leader
Bob Allphin/K4UEE and Gregg Marco/W6IZT: Co-leaders"

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
02 - 08 January 2012

Solar activity was low during most of the period with occasional
low-level C-class flares. A long-duration C2 x-ray event was
observed at 02/1524 UTC from just beyond the west limb. Associated
with this event was a greater than 10 MeV proton flux enhancement at
geosynchronous orbit (see below). Region 1390 (N08, L=122,
class/area Dao/210 on 06 January) produced a C1 x-ray event at
05/0722 UTC with an associated Type II radio signature (695 km/s
shock velocity). There were no Earth-directed CMEs observed during
the period.

No proton events were observed at geosynchronous orbit. However, a
greater than 10 MeV proton flux enhancement began late on 02 January
and ended late on 03 January (peak flux 1 pfu at 03/0550 UTC). The
enhancement was associated with the long-duration C2 x-ray event
mentioned above.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels.

Geomagnetic field activity was at quiet to unsettled levels during
the period. Brief minor storm periods occurred at high latitudes on
05 January associated with the onset of a coronal hole high-speed
stream (CH HSS).

Forecast of Solar and Geomagnetic Activity
11 January - 06 February 2012

Solar activity is expected to be at low levels during the period
with a slight chance for isolated M-class flare activity.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at normal levels during the period with a chance for
moderate levels during 14 - 16 January and again on 30 January - 01
```

February.

Geomagnetic field activity is expected to be at quiet levels during 10 January. An increase to quiet to unsettled levels is expected on 11 - 12 January and 16 January due to recurrent CH HSS effects. Quiet conditions are expected during 17 - 27 January. An increase to quiet to unsettled levels is expected on 28 - 29 January due to another CH HSS. Quiet levels are expected from 30 January - 06 February.

MMMonVHF Newsletter 2012-01-11 at 21:16 UTC

** MMMonVHF Newsletter / No.2 - WEEK 02/2012 **

Hallo dear MMMonVHF friends,

please find below the latest NEWSLETTER from the VHF-DX-Portal "Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-01-11. We try to distribute our Newsletter once a week (thursday) from now on - if any special activities will make it necessary, we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look on "News"-page
http://www.mmmonvhf.de/latest.php - you are very welcome for any input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 *

The MMMonVHF VHF-DX-Portal is happy to invite all VHF enthusiasts and VHF-DX'ers to join the new survey to identify the "The Best VHF DX Expedition of the Year 2011". The aim of the survey is to thank the very hard efforts of those who organized and carried out so many nice expeditions and trips all around the world on the VHF bands in the past year 2011.
Participation period: 01. January to
31 December - Voting period: 01. January 2012 - 21. January 2012 :
Persons or Groups who organized and carried out some kind of exped.
in the 144 MHz band segment via Meteor Scatter or Earth-Moon-Earth propagation. Expeditions / Activities have had to be spread out on the VHF-DX-Portal Make More Miles on VHF in the year 2011 and must have found their way into the "REVIEW" section of MMMonVHF.
You will be able to vote by selecting a maximum of 5 expeditions all together in TWO categories (MS and EME) by ticking the box in front of the expeditions. The voting page will be available by direct link at http://www.mmmonvhf.de/voting.php from up 1st of January 2012 until 21st of January 2012. Results in February 2012.

** Hawai, KH6

Hawaii, KH6, qrv HF and 50 MHz

Before his April trip to Tonga (see OPDX.1036), Haru, JA1XGI, will be active as W8XGI/KH6 from Hawaii between January 31st and February 4th. Activity will probably be on 20-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW.

SOURCE: Ohio/Penn DX Bulletin #1044

** PY1EME, GG76

Hello Mooners - I will be qrv during summer vacation, from now until the end of January 2012. Planned bands are 70cm (already qrv), 6cm (by the end of this month), 6m (starting next week) and 2m (occasionally) More info about 70cm, 6cm and 6m please take a look at PY1KK on qrz.com . For 2m please check PY1EME on qrz.com Please send an e-mail if interested on a try on any of these bands. Vy 73 de Bruce, PY2BS, PY1KK, PY1EME

SOURCE: tnx Lance, W7GJ, via Magic Band EME Group

** North Cook Island

North Cook Isl., E51. Operators (and members of the 3D20CR) Jan/DJ8NK, Uwe/DJ9HX, Werner/DJ9KH, Hawa/DK9KX, Hans/DL6JGN, Ron/PA3EWP and Leszek/SP3DOI will be active as E51M from Manihiki between March 27th and April 10th. Activity will be on 160-6 meters using CW, SSB and RTTY. Flights are booked and paid for. All equipment, except the transceivers, are already on Manihiki. In all they have eleven vertical antennas and a small 4 element beam for 6m. They plan to set up 5 stations using K3's with 500W amplifiers. QSL via DJ8NK, direct or by the Bureau. Online QSL Requests Service (OQRS) for the Bureau and direct cards can be made after April 20th. The E51M Web page is available at: http://www.manihiki2012.de/index.html (Ohio/Penn DX Bulletin #1044) 9 Jan. 2012 - 10 Apr. 2012

** E51EME - 6m dxpedition to the South Cook Islands, BG08

Just leaving for Rarotonga in the Cook Islands until late January. I'll be replacing the 5 element Yagi at E51CG's QTH with a 7 element Yagi and will be active on 6m with my IC706 and a HB 8877 PA ... mostly looking for Es and F2 propagation, but might appear on JT65a EME at my moonrise or moonset (both over water) during the low degredaation days.

SOURCE: tnx Bob ZL1RS/E51EME direct to MMMonVHF

** T32 W. kiribati

>From 17 January to 2 February 2012, a team of six operators will be active from Kiritimati [Christmas Island] (OC-024, WW Loc. BJ12HA) in Eastern Kiribati. Each team member will operate with their own callsigns, with activity on 160m to 6m CW and SSB. T32WW and T32CO will also operate both RTTY and PSK.
The group will put in a full Multi-Op effort for the CQWW 160m CW Contest (27-29 January)

as T32XX (QSL via KB8TXZ). The operators are as follows: Dave, VO1AU (T32AU - QSL via VO1MX); Brian, KG8CO (T32CO - QSL via KB8TXZ); Lee, N8LJ (T32LJ - QSL via K8ESQ); Ted, K8AQM (T32TR - QSL via KB8TXZ); Jim, KB8TXZ (T32TX - QSL via KB8TXZ); and Stan, AC8W (T32WW - QSL via KB8TXZ). The team will operate from the same location as the recent T32C DXpedition. Website: www.t32kiritimati2012.com/

** E2E EME-expedition to Thailand

I am happy to announce that there will be an EME-DXpedition in Thailand around 18th of April. A group of Expats (HS0ZFZ, HS0ZFD, HS0ZGQ and me HS0ZIL) are planning to activate some rare squares in northeastern Thailand daywise! The special callsign will be "E2E". The DXpedition will take place in order to assist the "Radio Amateur Society of Thailand (RAST)", who had lost all their equipment at the Club Station HS0AC in BANGKOK during last flood. So any donations for this activity are welcome and will be transferred to RAST Treasurer. An own website and/or an DX-Blog on http://www.mmmonvhf.de/ will be setup in the near future. Stay tuned on these sites for further informations!!! Pictures of the destroyed Club Station can be seen here: http://www.qsl.net/rast/ 73 to all

SOURCE: tnx to Karsten, DL2LAH/HS0ZIL direct to MMMonVHF

** Vietnam, XV2

Vietnam, XV2. Take, JA6CNH, will be active as XV2CNH from Ho Chi Minh City between February 10-15th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via JA6CNH direct only. (Ohio/Penn DX Bulletin #1044) 9 Jan. 2012 - 15 Feb. 2012

** DXCC: FG ; Square: FK96 ; Start: 2011-12-28 ** USE or SUBSCRIBE: http://www.mmmonvhf.de/latest.php?id=4041

Again this year F1DUZ and F6APE will catch the moon from Guadeloupe Island as FG4KH (FK96HF) LATEST NEWS from Phil, F1DUZ, dated
2012-01-05: From 01/01 to 04/01 5 new calls in the log for a total of 24 different. For tomorrow some activity in late afternoon and friday only in the evening 73 - NEWS from Phil, F1DUZ, dated
2012-01-01: 22 QSOs in the log. The conditions will be not good in the next days but I will try to be QRV at moonrise exept if the degrad is too high. 73 all

SOURCE: tnx to Phil, F1DUZ, direct to MMMonVHF

** PJ4C 2012 - Official Bulletin No 3 - QRV as well 50 MHz **

All the team wish you an happy New Year 2012. We are now a few days from departure and all the team is very enthusiastic. In mid-December around 600Kg of equipment has left Europe to Bonaire, Peter PJ4NX will take care of it until our arrival. Jeff F6AOJ has repaired equipment damaged in TJ9PF last year, Mat F5PED has prepared the 30m 4sq, and Yann F1NGP has configured all the computer network. Thanks to all the F6KOP team everything has been prepared and packed on time. Eric ON7RN and Peter PJ4NX have organized everything with the shipper. Read all in detail at: www.mmmonvhf.de/latest.php?id=4092

SOURCE: Maurice, F5NQL, F6KOP member direct to MMMonVHF

We will use the following equipment:
5x FT 450, 1x Icom IC7200 & 7000, 1x K3, 6x Acom 1010, 1x 50 MHz PA
4x Spiderbeam 5 Bands, 1x Spider 3 Bands, 1x Spiderbeam WARC, 1x 5 element 50 MHz I0JXX, 1x VerticaL 20m, 1x Four square 30m, 1x Four square 40m, 2x Verticals 80 (CW and SSB), 1x Vertical 40m, 1x L 160m Beverages.
We have also in-band filters for 80 and 75m simultaneous operation. Jean Paul F8BJI made the operating schedules. The 7th station will be used on 6m (sometimes as a beacon on 50.104MHz, please let us know is there are any openings).
F4AJQ leader, F6ENO co leader, F1NGP leader SSB, F8BJI leader Digi, F9IE leader CW. F5UFX will be our pilot and webmaster. F5NQL will be in charge of communication. F9IE is our QSL manager.
Logs will be uploaded as frequently as possible. Departure is scheduled from Paris January 12, 2012 morning, arrival in Bonaire late in the evening.
We would like to thanks our sponsors for their help. Of course you could help us to cover the expense for shipping all equipment, even small contributions are very appreciated, you could use paypal on our web site or send an email to f6eno@wanadoo.fr See you in the pile-up. Best 73ï¿½s from all the team. www.PJ4C.com Forwarded with 73, by Maurice, F5NQL, F6KOP member https://twitter.com/f5nql 8 Jan. 2012 - 23 Jan. 2012

** V21FS and V21ZG, qrv from FK97CC on HF and 50 MHz **

Babs, DL7AFS and Lot, DJ7ZG will once again be active as V21FS and V21ZG, respectively, from the Villa Sundowerns, near Pottery Village, island of Antigua (NA-100, WLOTA 1118, WW Loc FK97CC) beginning 5th March 2012, for a few weeks. Focus on 16-6m if sunspots allow Mainly RTTY, PSK and SSB. V21ZG will look especially for JA and QRP stations. QSL via the German QSL-bureau DARC to DL7AFS, or direct. Website: www.qsl.net/dl7afs/
SOURCE: [dx-world.net] via ICPO Bulletin (30 Dec 2011 - 06 Jan 2012)

DXNL 1762 - Jan 11, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

9Q, DEMOCRATIC REPUBLIC OF CONGO
Sergey,UV5EVJ (ex-5X1VJ), is working for the UN in a peacekeeping
mission (MONUSCO) in the province Katanga from Jan 12 until May 9.
He plans to work in CW and SSB on 80m-10m during his spare time.
His callsign is not known yet. QSL via homecall.

CE, CHILE
Luis,CE2/CX1EK, will be QRV again from Marbella mainly in CW on 12m
and 17m until April. QSLs for CE2/CX1EK unfortunately only direct to:
Luis Matho, 2303 Nordok Place, Alexandria, VA 22306, USA.

F, FRANCE
The Radioclub of Tulle celebrates the 10th anniversary of the intro-
duction of the Euro with the special callsign TM10E from Jan 7-21.
You can apply for a special award when you have worked stations from
all 17 Euro countries. See QRZ.com. QSL via F5KTU.

G, ENGLAND, EU-005
The special callsign GB80PW marks the 80th jubilee of the amateur radio
magazine "Practical Wireless". The editor Rob,G3XFD, will activate the
call in SSB/PSK31 mainly on 40m once a month throughout 2012, on the
publication day which is the 2nd thursday of the month.
QSL via G3XFD, unfortunately only direct.

HA, HUNGARY
The Greek catholic diocese Hajdudorog exists for 100 years now which
is marked by the special event station HA100CGCDH. QSL via HA0MO.
An interesting virtual tour of the cathedral can be found at:
http://www.digicart.hu/vs_photos/krpano/hajdudorog-tour.html

HK, COLOMBIA
Lothar,DK8LRF, will be QRV as HK3JCL in SSB/PSK31/RTTY/Pactor on 10-40m
from Colombia (FJ34fg) between Jan 16 and Mar 26. QSL via homecall.

JA, JAPAN
The special event stations 8N1JARL, 8N5JARL, 8N8JARL, 8N9JARL and
8N0JARL are active on the bands until Mar 31. The occasion is the
conversion of the JARL of an "Incorporated Association" into a
"General Incorporated Association" in the course of a reform.
QSL via bureau.

JD1/MT, MINAMI TORISHIMA, OC-073
Take,JG8NQJ, will be back on Minami Torishima (OC-073) for three months
starting on Jan 16. He will be QRV as JG8NQJ/JD1 in his spare time
mainly in CW and only some SSB. He will run only 50 watts to minimize
interferences with the sensitive equipment of the weather station.
QSL via homecall (bureau) or via JA8CJY (direct).
Logsearch at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

LZ, BULGARIA
The special event station LZ1818MOG remembers the Bulgarian martyr
and saint Onufrii Gabrovski until Jan 31. The station counts also for
the "All Bulgarian Saints 2012" award. QSL via bureau.
See also: http://www.balkanclub.org/awards.htm

P4, ARUBA, SA-036
Ed,W0YK, is QRV as P49X and plans also to take part in the upcoming
ARRL RTTY Roundup. QSL via homecall, LoTW. Info at: http://www.w0yk.com

PJ4, BONAIRE, SA-006
A large group with F4AJQ, PJ4NX, K4SV, I2VGW, N2WB, PA0R, DJ7JC, DJ9RR,
DL1YFF, OE3GCU, OE3JAG, ON7RN, F1HRE, F1NGP, F4DLM, F5EOT, F5VHQ, F2VX,
F6BIV, F6ENO, F6JMT, F8BJI, F9IE, OZ1IKY, F5QF and F8ATS will embark on
a major expedition to Bonaire (SA-006) from Jan 12-23. Their callsign
will be PJ4C and they want to make 80.000 QSOs in 11 days. Maybe they
will return with a new world record for RTTY. Operation will take place
also in SSB and CW with six stations all around the clock.
QSL via F9IE and LoTW. OQSL is possible via Clublog.
Check also their website at: http://www.pj4c.com

SP, POLAND
The big Christmas Charity exists for twenty years. The radio amateurs
are involved with several special stations active from Jan 2-15:
3Z0WOSP QSL via SP5ZRW
3Z20WOSP QSL via SP5YOW
HF0WOSP QSL via SP2KFL
HF5WOSP QSL via SP5PMD
SN0WOSP QSL via SP5KCR
SN20WOSP QSL via SP5KP

T32, EASTERN KIRIBATI, OC-024
A team of six plans to produce pile-ups from Kiritimati Island (OC-024,
Loc BJ12ha) in CW and SSB on 160m-6m from Jan 17 until Feb 2. T32WW and
T32CO will be QRV also in RTTY and PSK and T32XX will be used in the
CQWW 160m CW Contest. Their individual calls with QSL route are:
T32AU (OP VO1AU) QSL via VO1MX
T32CO (OP KG8CO) QSL via KB8TXZ

T32LJ (OP N8LJ) QSL via K8ESQ
T32TR (OP K8AQM) QSL via KB8TXZ
T32TX (OP KB8TXZ) QSL via KB8TXZ
T32WW (OP AC8W) QSL via KB8TXZ
T32XX (multi OP in the CQWW 160m CW), QSL via KB8TXZ.

T8, PALAU, OC-009
Mike,T88SM (JA6EGL), Yasu,T88CP (JA6UBY), Masa,T88BI (JH6KXG), and
Yu,T88HK (JE6DND), will be active from Palau (OC-009) in CW and SSB on
80m-10m from Jan 11-19. QSLs via homecalls, unfortunately only direct.

TX6, FRENCH POLYNESIA
Jacques,F6BEE, Gilles,VE2TZT, Michel,FM5CD, Vincent,F4BKV, and
Nigel,G3TXF, plan to activate also other islands before and after the
VP6T DXpedition to Pitcairn:
TX6T Tahiti Island (OC-046) Jan 14-16 and Feb 8-10
TX6T/p Mangareva Island (OC-063) Feb 6-7
The exact dates of these short activitities are depending on their trip
to and from Pitcairn. QSL via G3TXF.

UA, RUSSIA
The special event station R10DDX celebrates the 10th jubilee of UE3DDX
during the month of January. QSL via R2DX.

V2, ANTIGUA AND BARBUDA ISLANDS, NA-100
V25RV is the callsign of Naoki,JN1RVS. He is working on HF from Antigua
and Barbuda. QSL unfortunately only direct or LoTW.

VP2V, BRITISH VIRGIN ISLANDS, NA-023
Dave,GM0LVI, is spending his holiday on Cooper Island (NA-023) from
Jan 11-21. Listen for VP2V/GM0LVI in CW and SSB on 20m-6m using a
FT-817 with 5 watts, GP and dipoles. QSL via homecall.

VP6, PITCAIRN ISLAND, OC-044
The VP6T team travels to French Polynesia on Jan 12 and makes a stop
on Tahiti (OC-046) for three days. They will fly with a small plane to
Mangareva Island (OC-063) next. If they have sufficient time remaining
they plan to operate as TX6T (QSL via G3TXF) from Tahiti and Mangareva
as well. Another trip of three days later they want to produce large
pile-ups from Pitcairn (OC-044) starting on Jan 20. There will be three
stations active around the clock working in CW/SSB/RTTY on 160m-10m.
They extended their stay on Pitcairn for one week until Feb 4.
QSL via G3TXF, LoTW. More details can be found at: http://www.vp6t.org

VP8/A, ANTARCTICA, AN-016
Slava,UA1PAI, is active as RI1ANA on all bands from the Russian base
"Molodezhnaya" (AA UA-06, WAP RUS-08, WFF RFF-161) until mid March.
QSL via RK1PWA.

Bhagwati,VU3BPZ, will be QRV from the new Indian Bharti Base between
Jan 15 and March 2013. The Bharti Base is situated at 69 deg South and
77 deg East (WAP IND-new!, IOTA AN-016) in the Larsemann mountain range

on the Princess Christensen coats in Princess Elizabeth Land.
Bhagwati plans to put up his HF station after finishing his winter
duties and he is still waiting for a special callsign. QSL via I1HYW,
Gianni Varetto, Via Pancalieri 2, I-12030 Casalgrasso (CN), Italy.

VP8/F, FALKLAND ISLANDS, SA-002
Zorro,JH1AJT, plans to visit Bob,VP8LP, from Jan 21-28 and wants to
make a few QSOs as VP8DNT in holiday style on 80m-10m. QSL via JH1AJT.

VU, INDIA
Several members of the "Indian Institute of Hams" (VU2IIH) in Bangalore
and the "Mangalore Amateur Radio Club" (VU2RDO) will be QRV as VU17NYF
on all bands during the "17th National Youth Festival" from Jan 12-16.
QSL via bureau, 3 IRCs are needed for direct QSLs.
See also: http://www.nyf2012.in/nyf

XU, CAMBODIA
A Japanese group visits Sihanoukville from Jan 14-22. The OPs are
Masumi,JA3AVO (XU7AVO), Takeo,JA3BZO (XU7AEN), Tsuguya,JA3UJR (XU7UJR),
Kunio,JA1CJA/JH3LSS (XU7CJA), Shozo,JA3HJI (XU7HJI pending) and
Tatsuo,JA3ARJ (XU7ARJ pending). As last time they want to work again
in CW, SSB and digital modes on 160m-6m and maybe als via satellites.
QSLs via homecalls.

XV, VIETNAM
Takehara,JA6CNH, will be QRV again as XV2CNH or XV3CNH in CW/SSB/RTTY/
PSK/JT65 on 160m-6m from Jan 10-15. QSL via homecall.

YS, EL SALVADOR
Luca,IW2CXJ, is spending his holidays in El Salvador from Jan 11-24.
Listen for YS3/IW2CXJ in all modes on 40m-10m running 100 watts into
a Cushcraft R7. QSL via homecall, only direct, LOTW or eQSL.

YV, VENEZUELA
The Radio Club Venezolano - Casa Regional de los Valles del Tuy is
activating the special callsign YW6MOTO on 40m/20m/6m from a motor bike
expedition from Cua to Manaus on Jan 5/6 and again on Jan 11/12.
Participants are Mayka,YV5ALO, Luigi,YV5PI, Pedro,YV4BHH and Karl,YV5YA
QSL via bureau.

ZD8, ASCENSION ISLAND, AF-003
Sted,ZD8S, has been spotted again in SSB on 20m with his new antenna.
His equipment includes a TS-480 and a 20m vertical dipole. Sted plans
also other antenna projects. QSL unfortunately only direct.

WCA Happy Birthday
The Castles Award Program exists for three years now. HAMs worldwide
are activating castles on Jan 14-15, the WCA Happy BirthDay (WCA HBD).

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-014, A4, Ash Sharqiyah/Al Wusta Region group: A41WW/p is working from
Masirah Island only in SSB on 80/40/20/17/15/10m until Jan 30.
QSL via EA5ZD.

NA-076, W4, Florida State Northwest Group: Wade,AA8LL/4, and Roger,K0RMK/4,
are spending their holidays on the Cedar Keys until January 16. Listen
for them in SSB, CW and RTTY on following frequencies:
SSB: 28460, 24950, 21260, 18128, 14260, 7155 kHz
CW: 28040, 24910, 21040, 18098, 14040, 10114, 7030 kHz
RTTY: 28082, 24925, 21079, 18102, 14079, 10139, 7039 kHz.
QSLs via homecalls (direct/bureau). Logs will be uploaded to LoTW and
eQSL as well.

NA-143, TX State East group: The operation by K5KUA scheduled for January
has been postponed. The new dates are:
Apr 5-8 - NA-143 Galveston Island
Jul 27-30 - NA-143 Galveston Island (IOTA Contest)
Aug 31-Sep 3 - NA-143 Galveston Island

NA-240, Bethel County group (Alaska): Due to bad weather the DXpedition
to Pingurbek (K6VVA/KL7) has been postponed until Jun 28-30.
More details can be found at: http://www.twitter.com/k6vva

==> + ARRL BOARD OF DIRECTORS GATHER THIS WEEKEND FOR 2012 ANNUAL
MEETING

ARRL policy is made by its Board of Directors. The 15 voting members
of the Board are the Directors who are elected by the ARRL members in
their respective divisions. The Board meets in January and July,
usually in the Hartford area. ARRL members also elect Vice Directors
who may attend the meetings. ARRL Directors and Vice Directors are
volunteers who work hard to represent the ARRL in their divisions, to
represent the members who elect them on policy issues and to conduct
the committee work that is so important to good decision-making.
```

The 2012 Annual Meeting begins on Friday, January 13 and is expected to run through Saturday afternoon. Usually, the Annual Meeting is held the third full weekend in January, but with the World Radiocommunication Conference (WRC-12) beginning January 23, the Board voted to hold its meeting early.

The two Standing Committees -- the Administration & Finance (A&F) Committee and the Programs & Services Committee -- will meet on Thursday, January 12. These two committees are made up of five Directors and a Vice Director, with the treasurer serving as an additional member of the A&F Committee. Read more here <http://www.arrl.org/news/2012-annual-meeting-of-the-arrl-board-of-directors-set-for-january-13-14-agenda-announced>.

==> + FCC NEWS: FCC DENIES ARRL PETITION ON VANITY, CLUB CALL SIGNS

On January 11, the FCC denied an ARRL Petition for Reconsideration concerning vanity and club call signs. Filed with the Commission in January 2011, the ARRL's Petition was in response to the FCC's Report and Order that detailed rules changes to the vanity call sign system and call signs for Amateur Radio clubs. These new rules went into effect on February 14, 2011.

The FCC noted that the ARRL supports its efforts to prevent club stations from obtaining an unfair share of desirable call signs, but expresses concern that the specific rule language adopted by the Commission "does not preclude the abuses that the Report and Order intended to preclude." In its Petition, the ARRL stated that if a club has multiple station trustees, each of these trustees could obtain a vanity call sign for the club, thereby allowing the club to obtain multiple vanity call signs. The ARRL also argued that a club could "'gam[e]' the club station vanity call sign system" by obtaining multiple FCC Registration Numbers (FRNs) and applying for a vanity call sign under each FRN. "We do not believe that the vanity call sign system is subject to the abuses identified by the ARRL," the FCC said, "or that it's suggested rule changes are necessary." Read more here <http://www.arrl.org/news/fcc-denies-arrl-petition-on-vanity-club-call-signs>
.

==> + ARRL MEETS 2011 FUNDRAISING GOALS

Thanks to the generosity of dedicated members and friends, the ARRL successfully met its 2011 fundraising goals. More than 6000 individuals and clubs supported the efforts of the ARRL this past year through gifts to the Diamond Club, the Spectrum Defense Fund, the Education & Technology Fund, the Historic Preservation Fund, the W1AW Endowment Fund and the ARRL Endowment Fund.

Many of the ARRL's programs and services would not be possible without the additional support of its members. The Development Office -- managed by Chief Development Officer Mary Hobart, K1MMH -- worked tirelessly throughout 2011 to make the membership aware of these needs. "I am proud to report that our members have enthusiastically and

generously responded to our appeals all year long," Hobart said. "Our overall goal for 2011 was $960,000. As of the end of the year, we had met -- and exceeded -- all expectations. To everyone who made this possible, thank you!" Read more here <http://www.arrl.org/news/arrl-meets-2011-fundraising-goals>.

==> + GET READY FOR THE FEBRUARY ISSUE OF QST

The February issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. This issue celebrates 50 years of the Amateur Satellite Service, marking the December 1961 launch of OSCAR 1, the first Amateur Radio satellite. Discover articles, projects and tips to improve your station, as well as information about operating activities that will keep you active on the air throughout 2012.

With energy costs skyrocketing, many people are looking to find ways to save on their electric bill. It's no secret that radios, amplifiers and all the peripherals in your shack can drive up the cost of your monthly usage. With this in mind, Mert Nellis, W0UFO, presents "Characterizing Solar Panels for Amateur Radio Applications." Solar panels use the Sun to produce electrical current to charge a battery, providing steady power for radios and small appliances. And moving your station off the grid may be easier than you think. In his article "Going Totally Green," Dave Gauger, W9CJS, explains that it is simple to make your station environmentally friendly. Gauger notes that he didn't set out to "go green" to save money on his electric bill, but did it for the fun and challenge, as well as to have the ability to provide substantial HF communications in the event of a major power outage.

This year marks the 75th anniversary of the ARRL's DXCC Award, the world's preeminent DXing award. To celebrate this milestone, the ARRL is presenting the Diamond DXCC Challenge. We are challenging DXers worldwide to work at least 100 of the 231 entities representing those on the original 1937 DXCC List. And when you're out there hunting that DX, why not swing your beam south for Antarctic Activity Week? Ruth Vano, KB0USC, tells the story of this annual event sponsored by the Worldwide Antarctic Program in her article "To the End of the Earth -- Antarctic Activity Week."

ARRL Contributing Editor Phil Salas, AD5X, takes a look at the Elecraft KPA500 HF/6 meter power amplifier in this month's Product Review. He says this "fully featured amplifier looks and works great on your desk or at your DX location. It's 160 to 6 meter 500 W capability, auto band switching and PIN diode switching integrate well with all transceivers." QST Product Review Editor Mark Wilson, K1RO, test drove four 25 A switch mode power supplies: the Jetstream JTPS30M, the Powerwerx SS-30DV, the QJE DX PS30SWII and the Ten-Tec model 941.

Of course, there are the usual columns you know and expect in the February QST: Happenings, Hints & Kinks, The Doctor Is In, How's DX,

Vintage Radio and more. Look for your February issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> ON THE AIR: THE ARRL JANUARY VHF SWEEPSTAKES MEANS WINTER CONTESTING FUN FOR EVERYONE

VHF operators will be on the bands in force the weekend of January 21-23, as the ARRL January VHF Sweepstakes hits the airwaves. This contest gives the VHFer in all of us a chance to do some contesting during the winter months. "Don't let the cold weather in much of the US dissuade you from getting on the air," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "Many a portable or Rover operation has done just fine in January. While propagation enhancement can seem fleeting in January, there have been some monstrous openings during this contest in years past. Who knows? Perhaps the propagation gods will grant us a late holiday gift with an extended aurora or tropospheric event!" Read more here <http://www.arrl.org/news/the-arrl-january-vhf-sweepstakes-means-winter-contesting-fun-for-everyone>.

==> + FCC NEWS: FCC GRANTS SPECIAL TEMPORARY AUTHORITY FOR AMATEUR SPREAD SPECTRUM EXPERIMENTS

Phil Williams, KA1GMN, has been granted a Special Temporary Authority (STA) by the Federal Communications Commission to conduct Spread Spectrum experiments within 2.5 kHz signal bandwidths on 160 through 2 meters, at a maximum of 100 W effective radiated power. The six month authorization takes effect February 1 and expires on July 31. The FCC has assigned Williams the call sign WF9XJD for use during his experimental transmissions. Read more here <http://www.arrl.org/news/fcc-grants-special-temporary-authority-for-amateur-spread-spectrum-experiments>.

==> + FCC NEWS: RADIO AMATEURS NOT AFFECTED BY NARROWBANDING REQUIREMENTS

The FCC released a Public Notice <http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db0105/DA-12-12A1.pdf>
on January 6, reminding land mobile licensees, frequency coordinators and equipment manufacturers that they have less than one year to transition to narrowband operations in the 150-174 and 421-512 MHz bands. While the latter frequency range includes amateur service allocations, radio amateurs are not affected by the narrowbanding requirement. Land mobile operation is permitted in parts of the 421-430 MHz band in the areas around Detroit, Cleveland and Buffalo, and land mobile licensees in these areas are among those who will have to migrate to narrowband (12.5 kHz or narrower) technology by January 1, 2013. Amateur operation is not permitted along the Canadian border

(north of Line A as defined in the FCC Rules) in the band 420-430 MHz.

==> + ON THE AIR: ARRL REQUESTS FEEDBACK FOR 60 METER BAND PLAN

In November 2011, the FCC released a Report & Order detailing new rules for the 5 MHz (60 meters) Amateur Radio band <http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters>. As of January 12, these rules have not yet been published in the Federal Register. In order to be official, the rules must be published in the Federal Register and will take effect 30 days after the publication date. The R&O brings with it a number of changes for 60 meter operators. Considering the expected increase in 60 meter activity when the R&O finally takes effect, the ARRL is asking for feedback to assist in crafting a proposed band plan. Read more here <http://www.arrl.org/news/arrl-requests-feedback-for-60-meter-band-plan>.

==> SOLAR UPDATE

Tad "Searching for a way to January Sun <http://www.youtube.com/watch?v=ztzMII6T-U4>" Cook, K7RA, reports: The average daily sunspot numbers were up this week by a tiny bit, from 88.1 to 90.6, while the average daily solar flux was down slightly, from 136.2 to 134.9. The latest daily projection from NOAA/USAF shows the solar flux about 15 points lower than the average for the week, at 120 on January 12-15, 125 on January 16-19, and then a jump of 20 points to 145 on January 20-26. It should decline again, and then rise to a peak of 165 on February 17-21. The predicted planetary A index is 5 on January 12, 8 on January 13-14, 5 on January 15-17, 8 on January 18-19, and then back to 5 on January 20-27. Look for more information on the ARRL website on Friday, January 13. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Vanden Plas' January Sun <http://en.wikipedia.org/wiki/Christ_0>.

==> TECHNOLOGY NEWS: VIDEOS OF 2011 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE NOW AVAILABLE ONLINE

Amateur Radio Video News (ARVN <http://www.arvn.tv/>) has released high-definition videos of all the talks presented at the 2011 ARRL/TAPR Digital Communications Conference (DCC <http://www.tapr.org/dcc.html>), held September 16-18. The programs are now available online on the ARVN website <http://arvideonews.com/dcc2011/index.html>.

The DCC is a three-day conference on Amateur Radio digital technology. Among the video presentations are 18 seminars, the Saturday Banquet and the welcome introduction by TAPR Chairman Steve Bible, N7HPR. According to ARVN Producer Gary Pearce, KN4AQ, most of the talks are fairly technical, although there are four separate sessions that cover "Intro to" topics. "All of the talks -- except the 'Intro to' talks -- were shot in three-camera high-definition, with wireless mics

for 'close-up' audio of the presenter, as well as the question-and-answer period," he explained. "The 'Intro to' talks were shot with a single, standard-definition camera.

This year, Pearce decided to release the programs on the web <http://arvideonews.com/index.html> instead of the DVDs that have been produced in previous years (although the DVDs will be available later). "I wanted to make the programs available more quickly and easily to a worldwide audience," he said. "The web has become an easy, high-quality distribution medium."

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Do you have a call sign license plate on your vehicle?
- Do you still have some vacuum tubes in your parts box?
- Will the new privileges on the 60 meter band make you more inclined to operate there?
- Are you active on APRS (Automatic Position Reporting System)?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the April 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- January 13 -- NCCC Sprint Ladder
- January 14-15 -- North American QSO Party (CW); WW PMC Contest; Michigan QRP January CW Contest
- January 16 -- Run for the Bacon QRP Contest
- January 19 -- NAQCC Straight Key/Bug Sprint

Next week:

- January 20 -- NCCC Sprint Ladder
- January 21 -- Feld Hell Sprint; LZ Open Contest
- January 21-22 -- North American QSO Party (SSB); Hungarian DX Contest; YL-ISSB QSO Party (SSB)
- January 21-23 -- ARRL January VHF Sweepstakes <http://www.arrl.org/january-vhf-sweepstakes>
- January 25 -- SKCC Sprint
- January 25-26 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 27-28 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfest-1>, Jackson, Mississippi
- February 4 -- ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>, Richmond, Virginia; ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-1>, Ladson, South Carolina
- February 10-12 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>, Orlando, Florida
- February 17-18 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>, Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>, South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention <http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest>, Del Rey Oaks, California; ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-2>, Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>, Birmingham, Alabama
- March 9-10 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana-hamfest>, Rayne, Louisiana; ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-green-country-hamfest-1>, Claremore, Oklahoma
- March 10-11 -- ARRL Roanoke Division Convention <http://www.arrl.org/hamfests/roanoke-division-convention-charlotte-hamfest-tm>,

Concord, North Carolina
- March 17 -- ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest
>,
Lincoln, Nebraska; ARRL Southern Florida Section Convention
<http://www.arrl.org/hamfests/southern-florida-section-convention-2>,
Stuart, Florida; ARRL West Texas Section Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-57th-annual-st-pa
trick-s-day-hamfest>,
Midland, Texas
- March 23-24 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine

WIANEWS WEEK COMMENCING JANUARY 15 2012.

FOUNDATION COURCES DATES FOR VK2, VK3, VK4

looking for et with seti

HAMFEST SEASON IN VK2 / 3 / 4

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JANUARY 15 2012.

I'm Geoff Emery, VK4ZPP, and I've been thinking.

It has been great to listen to the discussion points in WIA National News,
given by Onno, VK6FLAB, who as a broadcaster is a radio old timer but as an
amateur is new to our ranks.

Onno's short stories demonstrate that every person brings something to this
hobby other than the "ticket" to operate. The fact that some-one starting their
journey in AR has such enthusiasm and wishes to share what he has found is a
real shot in the arm for those of us who flounder in finding ways to get the
message across.

The life experience of a primary school student sitting for a foundation licence
is something to be expanded and the life experience of all is to be recognised

as being as valid as our own personal opinions.

I'm Geoff Emery and that's what I think....how about you?

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

This is Mal VK3FDSL

I wish to advise that the National Office of the WIA will re-open at 10am Melbourne time Tomorrow Monday 16th January 2012.

The Wireless Institute Of Australia extends to all radio amateurs very best wishes for the year ahead.

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news
Email Address : r_demkiw@yahoo.com.au

NO RADIO EXPO AT COFFS HARBOUR.

Oxley Region ARC newsletter, Oxtales advises the Mid North Coast Amateur Radio Group will NOT hold their Radio Expo in Coffs Harbour in January this year.

VK3
web service:- http://www.amateurradio.com.au/news/
Police Roundup http://www.vicpolicenews.com.au/

All roads lead to the Centre Victoria RadioFest at the Kyneton Racecourse, an hour from Melbourne, Ballarat and Bendigo on Sunday the 12th of February.

The major commercial traders will be there in the bustling Traders Hall. Look for their specials!

Pick up a bargain or two in the second-hand market areas - components, bits and pieces, connectors, cable, sealed lead acid batteries or antennas?

Want to make a sales table or car-boot space booking? Then be quick and obtain an application form via the home page of the Amateur Radio Victoria website.

Make it something you don't miss! The Centre Victoria RadioFest at Kyneton Racecourse on Sunday the 12th of February.

Points are contact are:
Commercial Traders Liaison, Barry Robinson VK3PV 0428 516 001
Second hand tables are space, Ross Pittard VK3CE 0408 533 107
Club Corner Precinct, Tony Hambling VK3VTH 0423 635 152

Welcome to QNews from VK4WIA. I'm Geoff Emery, Vk4ZPP and I've been thinking again.

dxcoffee.com/eng/2011/12/26/interview-kevin-white-operator-vk0kev-macquarie-island/

At the link given in the text edition, on the dxcoffee.com website is a follow up interview with Kevin, VK4KEV, on his operations as VK0KEV Macquarie Island. This is not unusual as the wider DX fraternity are very collegial and supportive of people who have gone to exotic climes and given the opportunity of rare calls in the log.

For as long as I have been associated with AR, there have been an infestation of pests who ignore their licence conditions and wouldn't recognize the Amateur's Code if it were tattooed on their chests. These have been the self opinionated and self appointed "big guns" who run excess power and ignore normal operating procedures just to snare the rare one. These operators call over the top of stations and often the DX station acknowledges them just to clear the air waves for the courteous op's.

I mention this because one point that Kevin makes in this interview is the use of a new technique to clear this garbage from the air. To count for awards, a valid QSL must be given by each station.

I know we hear a lot of 5/9 reports these days when signal strength may be marginal with multiple repeats but at least these are valid contacts.

What does the "big gun" operator do with a logged signal report of 0/0?

No good for DXCC and no good for further pestering the DX operator for another useless report. It seems that this method is being used more frequently and more of the "big guns" are falling silent.

For behaviour that spoils the hobby, putting these individuals on the naughty chair seems only fair.

I'm Geoff Emery and that's what I think....how about you?

Neil VK4NF from the Bunya Mts & District Amcom reminds all visitors as well as locals Saturday the 4th February is their Ham & wine hamfest in the Maclagan hall in down town Maclagan from 0900 to 1400hrs.

" Table bookings are just $10 each and stall holders will be allowed in after 0700hrs to set up.

For more info, or to receive a flyer with the details, please send an Email to myself at holmzie@bigpond.com or Ricky, vk4nrl@wia.org.au

Be there or be square we would love to see you there.

The proceeds from the day will be put towards promoting Amateur radio, IRLP, APRS, etc, and recruiting new amateurs to the great hobby.

So put the date in your diaries, Saturday the 4th February doors open at 0900hrs. Remember it is towards the west, and not way out west, being about a 50 minute drive north west of Toowoomba."

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

Padre John, VK4BZ, who has spent the last 7 months in Afghanistan with 2RAR will be returning back to Australia in the next 3 weeks. John said, "Thank you for your support over the last seven months and for the emails and letters of encouragement - even the Padre needs encouragement sometimes, and your words have been just that for me. Blessings to all and we'll see you back in the Land Down Under - with green grass, fresh milk, amber fluid, bitumen roads and amateur radio!"

It will be good to see you back safe and sound John.

Last week's news had a story about by Darren, VK4DJH, who made a QRP contact to Italy, using 5 watts. The contact was placed on Utube at 1900DAZZA. Darren has now been informed that the ARRL has entered the contact into a competition and we are all hoping for the best for Darren.

The next technical talk will be on 16 Jan 2012 and will be by Steve, VK4CZ, and will cover the topic of 6 metre DX. In February, John VK4CJC, will discuss Calibrating SWR and Power meters, in March, Kevin VK4UH, Meteor Scatter, April, Phil, VK4FIL, Digital Modes and in May, Peter VK4EA, Software Defined Radio. Remember, Club technical talks are the third Monday of the month and all amateurs and anyone interested in the hobby of amateur radio is invited to attend.

The next Club Working Bee will most likely be the 4th Saturday 9.00am (21st) February. This working bee will to repair and replace guttering that was to be completed last year but unfortunately time ran out. Club members, who meet each Wednesday morning, have completed the movement of the kitchen bench and now the dishwasher can be installed.

If you are free any Wednesday morning in the Redcliffe area and want a quick chat and a cuppa, call in to the club rooms and you will be made welcome.

Wednesday night trivia is back for 2012 on the Redcliffe 70 cm repeater starting at about 7.30 pm local time.

The club's ATV System nearing almost at completion. Peter, VK4EA, demonstrated the capability of the system last Monday night and a few small calibration tweaks yet required before it goes on air.

There is a new starting date for all licence training courses conducted at the club. Training courses will start second weekend of February 2012. Foundation, Standard and Advanced courses will be held subject to the number of applicants. Anyone interested should contact Roger, VK4ZLQ, via the club's web site, www.redclifferadioclub.org.au/.

You do not have to be a club member to participate in the course.

Well this is about all at the moment and so it's 73 until next time from
Ray, VK4CF, from the Redcliffe club.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

January 1-31 VK Ross Hull Memorial VHF UHF Contest

January 14-15 VK Summer VHF-UGF Field Day

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

May 5 VK/trans Tasman Contest 80metres SSB

June 9-10 VK Shires Contest.

June 25 VK/trans Tasman Contest 160metres SSB

July First full weekend NZART Memorial Contest

August 11-12 VK Remembrance Day Contest

August 18-19 WW International Lighthouse Lightship Weekend.

Prefix hunters will be interested to know that Croatia is marking the 20th
Anniversary of the allocation of the 9A prefix. Operators there are permitted
to insert the figures '20' into their callsigns.

For example 9A2AA will become 9A202AA, 9A1MM becomes 9A201MM etc.

These prefixes are available throughout 2012.

(irts)

PA8A will be active as PJ4B from the island of Bonaire.
Listen out for him until 22 January.
His operation will be holiday style on the high frequency bands only.
QSL direct only via PA8A.

VE2XB will be active as J79XB from Dominica for several weeks.
His operation will be holiday style on all bands from 10 to 160m and possibly
6 metres if there are openings.
QSL via VE2XB as listed on QRZ.com

The VP6T team have started the journey to French Polynesia, with the first stop
in Tahiti, which is IOTA OC-046, for three days.
They will then take a small airplane to Mangareva Island, OC-063.
They plan to be active from Tahiti and, if time permits, also from Mangareva as
TX6T.
QSL via G3TXF.

Denmark has the Presidency of European Union until 30 June and the callsign
5 P 12 EU will be activated during this period.
QSL cards will be available and there is an award scheme for working or hearing
this callsign.
For all details on QSLing, the award scheme and logs, check out www.5p12eu.dk

2012 is the 75th anniversary of the ARRL's DXCC Award, the world's preeminent DXing award. To celebrate this important milestone, the ARRL has gone back to the beginning -- the 1937 DXCC List.The Diamond DXCC Challenge will test DXers ability to contact all the 231 entities on the original DXCC List.

ARRL tried to find corresponding entities today that would represent the places listed in 1937, and they were mostly successful. There are a couple of places that were merged, like French and British New Hebrides, and the Papua and New Guinea Territories. In those places, for 2012 if you work a YJ or a P29 (on the main island of New Guinea) you will get credit for working two entities! Many other oddities are sprinkled throughout the list, too. Returning to the air in 2012 will be the Canal Zone (any HP operating within 8 kilometers of the Panama Canal), the Cities of Gdansk, Poland, as well as Ifni, Morocco and Balochistan.

For some entities that now consist of multiple countries, you may work any of today's entities to qualify for that single 1937 country. For example, French Equatorial Africa will be considered worked if you log a station in TL, TN, TR or TT in 2012. The Diamond DXCC country tables show the current entity names and prefixes that qualify for the 1937 countries.

Read more here
http://www.arrl.org/news/arrl-diamond-dxcc-challenge

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

In VK3 and interested in getting your licence?

The entry level Foundation Licence continues to be the most popular way of getting into amateur radio. It is attracting those who have had some previous hobby radio communications interest (CB, 4WD, Scanner Listener) and others who are attracted to ham radio for the first time.

2012 Weekend Foundation Courses:-

March 24th & 25th
April 28th & 29th
July 21st & 22nd
Septr 22nd & 23rd
Nov 17th & 18th

VK4's Redcliffe Radio Club advise classes for Foundation, Standard and Advanced licences will commence in early March and the Advanced licence course will run until September.

Those interested read the club's web site, www.redclifferadioclub.org.au/

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

British Villagers were left unable to use their showers, doorbells and even car key fobs for several days in the latest case of suspected wireless interference.

Families in Kingsclere on the Hampshire-Berkshire border, spent much of the festive season without heating after the failure of household systems which rely on digital technology.

Ofcom the UK regulator claims often these problems can be caused by a video sender that transmits a television signal to other sets in the house.

The heating system failed, and a neighbour experienced other difficulties.

People living in Southampton had reported earlier that their remote car key fobs had stopped working. That problem was tracked down to a faulty video sender which was leaking a frequency which interfered with the fobs.

Residents in Windermere, Cumbria, had similar problems in March which were eventually traced back to a wireless device used to take orders at a nearby restaurant.

CAN I HAVE "AMATEUR RADIO" FOR $800, ALEX?

Popular television game show Jeopardy, where contestants have to answer in the form of a question had a question featuring Amateur Radio.

Playing the category "Pastimes" the contestant encountered this "answer" worth $800: "The FCC assigns call signs, like N8DNR, to use in this hobby."

N8DNR is call sign of Debbie Dorfman the mother of Stephen Dorfman N6DIW (SK).

Stephen was Jeopardy!'s longest serving and most prolific writer, with more than 50,000 clues to his credit. As part of a team of writers, he won six Daytime Emmy Awards for special-class writing, given for shows that do not fit into traditional categories!

SETI is at it again manning the Allen Telescope Array of 42 dishes northest of San Francisco in search for life from outer space.

Researchers were scanning the heavens for the presence of an intelligent alien civilisation back in 2007, but last year ceased due to budget restraints.

The Allen Telescope has begun using Kepler satellite data which includes the hunt for hunt for planets.

The Allen array is scouring the 54 planet candidates Kepler had detected and what is described by astronomers as the first habitable zone to date

SETI and ham radio have had a long association with one another going back several decades.

Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

==========

NEWS FROM ARNEWSLINE AND RSGB

S-E-T-I or SETI is an acronym that stands for the Search for Extraterrestrial Intelligence. On Monday December 5th, Jill Tarter, who is the director of the Center for SETI Research at the SETI Institute announced that the group has begun re-observing the Kepler worlds using a ground-based radio telescope system.

SETI's Allen Telescope Array or A-T-A is a set of 42 dish type antennas located about 300 miles northeast of San Francisco, California. It began scanning the heavens for electromagnetic signals that could betray the presence of an intelligent alien civilization back in 2007. In January of 2011 the SETI team started training the Allen array on the 54 planet candidates Kepler had detected what is described by astronomers as the first habitable zone to date. Then it was shut down due to budgetary constraints.

Once funds became available, SETI researchers reactivated the Allen Telescope and have begun using Kepler's discoveries to guide its activities. The Kepler space telescope was placed on-orbit in March 2009. Its mission is to hunt for Earth-size planets in their parent stars' habitable zone. That would position such planets at just the right range of distances from their home star where liquid water and perhaps life as we know could exist.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburgh, Pennsylvania.

Prestigious award for IOTA heads

Roger Ballister, G3KMA and Martin Atherton, G3ZAY are recipients of the Yasme Excellence Award for 2011, for their dedicated work for the Islands on the Air programme.

The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to amateur radio, including DXing and the introduction and promotion of amateur radio in underdeveloped countries. Everyone at the RSGB would like to congratulate both Roger and Martin on this well deserved award.

NO 40 METER CONTACTS POSSIBLE WITH THE ISS

According to a note from the Amateur Radio on the International Space Station team, rumors that the ISS was having direct contacts on the 40 meter band are false. The reason that this is not possible is that there is no high frequency radio gear on board the orbiting outpost.

What is likely being heard is space station audio being retransmitted by an amateur station on the ground. ARISS notes that WA3NAN which is the club station at the Goddard Spaceflight Center in Greenbelt, Maryland, is among those that retransmit shuttle audio.

Signal travels 2,200 miles with OPERA

Using the new OPERA datamode, Gary, G4WGT successfully transmitted a signal to Joe, VO1NA on 137.5kHz, a distance of 3,500km.

Gary transmitted six full callsigns in a two hour period, which is a big time saving over modes like QRSS.

The OPERA mode was envisaged by Graham, G0NBD and coded by Jose Ros, EA5HVK, as a way of providing data operations for stations who only had the CW capability.

Andy K3UK has written a guide on how to get started with the new amateur radio digital mode OPERA.

OPERA was initially developed for the 500 and 136 kHz bands but radio amateurs have also been using it on 10 MHz (30m) and other HF bands.

Read the Quick Guide to OPERA at
http://www.obriensweb.com/operaguide.html

The most up to date information on this mode can be found at the OFFICIAL site:
http://groups.yahoo.com/group/O_P_E_R_A_/.

HONORING FESSENDEN AND HEISING NEAR 500 KC

Finally this week, in honor of inventors Reginald Fessenden and Raymond Heising, a special operation is taking place on 472.5 kHz. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of the details:

As early as 1900 Reginald Fessenden was experimenting with the direct transmission of human speech. A bit later, during WW1, Raymond Heising was developing a method of constant-current modulation that was one of the earliest forms of Amplitude Modulation.

Brian Justin, WA1ZMS/4 is part of the ARRL's Low Frequency WD2XSH Experimental License. With the cooperation of commercial coastal CW station WNE and the FCC's Office of Engineering Technology Justin has received a Special Temporary Authority with call sign WF9XIH. This to permit AM transmissions with a center carrier frequency of 472.5kHz until March 1st.

Reginald Fessenden is best remembered for his Christmas Eve 1906 transmission. It was comprised of him playing the violin, playing a recording and him reading a Bible verse. Justin began his operation the week of December 18th of 2011 with a special recreation of that 1906 Christmas Eve transmission:

Actual transmission audio.

According to Justin, WF9XIH is licensed for up to 20 watts Effective Radiated Power and he says that every effort is being made to run as close to that ERP as possible. The antenna is a 160 meter dipole that tends to be very lossy when fed by a 600 meter signal. This is the same antenna that he has been using for his WD2XSH/31 operation.

WF9XIH transmissions are being coordinated with W-N-E and any changes to the WNE schedule will alter the WF9XIH operating times. The current plan is to make at least one Heising modulated AM transmission most evenings at 02:00 UTC. Audio loops of speech and a series of stepped audio tones will be used most of the time The stepped audio tones should make it easier for DX listeners to demodulate them in CW or SSB mode even when they are well beyond the range of the AM signal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

If you happen to copy a WF9XIH transmission, WA1ZMS requests that you log it at www.500kc.com

Information about the ongoing WD2XSH/31 operation can be found at tinyurl.com/wd2xsh31

International Museums Weekend

The International Museums Weekend special event will this year take place on the double weekends of 16th & 17th and 23rd & 24th June.

Radio amateurs are encouraged to participate in this event by setting up stations in their local museums. Organiser Harry, M1BYT asks that all those intending to take part in the event should register their museum via the from on the International Museums Weekend website, www.ukradioamateur.co.uk/imw

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

New Amateur Radio Home Construction List

Electronic home construction (DIY) is undergoing a boom at the moment with Maker and Hacker groups springing up everywhere. A new amateur Radio builder list has started to cater for the growing interest in building simple projects.

If you are currently a ham radio builder, or interested in becoming one, the Hamradio-builder mailing list has been created with you in mind.

Diane Bruce, VA3DB says of the list, "A recent look at some old 73 Magazines brought to mind the simple projects this magazine produced.

So my thought was to do something similar, but meant for the web instead of dead tree. I am not talking a full fledged magazine, but a website where we can put simple beginner type articles, with copious photos and good instructions. We hope it will become a bit like Maker Magazine but for the radio amateur."

The project is just getting started. If you are interested in joining this community you can sign up for the list at:
http://diana.db.net/mailman/listinfo/hamradio-builder

If you ARE an avid DIY 'selfer' particularly if you also are going to attend the Wyong Field Day to pick up some 'pre-loved' bits n pieces, have YOU thought about getting your Ham Licence?

wELL, Amateur Radio NSW will again be providing exam assessments at the Central Coast Field day at Wyong at the end of February.

Then in March the upgrade course for Standard and Advanced licenses in VK2 commences Monday evenings at VK2WI Dural and runs for several months. Details are to be found on the WIA web site calandar of events.

Full details are to be found in the text edition of this bulletin .....

education@arnsw.org.au or
telephone on either 02 9651 1490 or 0400 445 829 and leave contact details.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

Amsat draws your attention to a collection of interseting audio recordings.

The "Sounds from Space" collection on www.dd1us.de is a collection which has also a section dedicated to recordings of amateur radio satellite signals.

The idea is to give older radio amateurs the chance, to listen to signals of satellites which are already gone and the might have worked in the past, and to younger people interested in ham radio, to get them more excited in satellite communication.

In spite of the fact that the collection now gets close to 1000 recordings there are still missing recordings from some amateur radio satellites.

(vk7tw)

In order to certify the University of New South Wales BLUEsat safe for launch, the satellite needs to undergo vibration and shock testing.

BLUEsat is a basic low earth orbiting experimental digital amateur radio satellite being designed and built solely by students over at at the University of NSW.

Their immediate aim is to accurately recreate the conditions that BLUEsat will experience during launch.

BLUEsat members have designed and overseen manufacture of a mock interface that simulates the real manner in which the satellite will be secured to D.N.E.P.R's Space Head Module.

This new interface will be used to test the vibrational performance of the BLUEsat structure and, importantly, the integrity of the onboard electronics.

Once in orbit BLUEsat will be a digital amateur radio satellite, which means voice and data files can be uploaded to it by any amateur radio operator in the world over which the satellite passes.

Students from UNSW will continue to be the primary operators of the satellite while it is in orbit and continue the educational focus throughout the full satellite lifecycle.

A launch date is yet to be decided.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

WICEN Victoria has completed another very successful training exercise in conjunction with the "VicSuper" Murray Marathon conducted over 5 days from

26th - 31st December 2011.

The Marathon is a 404 Km Canoe race on the Murray River between Yarrawonga and Swan Hill on the New South Wales and Victoria border.

WICEN provided safety communications and logistical support during the progress of the event by establishing seven HF stations at the checkpoints on the riverbank amongst the red gums each day. The HF operations were conducted on 80 & 40 Meters as a controlled net managed by VK3AWI, while the remote stations used special call signs approved by the ACMA.

There were 120 canoes entered the event this year. Twenty-five amateurs attended the event and shared great camaraderie as they camped together each night.

The event will be on again this coming December 2012 between Christmas and New Year. If any one would like to be involved you can contact Graham Mason VK3KMG by telephoning (03) 59720704 and he will put your name on the list.

DISCUSSION POINT

What use is an f-call?

When I passed my Foundation License test I spent some months researching what equipment to buy, where to buy it from and how to configure it after I bought it.

In case you're wondering, I ended up with a Yaesu 857D with a Diamond SG-7200 dual band antenna and an SGC SG-237 antenna tuner for HF. I'm not mentioning those things as a recommendation, nor am I telling you about them because I think that's the best solution. I'm telling you about them to indicate that I purchased all my gear, straight from retailers, and now use the resulting kit as my station.

Last week I was at a club meeting where an Amateur of many, many years experience was holding a talk about VHF and UHF antennas that you can build in your kitchen with parts from your local hardware store. The excitement that this amateur had for making all manner of antennas was clearly evident and I came to realise that my path of buying all my gear, while successful in terms of making it on-air also left something behind, experimentation.

For months I've experimented with cables, connectors, batteries and locations. At a certain level I was "experimenting", making audio interfaces, battery leads, RF cables, etc. but this talk highlighted something for me personally that showed that until now I've not scratched the surface of experimentation.

My foundation license allows me to only use commercially produced transceivers, but it says nothing about anything connected to it. The talk showed that there is an infinite variety of antenna technology available and being produced and invented new each day. Some amateurs talk about a shed full of failed attempts and a little corner with some successes.

After being introduced to the beginnings of making my own antenna, I'm hooked. I'm sure I'll be spending at least some of my Amateur Radio time building antennas and learning from the experience. Perhaps one day I'll inspire the next person to build their own antenna too.

In the mean time I'm looking forward to learning from the Amateurs that went before me.

I'm Onno - VK6FLAB

Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

Amateur Radio Newsline(tm) Report 1796 - January 13 2012

Amateur Radio Newsline report number 1796 with a release date of
January 13th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The Supreme Court hears an appeal dealing
with broadcast indecency that could eventually impact ham radio and
other services. Also, the FCC turns away an ARRL vanity call sign
appeal dealing with club calls; Missouri exempts hams from a proposed
cellphone while driving law and ham radio to celebrate the life of
famed country music legend Johnny Cash. All this and more on Amateur
Radio Newsline(tm) report number 1796 coming your way right now.

(Billboard Cart Here)

RADIO LAW: FCC HEARS CHALLENGE TO FCC INDECENT LANGUAGE RULES

The United States Supreme Court heard arguments on Tuesday, January
10th about whether the FCC should still have a role in policing the
nation's airwaves or whether its indecency regulations violate
guarantees of free speech and due process. Whatever the justices
decide could also impact on other, non-broadcast services as well.
Amateur Radio Newsline's Cheryl Lasek, K9BIK, has more:

--

The broadcast networks have argued successfully in lower courts that in
a world where they exist side by side with cable channels, the Internet
and satellite provided programming that it is beyond the FCC's
jurisdiction and that singling them out is not only nonsensical but
totally unconstitutional. And in a court brief, Washington attorney
Carter G. Phillips, who represents several networks, told the court
that broadcasting is neither uniquely pervasive nor uniquely accessible
to children, yet broadcasters are still denied the same basic First
Amendment freedoms as other media.

Phillips continued by stating that to the average American viewer,
broadcasting is just one source among hundreds in a media-saturated
environment. He noted that with a mere press of a button on the remote
control one could switch from other to fully protected sources.

On the other side of this issue is the Obama administration which is
defending the FCC's regulatory powers. It told the court that in what
it calls a new media world that the FCC is still required to have

continued federal oversight of the public airwaves. This, to provide a haven for parents and children from the unregulated world of cable television and the Internet.

In his brief, U.S. Solicitor General Donald B. Verrilli Jr. wrote that generations of parents have relied on indecency regulation to safeguard broadcast television as a relatively safe medium for their children. He notes that the current regulations come from a 1978 Supreme Court's decision in the case of the FCC versus the Pacifica Foundation. There the court upheld the commission's decision that an afternoon radio broadcast of comedian George Carlin's 1973 monologue broadcast over New York City station WBAI about the so-called seven words that could not be said on television violated indecency standards. It was in that case where the Supreme Court found that the FCC was well within constitutional boundaries to police the radio and television airwaves during the times children would probably be listening, which was interpreted between 6 a.m. and 10 p.m.

As to the reason that this is an important case for ham radio and other personal radio services? Simply because traditionally enforcement of indecency violations in amateur radio, CB and the like has long been predicated on and tied to the standards used to guide commercial broadcasters. If the Supreme Court rules that the FCC cannot control indecent language in broadcasting it could be in effect saying that the government has no power on this issue in other services, including what's said on the ham radio bands.

For the Amateur Radio Newsline. I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

In recent years, the Supreme Court has regularly ruled in favor of free-speech claims. But during oral arguments none of the justices voiced any support for making a major change in the law barring broadcast indecency during safe haven hours. As we go to air it's not known when the Justices will render its decision in this case. (Various published reports)

**

RADIO LAW: FCC REJECTS ARRL PARTIAL APPEAL ON CLUB CALLSIGNS

The FCC has rejected a motion for partial reconsideration of revised rules enacted by the FCC. These to limit the number of vanity calls that any individual or club can hold.

In its petition the League stated that it supports the Commission's efforts to prevent club stations from obtaining an unfair share of desirable call signs. But it also expressed concern that the precise rule language adopted by the FCC did not preclude the abuses that the Report and Order intended to prohibit. Specifically, the ARRL believes that if a club has multiple station trustees, each of these trustees

could obtain a vanity call sign for the club. That in turn could allow the club to obtain multiple vanity call signs.

But in denying the ARRL appeal the FCC said that the Leagues petition does not provide any grounds for reconsidering the Commission's decision in the Report and Order. It said that the concerns expressed by ARRL about licensees attempting to evade the rules adopted in the Report and Order are already addressed by the Commission's licensing rules and processes. It notes that Section 97.5(b)(2) of its rules states, in part, that a club station license grant may be held only by the person who is the license or trustee designated by an officer of the club. In simpler terms, only one vanity call sign per club. (FCC)

**

RADIO LAW: FCC GREEN LIGHTS STA FOR TEXAS HAM TO RUN HF SPREAD SPECTRUM

The FCC has granted Philip J. Williams, KA1GMN, of Euless, Texas, a Special Temporary Authority or STA to conduct Spread Spectrum experiments on 160 through 2 meters.

The 6 month authorization takes effect February 1st and expires on July 31st. It limits Williams to a maximum 2.5 kHz of signal bandwidths at 100 watts effective radiated power. Williams was directed by the FCC to use the Experimental Station call letters WF9XJD during his investigational Spread Spectrum transmissions.

Previous experiments with Spread Spectrum technology have been conducted on the ham radio bands at 222 MHz and above where this mode of transmission is already legal. The Special Temporary Authority granted to Williams is the first permitting Spread Spectrum experimentation on the High Frequency and lower VHF bands. (FCC)

**

LOW FREQUENCY EXPERIMENT: OPERA ENCODED SIGNAL TRAVELS 2200 MILES

Opera has made a big debuet on the ham radio bands. Using the new Opera data mode, Gary Taylor, G4WGT, in Lancanshire in the United Kingdom has successfully transmitted a signal on 137.5 kHz across the North Atlantic to Joe Craig, VO1NA, in Toebay, Canada. This over a distance of 3,500 kilometers or 2200 miles.

Taylor transmitted six full callsign frames in a two hour period, which is a big time saving over other slow digital modes like QRSS. Opera was created by Graham Brown, G0NBD with the actual code written by Jose Ros, EA5HVK. This as a way of providing data operations for stations that only had the CW capability. The most up to date information on this mode can be found at groups.yahoo.com. (Southgate)

**

RADIO SCIENCE: UK HAMS EXPERIENCE DELAYED ECHO PHENOMENA ON 80 METERS

Two UK amateurs have reported hearing strong echoes on their 80 meter CW signals in the evening. Tony Roskilly, G3ZRJ in Herefordshire and Andrew Fairgrieve, GW3OQK in Swansea were in QSO on January 1st when they could hear another signal underneath theirs. It turned out to be an echo of their own signals.

Roskilly said the echoes were initially so strong that he had trouble monitoring his CW keying. The delay in the echoes was of the order of a quarter to a half second and the echo strength hit S9. Tests by Fairgrieve on the evening of the 3rd of January revealed the same phenomena at around 21.00 UTC, albeit weaker in signal strength.

Steve Nichols, G0KYA, is the chairman of the RSGB's Propagation Studies Committee. He says that these were unlikely to be round-the-world echoes, but could be due to a form of magnetospheric ducting where signals follow the earth's magnetic field lines down to the southern hemisphere before being bounced back along the same duct. Nichols said that this was quite rare and not really understood.

Amateurs are being urged to look out for any echoes on their 80 meter signals and report any findings to G0KYA (at) qsl (dot) net. (GB2RS)

**

RESTRUCTURING: DUTCH HAMS GRANTED BANDS AT 500 KHZ AND 70 MHZ

Dutch amateurs have been granted access to two new bands. The first is a low-band grant from 501 to 505 kHz on a secondary basis with power and mode restrictions. And like most of the European continent they also now are permitted operations from 70 to 70.5MHz. This also on a secondary basis with restrictions on the power output level that they can run. (GB2RS)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N8LFR repeater serving Bad Aex, Michigan.

(5 sec pause here)

**

RADIO LAW: MISSOURI EXEMPTS HAMS FROM PROPOSED CELLPHONE AND TEXTING LAW

Some good news for hams in the show me state. They won't be subject to a new law working its way through the Missouri legislature to control cellphone and texting while driving a motor vehicle. Matthew Chambers, NR0Q, is here with the details:

--

If you live in Missouri you might have heard, there is a new Senate Bill, SB 567, that has been introduced by State Senator Robin Write-Jones, a Democrat-St Louis to be considered in 2012 by the Missouri Senate. There is good news though in this bill if you're a ham radio operator. The last line of the bill contains the following exemption language:

Exempt are the use of two-way radio transmitters or receivers by a licensee of the Federal Communications Commission in the Amateur Radio Service.

That means that the mobile use of amateur transceivers is for now safe in Missouri.

For the Amateur Radio Newsline, This is Matthew Chambers, NR0Q. In Moberly Missouri

--

>From its wording, the exemption is only for ham radio so users of F-R-S, GMRS and CB might be subject to penalties unless the regulation gets changed to exempt theses personal radio services as well. (NR0Q)

**

RADIO LAW: LESS THAN ONE YEAR REMAINS FOR LAND MOBILE RADIO LICENSEES TO NARROWBAND

Land mobile radio service licensees operating in the 150 to 174 Mhz and in the 421 to 512 MHz bands now have less than a year to transition to FCC mandated narrowband operations. This as the regulatory agency issues a Public Notice reminding all licensees, frequency coordinators, equipment manufacturers, and other interested parties of the Commission's January 1, 2013 deadline to migrate to 12.5 kHz or narrower channel spacing technology.

By January 1, 2013, all VHF/UHF Industrial, Business and Public Safety Radio Pool licensees must operate on 12.5 kHz or narrower channels, or employ a technology that achieves the narrowband equivalent of at least one channel per 12.5 kHz of channel bandwidth. As of that same date equipment manufacturers will no longer be permitted to manufacture and import previously certified equipment that includes a 25 kHz channel spacing mode.

The FCC's Wireless Telecommunications Bureau, Public Safety and Homeland Security Bureau, and Office of Engineering and Technology have issued prior guidance by Public Notice regarding narrowbanding migration, compliance, and waiver requests. In addition, detailed information and references to other resources concerning narrowbanding are available at www.fcc.gov/narrowbanding.

We should add that the amateur 2 meter and 70 centimeter bands are not affected by this FCC mandated narrowbanding order. It only affects commercial land mobile operations.

In the world of amateur radio FM and repeaters, most regions already use 15 kHz channel separation on 2 meters. On 70 centimeters, some regions are reportedly considering a shift from 25 to 12.5 kHz in crowded urban areas. And to be different than the rest of the nation, Southern California shifted from 25 to 20 kHz inter system spacing in the 70 centimeter repeater subband several years ago. (FCC, ARNewsline(tm) archive)

**

RADIO LAW: VERIZON PROCEEDS WITH SPECTRUM ACQUISITIONS

A big move by telecommunications provider Verizon to ease its own spectrum crunch. Jim Davis, W2JKD, reports:

--

Verizon is set to invest in well over 100 licenses to operate broadband systems between 1700 MHz and 2100 MHz. This after spending $3.6 billion dollars to obtain spectrum from cable companies Comcast, Time Warner Cable and Bright House. Jim Davis, W2JKD, has the details:

Verizon says that the acquisition is a positive development which would take spectrum that had been gathering dust in the cable company's inventories and put it in the hands of a company with the motivation and wherewithal to put it to good use.

Lowell McAdam is Verizon's Chief Executive Officer. He recently told the Communications Daily industry newsletter that his company feels good about the acquisition from another perspective. This is because as Verizon has discussed its acquisition of spectrum with the FCC, it has found that one of the problems was there is a lot of spectrum that has been warehoused. This says McAdam takes spectrum with no plans for commercial service and gets it into the hands of somebody who will use it and allow additional investment and development.

Im Jim Davis, W2JKD.

--

Congress and the FCC are trying to push through a spectrum package involving the auction of spectrum in the television band but that has become bogged down in partisan politics. However it appears as if Verizon has taken the initiative to let the free enterprise market set the value and proceed on its own. (Future Communications)

**

DIY RADIO NEWS: CQ TO INTRODUCE MAKER COLUMN

CQ magazine will introduce a quarterly "Maker" column, to be written by Matt Stultz, KB3TAN, that will appear in the March, June, September and December issues of the magazine.

KB3TAN is the founder of "HackPittsburgh. This is a community workshop for makers in Pittsburgh, Pennsylvania. He has been a ham since 2009

and has integrated amateur radio into many of HackPittsburgh's activities.

As already reported, the hacker and maker movement is a worldwide do-it-yourself phenomenon among mostly younger, tech-savvy individuals who enjoy hands-on tinkering and experimenting with electronics, crafts and similar projects. Many "makers" are not familiar with amateur radio, even though hams have been "makers" since the dawn of radio. CQ says that the goal of this column to help build and strengthen bridges between the amateur radio and the maker communities. (CQ)

**

DIY RADIO NEWS: MULTIPLE LANGUAGE VERSIONS OF THE DIY MAGIC OF AMATEUR RADIO

And speaking of the maker and hacker communities, while it's not even been out a month, there appear to be several groups that have either asked permission to translate the ARRL's new the DIY Magic of Amateur Radio video into other languages or are already undertaking such a project.

Since its release last December 27th, word is that versions with either sub titles or over-dubbed audio are being prepared by individuals or groups around the globe in the Spanish, Portugese and possibly even Russian languages. And these are the ones that are known about.

Also, Tom Medlin who hosted the December 27th release of the video on his W5KUB website has made available some statistics. These show that the new video had viewers in Canada, Venezuela, Mexico, Argentina, France, Cayman Islands, Puerto Rico and New Zealand as well as across the United States.

Those who have not yet seen the new video can do so on-line on YouTube in English at tinyurl.com/arrl-diy-movie. You can also watch it or download it at www.arrl.org/DIY. (ARNewsline(tm))

**

HAM PUBLICATIONS: WINTER 5 MHZ NEWSLETTER NOW ON LINE

The Winter edition of the 5MHz Newsletter has just been published and includes a chart of the current 5MHz allocations worldwide. Although originating in the United Kingdom the publication invites worldwide readers and contributors to take an active part in its creation. The latest edition of the 5MHz Newsletter can be downloaded free of charge at tinyurl.com/72mozfx. (GB2RS)

**

NAMES IN THE NEWS: FORMER UK OFF SHORE DJ KNIGHTED

Some names in the news. First up is Roger James Gale, a Disk Jockey on Radio Caroline North and Caroline South in the 1960's, who has been

knighted in the United Kingdom's New Year's Honors List. Gale had a long career in radio before becoming the member of Parliament for the North of Kent. He is also the president of the group Conservative Animal Welfare. More about Roger Gale is on-line at www.rogergale.com. (Southgate)

**

NAMES IN THE NEWS: G3KMA AND G3ZAY NAMED WINNERS OF YASME AWARD

And congratulations to Roger Ballister, G3KMA and Martin Atherton, G3ZAY on being named as recipients of the Yasme Excellence Award for 2011. This, in recognition for their dedicated work for the Islands on the Air program. The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to amateur radio, including DXing and the introduction and promotion of amateur radio in underdeveloped countries. (RSGB)

**

NAMES IN THE NEWS: VLA TO BE RENAMED KARL G JANSKY VLA

The world's most famous radio telescope will become the Karl G. Jansky Very Large Array on March 31st. This, to honor the founder of radio astronomy which is the study of the universe using radio signals naturally emitted by objects in space.

The National Radio Astronomy Observatory announced the new name for the National Science Foundation's Very Large Array at the American Astronomical Society's meeting in Austin, Texas. The new name will become official at a rededication ceremony at the radio telescopes site in New Mexico.

The new name was selected from among 23,331 suggestions submitted by 17,023 people from more than 65 countries. The National Radio Astronomy Observatory had asked the public and the astronomical community to suggest names that reflected both the proud heritage and the future promise of the telescope array. More is on-line at tinyurl.com/jansky-vla. (NARO)

WORLDBEAT: THE HCJB COAX CABLE MIRACLE

Word that religious broadcaster HCJB has gotten its Radio Rasuwa project on the air as of last December the 1st, but not without a little divine guidance. An HCJB article about the rural Nepal radio project noted that engineer Ty Stakes fortuitously grabbed an extra length of coaxial cable as he packed for the journey to that lonely corner of the world. And it's a good thing that he did.

It turned out to be needed because the station's studio was not where it had been planned. Once on-site, Stakes and HCJB missionary Toffer King discovered the tower was not the one they had requested. Using local talent, translations and drawings solutions were crafted. A local welder found himself quite busy and needless to say that the extra length of coax that Stakes brought with him came to good use.

HCJB's Global Technical Center in Elkhart, Indiana provided the FM transmitter. The station's coverage area is the northern border of Nepal with an estimated 14,000 people as its potential audience. This includes a large number of Tibetan refugees fleeing Chinese control of their country.

The station will air 17 hours a day, in the local language. It joins five other HCJB FMs in Nepal. Three more are expected to launch during 2012. (RW, HCJB)

**

WORLDBEAT: RAC LOOKING FOR NEW DEFENSE OF AMATEUR RADIO FUND TRUSTEE

Radio Amateurs of Canada is looking for a person to fill the recently vacated position of trustee in the Canadian Defense of Amateur Radio Fund. The Defense of Amateur Radio Fund trustee must be a licensed Canadian radio amateur and may not be an officer, employee, director or agent of Radio Amateurs of Canada. The Defense of Amateur Radio Fund is a Trust Fund established in the early 1990's to provide financial support for travel expenses of an amateur radio representative on the Canadian delegation to World Radio Conferences to defend the amateur radio bands. If you fit the requirements and are interested in this position please provide your name and a brief resume of no more than 500 words by e-mail to Paul Burggraaf at Vo1prb73064 (at) rac (dot) ca. (RAC)

**

WORLDBEAT: IRTS TO CELEBRATE 80TH ANNIVERSARY WITH CONTEST

The Irish Radio Transmitting Society which is Irelands national ham radio organization will be celebrating its 80th anniversary by sponsoring a worldwide contest to commemorate the event. Called CQIR, it will take place most appropriately on Saint Patrick's Day, which this year occurs on Saturday, March 17th. Full rules and information are available on-line at www.irts.ie/cqir or by email to cqir (at) irts (dot) ie. (IRTS)

**

WORLDBEAT: EMI SOUNDS PAGE FROM ON4WW

ON4WW in Westham, Belgium, has created a web page with sound clips that covers the many cases of interference he's dealt with over the years. The sounds cover everything from a rain gutter noise to plasma TV interference and even L-E-D lighting. The ON4WW RFI audio page page is on-line at www.on4ww.be/emi-rfi.html (Southgate)

HAM RADIO IN SPACE: DUTCH ANNOUNCE FUNCUBE LAUNCH AGREEMENT

An agreement has now been reached with ISIS Launch Services BV, based in Delft in the Netherlands, for them to provide a launch of the FUNcube-1 CubeSat satellite. It is anticipated that this will be with a number of other spacecraft from a DNEPR rocket, sometime in the third quarter of 2012.

The orbit is still to be defined precisely but it is expected to be nearly circular and approximately sun synchronous. The FUNcube-1 spacecraft will transmit signals that can be easily received directly by schools and colleges for educational outreach purposes. In addition to providing these educational services for schools and colleges around the world, the spacecraft will also carry a UHF to VHF linear transponder for radio amateurs to use during local nights, weekends and during holiday periods.

The construction and testing of the spacecraft itself has already been funded via a legacy and other sources. For more information, check out www.funcube.org.uk (GB2RS)

**

SPACE SCIENCE: CHINA RELEASES FIVE YEAR PLAN FOR SPACE EXPLORATION

China plans to launch orbital space laboratories and manned ships and prepare to build space stations over the next five years. This according to a plan released Thursday, December 29th that shows the country's space program is very quickly gathering momentum.

China has already said its eventual goals are to have a space station on-orbit and put an astronaut on the moon. According to news reports, that nation has made systematic progress with its ambitious human spaceflight programs, but its latest five-year plan beginning signals a major acceleration to its space exploration program.

According to the white paper setting out China's space progress and future missions, by the end of 2016 China says that it will launch space laboratories, manned spaceships and ship freighters. It will also make technological preparations for the construction of more than one space station.

China's space program has already made major breakthroughs in a relatively short time, although it lags far behind the United States and Russia in space technology and experience. More on China's plans

for its future in space is on-line at tinyurl.com/d52q2lj (Space Science)

ON THE AIR W4NH FOURLANDERS SEEK WSJT CONTACTS IN VHF SWEEPS

The W4NH Fourlanders group will again be operating in the January VHF Sweepstakes from January 21st to the 23rd from its location near Dahlonega, Georgia. That is in grid square EM-84-ao.

According to Jim Worsham, W4KXY, the group will operate limited multi category on 6meters through 432 MHz running a full gallon into stacked beams on all four bands.

W4KXY notes that the group is looking for skeds, especially 6 and 2 meters with those operating WSJT. If you are interested in such a scheduled contact please contact Jim Worsham by e-mail to wa4kxy (at) bellsouth (dot) net. (VHF Reflector)

**

DX

In DX, G3PHO will be on the air as 9H3C from Malta's Gozo Island between March 8th and the 15th. Activity will be on 80-10 meters and possibly 160m. Look for him to be an entry in the RGSB Commonwealth Contest. QSL via his home callsign or Logbok of the World.

JS6RRR will be operational stroke KH2 from Guam between February 10th and the 14th. Activity will be on 160 through 6 meters using CW, SSB, FM, RTTY and PSK31. QSL via JS6RRR.

IK2GZU will be in Tanzania to do some work at a new hospital and orphanage between March 4th and April 4th. He plans to be active during his spare time as 5H3MB on the HF bands. QSL via IK2GZU, direct or by the Bureau. Also, via Logbook of the World, but only after his return home.

IK2QPR will be active stroke PJ7 from Sint Maarten through January 16th. This operation will be holiday style on the H-F bands. QSL via IK2QPR.

IW2CXJ will be active portable YS3 from El Salvador through January 24th. His operation will also be holiday style on 40-10 meters using a Cushcraft R7 vertical and 100 watts. QSL via LoTW, eQSL or direct to IW2CXJ.

Lastly, OE3GEA will take to the airwaves stroke 6Y5 from Jamaica between February 2nd and the 12th. This will be yet another holiday style operation, mainly using CW. QSL to his home address.

And for those not familiar with the term holiday style, it basically means that the ham in question is on vacation and will get on the air anytime that he or she feels like operating, if at all.

(Above from various DX news sources)

THAT FINAL ITEM: CELEBRATING THE LIFE OF COUNTRY MUSIC LEGEND JOHNNY CASH

And finally this week, ham radio will help commemorate the life of a country music legend. Tim Goodrich, N5ASH, better known to radio listeners as Skeeter Nash, joins us with the details:

--

Members of my club, the Northeast Arkansas Radio Club will be sponsoring the first ever Johnny Cash Birthday Celebration Special Event Station. This, on what would have been the late Country Music Hall of Fame and Rock and Roll Hall of Fame members 80th birthday.

The Johnny Cash Birthday Celebration Special Event Station will take to the air on Sunday, February 26th using the special call sign N5C. You can listen out for it beginning at 18:00 hours UTC which is noon Central U-S time. We plan to operate for a six hour period ending around 6 p.m. Central US time. .

N5C will have stations operating SSB on the 80, 40 20 and 10 meter bands. At least one of these will be located in Dyess Colony, not far from the house where the Cash family once lived.

Johnny Cash never forgot his roots here in northeast Arkansas, and we in the amateur radio community are looking forward to having the opportunity to honor one of the most recognizable figures in music history. Those making contact with N5C will receive a commemorative certificate.

>From Jonesboro, Arkansas, Im Tim Goodrich, N5ASH, a-k-a Skeeter Nash of the Northeast Arkansas Radio Club reporting for the Amateur Radio Newsline.

--

More information on this celebration can be found at the Northeast Arkansas Radio Club website. It's located in cyberspace at nea-rc.org. The club also maintains a Facebook page at eww.facebook.com/nearadioclub (N5ASH)

SARL NEWS - SUNDAY 15 JANUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

UK RADIO AMATEURS EXPERIENCE DELAYED ECHO PHENOMENA ON 80 METRES

TREAT YOURSELF TO THE 2012 ARRL HARDCOVER HANDBOOK

APPLICATIONS FOR 2012 MAY EXAM BURSARIES NOW INVITED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

UK RADIO AMATEURS EXPERIENCE DELAYED ECHO PHENOMENA ON 80 METRES

Two UK amateurs have reported hearing strong echoes on their 80 metre CW signals in the evening. Tony Roskilly, G3ZRJ, in Herefordshire and Andrew Fairgrieve, GW3OQK, in Swansea were in QSO on 1 January when they could hear another signal underneath theirs. It turned out to be an echo of their own signals.

Roskilly said the echoes were initially so strong that he had trouble monitoring his CW keying. The delay in the echoes was of the order of a quarter to a half second and the echo strength hit S9. Tests by Fairgrieve on the evening of 3 January revealed the same phenomena at around 21:00 UTC, albeit weaker in signal strength.

Steve Nichols, G0KYA, is the chairman of the RSGB's Propagation Studies Committee. He says that these were unlikely to be round-the-world echoes, but could be due to a form of magnetospheric ducting where signals follow the earth's magnetic field lines down to the southern hemisphere before being bounced back along the same duct. Nichols said that this was quite rare and not really understood.

Amateurs are being urged to look out for any echoes on their 80 metre signals and report any findings to G0KYA@qsl.net.

TREAT YOURSELF TO THE 2012 ARRL HARDCOVER HANDBOOK

The SA Amateur Radio Development Trust has the 2012 ARRL Handbook in stock. The hard cover version comes at a special price of R600 plus R50 for packing and posting. The handbook is fully updated and includes: New Test Equipment and Measurements chapter, New projects, including High-Power RF Samplers, RF Current Meter, and a Two-Tone Audio Oscillator from the ARRL Lab, Updated ElsieT filter design software, Expanded content on CD-ROM, including an operating supplement for Space Communications, Digital Communications, Image Communications and a New comprehensive treatment of Noise. More details and order forms are available on www.amateurradio.org.za.

APPLICATIONS FOR 2012 MAY EXAM BURSARIES NOW INVITED

If you are under 26 years of age and are planning to write the May Radio Amateur class A Examination, you are invited to apply for a bursary from the SA Amateur Radio Development Trust. The bursary value is R1 000 and will pay for the exam fee, your first year license, student Membership of the SARL and tuition fees. Get details from www.amateurradio.org.za.

HOW TO MAKE LONG DISTANCE VHF CONTACTS DURING THE PEARS CONTEST

The PEARS National VHF/UHF contest starts on Friday 20th January and ends on Sunday 22nd January 2012 and is divided into two sessions. For full details and rules see the latest Blue Book. Please note that in the PEARS contest SSB and CW share the same contest frequencies. This is a wonderful opportunity to work long distances especially on 50 and 144 MHz with many VHF amateurs on frequency from other divisions. Here are some pointers.

1. Make regular short CQ calls on the contest frequencies of 50,200 MHz USB and/or 144,200 MHz USB and carefully listen for weak long distance VHF signals. When the frequency is occupied then call five to ten kilohertz higher in frequency. Do not have chats on these long distance frequencies.

2. If the SSB signals are marginal or unreadable then give a call on CW, which could result in a two-way contact. A CW signal is readily audible on Upper Sideband when it is transmitted about one kilohertz higher in frequency.

3. It is important to know when and in what direction to point your beam antenna, It is recommended that on the hour to the half hour transmit or listen in a northerly/southerly direction, and on the half hour to the hour turn the beam in an easterly/westerly direction. This way many distant contacts can be made.

4. Keep an eye on VHF beacons for band openings, such as ZS2X on 50,006 MHz, V51VHF on 50,300 MHz, ZS6JON on 50,050 MHz and ZS6TWB on 50,040

MHz.

Even if you are not interested in contests, come on the air and work some long distance VHF stations for fun, and give the VHF contestants some points. Good luck in the contest and enjoy the challenge.

NOMINATIONS FOR SARL AWARDS

Members and clubs are again invited to submit nominations to Council for the following SARL awards:

Honorary Life Membership - the SARL's highest honour.

Willie Wilson Gold Badge For the amateur that gave exceptional and meritorious service to the League.

Jack Twine Award To recognise qualities such as unselfishness, clean operating and a genuine interest in Amateur Radio and its affairs. This prestigious Award will be made to Amateurs who, in the opinion of their fellow amateurs and the League's Council, exemplify the qualities desirable in a Radio Amateur.

Arthur Hemsley 2 metre Trophy For a Radio Amateur for his/her individual achievements with transmissions in the 2 metre amateur band. This award is made for extraordinary performance on EME or modes such as tropospheric propagation. It is not for the longest distance worked but rather for persistence in achieving something special on 2 metres.

Barney Joel Trophy For any member of the SARL for the best performance during the year whilst working HF mobile. This award could be made for performance by an individual in rally or other public event communication etc.

Icom Excellence Award This award is bestowed annually on the amateur who through his/her activity in the Amateur Service has brought international recognition to South Africa by either the achievement of a VHF/UHF long distance record which is internationally recognized by the IARU, or by service to the Republic of South Africa or the SARL in the field of scientific research using the amateur spectrum, or in promoting the amateur service internationally or as Council may determine from time to time.

Joseph White Plaque For any member of the SARL for exceptional achievements in the 432 MHz band during the past year. This is not awarded for the longest distance worked, but for all round achievements.

Bert Buckley Six metre Trophy For any radio amateur for his/her individual achievements with transmissions in the six metre amateur band. This award is not for the longest distance worked but for outstanding work or activity on six metres.

Nominations can be sent by email to secretary@sarl.org.za. Please do it without further delay.

NATIONAL BAND PLANNING MEETING AT NARC

The national VHF/UHF/Microwave band planner and the repeater manager of the SARL invite all club repeater coordinators in the Gauteng area to attend a meeting at NARC on 21 January 2012 at 9:00. The focus will be around new repeater applications. Formal feedback and update session by them regarding the current state of affairs for repeaters and other VHF/UHF/Microwave matters. The updated band plans will also be discussed. Band planning correspondence may be done to vubandplanning@sarl.org.za. Specific repeater inquiries may be sent to repeaters@sarl.org.za. We look forward to hear from you!

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low level. Sunspot 1 393 has a "beta-gamma" magnetic field that harbours energy for M-class solar flares. For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 73.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today 15 January - Last day for submission of summaries of proposed papers for the Radio Technology in Action Symposiums 2012 to artoday@sarl.org.za. 20-22 January - PEARS National VHF/UHF Contest. 21 January - National VHF/UHF/Microwave band planning meeting at NARC at 09:00. 31 January - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January - Closing date for submitting papers for SA AMSAT Space Symposium.

Remember also to submit nominations for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur

frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

IRTS AGM & Rally 2012

The IRTS AGM, Annual Dinner and Rally this year is hosted by Dundalk Amateur Radio Society at the Fairways Hotel on the weekend of April 21st & 22nd 2012. Please keep your diaries free for this special event in our 80th Anniversary year celebrations. More details to follow.

IRTS Request for Return of Trophies

It is time once again to recall all trophies presented at the 2011 IRTS, AGM in Limerick.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday 12th February. or to any IRTS Committee Member before end of February 2012.

This will allow for engraving to be done and allow for repairs if necessary.

Early return will be appreciated. Peter EI4HX at ei4hxperimental /at/ eircom /dot/net

---

Nominations For Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS Trophies that are required from within the membership, this includes the awards for, 1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2 Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Jim EI4HH, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental /at/ eircom /dot/ net

Closing date for nominations is 29th February 2012.

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary this year 2012. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at /irts / dot/ie

---

New VHF - UHF Band Plan

Band Plans for amateur radio frequencies are revised from time to time following international consultations with users and special interest groups. The new Region 1 Band Plan for VHF and UHF frequencies came into effect on 1st January this year. The biggest changes are in the 6 metre band - with new beacon sub-bands and a number of new "centre of activity" frequency allocations. The revision in the 6 metre band plan is designed to give more bandwidth to CW and SSB users, while recognising increased activity levels in the new digital modes.

The revised Band Plan for the 6 metre, 4 metre, 2 metre and 70cms bands can be downloaded from the downloads page of the IRTS web site. Bear in mind that the 4 metre allocation in EI does not cover the full extent of the 70.0 MHz to 70.5 MHz band plan contained in the IARU document; a note showing the EI allocation has been added to the document which is on our downloads page.

Those operating on frequencies above 70cms can see the relevant band plans in the VHF Managers Handbook, which is available on the IARU Region 1 web site. Again, it is important to note the EI frequency allocations, which can differ from the limits shown on the band plan pages.

The South Eastern Amateur Radio Group (SEARG)

The South Eastern Amateur Radio Group's APRS node and weather station is back up and running having been off-air for a time due to sensor problems. It is now located at the Waterford City River Rescue HQ which is on the river Suir in Waterford City. The output from it can be viewed on www.aprs.fi, callsign is EI2WCP-2. Data (including graphs) are also available on the clubs web site at www.searg.com/weather.php. The club would like to thank Waterford City River Rescue for hosting the equipment.

The next meeting of South Eastern Amateur Radio Group will take place on Monday 30th of January at 8:30 p.m. in the Roanmore GAA centre, Cleaboy Road, Waterford and all are welcome to attend. The meeting will be preceeded by a committee meeting at 8:00 p.m., committee members are asked to attend.

For latest news from the group, visit www.searg.com and you can also follow South Eastern Amateur Radio Group on Facebook and Twitter.

South Dublin Radio Club

South Dublin radio club has returned after the X-mas break and there will be a number of talks in January

On the 17th January Joe EI7GY will give a talk on "The competitive side of Amateur Radio, including the DXCC programme and contesting"

Two weeks later on Tuesday the 31st January Colin McKeeman will give a talk on aeronautical radio communications on the North Atlantic and Shanwick

Visitors as always are welcome

Mid Ulster Amateur Radio Club

As promised in previous issues the Mid Ulster Amateur Radio Club can confirm the activation of the club callsign MN0VFW in support of the charitable RNLI SOS Week. The Club should be active on the HF bands between 11.00 and 16.00hrs GMT on Saturday 21st and between 10.00 and 15.00hrs GMT on Sunday 22nd January 2012. Thanks to the kind permission of Nigel Sands, 2i0 GLY, the Club will be operating from the shores of Lough Neagh at 'Sands Marine and Leisure', Kinnego Marina, Oxford Island, Lurgan, Northern Ireland, BT66 6NJ. As with all Mid Ulster events visitors are more than welcome to call in person and experience some of the Club's legendary hospitality.

The Club will also be holding an informal radio, computer and electronics 'bring and buy sale/coffee morning' on Saturday 4th February 2012 at Drumgor Resource Centre, Drumgor Road, Craigavon, BT65 5DL. Doors open at 11.00hrs, closing again at 14.30hrs. This is the ideal opportunity for individuals to offer for sale those items that have been cluttering the shack, piling up on the computer desk and filling the junk box. Floor space is available to members and non-members alike. Contact Brian Mi0TGO at muarc.secretary /at/ yahoo.co.uk for further details.

Please refer to our website at www.muarc.com for lots more Club and amateur radio information.

Shannon Basin Radio Club

The Shannon Basin Radio Club will be holding its AGM on the 27 January 2012 at 8.30pm in Hannons Hotel Roscommon. All members are requested to attend and all newcomers are welcome to attend. For more info please see www.shannonbasinradioclub.com.

Limerick Radio Club

The Annual General Meeting of Limerick Radio Club will be hold on Wednesday 8 February 2012 in the Limerick Institute of Technology at 7.30pm and all paid up members are requested to attend.

Rally: Limerick Radio Club rally will be held on Sunday March 11 2012 at the Radisson Blue Hotel on the Ennis Road, Limerick. Doors open at 11am and all the usual traders will attend. Bring and Buy tables can be ordered from Dermot Gleeson EI2GT.

Fermanagh Amateur Radio Lunch

Lough Erne Amateur Radio Club members gather for their annual winter lunch today, Sunday 15 January, at the Hunting Lodge, Irvinestown, in North Fermanagh. This happy family affair includes wives and children - there are two infant high chairs ordered. Chat on the year past will feature the Club station's award in June's 80 metre contest and Jamie 2i0MFB's award in the summer 2 metre contest. Jamie is 18 this month. Bob Mi6RAX also has a big birthday soon, his 80th. This year's big event is the thirty-first Lough Erne Rally at the SHARE Centre, in south Fermanagh, on Sunday 1 April - a date that is very easy to remember.

DX News

Serge UV5EVJ who was active as 5X1VJ from Uganda last year is now due to start a four month stay with the United Nations Stabilization Mission in Katanga in the Democratic Republic of the Congo. At the time of writing his callsign was not known but look out for him with a 9Q call until early May.

An unusual prefix is on the air for all of 2012 from the Philippines. To celebrate their 50th Anniversary the Philippine Amateur Radio League will use the call 4G0LD. QSLs go via the DU bureau.

A multi-national team will operate from the Pacific island of Pitcairn from 20 January until 4 February. They will use the callsign VP6T. QSL Manager is G3TXF. Pitcairn Island is famous as the home of the descendants of the Bounty mutineers. One of these is Tom Christian who was active as VP6TC.

'Practical Wireless' is celebrating its 80th year of publication this year and the Editor Rob Mannion G3XFD/EI5IW will operate the special

call GB80PW on publication day each month. Look for the call on the 2nd Thursday of each month.

Six operators from Holland/Belgium will activate the call TN2T from the Congo from 22-31 January. They hope to have three stations on 160 - 10m on SSB, CW and RTTY. QSL Manager is M0URX.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

33. Ohio/Penn DX Bulletin #1045

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1045
BID: $OPDX.1045
January 16, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K6VVA, KH6BZF, N7OU, N7UN, NN7A, K8GI, K8YSE, W8GEX (60m News), W9OL, 5Q2J, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HA0HW, I1JQJ/IK1ADH & 425 DX News, I1RBJ, LU1FAM, OZ6OM & 50 MHz DX News, PS7AB, RSGB IOTA Web Site, SM3CVM, TA1HZ, VA3RJ & ICPO, VHF-DX-Portal, YT3W and ZS2DL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-January, through Sunday, 15th-January there were 215 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/m, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2C, CONWAY REEF. Operators Hrane/YT1AD (Team leader), David/K3LP (Technical Co-leader), Aleksey/UA4HOX (Organization Co-leader), Paul/N6PSE (PR), Atilano/PY5EG, Vasily/RW4NW, David/WD5COV, Carlos/EA1IR, Joe/AA4NN, David/AH6HY, Alan/AD6E, Gabriele/I2VGW and Alan/K6SRZ (Medical Doctor) and possibly two others (spots are open!) will be active as 3D2C

from Conway Reef (OC-112) between September 25th and October 6th. Most of these operators were active from Rotuma as 3D2R last year. Activity will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31. Suggested frequencies are:
CW - 1822, 3503, 7005, 10105, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 1835, 3795, 5403.5, 7082, 14190, 18150, 21295, 24950 and 28495 kHz
RTTY - 1835, 3582, 7035, 10145, 14081, 18100, 21081, 24920 and 28081 kHz
SSTV - 3723, 7035, 14230, 21335 and 28680 kHz
PSK31 - 1835, 3582, 7035, 10145, 14081, 18100, 21081, 24920 and 28081 kHz

The 3D2C team will be active from Conway Reef on 2m and 6 EME using WSJT65 (A,B,C) on 50.375 MHz and 144.375 MHz. A 6 meter beacon will be active on 50.095 MHz. QSL via YT1AD, direct (w/SAE or SASE + 1 USD for normal postage, 2 USDs for Airmail) or by the Bureau. For more details and updates, visit the 3D2C Web page at:
http://www.yt1ad.info/3d2c/index.html

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQ 160-Meter CW Contest (January 27-29th) as a Single-Op/Low-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

4W, TIMOR-LESTE. Vlad, UA4WHX, is once again on the move and is currently active as 4W0VB from Timor-Leste (OC-148). His length of stay is not known as of press time. Activity has been mainly CW on 40/30/20/17/12 meters. QSL via UA4WHX.

7P8, LESOTHO. Donovan, ZS2DL, will lead a team of operators to Lesotho between November 9-19th. The team of 8 operators will be active on 80-10 meters focusing mainly on CW and RTTY with possibly some SSB. A callsign has not yet been assigned (currently awaiting official papers from the Lesotho Communications Authority - possibly 7P8D). Donovan is looking for operators and sponsors. QSL direct via: LESOTHO DXPEDITION 2012, P.O. Box 29169, Sunridge Park, 6008, SOUTH AFRICA (w/2 USDs - Please no IRC as it is difficult to convert at the post office). A OQRS system (PayPal) will also be implemented just before the expedition. Logs will be uploaded to LoTW within 12 months after the DXpedition has ended. For more details, visit: http://www.zs2dl.co.za
--or--
http://www.zs2dl.co.za/7P8D.html

8Q, MALDIVES (Date Change). Operators Bert/CX3AN and Mario/CX4CR will be active as 8Q7HU from Maafushi Island, Kaafu Atoll (AS-013), between February 6-15th. Activity will be on 80-6 meters using CW, SSB and the Digital modes. There will be a special emphasis on South America.

9M2, WEST MALAYSIA (Special Event). Neoh, 9M2CLN, station master for the Malaysian Amateur Radio Transmitter Society (MARTS), announced that the special event callsign, 9M4CNY, will be active to celebrate the "Chinese New Year Cultural And Heritage Celebration 2012" from Penang Island (AS-015) on January 29th, between 0700-1600z. Suggested frequency are

14288 kHz and 7088 kHz, SSB only. QSL only direct to address on QRZ.com.

A5, BHUTAN. Iain, G4SGX, will be active as A52JF from Bhutan between February 11-15th. Activity will be on 40-10 meters using CW, SSB, PSK and JT65. He will use K3 radio. QSL via his home callsign. For updates, watch Iain's Blog page at: http://www.g4sgx.org/blog

C5, GAMBIA. Alan, G3XAQ, will be active as C56XA from The Gambia between February 27th and March 15th. Activity will be on the HF bands using CW. Also, look for Alan to participation in the RSGB Commonwealth Contest (March 10-11th). QSL via G3SWH.

CT9, MADEIRA ISLANDS. Julius, OM7JG, will once again be active from Madeira Island (AF-014) as CT9/OM7JG during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry. QSL via OM7JG.

CT9, MADEIRA ISLANDS. Tibor, OM3RM, will be active as CR3A during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/High-Power entry. QSL via CT3EE. Look for him before the contest as CT9/OM3RM.

CY0, SABLE ISLAND (Update). From the <http://www.cy0dxpedition.com> Web page dated January 14th: "We are in the process of rescheduling the CY0 operation. Our business schedules will dictate, in part, when we can make another attempt. The goal is to select a time after the winter weather conditions to increase the certainty next time of being able to travel to Sable Island without delay from a winter storm. Once a date as been confirmed with the Sable Island station, we plan to recruit a CW operator, with DXpedition or contest experience, to 'round out' the team. With improving propagation conditions, the band conditions will provide more opportunity than two operators can satisfy. The plan is for:
1st Operator - WA4DAN - 70% SSB, 30% CW
2nd Operator - AA4VK - 100% SSB
3rd Operator - ?????? - 70% CW, 30% SSB
Continue to check the CY0dxpedition Web site and the various DX bulletins for updates."

DAYTON HAMVENTION (Press Release - SWODXA DX Dinner). Joe, W8GEX, reports:
"The SOUTHWEST OHIO DX Association (SWODXA) is pleased to announce that we will again sponsor the DX Dinner &#65533;, held in conjunction with the 2012 Dayton Hamvention&#65533;. This, our 27th annual dinner, will be on Friday, May 18,
2012. The dinner will again be at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, OH 45409.
There will be a cash bar starting at 5:30 p.m., with dinner served at 7:00. Following the meal, there will be a separate room and cash bar available for more fellowship. This is an excellent opportunity to meet new hams, and renew old acquaintances, as well as learn about past DXpeditions and those in the planning stages.
We were pleased with our new venue at the Marriott last year. The dining room is on the ground floor so there are no steps, there is a larger capacity, and there is ample free, on-site parking.

This dinner is always well attended by some of the most avid DXers in the world. As in the past, there will be some major door prizes, and there is always great anticipation as to who will be named the 'DXpedition of the Year'.
The Marriott is a large hotel with many room choices. Should you need accommodations, their Web site is <http://www.marriott.com/hotels/travel/dayoh-dayton-marriott> and their phone number is 937 223-1000.
Details and dinner reservation information can be found on the SWODXA Web site, at <www.swodxa.org>. From there, click on the DX Dinner icon. You can print the reservation form and submit it with your personal check or money order. And as an alternative, we are happy to announce that this year we are also accepting PayPal and credit card payments.
Program details and a list of the prizes will be on the Web site as they become available. Check out our Facebook page at 'Southwest Ohio DX Association', or follow us on Twitter @SWODXA"

FR, REUNION. Pierre, F8APV, will be active as FR/F8APV from Reunion Island (AF-016) between January 22nd and February 10th. Activity will take place everyday between 0100-0400z on 40/30 meters CW, and then between 1700-1900z on 20 meters SSB. QSL via his home callsign.

FS, SAINT MARTIN (Also PJ7). Benoit, F8PDR, will be active as FS/F8PDR from Saint Martin (NA-105, WLOTA 383, DIFO FS-001) between February 5-16th. Activity will be on 80-10 meters using mainly CW and RTTY, with 100 watts into a dipole and vertical antennas. He is also planning a side trip to Sint Maarten (PJ7). QSL via F8DPR, direct or by the Bureau and also LoTW.

HK0NA DXPEDITION (Latest News Dated January 12th). The following press release is from the HK0NA Web page [edited]: "The 'Fabulous Four' (Faber/ HK6F, Jim/HK1N, Bolmar/HK1MW and Salim/HK1T) advance team continue their work of building the infrastructure for HK0NA with emphasis shifting now to OP. A (top of the mountain). And ..in their spare time making some QSOs with the deserving.
Of course, we are hearing from a small minority that they are doing everything wrong and not listening here or there or whatever. May we suggest to you and everyone be patient, and remember that 16 more operators will be there the morning of the 21st for up to 17 days.
Yesterday the DXCC desk confirmed that QSOs made by the advance team, when they used their individual calls, will count for DXCC purposes. Those logs will not be available until after the DXpedition concludes. May we suggest that you work HK0NA also.
We intend to upload the HK0NA logs to ClubLog soon after the arrival of the main operating team. Don't bother checking the 'Log Online' until then.
Lastly, our volunteer pilots kindly request that you not contact them until after the main operation begins! .... Thanks to all!"
ADDED NOTE: Some pictures are now available and can be viewed on the HK0NA Web page under "Camp Setup". For more details and updates, visit: http://hk0na.com

LATEST MINUTE UPDATE: The HK0NA Web page is reporting: "For the last couple of nights there have been many bogus HK0NA spots on the clusters. While there is a limited operation by the advance crew, and thus some of the spots are valid, one or more 'slims' are apparently calling CQ using the HK0NA call." Read the whole press release on the Web page for more details under "Latest News".

IOTA DXPEDITION (NA-172/NA-050/NA-004). Rick, K6VVA, informs OPDX [edited]: "After completing NA-242 last July with Mike, K9AJ, 2012 is the year to now wrap up a 'Clean Sweep' of the KL7 North Slope IOTA #'s. Plans are to start with NA-172 left over from last year partly due to area fog problems. Mike may also join me for the other two. I hope to finalize NA-004 approval soon. Several other KL7 IOTA trips are also in the planning stages, and Mike (and I) still have NA-240 targeted for June 28-30th, 2012." Stay tuned for more details on the "KL7 North Slope IOTA EXTRAVAGANZA!!", by watching the Web page at:
http://www.k6vva.com/iota/na172
Also, check TWITTER at: http://www.twitter.com/k6vva
QSL "ONLY" via N6AWD (direct or by the Bureau). Rick states, "If I/we respond to a callsign or partial callsign that is NOT even close to yours, please QRX and do NOT call. Really. Seriously. And please, NO 'SAME BAND/MODE DUPES'!!!"

IOTA NEWS.....
EU-059. Operators Allan/GM3OZB, Barry/GM3YEH, Bill/GM3ZRT, John/GM0DJG, Gordon/MM0BIM and Declan/EI6FR will be active as GM7WCO/p from St. Kilda Island between May 16-21st. Activity will be on the HF bands and 6 meters using CW, SSB and possibly RTTY. QSL via GM7WCO.

NA-085. Dennis, WA2USA, is to be active as WA2USA/4 from St. George Island (USI FL007S, Franklin County, Fl) between February 1-27th. Activity will be on all HF bands. QSL via WA2USA, direct or by the Bureau. For more details, see Dennis's Web site at: http://www.wa2usa.com

SA-018. (UPDATE) Operators Roberto/CE3CT (ex-CE4CT), Pedro/CE3FZ and Luc/LU1FAM will be active as 3G7C from Chilo&#65533; Islands between April 15-18th. Activity will be focused on 30 meters and the low bands. They will have 2 stations active on CW, SSB and RTTY. QSL via: PO BOX 3159, SANTIAGO DE CHILE, CHILE. They are looking for funds and support would be appreciated, please contact: lu1fam@yahoo.com
For updates and operating frequencies, visit:
http://3g7c.blogspot.es

SA-030. Look for a Uruguayan team to activate Flores Island as CV5A during March. QSL via CX2ABC. No other details were provided.

J3, GRENADA. Once again, members of the "Buddies in the Caribbean" 2012 (Team #1) will mount a mini-DXpedition to Grenada (NA-024) between February 1-9th. The Buddipole team, which specializes in 100 watts or less low power

radios and the Buddipole portable antenna systems, will have fixed operations from a cliff-top villa and portable operations from various points on the island using CW, SSB, and the Digital modes, on 160-10 meters. The team consists of the following operators: Budd/W3FF, Mike KC4VG, Chris/W6HFP, Guy/N7UN, Bill/W7ZT, Weymouth/K8EAB, Paul/KB9AVO and Steve/WG0AT. Licensing is not yet complete, but each operator is expected to receive their J3/callsign. QSL via LoTW, eQSL, or mail to operator's home callsign (SASE required).

J3, GRENADA. Roy, KE4TG, will once again be active as J38RF between February 8th and March 8th. His primary interest is the Digital modes using a K-3 with a G5RV and phased vertical antennas. There may be some CW and SSB. QSL via his home callsign.

J3, GRENADA. Harry, AC8G, will once again be active as J37K between March 1-5th. Activity will include the ARRL DX SSB Contest (March 3-4th) as a Single-Op/High-Power entry. QSL to AC8G, stateside direct with SASE. For others sending by the Bureau, please clearly mark for QSLs to go to AC8G. Also via LoTW (a week or so after the contest).

JD1, OGASAWARA. Koji, JI1LET, will once again be active as JI1LET/JD1 from Chichijima Islands (AS-031) between April 29th and May 5th. Activity will be on 80-6 meters using CW, SSB and RTTY. QSL via his home callsign.

JW, SVALBARD. Torkel, LA6VJA, will once again be active as JW6VJA from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) for only 24 hours on February 11th. Activity will probably be on the low bands as it will be in the dark hours around the clock. QSL via LA6VJA, direct or by the Bureau. Also, he will upload his log to LoTW. For more details, visit: http://www.bitwrap.no/web/index.php?id=

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW. For more details, see: http://www.wix.com/n2tta1/kp2mm

P4, ARUBA. Helmut, DF7ZS, will be active from Aruba (SA-036) possibly as P40S from P40V's QTH between March 21-27th. Activity will include the CQ WPX SSB Contest (March 24-25th). QSL via DF7ZS.

PACIFIC TOUR (Changes To The HA Operation). Laci, HA0HW, received the following press release from Pista, HA5AO [edited]: "HA South Pacific Tour 2012 - Press Release II - (For immediate release) -- We had two focuses on our announced January/February 2012 South Pacific DX Tour: T2 and T30 with possible operation from T33. We are regret to advise that we had to cancel the operation from T2 and T30. That was the bad news. The good one is that our new target is C2, Nauru.

The reasons of these very last minute changes, which are out of our control, are as follows:
1) We had to cancel the T30 as the flights from Fiji to Tarawa have been suspended since 12 September 2011, due to the air traffic dispute between Kiribati and Fiji. There is high risk to extend the flight disruption for an even longer period. After the consultation with the airlines and our consulate in Canberra, we were advised that 'there is high risk of not getting to Tarawa or not being able to leave Tarawa for a long, undefined period of time. This situation does not affect the flights to Tuvalu and Nauru.' We were waiting until the very last minute hoping that the air traffic dispute between Fiji-Tarawa-Fiji will be solved, but the flights have not been restarted, yet.

2) The Tuvalu government declared a nation-wide state of emergency on 28 September 2011 due to critical shortages of drinking water. The state of emergency was declared after existing desalination plants broke, exacerbating an already dire situation. The water crisis is still serious on two of the worse affected islands, the capital island of Funafuti and Nukulaelae. The airlines still do not accept excess baggage at all, including hand luggages, because of the loads of drinking water containers by Red Cross. We could only check in less than a third of our technical stuff, resulting in significant and unreasonable limitation of the station set up. Due to this restriction we decided to cancel the T2HA Tuvalu operation, as well.

3) Due to the above detailed situation, we decided to change the target of our DXpedition to C2, Nauru. Operation is planned between 10th January and 6th February 2012 as C21HA with two stations on all HF bands. Log search and further info: http://ha5ao.novolab.hu

It was the first time that we asked support and received contributions from DX Foundations, DX Organizations and individuals. We appreciate these supports very much. However, we will contact all organizations and individuals who supported us, and will pay the donations back if these changes would make them disappointed, despite the fact that Nauru is much better ranked on the most wanted DXCC list.....
73' Pista, HA5AO and George, HA5UK"

EK6LP ON LOTW. Peter, G3ZSS, reports: "If anyone needs a QSO confirmed
on LoTW with EK6LP, then the secret is to send an E-mail to RN4LP with
the QSO details. My QSOs were then quickly confirmed on LoTW (within
1 hour!). I wonder why he just does not post the whole log on LoTW,
and only responds to individual requests???"
```

PLEASE HAVE PATIENCE.....
* JX5O QSLS. Stan, SQ8X, reported this past week about the delay of the JX5O QSL cards. He states, "In August 2011 I had been diagnosed a serious illness that put my life all upside-down. I really stopped counting how many times I've been to a hospital or clinic since then. I also had to put all things like my job, not to mention • hobbies • totally aside for a long while. Finally, after many months, I start to recover and feel slightly better and also finally got sometime to take care of things that really bother me because of the delay. One of them is JX5O QSL management, which I declare I'm still in charge of. I know that many DXers who worked us at Jan Mayen are really anxious about receiving the confirmation from JX5O. Unfortunately, the reason of the delay has been really serious. And the only thing I ask for now is a little bit more patience. All OQRS requests and direct requests are secured and there is no need to re-send them or to worry that your card has been lost." To read Stan's full press press release, go to: http://janmayen2011.org/jx5o-important-update

```
* Paul, I1RBJ, informs OPDX readers [edited]: "I left France last
November to recover in hospital in Italy for a very aggressive cancer.
I went twice under surgery and I survived although I am now almost an
invalid, but I thank God I'm still with Caterina, Sara, Luca and my old
parents. It's a very hard to accept for a man like me always around but
it's life and I must accept it.. I'll again be QRT for a long while for
I must undergo chemio and radio therapies. All QSLs must go now to my
Italian address (see QRZ) I'll do my best to send them quickly with
the help of my father I1RB. All the best to my fellow DXers, hope to
see you all again before too long.....Paul rbj"

** OPDX and its readers hope for a quick recovery for both Stan/SQ8X
and Paul/I1RBJ.
```

QSL STATUS ON E51MAN AND E51NOU. Bill, N7OU, reports: "The logs for E51MAN and E51NOU have been uploaded to LoTW. If you think there's an error, notify me by E-mail and I'll look into it. QSL cards for both callsigns are beginning to go out, but it may be 6-8 weeks before I'm caught up."

QSL RECEIVED VIA LoTW: 5B4AIF, AL9A, DP1POL, EI6IL, EI7M, FG5LA, HG6N, IO5O, IR1A, JA0FVU, JA1VND, OA1F, P49X, PA30BR, PY5ZD, S58N, SP3DOI, TO5G, VA7AM, VE5UA, XE2B, XU7ACY, ZK2V and ZS2EZ

QSLS RECEIVED VIA MAIL: 3D2R, 4L1MA, 5N7Q, 5Z4HW, 6Y3M, 7P8BA, 7Q7GM, 9G5MP, 9M6XRO, A25FC, A52VM, E51MAN, E51NOU, EL2LF, EL2WS, EX8MLE, FP/KV1J, HB9EHJ, HK4CZE, HR9/AI5P, J79WE, JW5AJA, MU/PA9M, PJ7NK, S9SS, TU2T, TY1KS, UA0MF, YJ0VK, YN2CC, ZD8ZZ, ZF2AH, ZK2V and ZS6EZ

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SI9, SWEDEN (Special Event). Special event station SI9AM from the King Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active once again between January 25-30th. Operators will be Raf/ON5RZ, Dirk/ON7DS and Fons/ON4AWT. The trio plan to be an entry in the UBA DX Contest (January 28-29th). Outside of the contest, activity will be on 160-10 meters using CW, SSB and FM. Suggested frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and repeater RV49 - 145.612.
QSL via SM3CVM, direct or by the Bureau. For more information, visit the SI9AM Web page at: http://www.si9am.se

T6, AFGHANISTAN (Update). J&#65533;rgen "Joe", 5Q2J/OZ2JBC, informs OPDX that he will be active as T6JP possibly late February. Joe is an electronic mechanic in the Danish Army. Activity will be on 160-10 meters depending on the conditions, mostly on RTTY, PSK and SSB with a Yaesu FT-857D (100W). QSL via 5Q2J. More details will be forthcoming.

TC2012, TURKEY (Special Event). Members of the Special Wireless Activity Team (TCSWAT) and the Giresun Radio Amateurs and Nature Sports Club (GITRAD), in collaboration with Turkish Society of Nephrology-Istanbul Branch, will be on the air as TC2012WKD on March 8th. Activity is taking place on "World Kidney Day" to raise awareness of the importance of our kidneys to our overall health, and to reduce the frequency and impact of kidney disease and its associated health problems worldwide. Operations will be on the HF bands using CW, SSB, BPSK31 and SSTV. Stations making contacts on three or more bands or modes will receive a special award via E-mail. QSL via the TA Incoming QSL Bureau or via TCSWAT. Details about "World Kidney Day" is available at: http://www.worldkidneyday.org

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the ARRL DX CW Contest (February 18-19th) as Single-Op/Single-Band entry. QSL via LX1NO.

TM70, FRANCE (Special Event). Members of the French Army ARC will be active and using the special callsign TM70TRS during the major domestic

and international contests throughout the year 2012. Activity is to commemorate the 70th anniversary of the French Army Signal Corps. Look for operations to also take place during French Army activities (like open doors and other meetings) and during the French "Coupe du REF" contests (both CW and SSB parts) on the last weekends of January and February. QSL via F6KHX.

V3, BELIZE. Art, NN7A, will once again be active as V31JZ/p, but this time from South Water Caye (NA-180) between January 27th and February 1st. Activity will be on 160-10 meters including the WARC bands and mostly CW using only 100 watts and wire antennas. There may be some SSB on the 20/15m IOTA frequencies, and if condition permit. Art will also be an entry in the CQ 160m Contest (January 27-29th). There will be no online log or skeds. QSL via NN7A, by the QSL Bureau or direct to: Art Phillips, P.O. Box 73, Eckert, CO 81418 USA. DO NOT QSL via the Belize QSL Bureau because there is no active V3 Bureau.

VK0, MACQUARIE ISLAND (VK0TH QRT??). It seems Trevor, VK0TH, has had enough with the bad behavior during the pile-ups. Trevor, who is expected to stay on Macquarie until the end of April, states the following on QRZ.com (January 14th): "VK0TH QRT - Operator behavior has become a problem JA stations and EU stations that constantly call over other stations, don't hear or jam have turned a fun hobby into a stressful environment. I worked over 200 JA stations today (13/14 January) and when sending NO JA in the call it all got very ugly. I will be QRT for the next few days while I reevaluate how much radio I will continue doing while on Macquarie Island and how it is done. My apologies to those that wanted VK0/M, I can't see this behaviour changing, and I'm not willing to spend my free time doing something that is no longer fun. My apologies. Trevor."
LAST MINUTE UPDATE (From QRZ.com, January 15th): Trevor, VK0TH, writes, "Change to Operations - The vast majority of operators are excellent communicators, patient and polite however the minority have made operations over the last week almost impossible. The number of contacts made this week is less than half of last week due to QRM.
Effective immediately - No longer will I list real time frequency information on my QRZ.com page, and I will no longer self spot on the cluster when I have limited time available. I will make a habit of 'dropping' into nets and conversations more often and will QSY when operations become difficult. Again my apologies, I thought I could work through these huge pileups and bring order to the chaos. Those that haven't been involved in these sorts of pileups have all the solutions, splits, work by numbers and can't understand what is so difficult. I will post some audio samples of SSB and CW pileups and perhaps that will give you some idea."

VP2, MONTSERRAT. Operators Norbert/DL2RNS, Olaf/DL7JOM and Rudi/DM2XO will be active as VP2MSN, VP2MOM and VP2MXO, respectively, from Montserrat (NA-103, WLOTA 1475) between February 27th and March 10th. Activity will probably be on 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns.

VP5, TURKS AND CAICOS ISLANDS. Operators Bill/N7OU, Bob/W7YAQ, Alan/K7AR and Rocky/NE7D will be active as VP5OU during the ARRL DX CW Contest (February 18-19th) as a Multi-Sinlge/Low-Power entry. QSL via LoTW or via N7OU. The group will be on the island between February 15-22nd. Outside of the contest, they will be signing VP5/homecalls, operating on 160-10 meters using CW, SSB and RTTY.

VP6, PITCAIRN ISLAND (Reminder/Update). Just a reminder that the VP6T Dxpedition from Pitcairn Island (OC-044, CQ Zone 32) between January 20th and February 4th. This past week, the VP6T Web page reported on January 11th [edited]: "Since we got many requests asking for 6m operations, EME, SSTV, 60m, etc .. we would like to clarify the following:
We are a small team of 5 operators, and we were very limited in baggage weight and size, mainly on the Air Tahiti domestic flight. So we had to make choices. While most of us are 6m operators, we had decided to not spend much of our precious time and effort on this band.
No antenna will be taken for 6m, as well as no time slot is booked for 6m in our operation schedule (it will already be very hard to keep 3 HF stations running 24/7 with 5 operators).
On the other side, we are aware there is potentially an old 5 element Yagi 6m antenna (left by OH2BR probably). If time permits, we will try to locate it and if it is still in good shape after 12 years spent on the island, then we may install it and make some tests on 6m, using conventional modes (CW and/or SSB). In that case, it will be announced on this web site, or on air by the HF operators.
So to summarize, 6m operation from Pitcairn has not been on our agenda since the early planning stage, as well as all others bands/modes that are not specified on this web site. Thank you for your understanding."
The QSL Manager is Nigel, G3TXF. In addition to the usual routes (Direct QSLing, QSLing via the Bureau and E-mail requests for Bureau cards to "QSL at G3TXF dot com"), they will also be using the new "Online QSL Request Service (OQRS) provided by ClubLog." For more details and the suggested frequencies, visit the VP6T Web site at: http://www.vp6t.org

XP2, GREENLAND. Henning, OZ1BII, will be active as XP2I from OX3KQ's QTH in Kangerlussuaq between February 24-29th. Activity will be on the "useable" HF bands mainly on CW. QSL via OZ1BII.

ZF, CAYMAN ISLANDS. Daryl, W7TAE, will be active as ZF2TE from Grand Cayman Islands (NA-016) between January 22-27th. Activity will be on 20-6 meters using mainly SSB with some CW. Operations will take place during his early mornings and afternoon hours. He will operate with 100 watts into a 1/2 wave vertical antenna. Daryl will also be active in the ARRL VHF Contest, 6 meters only on Sunday the 22nd. QSL via his home callsign.

ZF, CAYMAN ISLANDS. Operators Paul/W3GQ and Paul/W3HGT will be active as ZF2GQ and ZF2GT, respectively, from Grand Cayman (NA-016) between February 4-11th. QSL via their home callsigns. Both W3GQ and W3HGT state, "Log will be uploaded to LoTW upon return to USA. Direct QSL requests should include SASE and sufficient postage. Bureau card requests will be sent at no charge. eQSL by request only."

ZY78, BRAZIL (Special Event). On February 2nd, the Liga de Amadores Brasileiros de R�dio Emiss�o-LABRE (Brazilian Amateur Radio League) will be celebrating their 78th anniversary. In commemoration of the event, look for special operations to take place between February 1-5th, on all bands and modes. Also, look for the National LABRE station to be active using the special callsign ZY78AA during and throughout the month of February. All QSOs will be confirmed with a beautiful commemorative QSL card. To receive directly (by mail), send a SAE + IRC or 2 USDs. QSL to all LABRE callsigns via PT2AA.

GB2RS NEWS

Sunday 15th January 2012

The news headlines:

* RSGB representation at World Radiocommunication Conference

* SOS Radio Week coming up

* KA1GMN gets special spread spectrum licence

RSGB Past President Colin, G3PSM will be attending the World Radiocommunication Conference 2012 from 23 January to 17 February as part of the IARU Region 1 team. He will be posting up-to-the-minute news on the RSGB website. More information is at www.rsgb.org/WRC-12-news.

SOS Radio Week starts at 0000 on Saturday 21 January and concludes nine days later at 2359 on Sunday 29 January. It is a sponsored operating event, where registered stations operate for as much time as they can spare, making as many contacts as they can. All sponsorship money raised is donated to the Royal National Lifeboat Institution. Over the last two years the event has proven very popular and raised in excess of £6,500. This year looks like being another bumper year, with over 35 stations registered. Many of these are special event stations operating on specific days during the event from lifeboat stations around the country, but there are also several individual stations that will be operating all week from home and various other locations. Visit www.sosradioweek.org.uk for a list of participating stations and a registration form, if you would like to take part yourself, as it's not too late to register.

The American FCC has granted KA1GMN a Special Temporary Authority to conduct spread spectrum experiments on 2 to 160m. The 6 month authorisation starts on 1 February and expires on 31 July. It limits KA1GMN to a maximum 2.5kHz of signal bandwidths at 100 watts effective radiated power.

The popular Wainwrights on the Air scheme has been improved to make it easier to get involved. The Wainwrights are the 214 Lake District mountains described by Alfred Wainwright in his seven iconic guides. The WOTA scheme, which runs continuously, involves making contacts from and to the Lake District summits as an Activator or Chaser. The scheme now covers Wainwright's additional 116 Outlying Fells. Ascending the smaller Outlying Fells generally entails relatively easier hiking,

offering visiting amateurs a simple way to sample the scheme as Activators. 2m FM handheld equipment is most commonly used and a standard rubber duck antenna usually enables a number of contacts to be made from the summits. Using vertical and beam types will naturally increase success. More Chasers will also be welcomed, fixed, mobile or operating portable themselves. Information is available at the scheme website, www.wota.org.uk.

And now for the details of rallies and events for the coming week

The Red Rose Winter Rally takes place today, 15 January, at George H Carnall Leisure Centre, Kingsway Park, M41 7FJ. The venue is easily accessible from Junction 9 of the M60, opposite the Trafford Centre. Doors open at 11am. There is free car parking, traders, a Bring & Buy, special interest groups and an RSGB bookstall. Details from Steve, on 07502 295 141.

Also today, 15 January, the Dover Amateur Radio Club Rally takes place at Whitfield Village Hall, Dover CT16 3LY. There will be trade stands and a Bring & Buy. The next rally we have details for takes place on 29 January. The Horncastle Winter Rally will be held in the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission is £1.50. Details from Tony, G3ZPU on 01507 527 835.

Advance notice now that the Spring Kempton Rally has moved to 22 April to avoid a clash with the Blackpool Rally. Details are at www.radiofairs.org.uk.

Now for the news of special events

Orkney Amateur Radio Club is supporting SOS Radio Week from 21 to 29 January. There will be a special event station at or near each of the Islands' three lifeboat stations. GB1OL will be in Stromness; GB2OL will in Longhope, based at the old lifeboat station; and GB4OL will be at Kirkwall Bay. QSLs should be sent direct with the information on the website, http://eu009.webplus.net/gb1ol.html. The stations will be active on most bands, mainly at the weekends, and will concentrate on 80, 40 and 20m.

Mid Ulster Amateur Radio Club will be putting the club callsign, MN0VFW, on the air in support of SOS Radio Week. The station should be active on the HF bands between 1100 and 1600 GMT on Saturday 21 January and between 1000 and 150 GMT on Sunday 22 January. Thanks to the kind permission of Nigel Sands, 2I0GLY, the club will be operating from the shores of Lough Neagh at Sands Marine and Leisure at Kinnego Marina in Lurgan. As with all Mid Ulster events, visitors are more than welcome to call in person and experience some of the club's legendary hospitality.

The Philippine Amateur Radio League is celebrating its golden anniversary this year. To commemorate this milestone, a commemorative diploma can be obtained by establishing 2-way QSOs with its members. The rules to qualify for the award and sample diploma can be viewed at

www.dx1l.dxhams.net/Awards.htm. They will also be putting a special event callsign, 4G0LD, on air throughout the year.

And now the HF DX news compiled from 425 DX News and other sources

Mike, VE2XB will be on the air from the island of Dominica in the Caribbean from now until the end of January. He will use the callsign J79XB.

The Pacific island of Tuvalu will be activated by two Hungarian operators, HA5AO and HA5UK, from 12 to 26 January. The call to be used is T2HA.

Francis, F6BLP will be active again as 6W7SK from Senegal from 20 January to 3 February. He plans to focus on the low bands and CW. QSL via F6BLP.

Six operators will be active as TN2T from Congo from 22 to 31 January. They will have three stations active on 10 to 160 metres SSB, CW and RTTY, with a focus on 160 and 80m. Further information can be found at www.tn2t.be. QSL via M0URX, preferably via the OQRS facility on his website, http://m0urx.com/oqrs for either direct and bureau requests.

Now the contest news

Today, Sunday 15th, the Super League series continues with 80m CW Affiliated Societies Contests taking place from 1400 to 1800UTC. Using CW only, the exchange is signal report and serial number. It is followed six days later, on the 21st, by the 80m SSB AFS, also a Super League event. Taking place from 1400 to 1800, inter-UK propagation for these should be fine for the first couple of hours, but expect the skip to lengthen significantly as darkness falls. The exchange is signal report and serial number.

On January 17 the 1.3GHz UK Activity Contest takes place from 2000-2230. Using all modes on the band, the exchange is signal report, serial number and locator.

The HA DX Contest on 21-22 January has no fewer than 18 entry categories! Work everyone, giving them a signal report and serial number, between 1200 and 1200UTC. HAs send a signal report and Hungarian county code.

And now the solar factual data for the period from Friday the 6th to Thursday the 12th of January, compiled by Neil Clarke, G0CAS on the 13th of January.

The number of sunspot groups visible this week was well down on recent weeks. Some days only three groups were visible. Solar activity though was low, with C class solar flares taking place every day. By far the most interesting flare of the period was the C2 solar flare on the 12th. Although not very strong, it did last for over six hours. A coronal mass ejection was associated with this flare. Solar flux levels declined from 141 units on the 7th to 117 by the 12th. The average was

132 units. The 90 day solar flux average on the 12th was 145 units, that's one unit up on last week. X-ray flux levels declined slightly from the start of the period to the end and averaged B5.2 units. Geomagnetic activity was quiet every day; the most disturbed days were the 9th and the 12th, with an Ap index of only 5 units on both days. The average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 360 and 470 kilometres per second but increased to 550 during the 12th. Particle densities were low every day. Bz never varied more than minus 7 and plus 8 nanoTeslas during the period. Despite falling solar flux levels and thanks to continued low geomagnetic figures, HF propagation generally reached predicted values, with 28MHz open every day.

And finally the solar forecast. This week the slightly more active side of the Sun is expected to be rotating into view. Solar activity is expected to be mostly low to moderate, with C class solar flares taking place every day. There is also a chance of an occasional M class flare taking place. Solar flux levels should increase and be in the 130's later in the week. Geomagnetic activity should be quiet every day. MUFs during daylight hours at equal latitudes should be around 27MHz. Darkness hour lows are expected to be about 8MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 33MHz. The optimum working frequency with a 90 per cent success rate will be about 26MHz. The best time to try this path will be between 1000 and 1600 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 15 January Leicester Radio Society is taking part in the AFS contest. Details from John, G0IJM, on 07939 121 132.

On Monday 16 January Gloucester Amateur Radio & Electronics Society is operating club equipment in the new shack. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 16 January Lincoln Short-Wave Club Lincoln Short Wave Club is holding a committee meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 16 January South Birmingham Radio Society is holding a committee meeting. Contact Don, on 01214 581 603.

On Monday 16 January Welland Valley Amateur Radio Society is working amateur satellites and the International Space Station from Great Bowden Village Hall. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 17 January Derby & District Amateur Radio Society is having a video night. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 17 January Lincoln Short-Wave Club is taking part in the VHF/UHF/SHF Cumulative Club Contest. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 17 January Loughborough & District Amateur Radio Club is having a talk on simple circuits by Ian, G8SNF. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 17 January Wythall Radio Club is having a visit from RSGB President, Dave Wilson M0OBW. Details from Colin, M0GJM, on 07598 540 507.

On Wednesday 18 January Lincoln Short-Wave Club is having a formal meeting and putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 18 January Midland Amateur Radio Society is having a review of the Christmas meeting and 80th birthday exhibition. Details from Norman, G8BHE, on 07808 078 003.

On Thursday 19 January South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 20 January Bromsgrove & District Amateur Radio Club is holding a committee meeting. Contact Chris, M0BQE on 01905 776 869. On Friday 20 January Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777 363.

On Friday 20 January South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 21 January Leicester Radio Society is taking part in the AFS contest. Details from John, G0IJM, on 07939 121 132.

On Saturday 21 January Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND On Thursday 19 January North Wakefield Radio Club is holding an open evening showing what amateur radio is, details of training courses and having a talk by an RSGB representative. For more details email to publicity@g4nok.org.uk.

On Sunday 15 January Hornsea Amateur Radio Club is taking part in the AFS Contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Monday 16 January Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 16 January Sheffield Amateur Radio Club is having a talk on the DXpedition to T32C by Nick, G4FAL. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 16 January Thornton Cleveleys Amateur Radio Society is having a talk on solders and soldering by M Green, G4EZM. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 17 January Chester & District Radio Society is having a talk by David, G3UFO on his time as a radio officer. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 17 January Halifax & District Amateur Radio Society is holding Foundation and Intermediate examinations. Details from Anthony Vinters, G0WFG, on 01422 822 636.

On Tuesday 17 January Stockport Radio Society is having an explanation of PSK31 and data operations by Evan, M0TJU. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 18 January Chorley and District ARS is holding its AGM. Details from Nessie, M0NES by email to nessie68@hotmail.com.

On Wednesday 18 January Denby Dale Radio Club is holding its constructors' competition. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 18 January Hornsea Amateur Radio Club is having a mystery object night. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 18 January Maltby & District Amateur Radio Society is holding an On Air Night. More information from Keith, G1PQW, on 07801 156 678.

On Thursday 19 January Hornsea Amateur Radio Club is taking part in the 80m CC Data contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.
On Thursday 19 January Sheffield Amateur Radio Club is taking part in the RSGB 80m Club Contest from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday 19 January South Manchester Radio and Computer Club is having part 2 of the Great Train Robbery talk by Doug, G8ILW. Details from Ron, G3SVW, on 01619 693 999.

On Friday 20 January East Cleveland Amateur Radio Club is having a bring in something interesting evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 20 January Tynemouth Amateur Radio Club is having Morse tuition and is putting G0NWM on the air. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 21 January Hornsea Amateur Radio Club is taking part in the AFS Contest Phone. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

RAC Bulletin 2012-002E - Treasurer
2012-01-15

The Radio Amateurs of Canada (RAC) is looking for a Treasurer who is a Chartered Accountant, Certified General Accountant or Certified Management Accountant. A certification in amateur radio is optional. As RAC???s financial advisor, we need someone to provide +direction on the accounts and act as liaison with the external auditors. Experience with QuickBooks would be an asset.

Please speak with your friends, there must be a RAC member who either qualifies or can approach someone for this volunteer position. Interested parties please contact the RAC Corporate Secretary at vo1prb@rac.ca

Paul Burggraaf
RAC Corporate Secretary

37. Frostfest 2012 - Saturday, February 4, 2012! - Richmond Virginia

Newsgroup: rec.radio.amateur.misc
Date: 2012-01-16 21:48:31 UTC
From: Frostfest 2012 <mailer@aprs.rats.net>
Message-ID: <8916351177176327992 79@binary1work>
Source record: 3604
Cross-posted to: rec.radio.amateur.misc,rec.radio.swap,rec.radio.info

Hello, Frostfest friends!

Ticket sales for Frostfest 2012 are THROUGH THE ROOF! That means lots of people are coming to buy your used amateur radio gear! Now is the time to get a flea market table to sell that closet full of stuff you've been meaning to get rid of for how long?y There are still some good tables left! Lots of manufacturers and accessory vendors are on board. VE Testing will be in full swing, and ARRL DXCC Card Checkers will be there, too. You can order your flea market tables - and some are still available in the Commonwealth Building - by going online to http://www.frostfest.com. Don't forget, you get in 30 minutes early by pre-ordering your tickets online and pay only $8!!! All purchasers of at least ONE (1) Flea Market Table are eligible for a special drawing for $50 in Frostfest Buck$! Each Flea Market Table purchased is one chance in the drawing. ALL purchasers are eligible, even those who have already made their purchase.

Frostfest 2012 is on Saturday, February 4th, at the Richmond Raceway Complex. RRC is easy to find from all major routes into Richmond, Virginia, and we will also have talk-in available from 7:00AM until 10:00AM that day. We all hope to see you all there!

Sincerely,

Tray Murphy, N4PAT, Chairman, Frostfest 2012
The Entire RATS Frostfest* Committee

*Frostfest is the only fund raiser that the Richmond Amateur Telecommunications Society runs each year (RATS - http://www.rats.net) to fund their wide coverage repeater systems on both 2M and 70CM, a wide area APRS network, dual ILRP nodes, and a JNOS packet node. You can find us on Facebook and on Twitter for up to the minute information about Frostfest 2012!

38. Weekly Highlights of Solar and Geomagnetic Activity, 09 - 15 January 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-01-17 22:30:08 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20120117223001.92D6033C52@panix2.panix.com>

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Jan 17 1552 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
09 - 15 January 2012

Solar activity was at low to moderate levels. Activity was low
during 09 - 13 January. Moderate levels were reached on 14 January
due to an M1 flare at 14/1318 UTC from new Region 1401 (N17, L =
218, class/area Dai/200 on 15 January). Activity returned to low
levels on 15 January. There were no Earth-directed CMEs during the
period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during 09 - 12 January. Predominately
normal levels were observed during 13 - 15 January.

Geomagnetic field activity was at mostly quiet levels during 09 - 12
January. Activity increased to quiet to unsettled levels on 13
January due to a coronal hole high-speed stream (CH HSS). Field
activity decreased to quiet levels on 14 - 15 January.

Forecast of Solar and Geomagnetic Activity
18 January - 13 February 2012

Solar activity is expected to be at low levels with a chance for
isolated M-class activity from Region 1401, 1402 (N27, L=215,
class/area Dho/270 on 15 January) and old Region 1389 (S23, L=087),
which is expected to return to the visible disk on 21 January.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at normal flux levels during 18 January - 03
February. Normal to moderate levels are expected from 04 - 07
February following a CH HSS. Normal levels are expected for the
remainder of the period.
```

Geomagnetic field activity is expected to be quiet on 18 January. Conditions are expected to be at quiet to unsettled levels with a chance for isolated active periods on 19 - 20 January due to a CME observed early on 16 January. Mostly quiet conditions are expected to return from 21 January - 01 February. Quiet to unsettled conditions are expected from 02 - 04 February due to a recurrent CH HSS. Predominately quiet conditions are expected from 05 - 08 February. A second CH HSS is expected to become geoeffective on 09 February bringing quiet to unsettled conditions. Mostly quiet conditions are expected on 10 - 11 February before becoming quiet to unsettled for the duration of the period due to a third CH HSS.

39. [DXNL] DXNL 1763 (Jan 18, 2012)

DXNL 1763 - Jan 18, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

4W, TIMOR LESTE, OC-148
Vlad,UA4WHX, has been worked as 4W0VB in CW on 20m/17m/15m and 12m.
More details are not known. QSL via homecall, LoTW.

6W, SENEGAL
Francis,F6BLP, will be QRV again in holiday style signing 6W7SK from
Mbour between Jan 20 and Feb 3. He will work mainly in CW, his equip-
ment includes an IC-7000 with G5RV. QSL via homecall, LoTW.
See also: http://www.f6blp.org/index.php?langue&#65533;

A3, TONGA, OC-049
Holger,ZL3IO (A31IO), Birgit,ZL3IQ (A31YL), and their daughter
Sassi,ZL2GQ (A31GQ), are on a family holiday with little Xenia. Though
this is not a planned DXpedition he has a K3 plus vertical with him.
Their licenses are valid for one year and Tonga is only 3 hours by
airplane from New Zealand... QSLs via homecalls.

DL, GERMANY
The sinking of the passenger liner Titanic has its 100th anniversary on
Apr 15,2012. After hitting an iceberg the ship sank 300 nautical miles
southeast of Newfoundland. Unfortunately, only about 700 of the 2200
passengers and crew members were rescued. It was one of the worst
maritime disasters of civilian shipping. This resulted in numerous
measures to accelerate the rescue of people at high seas.
An international radio distress frequency was introduced and the duty
to its constant monitoring. Even today these decisions are still valid
and are written down in the SOLAS treaty, adapted to the technical
possibilities of today.
The local DARC club in Schoenau (S65) commemorates this historic event
and the beginning of coordinated emergency communications with the
special callsign DM100MGY from Jan 1 until Dec 31. They will also hand
out the special DOK 100MGY between Apr 1 and Jun 30, 2012.

QSLs only via bureau, no direct QSLs and no eQSL.

The clubstation in Jesewitz exists for 50 years now and operates the
special callsign DM50KSJ. QSL via DL2VM.

The Harz Narrow Gauge Railways (HSB) were opened in 1887 with the track
Gernrode-Maegdesprung. Today it maintains a length of 140 km, which is
the longest contiguous stretch of narrow-gauge railway network in
Germany, with steam locomotives operating every day and a total of
48 stations. On this occasion the special event station DQ125HSB is
activated thoughout 2012. QSL via bureau.
The station also counts for the EFA and FIRAC diplomas.
See also: http://www.amateurfunk-vienenburg.de

EI, IRELAND, EU-115
The Irish Radio Transmitters Society celebrates its 80th anniversary
in 2012. The special event station EI80IRTS is active throughout 2012.
QSL via EI4GXB, LoTW.

F, FRANCE
The French telecommunications corps celebrates its 70th anniversary
this year and the ARC of the French signal school activates the special
callsign TM70TRS during several events. QSL via F6KHX.

FK, FRENCH NEW CALEDONIA, OC-032
Ante,9A4DU, is active as FK/9A4DU from the clubstation FK8KA.
QSL via homecall.

FR, REUNION, AF-016
Pierre,FR/F8APV, announced to show up from Reunion (AF-016) every day
in CW on 40/30m from 0100-0400 UTC and in SSB on 20m from 1700-1900 UTC
between Jan 22 and Feb 10. QSL via homecall.

FW, WALLIS (OC-054) and FUTUNA (OC-118)
A Hungarian group plans to become active with two stations in all modes
on all bands signing FW0R from Wallis (OC-054) from Jan 24 till Feb 23.
They will also try to activate Futuna (OC-118) as TW0F from Feb 5-10
in between. Participation in the ARRL CW Contest is planned as well.
QSLs via HA0NAR. See also: http://www.ha0nar.hu

I, ITALY
The HAMs of Lanciano are celebrating their 35th jubilee in 2012 and
thus are operating the special event station II6LN.
All QSOs will be confirmed via bureau automatically.

JT, MONGOLIA
Robert,VA7DX, is working as JT1RF on HF until the end of January.
QSL via VE7YBN.

KH0, NORTHERN MARIANA ISLANDS, OC-086
KH0/HB9BCK will be QRV in CW/SSB and maybe also in PSK/RTTY on 10m-80m
with 500 watts, yagi and vertical from Jan 22-28. QSL via homecall.

ON, BELGIUM
The HAMs of Bruges are activating the special event station ON65BR to
celebrate their 65th anniversary. QSL via ON6BR.
See also: http://www.on6br.be/drupal

The city of Turnhout celebrates its 800th anniversary and the local
HAMs are using the special callsign ON800TUR. QSL via ON1CB.

PJ2, CURACAO, SA-099
Tom,AA9A, and his family are spending their holidays in the Caribbean
until the beginning of March. He will be QRV in CW and SSB on 40m-10m:
Jan 21-Feb 4: PJ2/AA9A from Curacao (SA-099, WLOTA 0942)
Feb 13-22: V25AA from Antigua (NA-100) together with other OPs
Mar 3-17: PJ7/AA9A from Sint Maarten (NA-105)
QSLs via homecall, LoTW.

PJ4, BONAIRE, SA-006
Following the PJ4C DXpedition Norbert,DJ7JC, plans to to work as PJ4M
with HF9 Butternut, K3 plus Tokyo-HighPower amplifier from Jan 23-30.
QSL via homecall.

SV, GREECE
Macedonia and Greece were unified 100 years ago which is marked by the
special event call SX1912. They have also a special award, see QRZ.com.
QSL via bureau.

TN, REPUBLIC OF CONGO
Patrick,ON4HIL, Marc,ON6CC, Luc,ON4IA, Ronald,PA3EWP, Carlo,ON4BR, and
Stefaan,ON4FG, will show up as TN2T from Jan 22-31. They had to wait
six months for their license! QSL via M0URX. See: http://www.tn2t.be

V3, BELIZE
Gerd,DJ4KW (V31YN), and Gisela,DK9GG (V31GW), are looking for QSOs from
Consejo until Feb 26, including big contests like WWDX 160m CW and SSB,
CQ WPX RTTY and ARRL DX CW Contests.
They will be QRV as V31YN/p from Southwater Caye (NA-180) for the IOTA
hunters from Feb 1-8. QSLs via homecalls, LoTW.
Their website is: http://www.qslnet.de/member/v31yn

VK0/M, MACQUARIE ISLAND, AN-005
Trevor,VK0TH, is very angry about the undisciplined behavior of some
DXers and went QRT for a few days, see also QRZ.com.

XT, BURKINA FASO
Jon,K3QF, is staying in Burkina Faso for the next few weeks and wants
to spend time for our hobby as XT2RJA mainly during the evening hours.
QSL via K3QF.

ZF, CAYMAN ISLANDS, NA-016
Daryl,W7TAE, is going to visit Grand Cayman (NA-016) from Jan 22-27.
Listen for ZF2TE in SSB/CW on 20m-6m running 100 watts into verticals.
He also plans to join the ARRL VHF Contest (MOSB 6m). QSL via homecall.

WAGNER SAILING RALLY
In memory of Wladek Wagner the special event station SN2012WW will be
active as SN2012WW/mm from aboard the training ship "Fryderyk Chopin"
and also with other prefixes like FM/, FJ/ etc.
Other special event stations will be:
HF80WW Jun 8-Jul 8, 2012
HF20WW Aug 15-Sep 15, 2012
HF100WW Sep 17-Oct 17, 2012
All QSLs via bureau.

SOUTH PACIFIC TOUR
The DXpedition by HA5AO and HA5UK announced in DXNL 1761 had to be
cancelled because they did not reach their destinations. Instead of
returning home they decided to travel to Nauru from where they showed
up C21HA between Jan 10 and Feb 8. QSL via HA5UK, OQRS via Clublog.

OPs WANTED
Donovan,ZS2DL, is planning a DXpedition to Lesotho for Nov 9-19.
Operation shall take place in CW and RTTY on 80m-10m. The callsign
is not known yet and he is still looking for more operators:
Lesotho DX Pedition 2012, Box 29169, Sunridge Park 6008, South Africa

The internet portal DXCoffee celebrates its 2nd anniversary:
http://www.dxcoffee.com/eng

UPCOMING CONTESTS

Jan 21: LZ Open Contest
Jan 21/22: HA DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-009, GM/MM, Orkney Islands: The Orkney Amateur Radio Club supports the
SOS Fundraising week from Jan 21-29 and activates following special
event stations: GB1OL (OP MM5DWW) in Stromness; GB2OL (OP GM0WED)
in Longhope and GB4OL (OP GM0IFM) in Kirkwall Bay.
All QSLs should be sent via their homecalls, unfortunately only direct.

See also: http://eu009.webplus.net/gb1ol.html

EU-089, CU8/9, Azores Western group: CU8AS, CT3FN/HB9CRV and CT8/HB9CQL will be QRV from Flores Island between Jan 20 and Feb 13.
Ruedi,HB9CQL, will be active as CT8/HB9CQL only until Feb 7.

SA-007, HK0/M, Malpelo Island: The DXARC Dxcolombia Amateur Radio Club HK1NA will be active as HK0NA from Malpelo Island (WFF HKFF-034, WLOTA 0633) between Jan 21 and Feb 5/6. They plan to work with K3's and 500 watt amplifiers in CW/SSB/RTTY on 160m-6m. The "Fab Four" advance team is already on the island since Jan 10 to build up the equipment.
All QSLs via N2OO (bureau/direct). An OQRS will be installed as well.
The log will be uploaded to the LoTW six months later.
More information is available at: http://www.hk0na.com

The Documentary Archive Radio Communications has put up a very detailed website with all previous activities from Malpelo Island.

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 18, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Winter Wonderland - ARRL January VHF
- Planetary Top Band - CQ WW 160
- Dinnertime Entertainment
- It's Map Time
- Under African Skies
- Results from DC to Daylight
- Phased by Noise?
- N3OX's Fertile Imagination
- Spanning the Bands

NEW HF OPERATORS - THINGS TO DO

If you've not yet tried 160 meters thinking that the antennas are too
big and the static crashes too loud - give the band another try during
the upcoming CQ Worldwide 160 Meter contest. You'll find lots and lots
of stations ready to pull your signal into their logs!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

I'll blame these on the effects of holiday nog! The correct URL for
K5LXP's 6x2 antenna switch is here
<http://www.qsl.net/k5lxp/projects/CoaxSwitch/CoaxSwitch.html> - thanks
to Doug KR2Q and others who spotted the extra %20 at the end of the
URL. The photos of N6RO and K3EST & Junko should have been credited to
Bob N6TV instead of mutual friend Dean N6BV. And the Contest Super
Suite begins on Wednesday, not Thursday, of the Dayton Hamvention says
John K9JK.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section
```

January 21-22

- ARRL January VHF Sweepstakes
- Locust QSO Party--CW (Jan 18)
- Linc Cundall Memorial CW Contest (Jan 18)
- NAQCC Monthly QRP Sprint--CW (Jan 19)
- LZ Open Contest--CW
- YLISSB QSO Party--Phone
- HA DX Contest
- UK DX RTTY Contest
- Feld-Hell Gridloc Sprint
- North American QSO Party--Phone
- International United Teenager Contest

January 28-29

- CQ WW 160 Meter Contest--CW (Jan 27-29)
- REF French Contest--CW
- BARTG RTTY Sprint
- UBA Contest--Phone
- Winter Field Day
- WAB Top Band Phone Contest
- Classic Exchange--CW
- QRP Winter Fireside SSB Sprint

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The Florida Contest Group will be sponsoring the 2012 Orlando Contest Dinner at the Orlando Hamcation <http://hamcation.com/> convention. The dinner will take place on February 10, 2012 at 6pm at the American Legion Hall <http://tinyurl.com/FCGDirections> at 2101 Lee Road in Orlando. After dinner, hear an address by new NCJ Editor Kirk Pickering, K4RO. There will also be a hospitality suite with CW and SSB copying contests. For questions and to order tickets, contact Chris WF3C <chris.plumblee@gmail.com>.

If you're planning on attending the Contest Dinner <http://contestdinner.com/> during Dayton Hamvention, the North Coast Contesters are happy to announce that CQ Contest Hall of Fame member Larry "Tree" Tyree, N6TR will be the featured speaker. It's possible that Tree will share his secrets of winning contesting. When not chasing new countries on 160 meters, Tree is also a log checker for the ARRL, CQ, and WRTC. With a distinguished and interesting contest resume, his talk is sure to be interesting! (Thanks, Tim K3LR)

Todd KC9BQA has made several new web posts <http://kc9bqa.com/> to that are helpful to newer VHF+ contesters, such as the articles titled VHF Contesting School <http://kc9bqa.com/?p=5609>. The articles are broken down into bite-sized pieces geared toward getting a novice VHF+ operator comfortable calling "CQ Contest".

Firefox users may be interested in the Propfire utility <http://www.n0hr.com/Propfire.htm> that displays Solar Flux, A, and K indices at the bottom of the browser window. (Thanks, Chuck AF4O)

Baby boomers will recall the WPE call signs for SWL (short-wave listener) stations - and they are making a comeback! On January 1, Popular Communications magazine launched the Pop'Comm Monitoring Station <http://popcommmonitors.blogspot.com/> (PCMS) program, reminiscent of Popular Electronics magazine's popular Monitor Station (WPE) program of more than 50 years ago. So far, more than 300 SWLs, scanner buff, and digital communications enthusiasts have signed up. This was a common path to ham radio - why not suggest it to an unlicensed friend or relative? (Thanks, Popular Communications Editor, Richard KI6SN)

Just in time, a new version of the VHF Super Check Partial and Prefill databases <http://www.k3lr.com/w9zrx/> for the ARRL January 2012 VHF Contest are now available from W9ZRX.

WRTC 2014, Inc. <http://www.wrtc2014.org/>, host of the 2014 World Radiosport Team Championship competition, is pleased to announce that L. Dennis Shapiro, W1UF, has joined the WRTC2014 Advisory Council. The Advisory Council consists of individuals who have experience in the execution of major events and are willing to provide significant financial resources to the project. Dennis is a lifelong New Englander and maintains two stations - one in the Boston area and one on Nantucket Island. An active DXer and occasional contester, Dennis explains his motivation for joining the Advisory Council, "I am interested in building international friendships and see WRTC as furthering that goal." (Thanks, WRTC-2014 Co-Chair, Randy K5ZD)

The first Potomac Valley Radio Club <http://www.pvrc.org/> (PVRC) webinar of the year will feature Tim Duffy, K3LR, Chancellor of Contest University <http://contestuniversity.com/> (CTU) discussing the 2012 course line up, list of professors, and the WWROF endorsed Contester's Code of Ethics. CTU welcomes six new professors this year. Click the "Upcoming Webinars" link for more information and to register for this free talk to be conducted on 30 January. (Thanks, Ken K4ZW)

A great way to display your QSLs is by scanning them and putting the images into a digital picture frame. Most digital picture frames depend on something like a USB Flash Card for their input. A 4-Gbyte Flash Card costing a few dollars will hold thousands of high-res images of scanned QSL cards. (Brian N9ADG and Chuck K0TVD)

Web Site of the Week - Imus Geographics <https://imusgeographics.com/> is having a hard time keeping up with demand for their new and highly rated new map of the United States as described in this Slate.com <http://www.slate.com/articles/arts/culturebox/2012/01/the_best_american_wall_map_david_imus_the_essential_geography_of_the_united_states_of_america_.html> story. I know that hams love maps and this one captured my interest (and order) right away!

WORD TO THE WISE

QNZ - "Zero beat your signal with mine." A Q-signal sent by net control stations but that could also be used in many contests. For example,

clear the RIT before calling a station. It's certainly easy to forget, leaving you potentially well outside the passband of a station's receiver on a crowded band. Some contesters even add the software commands to clear the RIT in their operating macros so they don't forget. (Thanks, Tom W8TK)

==> SIGHTS AND SOUNDS

The link to information on the 1948 Gatti-Hallicrafters DXpedition created some interest - here is another good website <http://www.qsl.net/pa0abm/ghe/1948dxped.htm> about it. W7LR was also featured in this two-page (page 1 <http://www.kkn.net/%7Etree/160/W7LR_Article_Page1.jpg>, page 2 <http://www.kkn.net/%7Etree/160/W7LR_Article_Page2.jpg>) newspaper story and in his own words <http://www.kkn.net/%7Etree/160/W7LR-MIDWAY-4.pdf> on his WWII experiences as a radio operator - the images will load somewhat slowly. (Thanks, Tree N6TR)

The Semiconductor Museum <http://semiconductormuseum.com/Museum_Index.htm> is a great way to spend some time - we take these tiny marvels for granted today but they changed the world in a big way. My favorite is the section on my old friend, the 2N2222, of which I used many, ruined more than a few, and still specify now and then today. (Thanks, George W2VJN)

If you enjoyed those photos by Bob N6TV in the last issue, there are many more faces of the Northern California Contest Club members online <http://www.nccc.cc/photos.html>. (Tom K6AET's photo is my favorite!) The montage was assembled by John K6MM - your club might want to consider something similar.

==> RESULTS AND RECORDS

A whole batch of ARRL contest results <http://www.arrl.org/contest-results-articles> are hitting the 'net including the IARU HF Championship, September VHF QSO Party, and 10 GHz Cumulative contests. These all include extra content beyond the QST article such as graphs, photos, tables, and all of the line scores. The IARU results may take another day or two before posting but look for them shortly. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The final tally of 5,438 logs received for the ARRL 10 Meter Contest is an all-time record for ANY of the ARRL contests - single-band, multi-band, domestic, DX, HF, or VHF. Wow! (Thanks, Sean KX9X)

2011 Nebraska QSO Party results <http://www.hdxa.com/> have been posted with final rules for the 2012 contest to follow shortly. (Thanks, Heartland DX Association webmeister, Jeff NE0DX)

CQ Worldwide 160 Contest Manager, Andy N2NT, announces the posting of the 2011 CQ 160 contest results <http://cq160.com/results.htm>. This package includes corrections to the print article, such as missing

scores and adds a trophy list. Certificates have already been mailed and plaques are in the process of being made up. The record list will be updated soon. Log checking reports can be obtained by emailing Andy <andyn2nt@gmail.com> with the call sign you used and the mode of the contest you entered.

Don AA5AU has written up his experiences <http://rttycontesting.com/contestnotes/2012_arrlru.htm> during the recent ARRL RTTY Roundup in which he finally cracked the 2000-QSO barrier for low power entries. If you want to know more about how the high-scoring stations make those big totals, here's one example.

WRTC-2014 standings have been updated to include the official results from CQ WPX SSB, EUHFC, and NAQP CW and SSB. Problems with the NA Sprint scores are being fixed. Updated Excel spreadsheets for each Selection Area have been posted <http://www.wrtc2014.org/competitors/qualification-standings/>, as well. Thanks to Marek, SQ2GXO for his continuing efforts to track both final and claimed scores on his website WRTC-Rank <http://www.wrtc-rank.com/>. Updates will continue to appear periodically as various contest results are made public. (Thanks, WRTC-2014 Team Selection Director Dan K1TO

Bob K0RC's Log Analyzer for the ARRL RTTY Roundup contest, version 2.0.2, can be downloaded <https://skydrive.live.com/?cid=d96c61feb759dc6e&sc=documents#cid=D96C61FEB759DC6E&id=D96C61FEB759DC6E%21903&sc=documents> and includes minor enhancements added since last year, including one-click Import procedures for Cabrillo-formatted logs.

OPERATING TIP

While these tips on contest logging <http://www.ncjweb.com/naqplogguidance.php> were written for the NAQP contests, NAQP Contest Manager, Bruce WA7BNM's suggestions make a whole lot of sense for any contest - before, during, and after.

==> TECHNICAL TOPICS AND INFORMATION

Single-band contesters will be the first to attest that effective listening while transmitting on the same band is difficult to achieve due to transmitter noise and sheer overload. PA0SIM has taken a run at the problem with this two-transistor phaser <http://www.pa0sim.nl/Phaser%2080%20-%2010%20meters.htm> for 80-10 meters. (Thanks, Martin OK1RR)

A favorite foot-warming fixture in many ham shacks, this article <http://www.orcadxcc.org/content/cantenna_va7jw.pdf> by VA7JW provides a detailed accounting of the venerable Heathkit Cantenna dummy load. (Thanks, Jim VE7FO)

Protecting dc-powered designs against reverse polarity power supplies takes many forms. Terry WA0ITP captured some of the most common

techniques in his collection of circuit sketches <http://www.wa0itp.com/rvpcircuits.pdf>. One will surely be right for you - or at least spark an idea, so to speak.

Just in case you need some help to grow your HyGain antennas, Tom K1KI found this helpful website <http://www.hygain.com.au/Product_Range/balanced.php>.

With the CQ 160 contests coming up shortly, here's a simple receive antenna recommended by Tim K3LR. The VE3DO loop <http://topbanddinner.com/attachments/InexpensiveReceiveAntennasforTopBand.pps> is also straightforward to build and install, making it a good "temporary" antenna.

Diane VA3DB has started a Ham Radio Builder List <http://diana.db.net/mailman/listinfo/hamradio-builder> for anyone interested in homebrew electronics. "Builders" is the term in vogue for folks that like to build rather than buy and that certainly fits a lot of hams - whether by choice or necessity. The website is intended to collect and publish short and simple articles with lots of photos and good instructions. (From AMSAT <http://amsat.org/> newsletter ANS-008)

If you are surprised to find your Windows PC assigning virtual COM ports with very high numbers - it's a consequence of the way Windows tracks and manages COM ports created by external accessories. Even if you are not using that particular accessory any more, Windows remembers and reserves a COM port for it. This occasionally wreaks havoc with applications such as logging software. To regain control of your COM port assignments, check out this Microsoft Support article <http://support.microsoft.com/kb/315539>. It's also noted in the N1MM <http://n1mm.com/> contest logging software manual. A free tool called USBDeview <http://www.nirsoft.net/utils/usb_devices_view.html%20> can also be used to uninstall USB drivers for devices that you no longer use. (Thanks, Rick N6XI, Bob N6TV and Steve N2IC)

To protect a receiver from dc voltages on feed lines for powering external devices and prevent creating intermod in a receive-only devices such as a signal splitter, Frank W3LPL makes the following suggestions. "Use a well over-rated dc blocking capacitor, this is not an application to save a few pennies by using a marginally rated capacitor. You should also use a choke to ground with a high current rating to protect your receiver if the capacitor shorts out. A choke wound with #18 wire on a ferrite core will guarantee that your receiver won't be trashed if the capacitor fails. It's a good idea to place capacitors in series with all three ports of a "magic-T" 3 dB splitter. The ferrite cores in commercially made splitters are very small, if even a small amount of 60 Hz ac current flows through the core it will saturate causing intermod problems. In a multi-operator station, a band-pass filter should be installed to protect the splitter from strong signal saturation, also resulting in intermod problems. You can avoid splitter intermod problems by building your own splitter with large ferrite cores, but you can usually avoid that by using band-pass

filters and capacitors to protect the splitter from saturation."

Steve W3AHL notes two common causes of excessive loss in PL-259 connectors - "a solder ball on the end of the center pin, spreading the mating female contacts. After a few insertion cycles a cheap SO-239 may read 2-5 ohms through the center pin. Then there are the connectors where someone scraped all the [the center pin] with a knife, taking all the plating with it." The moral of the story is to assemble the connector correctly without excess solder.

Technical Web Site of the Week - Dan N3OX has an interesting webpage <http://n3ox.net/> full of projects and measurements, such as a tunable short vertical antenna that uses a novel mechanism to vary its geometry. The animations of energy being radiated from an antenna are also captivating! (Thanks, Steve G3TXQ)

==> CONVERSATION

Spanning the Bands

Just this week, a whole batch of ARRL contest results <http://www.arrl.org/contest-results-articles> hit the web, covering quite a range of spectrum. The 10 GHz Cumulative Contest and September VHF QSO Party results capture activity on the short wavelengths and the IARU HF Championship results chronicle operating feats all the way at the other end of our allocations. (The IARU results should be up shortly if they are not posted by the time this newsletter is published.)

>From 1.8 MHz to 78 GHz in one set of results is pretty impressive when you think about it - four and a half orders of magnitude. Yet here were hams pushing the limits of propagation and electronics, trying for distance, distance, and more distance!

This certainly seems to indicate that we are fulfilling our charter as stated in FCC Part 97.1 - to push the boundaries of the radio and communications art. Whether the operators are trying to overcome short antennas and static or pencil-thin beam angles and atmospheric absorption, that they are able to accomplish what they do is nothing short of amazing!

How cool is it that a 160 meter signal can be perfectly timed to hit a sunrise opening lasting less than a minute to a location on the other side of the planet? How cool is it that signals at 78 GHz - a wavelength of 3.8 mm - can be beamed across a 2 km path...for fun? And all those other bands in between - bouncing signals off of airplanes, meteors, ionospheric ions and electrons!

I can envision a contest in which "all-band" really means "all of the bands". Can you imagine how a rover station for such a contest would appear, festooned with radiating appurtenances and fixtures and, dare I say, doo-dads all fizzing with RF, both outbound and inbound? Extraordinary! Running the bands would take on a whole new scope with

such a station on either end.

It's kind of ironic that the only event that supports such an exchange is actually not a contest - it's the annual ARRL Field Day. Perhaps the W3AO monster-multi crew will lead the way for others to follow? To me, the scope of radiosport here at the beginning of ham radio's second century is really exciting. More bands than ever, digital modes by the bucket load, new hams flocking to phone and CW and setting log submission records with each passing year.

Perhaps one day soon amateurs will be granted an allocation at even longer wavelengths and I know for a fact that hams are already experimenting with signals in the hundreds of GHz! Our call signs will still be crackling over the air waves no matter what the frequency or color as the laser operators tunnel busily down to meet the mm-wavers tunneling busily up. Wherever there is an electromagnetic niche to be explored, expect to find a ham there - trying for ever-longer, ever-more-difficult QSOs in the quest for DX that is as old as radio. QRZ?

73, Ward N0AX

==> CONTESTS

18 January through 31 January

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American QSO Party--Phone, from Jan 21, 1800Z to Jan 22, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/naqprules.php>

Locust QSO Party--CW, from Jan 18, 0200Z to Jan 18, 0300Z. Bands (MHz): 3.5-7. Frequencies: 3.553, 7.053. Exchange: Name, state or province or 'DX'. Logs due: Jan 31. Rules <http://www.k6vva.com/lqp>

Linc Cundall Memorial CW Contest--CW, from Jan 18, 2300Z to Jan 19, 2300Z - Multiple operating periods. Bands (MHz): 1.8-7. Exchange: See Web site. Logs due: 30 days. Rules <http://www.antiquewireless.org/>

NAQCC Monthly QRP Sprint--CW, from Jan 19, 0130Z to Jan 19, 0330Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

LZ Open Contest--CW, from Jan 21, 0000Z to Jan 21, 0400Z. Bands (MHz): 3.5, 7. Exchange: 6-digit serial and serial from previous QSO. Logs due: 30 days. Rules <http://www.lzopen.com/>

YLISSB QSO Party--Phone, from Jan 21, 0000Z to Jan 22, 2359Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 18. Rules <http://www.ylsystem.org/>

HA DX Contest--Phone,CW, from Jan 21, 1200Z to Jan 22, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: 30 days. Rules <http://www.ha-dx.com/>

UK DX RTTY Contest--Digital, from Jan 21, 1200Z to Jan 22, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.ukdx.srars.org/>

Feld-Hell Gridloc Sprint--Digital, from Jan 21, 1600Z to Jan 21, 1800Z. Bands (MHz): 1.8-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

International United Teenager Contest--Phone,CW, from Jan 22, 0900Z to Jan 22, 1500Z. Bands (MHz): 3.5-28, 144/432/1.2G. Exchange: RS(T) and age or "RT". Logs due: 30 days. Rules <http://www.qrz.ru/contest/detail/140.html>

CQ WW 160 Meter Contest--CW, from Jan 27, 2200Z to Jan 29, 2200Z. Bands (MHz): 1.8. Exchange: RST and S/P/C. Logs due: Feb 28. Rules <http://www.cq160.com/>

REF French Contest--CW, from Jan 28, 0600Z to Jan 29, 1800Z. Bands (MHz): 3.5-28. Exchange: RST and serial or department ID. Logs due: 30 days. Rules <http://concours.ref-union.org/contest>

BARTG RTTY Sprint--Digital, from Jan 28, 1200Z to Jan 29, 1200Z. Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Mar 1. Rules <http://www.bartg.org.uk/>

UBA Contest--Phone, from Jan 28, 1300Z to Jan 29, 1300Z. Bands (MHz): 3.5-28. Exchange: RS, serial, and ON province. Logs due: 2 weeks. Rules <http://www.uba.be/hf/contest-rules>

Winter Field Day--Phone,CW,Digital, from Jan 28, 1700Z to Jan 29, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

WAB Top Band Phone Contest--Phone, from Jan 28, 1900Z to Jan 28, 2300Z. Bands (MHz): 1.8. Exchange: See Web site. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/contest>

Classic Exchange--CW, from Jan 29, 1400Z to Jan 30, 0800Z. Bands (MHz): 1.8-28, 50, 144, Frequencies: CW 1.810, 3.545, 7.045, 14.045, 21.135, 28.050, 50.100, 144.100 . Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://www.classicexchange.org/>

QRP Winter Fireside SSB Sprint--Phone, from Jan 29, 2000Z to Jan 29, 2359Z. Bands (MHz): 3.5-28. Frequencies: QRP calling frequencies. Exchange: RS, S/P/C, QRP ARCI number or power. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

VHF+ CONTESTS

ARRL January VHF Sweepstakes--Phone,CW, from Jan 21, 1900Z to Jan 23, 0400Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Feb 22. Rules <http://www.arrl.org/contests>

International United Teenager Contest--Phone,CW, from Jan 22, 0900Z to Jan 22, 1500Z. Bands (MHz): 3.5-28, 144/432/1.2G. Exchange: RS(T) and age or "RT". Logs due: 30 days. Rules <http://www.qrz.ru/contest/detail/140.html>

Winter Field Day--Phone,CW,Digital, from Jan 28, 1700Z to Jan 29, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

Classic Exchange--CW, from Jan 29, 1400Z to Jan 30, 0800Z. Bands (MHz): 1.8-28, 50, 144, Frequencies: CW 1.810, 3.545, 7.045, 14.045, 21.135, 28.050, 50.100, 144.100 . Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://www.classicexchange.org/>

---------

==> ARMY MARS AND WINLINK UPDATE

According to Pudge Forrester, AAA9GL, government liaison for Army MARS
<http://www.netcom.army.mil/mars/>, Lieutenant General Susan Lawrence
has reversed the decision to phase out the use of the WinLink 2000
<http://www.winlink.org/> global radio e-mail system by Army MARS
members.

Ms Lawrence stated that the Army, after reviewing its capabilities, had
decided that the continued use of WinLink 2000 was a valuable asset to
Army MARS members and agencies that were using the service. She issued
a statement to that effect on December 21, 2011. On January 5, 2012,
the Chief of Army MARS officially notified his membership that the
phase out notice had been rescinded.

Army MARS members and agencies who had been using the service hailed
the decision by Ms Lawrence and resumed use of WinLink 2000.

==> REMINDER TO ARRL LOCAL EMERGENCY COORDINATORS AND SECTION EMERGENCY
COORDINATORS
```

Do not forget to submit your 2011 annual reports to ARRL HQ. EC's may access form C "EC Annual Report" on the Public Service page <http://www.arrl.org/public-service-field-services-forms>. The form may be downloaded as a Word document. Once completed email it to ARRL Field Services Supervisor, Steve Ewald, WV1X, sewald@arrl.org or you may mail it to ARRL HQ, 225 Main St. Newington, CT 06111.

Section Emergency Coordinators are reminded to submit their monthly SEC reports. This can be done online <http://www.arrl.org/fsd-96-monthly-section-emergency-coordinator-report>.

==> NACOGDOCHES (TEXAS) ARC ASSISTS IN ANGELINA RIVER BOTTOM FIRE

"Command, this is Lilbert."

"Go ahead Lilbert; this is Command."

"Command, a civilian stopped by just now and notified us that some heavy smoke is visible south of County Road 343 within a mile of the Angelina River bridge. She says the smoke was not there earlier."

"Roger, Lilbert. We will pass that information on. KD5GEN"

"Thank you, Command. KE5EXX"

This was one of the QSOs between Rusty Sanders, KD5GEN, and myself on the afternoon of September 7, 2011. Sanders was at the Angelina River Bottom Fire Command Center that was established in the small town of Douglass, Texas. I was located in a small church in the Lilbert community that was acting as a supply point for the firefighters. Douglass is just three miles north of where the Piney Woods of East Texas was ablaze.

Earlier that day, the Nacogdoches County Sheriff's Office had contacted Kent Tannery, KD5SHM, and asked if the Nacogdoches Amateur Radio Club could provide communications assistance to the firefighters. Tannery then called the Nacogdoches County Emergency Management Planning Section Chief, Tara Triana, to find out what was needed and where. Tannery said, "They told me they wanted three hams at the three places (Douglass, Lilbert, and Sacul), but then Tara told me they needed help monitoring the three different fire locations that were using the Texas Fire frequencies and relay for them."

The State of Texas has an Interoperability Channel Plan that allows multiple agencies to communicate with each other. In the case of Texas Fire1, Texas Fire2, and Texas Fire3, these are all VHF simplex frequencies. The density of the forest, as well as the distance between outposts, were barriers for firefighters' communication with each other or the command post, with their VHF hand-helds in simplex mode.

Tannery continued, "Then I knew what to take and what we needed to do and looked up those frequencies and e-mailed them to Army Curtis, AE5P." Curtis immediately activated an emergency net on the club's 147.32 MHz repeater and coordinated activating Rusty Sanders, KD5GEN, to man the Command Center; Kent Tannery, KD5SHM, to operate from Sacul;

and myself, KE5EXX, to operate from Lilbert.

We ended up using two ICOM IC-2720 units and a Yaesu FT-1500 to communicate between the three remote locations and act as relays to the different fire departments who could not communicate over the large forest. The Sheriff's Office supplied each of us with portable radios. We also provided health and welfare traffic, such as confirming that assets were moved to the correct location or that food and drinks were provided to the firefighters.

The club maintains three ready-to-go kits: An "Orange Box Kit" that contains an ICOM IC-2720H, a Kantronics KPC-3+; another box kit that contains a Yaesu FT-8800; and a "Wooden Box Kit" that contains a Yaesu FT-1500. At the time of the fires, the club also had one W3FF

"Orange Box" Ready to Go Kit. mast, tripod, a guying assembly, and a VHF 1/4 wave ground plane manufactured by Centerfire Antenna. (The club has since been provided with three additional mast/tripod/antenna kits.)

As soon as I arrived on location, I checked in with the point of contact and told her why I was there. I looked for the best place to setup, preferably someplace quiet and out of the way. I originally attempted to use a 5/8's wave mag mount on a cookie sheet from the inside of the building, but I was unable to make the repeater. In order for me to get on the air, I put the mag mount on the roof of the metal building I was in and ran the coax in through a window.

Lessons Learned

We learned quite a bit from this event. Although all of us were activated during the Space Shuttle Columbia disaster and numerous hurricanes that have hit our area, this was new territory for many of us. Until now, we had not operated from such remote areas. We found that we needed to add more coax to our go kits. We also found that we needed more of the mast/tripod/antenna kits that were later donated to us.

Nacogdoches County Sheriff Thomas Kerss commented, "We realized the value of incorporating the use of Amateur Radio into our operations several years ago during the Space Shuttle Columbia disaster. We continue to see that value today. Thanks to the efforts of the local Amateur Radio operators during the Angelina River Bottom Fire we were able to establish communication links with emergency responders in areas of our county that would not have been possible otherwise." -- Andy Delgado, KE5EXX <%20delgado@apollos-dev.com>, Nacogdoches, Texas

==> OPERATORS TO DEMO EMCOMMS IN MICHIGAN

Muskegon, Michigan - Hundreds of Amateur Radio operators across the country will be displaying their emergency communication capabilities on Saturday, January 28, 2012. The public is invited to step out and view what Amateur Radio communications can do in times of emergencies.

The Society for the Preservation of Amateur Radio (SPAR) established a Winter Field Day <http://www.spar-hams.org/contests/winterfd/index.php?pg=2> event in 2007 and invited Amateur Radio operators to participate. Using emergency power, operators will construct, and operate portable emergency stations in parks, shopping malls, schools, and backyards across the country. Operators will demonstrate long and short range voice, data, and Morse code communications.

In the Muskegon area the Muskegon County Emergency Communication Services, Inc. (MCECS) and the Muskegon Area Amateur Radio Council (MAARC) will be demonstrating their communication skills at the Muskegon Conservation Club, North Muskegon, on that Saturday from noon until 7:00 PM. Other groups from around the country are encouraged to join in. -- James Duram, K8COP <jimk8cop@afo.net>, Emergency Coordinator, Muskegon County, Michigan

==> MICHIGAN EMCOMM GROUP SELECTS ONE OF ITS OWN FOR AWARD

The Muskegon County (Michigan) Emergency Communication Services, Inc. a local non-profit amateur radio group involved in emergency communications, has awarded Barbara Grob, K9BLG, the Al Ronning Outstanding Service Award. The award is given each December to a member of the group that has gone above and beyond the call of duty in service to this organization. This recognition is given in memory of Al Ronning, K8AER, who was an inspiration to other members of the group in his tireless effort in public service. Ronning was a member of the group who died in an automobile crash in December, 2006. James Duram, K8COP, Emergency Coordinator, Muskegon County, awarded the plaque to Grob at their December meeting.

==> LETTERS: COML

The item in the December 21, 2011 ARES E-Letter does a good job of describing the role of the Type III Communications Unit Leader (COML). However, readers should be aware that actual certification requires task completion and sign-off of a task book that may be impossible to achieve if one is not already appropriately employed in a public-safety agency. Thus, I don't think the rating is achievable for hams not already "in the business." -- Marty Woll, N6VI, Vice Director, ARRL Southwestern Division; Assistant DEC, ARESLAX BCUL 15 and Training Officer, LAFD ACS, CERT III

In the recent ARES E-Letter there was the statement "This COML training will qualify emergency responders to lead ICS communications units if they possess the necessary prerequisites, including knowledge of the following: local communications; communications systems; and regional, State, and local communications plans." To be more correct, the training alone doesn't "qualify" emergency responders by itself after one takes the COML Training (and I have). The most important part of the process to achieve COML qualification is completion of a task book that the student receives. This document gets signed off on each of the

tasks by served agency staff in authority to see first hand that the student demonstrates the capabilities of the position. This task book must be signed off when the student demonstrates experience in real world events or exercises. Then, the task book must be submitted to a State Level organization that has the responsibility for certifying the student before they can say anything other than they attended the course. The COML qualification is not awarded until those additional steps take place. Merely taking the course is not sufficient. I should note that the Department of Homeland Security Office of Emergency Communications (DHS - OES) is also running other courses that would be useful to radio amateurs: COMT and RADO, all being important and specific roles in the NIMS/ICS framework.

Here in North Carolina we (ARES and MARS) have a strong effort to support the agencies we serve - and I'm sure the effort is equally as strong in other states. That being said, I can say with some confidence that a good number of COMLs in North Carolina who have had their task books submitted for approval are hams! The DHS OEC staff just last week came to North Carolina for our second State Communications Interoperability Summit. There were many hams in attendance, and among the many events and training opportunities, with Amateur Radio having a major role in this Summit, there was a two day exercise for COML students from previous COML courses and a small number of students demonstrated all the task book capabilities to multiple COML qualified evaluators so that some or all of their COML tasks could be signed off by DHS and State qualified evaluators for submission to our State Interoperability Executive Committee, which certifies COMLs here.

North Carolina has led the way in the number of ARES operators getting ICS course completion as well as AUXCOMM training: North Carolina ARES/MARS/AUXCOMM hams are in exercises and real-world demonstrations, showing our served agencies the benefits of having a partnership with NIMS/ICS-trained Amateur Radio operators serving the emergency response agencies in our State, along with the communities they protect and support. -- P. A. Sadowski, AH6LS, IT Manager, North Carolina State Highway Patrol Technical Services Unit, Raleigh, North Carolina

==> ARES SUPPORTS MAJOR EXTREME RACING EVENT IN KENTUCKY

The United States Adventure Race Association (USARA) National Championship Extreme Racing event was held October 7 to 8, 2011 in McCreary County, Kentucky. It is a cross country extreme Ironman event consisting of three person coed teams from across the United States, involving hiking, biking, canoeing, and orienteering.

The event was coordinated at Cumberland Falls State Park, with the race starting at Blue Heron in the Big South Fork National River and Recreation Area at 8:00 AM on Friday. The first team finished exactly 20 hours and 15 minutes later in the early morning hours of Saturday.

Communications was provided by Region 5 ARES from McCreary, Pulaski, and Whitley counties, Kentucky. Operators were positioned at six

Transition Areas, and reported arrivals and departures of each team at each Areas.

Many legs were involved, starting with a short hike from the start point before the teams transitioned to mountain bikes. An orienteering course tested the teams' map and compass ability. At Bell Farm the teams started a time trial event called "The King of the Mountain," which tested the teams' endurance for a climb to the top of Peter's Mountain Lookout Tower. More biking was followed by the teams transitioning to canoes to paddle a distance of 5.7 miles, with another orienteering course at the end of the paddle. More paddling and biking was followed by more orienteering courses. Total distance was 78.2 miles through some of the most beautiful country in the eastern United States.

Lessons Learned

ARES operators performed with excellence, totaling 23 hours of continuous operation. The repeater used was the 444.050 MHz machine, Williamsburg, Kentucky, owned and maintained by Will Jones, KB4PTJ, which offered outstanding coverage including hand-held coverage in most places along the river gorge.

The challenge was the size of the course and the number of operators who were able to volunteer their time and resources to such a major task. I was forced to ask several operators to move from one Transition Point to another to provide information as the contestants checked in and out. I have had a difficult time recruiting enough ARES members and that was the main reason for some lack of coverage.

The ARES net control station (NCS) was established in a room at DuPont Lodge and sent information upstairs to race officials who in turn posted it on the USARA website. Due to limited access of an entry point for our coax and antenna location we were forced to be in a separate room from the race officials. This problem was overcome by the NCS operators' adaptability, relaying reports from the field by texting and sending e-mails to race officials. But, the bottom line is the NCS operation and the USARA bloggers should have been co-located.

Another issue was lack of food for the communications personnel at each Transition Point. Since all operators were informed to bring their own food should none be available, it was not a problem. The lesson is: When deployed on any type of public service event or an actual emergency, an ARES member should be self sustaining, and not rely on being provided with this type of support.

The participation by ARES members from different Kentucky districts was great. Operators fell into place without any problems. NCS was up and running before the race start and was well staffed with four operators and several radios to cover the primary as well as the secondary frequency. Net Control operators were members of the Lake Cumberland ARA, due to their duty-specific training by Don Munsey, AC4DM, Pulaski

County, and performed flawlessly.

Our effort was typical of an actual emergency response and was excellent training for all involved. More information on the race here <http://www.usaranationals.com/home.aspx>. -- Randall E. Gilreath, AD4WB <gilreath@highland.net>, District Emergency Coordinator, District 11 ARES Kentucky Section

==> K1CE FOR A FINAL

Here is a news story from my home town of Palm Coast, in Flagler County, Florida, written by Public Information Officer Eddie Cail, KJ4LRB, that I particularly enjoyed:

2012 ARRL KID'S DAY EVENT

By Eddie Cail, KJ4LRB

Flagler County ARES and The Flagler Palm Coast Amateur Radio Club hosted the ARRL Kid's Day event this past Sunday in Palm Coast. Participants included Boy Scout Troop 402 who were working on Radio merit badges and youth from all over the county.

The objective was to get youth on the air and get them interested in Amateur Radio by passing basic traffic over HF and other modes. Children were able to log their traffic and see what it was like to work stations near and far.

Both groups are working to garner youth's interests and advancing their education to the point of obtaining their licenses. FPCARC runs a cadet program year round educating students on various aspects of Amateur Radio and both organizations hope to run similar events during the year.

** MMMonVHF Newsletter / No.3 - WEEK 03/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-01-18
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 **

The MMMonVHF VHF-DX-Portal is happy to invite all VHF enthusiasts
and VHF-DX'ers to join the new survey to identify the "The Best
VHF DX Expedition of the Year 2011". The aim of the survey is to
thank the very hard efforts of those who organized and carried out
so many nice expeditions and trips all around the world on the
VHF bands in the past year 2011. Participation period: 01. January to
31 December - Voting period: 01. January 2012 - 21. January 2012 :
Persons or Groups who organized and carried out some kind of exped.
in the 144 MHz band segment via Meteor Scatter or Earth-Moon-Earth
propagation. Expeditions / Activities have had to be spread out on
the VHF-DX-Portal Make More Miles on VHF in the year 2011 and
must have found their way into the "REVIEW" section of MMMonVHF.
You will be able to vote by selecting a maximum of 5 expeditions
alltogether in TWO categories (MS and EME) by ticking the box
in front of the expeditions. The voting page will be available by
direct link at http://www.mmmonvhf.de/voting.php from up 1 st of
January 2012 until 21 st of January 2012. Results in February 2012.

** Atleticoteam goes Africa, 144 Mhz & 430 Mhz EME **

Hi Folks!
As you already know Atletico-team surprises us each year
with one ormore EME DX-peditions. Remember: PJ4EME 2007,

JW5E 2008, 5Z4EME 2009 (awarded by MMM readers as "Best VHF DX Expedition" of the year 2009), 3B8EME 2010 (awarded by MMM readers as "Best VHF DX Expedition" of the year 2010),C56EME 2011 (worldrecord 144 MHz EME with 361 QSO's!) PJ4X 2011, PJ2/PE1L 2011.
Well, there are serious plans that Rene PE1L and Eltje PA3CEE will travel back to Africa again this year!
Africa came into our blood, there is no other way than to return... and return... and return...
We start with revealing just a bit of our plans: Our goal is big grid KJ. Right! Deep in the heart of Africa. But where? What entity? More details will be revealed later. There must be something left now to guess.
We'll keep you informed!

SOURCE: Rene PE1L via Moonnet

** To: MAP65 users **

If you are a regular user of MAP65, I invite you to try an all-new version of the program, MAP65 2.0. Background information, details about its new features, and installation instructions are described in a document posted at

http://physics.princeton.edu/pulsar/K1JT/Beta_Release_of_MAP65_2.0.pdf

If you try this beta release of MAP65 2.0, please provide feedback to this list, or by email direct to me. Future users of the program will surely benefit from your comments, suggestions, and bug reports.

Latest news:
A new revision of the beta release of MAP65 2.0 has been posted at

http://www.physics.princeton.edu/pulsar/K1JT/MAP65_199r429.exe

(If you need instruction about what is different about MAP65 2.0, and how to install it, go to
http://physics.princeton.edu/pulsar/K1JT/Beta_Release_of_MAP65_2.0.pdf)

SOURCE: Joe K1JT via Moonnet

** PSK2k, new meteorscatter software available **

Those who are regular visitors of the ON4KST-chat or the DX-cluster will have noticed that there are stations that are using a new software for meteorscatter (or weak signal QSO's) called PSk2k and found a place around 144.360 MHz.

The software is still in a deveopment state but can be used already and succesfull QSO's are reported in tropo and MS.

Author of this piece of software is Klaus, DJ5HG. The software is an avanced digital mode for meteorscatter with secure communication by Error Correcting and Error Correcting Codes. It features Auto-Modes for automatic QSO's and is replying automatic to received calls. The program can operate in parallel to WSJT on the same PC on the same soundcard, however the processor-load can be heavy so only at newer types of PC's.

The program will need MATLAB (MCR) installed on your PC and before installing and running PSK2k the use of the tool MCR_test is advised.

Software can be downloaded on the downloadpage from DJ5HG at the URL http://dj5hg.de/dj5hg_download.html

Before installing the software is highly recomended to read the manual as setting up the software is taking more time and you need some things to get it running.

A PSK2k User Group was founded on Jan. 7th at the group can be found on URL http://uk.groups.yahoo.com/group/psk2k/ . Reading the posts on the User pages is usefull. You can also find a tool in the section files called testaudio.zip . As setting up the RX/TX audio is not so easy as in WSJT, this tool will help you. Founder of the User group is Roger, GW4WND.

Remember, the software is still in development so not everything is perfect yet. Feedback is welcome. And remember...the way of decoding is different than FSK441 in WSJT where you were able to decode als signals and partial messages. PSK2k will decode it all or nothing and only what is general or for your eyes only....you will not be able to decode signals that are for other stations.

SOURCE: DJ5HG and the PSk2k User Group

** FG4KH on 144 MHz April 12th to April 26th **

FG4KH (FK96) is annouced to be QRV on 144 MHz in the period between April 12 and April 26 2012. Further details are on URL http://fgdxpeditionf1duz.monsite-orange.fr/

The 432 MHz expedition ended and QSL's will be send when ready.

SOURCE: Philippe, F1DUZ, to Moon-Net, Jan. 18th.

--

** UT1FG/MM **

Yuri, UT1FG, who is traveling across the Atlantic Ocean and is activating "Wet Grids", has been reported last week (Jan. 11-Jan. 18) in the JO55 area. He has been on 144 MHz SSB and on satellite.If you need wet squares next week might be your chance.

** Conway Reef, 3D2C **

3D2C, CONWAY REEF. Operators Hrane/YT1AD (Team leader), David/K3LP
(Technical Co-leader), Aleksey/UA4HOX (Organization Co-leader), Paul/
N6PSE (PR), Atilano/PY5EG, Vasily/RW4NW, David/WD5COV, Carlos/EA1IR,
Joe/AA4NN, David/AH6HY, Alan/AD6E, Gabriele/I2VGW and Alan/K6SRZ (Medical
Doctor) and possibly two others (spots are open!) will be active as 3D2C
from Conway Reef (OC-112) between September 25th and October 6th. Most
of these operators were active from Rotuma as 3D2R last year. Activity
will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31.
The 3D2C team will be active from Conway Reef on 2m and 6 EME using
WSJT65 (A,B,C) on 50.375 MHz and 144.375 MHz. A 6 meter beacon will be
active on 50.095 MHz. QSL via YT1AD, direct (w/SAE or SASE + 1 USD for
normal postage, 2 USDs for Airmail) or by the Bureau. For more details
and updates, visit the 3D2C Web page at: http://www.yt1ad.info/3d2c/index.html

SOURCE: Ohio/Penn DX Bulletin #1045

**Maladives, 8Q **

8Q, MALDIVES (Date Change). Operators Bert/CX3AN and Mario/CX4CR will be
active as 8Q7HU from Maafushi Island, Kaafu Atoll (AS-013), between
February 6-15th. Activity will be on 80-6 meters using CW, SSB and the
Digital modes. There will be a special emphasis on South America.

SOURCE: Ohio/Penn DX Bulletin #1045

** Malpelo Island, HK0NA **

HK0NA DXPEDITION (Latest News Dated January 12th). The following press
release is from the HK0NA Web page [edited]: "The 'Fabulous Four' (Faber/
HK6F, Jim/HK1N, Bolmar/HK1MW and Salim/HK1T) advance team continue their
work of building the infrastructure for HK0NA with emphasis shifting now
to OP. A (top of the mountain). And ..in their spare time making some QSOs
with the deserving.
Of course, we are hearing from a small minority that they are doing
everything wrong and not listening here or there or whatever. May we
suggest to you and everyone be patient, and remember that 16 more operators
will be there the morning of the 21st for up to 17 days.
Yesterday the DXCC desk confirmed that QSOs made by the advance team,
when they used their individual calls, will count for DXCC purposes.
Those logs will not be available until after the DXpedition concludes.
May we suggest that you work HK0NA also.
We intend to upload the HK0NA logs to ClubLog soon after the arrival
of the main operating team. Don't bother checking the 'Log Online' until
then.
Lastly, our volunteer pilots kindly request that you not contact them
until after the main operation begins! .... Thanks to all!"

ADDED NOTE: Some pictures are now available and can be viewed on the
HK0NA Web page under "Camp Setup". For more details and updates, visit:
http://hk0na.com
LATEST MINUTE UPDATE: The HK0NA Web page is reporting: "For the last
couple of nights there have been many bogus HK0NA spots on the clusters.
While there is a limited operation by the advance crew, and thus some
of the spots are valid, one or more 'slims' are apparently calling CQ
using the HK0NA call." Read the whole press release on the Web page for
more details under "Latest News".

I heard from the trip leader, and they may be open to consider 6m EME
after January
25. Watch their website for details, including the frequency.
Lance Collister, W7GJ

WIANEWS WEEK COMMENCING JANUARY 22 2012.

Don't forget the AX prefix can replace VK prefix for 26 January

Kids in VK6 win chance to speak to ISS

TV FIRST TRANSMISION IN VK IN 1800'S

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JANUARY 22 2012.

The World Radiocommunication Conference 2012 (WRC-12) is being held in
Geneva, Switzerland from 23 January to 17 February 2012.

The Australian delegation, led by the ACMA, will include ACMA Chairman,
Chris Chapman, for the first week of the conference and Maureen Cahill,
General Manager Communications Infrastructure, operational Head of the
Australian delegation.

Dale Hughes VK1DSH is representing the WIA and the amateur service.

There are 35 agenda items for WRC-12, including agenda Item 1.23
"to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz
to the amateur service on a secondary basis, taking into account the need to
protect existing services".

Dale will be reporting regularly to the WIA Board.

(Sourced from WIA Front Page News)

Successful Prosecution

WIA President Michael Owen VK3KI writing on WIA Front Page News (wia.org.au) says a 63 year old man from Melbourne's Western suburbs pleaded guilty in the Werribee Magistrates Court January 11 to several offences under the Radiocommunications Act.

The offences, unlicensed operation of a radiocommunications device, unlawful possession of a radiocommunications device and causing interference to radiocommunications carry penalties of up to two years' imprisonment.

The prosecution followed an extensive investigation into alleged breaches of the Radiocommunications Act.

The court was told that, until August 2009, the defendant had been a licensed amateur radio operator but was investigated by the ACMA following extensive complaints about interference. As a result of the investigation by its Compliance Operations, Field Operations and Interference Management and Monitoring Sections, the ACMA cancelled the defendant's amateur licence.

It was alleged that the defendant continued to regularly use his amateur transmitter from his home, contrary to the Radiocommunications Act, deliberately causing interference to licensed radio amateurs.

After further complaints, the ACMA traced the interference back to the defendant's home a number of times. However, despite warnings from the ACMA, the complaints continued. The execution of a search warrant by the ACMA in September 2011 confirmed that the defendant had a large amount of radiocommunications equipment, contrary to the Act.

Tests confirmed that the equipment was set to the radio frequencies that had been interfered with.

The court placed the defendant on a 12-month good behaviour bond, ordered him to dispose of all of the seized equipment within four months and to prove to the ACMA in writing that he had disposed of the equipment.

Western Australia marks 50th Anniversary of Perth as the 'City of Light'

On February 20, this year, WA will celebrate the 50th anniversary of a very significant event. On that day in 1962, John Glenn became the first American to orbit the Earth in the Friendship 7 spacecraft.

On this mission, John flew over Perth and the people of Perth turned on their lights to acknowledge his mission. John observed that the city was clearly visible from space and Perth became known worldwide as the 'City of Light'.

This early space exploration mission set the stage for the Gemini and Apollo programs which culminated in NASA landing men on the moon.

To commemorate the 50th anniversary of John Glenn's orbit, on Monday Feb 20 an outdoor public event will be staged in the Northbridge Piazza, featuring

a live audio and video link to the International Space Station as it orbits the Earth.

This free public event is being organised by the State Records Office of Western Australia and the WA Museum working with the City of Perth.

State Archivist Cathrin Cassarchis said the highlight of the event will be an opportunity for young people to speak with and ask questions of the astronauts on the International Space Station.

10 young people will be selected through an online competition in which they are asked to come up with their original questions for the astronauts.

The school aged children will ask their questions to the astronauts on the ISS as they are streamed live on the big screen at the Northbridge Piazza," said Ms Cassarchis.

The world wide ARISS network will be setting up the link between the Space Station and Perth and assisted by the Hills Amateur Radio Club

City of Perth Lord Mayor, Lisa Scaffidi said the City was pleased to be involved in hosting a free public event that engaged the community and recalled a very significant event in Perth's history.

School aged children in WA ONLY!! are encouraged to enter the competition by submitting their questions to the astronauts on the International Space Station at the Western Australian Museum website http://www.museum.wa.gov.au/city-lights

Entries close on 29 January 2012 and winners will be contacted by the State Records Office by 2 February 2012.

This has been Tony, VK5ZAI the Australian National coordinator for ARISS

Decision time for leap seconds

The International Earth Rotation and Reference Systems Service has decided to add a leap second to Coordinated Universal Time (UTC) at the end of June 2012.

The most recent leap was added on December 31, 2008. They have been necessary because of the Earth's unpredictable rotation.

UTC is based on highly accurate atomic clocks, but has been kept more or less synchronised with mean solar time by way of leap seconds.

A revision of Standard-frequency and time-signal emissions will be voted by the International Telecommunication Union Radiocommunication Assembly meeting, immediately before the World Radiocommunication Conference 2012.

If approved it will eliminates them by 2018. Leap seconds were introduced in 1972.

Meantime with this being a so called leap year, February will have a total of 29 days instead of the usual 28, to make up for our rotation around the Sun.

(Jim Linton VK3PC)

YL International Meet 03-09 May 2012 Update

ALARA President Tina VK5TMC has 47 YLs registered!

If you are going to join the meet then time to register is running out fast.

Registrations will need to close by the end of February for the Ghan and early March for the Adelaide Meet.

Unfortunately there has been a change the Ghan trip at what organisers consider the last minute. The Meet travel agent has been advised by Great Southern Rail (the Ghan train operator) that all Wednesday trains have been cancelled including the scheduled Meet trip from Adelaide to Alice Springs!

The Meet travel agent tried very hard to get the operator to reconsider (considering planning for the event has been going on for four years now) however the operator was adamant, no trains on Wednesday.

Organisers say that an alternative plan will be put in place!

(sourced to theTARCinc)

I'm Geoff Emery, VK4ZPP, and I've been thinking.

Regular listeners will be aware that the WIA news team has reciprocal arrangements with other amateur radio news services. These services may pick your club news item and place it on their own web site with credit to the WIA as the news source. However you can find that that same item is read and spread around the world from that secondary source.

This is why you can expand your club's presence in the world of amateur radio by submitting news items for broadcast. A good club web site is a great tool for your members but please remember our broadcast team gives their own time to compile and distribute the news. Just like you they don't have time to search the internet for your news "gem".

Remember if an item is good enough for your web site, it is good enough for WIA News.

I'm Geoff Emery and that's what I think....how about you?

An example or two, this story was sent to us from the Summerland Club this week,

WHEN WAS THE FIRST TV TRANSMISSION MADE IN AUSTRALIA?

It was the 3rd of November, 1885.

1885!

Seems the '85 Melbourne Cup was transmitted to Ballarat, Victoria.

AND was Reported to be very satisfactory.

Henry Sutton via telegraph line used Nipkow disc equipment he built himself.

Henry was known as "Australia's Edison".

Alexander Graham Bell even went to Ballarat to see him and his inventions
and it's said he was 'very impressed'.

Sutton should be better recognised, unfortunately he was on the wrong side
of the World.

Resource urls' include
http://www.iceinspace.com.au/forum/archive/index.php/t-74963.html
http://www.heritageaustralia.com.au/pdfs/Heritage1105_Henry%20Sutton.pdf

The other example of club news making national and world wide news when sent
to the National News Services comes from Tim Goodrich, N5ASH, known locally
to radio listeners as Skeeter Nash:-

CELEBRATING THE LIFE OF COUNTRY MUSIC LEGEND JOHNNY CASH

Members of my club, the Northeast Arkansas Radio
Club will be sponsoring the first ever Johnny
Cash Birthday Celebration Special Event
Station. This, on what would have been the late
Country Music Hall of Fame and Rock and Roll Hall
of Fame members 80th birthday.

The Johnny Cash Birthday Celebration Special
Event Station will take to the air on Sunday,
February 26th using the special call sign
N5C. You can listen out for it beginning at
18:00 hours UTC which is noon Central U-S
time. We plan to operate for a six hour period
ending around 6 p.m. Central US time. .

N5C will have stations operating SSB on the 80,
40 20 and 10 meter bands. At least one of these
will be located in Dyess Colony, not far from the
house where the Cash family once lived.

Johnny Cash never forgot his roots here in
northeast Arkansas, and we in the amateur radio
community are looking forward to having the
opportunity to honour one of the most recognizable
figures in music history. Those making contact
with N5C will receive a commemorative certificate.

>From Jonesboro, Arkansas, I'm Tim Goodrich,
N5ASH, a-k-a Skeeter Nash of the Northeast
Arkansas Radio Club reporting for the Amateur Radio Newsline.

More information on this celebration can be found
at the Northeast Arkansas Radio Club
website. It's located in cyberspace at
nea-rc.org. The club also maintains a Facebook

page at www.facebook.com/nearadioclub

CCARC Field Day 2012

Didn't get that special present this Christmas?

Were you on Santa's naughty list?

Don't worry; It's only 34 days until the Central Coast Amateur Radio Club Field Day at Wyong - 26th of February 2012.

Amateur Radio's Big Day out is coming up fast!

So get your wish list together, check it twice and grab that special bargain at the largest Amateur Radio gathering in the Southern Hemisphere.

Central Coast Amateur Radio Club Field Day at Wyong

As a new, free, service for 2012 the CCARC are offering to arrange "meet-ups" for Australian clubs and groups attending the field day.

For those wishing to take advantage of the meet-up feature, please register as soon as possible via the form under meet-ups tab on the right hand side of the fieldday.org.au web page. Get in quick as the list will close at shortly.

As usual most major suppliers of amateur radio equipment will be at the Field Day along with the Flea Market, Exhibitors and various amateur radio clubs, for more information, please go to the fieldday.org.au website

Of course, the Field Day raffle is on again this year and the CCARC would like to acknowledge Amateur Transceiver Radio Centre for their donation of a Yaesu VX170 to be included in this year's prize list.

VK3
web service:- http://www.amateurradio.com.au/news/
Police Roundup http://www.vicpolicenews.com.au/

The countdown continues to the Centre Victoria RadioFest with its family friendly and interesting program.

The commercial traders have loads of stock to sell at competitive prices, all in the dedicated Traders Hall.

There will be plenty on offer too at the second-hand market tables and car-boot space alley.

What sets this event apart from others is that it includes a mini-lecture program and activities. The organisers thank the guest presenters in the mini-lecture program:

There will be Australia's first showing of home-brew digital television,
a look behind the scenes at the ACMA and the Super DX station ZL6QU at
Quartz Hill.

Put it in your diary now.

The Centre Victoria RadioFest at the Kyneton Racecourse on Sunday 12 February.

VK4 QNEWS

VK4 SILENT KEYS @ 2011 - 2012 QAC YEAR

VK4MUJ Jean Bowden passed away 2nd January 2012 advised by VK4ZZ
VK4BAY Roy Mahoney January 2012 advised by VK4BSH

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

During the TV silly season when programmes may be worth watching or not, I
did manage to watch a couple of shows that were based on recent history.
Well recent enough for me to have familiarity with the technology,
particularly the electronics.

I am no specialist in this area but magazines, news-reels and cinema brought
the insides of radio stations, TV studios and the ancillary equipment to the
attention of people. What struck me was that great effort had been taken to
use the correct props for the different scenes. Motor vehicles were age
appropriate, as were the coiffure and clothes; furnishings and decor as well
as cutlery all fitted the periods portrayed. However it was the early film
editing suites, the velocity microphones and the TV cameras which really
shone for me.

As I understand, very few production houses now maintain large repositories
of props and the properties are sourced from current owners. Now this would
seem that the boat anchor brigade has a real opportunity to be part of the
TV/stage production and film industries in sourcing and supplying real props
as well as getting some money to help fund the collection and restoration of
items like these.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING

Submitting news items

If you would like to submit news items for inclusion in the
QNEWS broadcasts, please email your item in text to qnews@wia.org.au

Submit audio, read "how to submit items" on the weekly WIA news page.

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of QNEWS.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.
Last Monday's technical talk was given by Scott, VK4CZ on the topic of 6 metre DXing, an operator's experience. For Scott, his main interest in Amateur radio was in DXing and for him this meant talking to other countries. Scott's ambition is to achieve a DXCC award for 6 metres.

In Australia this is something of a challenge as all counties are typically more than 1000km distant from Australia and Scott believes that it will take possibly 2 sunspot cycles to achieve this. When asked, why 6 metres? His reply was because it is different to other bands but also at the same time, similar. As it challenges operators on both technical and capability levels and it attracts some of the best DXers from around the world.

Scott said that the band had a number myths associated with it like:
You can work the world on a piece of wet string!!;
It's either open or closed;
You have to call CQ to find out if the band is open;
It is only ever open in summer and
You can work DXCC in less than 12 months (in Europe).

Scott went on to outline what he believed are the best strategies for an Australian amateur to be successful on 6 metres. He said that there are both tips for operation and tools that should be used. These include:
Use propagation predictors;
Listen for Out of Band Indicators that is Remote TV stations below the band;
Beacons in Band;
Good operating practices and using the internet to use tools such as ionisation indicators and MUF maps found at
http://www.ips.gov.au/ and
http://www.spacew.com/www/realtime.php

Regrettably some of the Out of Band indicators are being shut down in the 49 and 50 MHz bands essentially the analogue TV stations and these will probably have disappeared by 2014.

Scott had found the following operating practices provided greatest success.
Follow the band plan;
Utilise Indicators and Tools;
Practice the DX Code of Conduct;
Learn CW;
Be prepared to listen to lots of white noise;
Listen carefully (contacts are likely to be 5x1);
Tune to Out of Band and In Band key indicators;
Listen (again!!) and
Tune the beacons.

For Scott, this summer has been very successful so far, as he had made contact with 15 countries so far. Despite the heavy rain which limited the

numbers attending, all club members thought it was a most interesting talk and certainly gave them some avenues to follow for more successful operation.

Thanks Scott!

Well this is about all at the moment and so it's 73 until next time from Ray, VK4CF, from the Redcliffe club.

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
Web - www.vk4wip.com
Email - vk4wip@wia.org.au
Main 2 meter repeater - 146.900, linked to 438.375 and 439.300

Now a roundup of news from the Ipswich and District Radio Club.

With the recently upgraded 2 meter repeater on 146.900 at The Knobby near Glamorganvale here's a reminder that the club conducts a daily morning net at 8am and a Tuesday night 'feather duster' net at 7.30pm local time.

The main Ipswich repeater is linked to 438.375 Ipswich city. It is also linked 439.300 on Spring Mountain - providing a linked repeater system through three transmitter which offers improved coverage to most of Brisbane's Southside, eastern suburbs of Ipswich and Logan areas. Whether you are portable, mobile or home station VK4RAI Ipswich and VK4RSM Spring Mountain offers extended coverage of the region. Both 70cm repeaters require a 91.5hz tone for access.

Every Tuesday the club's weekly 80 metre net is on 3.585 MHz Each week we are keen to hear from first timers to the club's net, so why not turn off the TV and join us for a couple of overs on Tuesday night.

The club meets twice a month at 7:30pm on the second and fourth Mondays, with the second Monday a social meeting and the fourth the business meeting. The first business meeting for the year is tomorrow night at the clubhouse, Deebing Street, Denmark Hill.

Don't forget you can also keep up to date on news and events at the club website - vk4wip.com

Reporting from Ipswich, this is Allan VK4FABR.

DISCUSSION POINT

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

When I came out of the examination room where I'd just passed my Foundation License, after the obligatory congratulations and back slaps, I walked out into the sun and wondered:

"Now what?"

At the time I knew two Amateurs and had met the people in my classroom. Since then I've become an active participant in Amateur Radio.

Recently I was having lunch with some other Amateurs and we were talking about how their journey evolved from graduation to their current level of involvement.

The key was "Information".

I've talked here about how I went
about selecting a radio, an antenna and the like, but there was a step before that, one that each new Amateur needs to make and that is finding the community.

Ironically, while you're listening to this, you've already found us, you already have a link to other Amateurs, but you might have graduated with other people who are not so fortunate, so firstly I'd like to encourage you to contact those people and link up with them.

Of course listening to me talking is not really interaction and I'm not the fountain of knowledge. Instead I'd encourage you to seek out other sources of information. The obvious ones are clubs and the Internet, but less obvious ones exist in the form of Amateurs who've been around the block more than a few times.

Having lunch with Amateurs who have had their license as long as you've been alive is an interesting pass-time, especially when the guy on the other side pipes up and confesses that he has had his license longer than your parents have been alive.

This Amateur Radio caper is a hobby, it's fun, it's a diversion from your day-to-day life and an opportunity to learn new things from new people. Keep your eyes and ears open and soon you too will start finding other like minded individuals.

In the meantime, listen to the Amateur Radio news,
participate in online fora, visit local clubs and remember that this hobby touches all walks of life across the globe.

Enjoy.

I'm Onno - VK6FLAB

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Army MARS resumes use of WinLink 2000

It appears the Army Military Auxiliary Radio System (MARS) has reversed its decision to phase out WinLink 2000.

The ARRL reports:

According to Pudge Forrester, AA9GL, government liaison for Army MARS, Lieutenant General Susan Lawrence has reversed the decision to phase out the use of the WinLink 2000 global radio e-mail system by Army MARS members.

Ms Lawrence stated that the Army, after reviewing its capabilities, had decided that the continued use of WinLink 2000 was a valuable asset to Army MARS members and agencies that were using the service.

She issued a statement to that effect on December 21, 2011.

On January 5, 2012, the Chief of Army MARS officially notified his membership that the phase out notice had been rescinded.

Army MARS members and agencies who had been using the service hailed the decision by Ms Lawrence and resumed use of WinLink 2000.

FCC GREEN LIGHTS STA FOR TEXAS HAM TO RUN HF SPREAD SPECTRUM

The FCC has granted Philip J. Williams, KA1GMN, of Euless, Texas, a Special Temporary Authority or STA to conduct Spread Spectrum experiments on 160 through 2 meters.

The 6 month authorization takes effect February 1st and expires on July 31st. It limits Williams to a maximum 2.5 kHz of signal bandwidths at 100 watts effective radiated power. Williams was directed by the FCC to use the Experimental Station call letters WF9XJD during his investigational Spread Spectrum transmissions.

Previous experiments with Spread Spectrum technology have been conducted on the ham radio bands at 222 MHz and above where this mode of transmission is already legal. The Special Temporary Authority granted to Williams is the first permitting Spread Spectrum experimentation on the High Frequency and lower VHF bands.

Bomb threat shuts Cyprus radio & TV for three hours

Staff were evacuated from the premises of the Cyprus Broadcasting Corporation Monday last after a bomb threat was phoned into the station.

According to an informed source a threat was phoned in twice to the main switchboard, firstly at 1020 UTC, then again just after 1100 UTC.

Few details are known about the actual threat, but dozens of police officers, fire and explosives experts cordoned off the sprawling complex, with TV and radio services forced off air. The studios were evacuated and after a search lasting three hours, police gave the all clear.

CyBC is Cyprus's public broadcasting service, transmitting island-wide on four radio and two television channels.

ITU receives Emmy Award

This for new audio broadcast standard Recommendation which aims to standardise loudness metering on TV.

The annual Technology and Engineering Emmy recognizes the ground-breaking work on the worldwide standardization of loudness metering for use in broadcast audio, which the Academy considered as outstanding and showing excellence in engineering creativity.

ITU-R Recommendation BS.1770 on "Algorithms to measure audio programme loudness and true-peak audio level" was elaborated over a decade as a result of the dedication of many specialists including Craig Todd of Dolby Laboratories, USA; Gilbert Soulodre of Communications Research Centre, Canada; and Spencer Lieng of the Australian Broadcasting Corporation.

The standard was finalized during the last study period within ITU-R Working Party 6C under the Chairmanship of David Wood of the European Broadcasting Union. The pertinent algorithm and the agreed parameters are now contained in the ITU-R Recommendation approved by ITU Member States, giving worldwide guidance on loudness metering.

NEWS FROM ARNEWSLINE USA

DIY RADIO NEWS: CQ TO INTRODUCE MAKER COLUMN

CQ magazine will introduce a quarterly "Maker" column, to be written by Matt Stultz, KB3TAN, that will appear in the March, June, September and December issues of the magazine.

KB3TAN is the founder of "HackPittsburgh. This is a community workshop for makers in Pittsburgh, Pennsylvania. He has been a ham since 2009 and has integrated amateur radio into many of HackPittsburgh's activities.

As already reported, the hacker and maker movement is a worldwide do-it-yourself phenomenon among mostly younger, tech-savvy individuals who enjoy hands-on tinkering and experimenting with electronics, crafts and similar projects. Many "makers" are not familiar with amateur radio, even though hams have been "makers" since the dawn of radio. CQ says that the goal of this column to help build and strengthen bridges between the amateur radio and the maker communities.

MULTIPLE LANGUAGE VERSIONS OF THE DIY MAGIC OF AMATEUR RADIO

And speaking of the maker and hacker communities, while it's not even been out a month, there appear to be several groups that have either asked permission to translate the ARRL's new the DIY Magic of Amateur Radio video into other languages or are already undertaking such a project.

Since its release last December 27th, word is that versions with either sub titles or

over-dubbed audio are being prepared by
individuals or groups around the globe in the
Spanish, Portuguese and possibly even Russian
languages. And these are the ones that are known about.

Also, Tom Medlin who hosted the December 27th
release of the video on his W5KUB website has
made available some statistics. These show that
the new video had viewers in Canada, Venezuela,
Mexico, Argentina, France, Cayman Islands, Puerto
Rico and New Zealand as well as across the United States.

Those who have not yet seen the new video can do
so on-line on YouTube in English at
tinyurl.com/arrl-diy-movie. You can also watch
it or download it at www.arrl.org/DIY.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

Don't forget the AX prefix can replace VK prefix for 26 January

VK Ross Hull Memorial VHF UHF Contest CLOSES January 31
VK JOHN MOYLE MEMORIAL FIELD DAY March 17-18
VK/ZL AM/CW on ANZAC DAY April 25
VK/ZL Trans Tasman Contest 80 metres SSB May 5
VK Shires Contest June 9-10
VK/ZL Trans Tasman Contest 160 metres SSB June 25
ZL NZART Memorial Contest July First full weekend
VK Remembrance Day Contest August 11-12
WW International Lighthouse Lightship Wknd August 18-19

On ANZAC Day, 25th of April 2012, a group of Amateurs in North Queensland,
Tableland Radio Group, are encouraging amateurs to operate on AM and CW
modes during the afternoon and evening of ANZAC Day as a mark of remembrance
to the servicemen and women who served our countries during time of conflict.

AM and CW were modes used by radio operators and signallers during WW2 and
in Korea, Malaysian and early in Viet Nam so, by using those modes, it shows
that we Radio Amateurs are remembering them in our own special manner.
Hopefully our New Zealand cousins will join in the activity as the ANZAC
spirit is an integral part of both our countries.

This is NOT a contest and we simply ask Amateurs to switch to AM and CW to
experience the attributes of those old modes.

As regards frequencies its simply staying on the usual net frequencies BUT
change the mode.

If it's possible we ask that ex-Navy Ships, Military Museums, fortifications,
Warbirds,Radio museums etc etc be used to operate from.

On conclusion please send an article to Amateur Radio Magazine to show
others what you have done.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Amateur Radio station celebrating Chinese New Year

Neoh, 9M2CLN, station master for the Malaysian Amateur Radio Transmitter Society (MARTS), announced that the special event callsign, 9M4CNY, will be active to celebrate the 'Chinese New Year Cultural And Heritage Celebration 2012' from Penang Island (AS-015) on January 29th, between 0700-1600z.

Suggested frequency are 14288 kHz and 7088 kHz, SSB only.

QSL only direct to address on QRZ.com

VK5CP HOLIDAY STYLE

"I will be operating in 'holiday mode' from LORD HOWE ISLAND as VK5CP/9 from 19 January 2012 to 24 January 2012.

I will be using a IC7000, LDG Z2Pro Tuner and a Buddistick vertical antenna. I will be focusing on 30M (data), 20M and 6M depending on conditions. I have a signalink USB interface and Mix W software. Key data modes will be PSK31 and RTTY. I will try 30M first as I understand this is a much wanted mode/band. I dont expect that I will be loud but hopefully the data modes will make things easier for those that need LHI.

I will post QSOs via LOTW and EQSL upon my return to VK5. Please QSL via VK5CP (and be patient as I will have to print some cards).

Lost Islands of Central Arctic

Tomas NW7US has made available on YouTube a 58-minute movie of an amateur radio DX-pedition to the 'Lost Islands of Central Arctic'.

In April 2001, a team of amateur radio operators and support team members embarked on a journey to the "Lost Islands of Central Arctic", an area above Russia, just shy of the permanently-frozen arctic circle.

These Islands were at one time never marked on any map, as they were strategic military 'assets' of the USSR. Now, they are documented and in this Diary, you get to journey with the expeditionary team. Narration is in English.

They went from Island to Island, spending time at each, to 'activate' the island on the amateur radio bands. This is a fantastic documentary of this expedition.

Islands included in the near hour long movie:
+ RI0B (AS-156) USHAKOVA Isl. (IOTA New one)
+ RU0B (AS-057) UYEDINENIYA Isl.
+ RS0B/P(AS-057) ISACHENKO Isl.
+ RS0B/P(AS-068) MONA Isl.
+ R3CA/0

Team members:
+ RA0BM - Victor
+ UA9OBA - Yuri
+ R3CA - Vladimir
+ RW3GW - Valery
+ RZ9OO - Alexender
+ RV0AR - Pavel
+ UA0BA - Andrey
+ RX9ULT/9 - Andrey

There were also other supporting team members, like Evgeniy and Boris, plus the helicopter crew, including Igor, Leonid, the Mi8 Helicopter crew with Sergey.

Please subscribe to my channel. I am on Twitter: @NW7US http://NW7US.us/

QRP to the ISS

Doug Cook KD5PDN's article about contacting the International Space Station with a few watts and a shoestring budget antenna is now available.

The article "QRP to the ISS" appeared in the February issue of QST magazine and with permission from the ARRL, can now be downloaded from Clint Bradford K6LCS's website.

Doug walks the reader through building a simple tape measure beam, and how to successfully work the ISS with it and a handheld radio.

Read the article at

http://www.work-sat.com/Work-Sat/Sat_Skeds_files/QRP-ISS_2.pdf

WW SPECIAL INTEREST GROUPS --- ILLW

The half-way point for ILLW

The 100th entry in the 15th annual International Lighthouse and Lightship Weekend is the Moritzburg Lighthouse, Germany.

It was built in 1770 next to a lake and miniature harbour for the King to Saxony for entertaining imitation naval battles.

Contest style station DM2C at a lighthouse expects to work CW, SSB and PSK31. Each contact will receive a QSL card through the bureau.

With seven months to go Australia is in the lead accounting for a third of all entries so far, with Germany on 16, the USA 12 followed by England having nine.

Among the other early representatives are Argentina, Belgium, Chile, Denmark, France, Honduras, Italy, Netherlands, New Zealand, Northern Ireland, Poland, Romania, Scotland, Sweden and Wales.

Only a quarter of regular countries have joined at this stage and hundreds of entries are yet to be received.

It was a record last year with 470 entries including 19 Lightships and 55 countries involved. The International Lighthouse and Lightship Weekend, a 48 hour fun event, is always on the third full weekend of August.

The founder of the annual event was Mike Dalrymple GM4SUC, who passed away in December 2005 and operated from Turnberry Lighthouse with the Ayr Amateur Radio Group.

Check out the availability of a lighthouse or lightship now and register it. For guidelines, an entry form and other full information about August the 18th and 19th this year visit the website illw.net

ELECTRONIC BALLOTING FOR DIVISION ELECTIONS

The ARRL Board of Directors held its 2012 Annual Meeting January
13-14, 2012 in Windsor, Connecticut, under the chairmanship of
President Kay Craigie, N3KN. Newly elected Delta Division Director
David Norris, K5UZ, attended his first Board meeting as Director. In
addition, two recently elected Vice Directors -- Glen Clayton, W4BDB,
Delta Division, and Dale Williams, WA8EFK, Great Lakes Division --
attended their first Board meeting.

After viewing a demonstration of electronic balloting, the Board
adopted amendments to the ARRL Bylaws that will permit the
implementation of electronic voting in the 2012 fall elections for
Director and Vice Director of the Central, Hudson, New England,
Northwestern and Roanoke Divisions. Plans call for paper ballots still
to be mailed to those members who have not shared their e-mail
addresses with the ARRL, or who simply prefer to cast their votes by

mail. Supervision of the balloting is the responsibility of the Ethics and Elections Committee. Read more here <http://www.arrl.org/news/arrl-board-of-directors-holds-2012-annual-meeting-okays-electronic-balloting-for-division-elections>.

==> + ARRL BESTOWS AWARDS AT 2012 ANNUAL MEETING

The ARRL Board of Directors had the pleasure and distinction of bestowing three annual awards on six recipients at its 2012 Annual Meeting: The George Hart Distinguished Service Award, the Bill Leonard, W2SKE, Professional Media Award for print, audio and video, and the ARRL International Humanitarian Award. Read more here <http://www.arrl.org/news/arrl-bestows-awards-at-2012-annual-meeting>.

==> + ARRL BOARD WELCOMES RICK NISWANDER, K7GM, AS NEW TREASURER

When ARRL Treasurer Jim McCobb, K1LU, announced last year that he would retire after more than three decades of volunteer service to the ARRL, ARRL President Kay Craigie, N3KN, appointed a search committee to find a suitable replacement. The committee received many resumes from League members, and after interviewing several applicants, selected Rick Niswander, K7GM, of Greenville, North Carolina. At the 2012 ARRL Annual Meeting, Niswander was elected by the Board of Directors as the sixth Treasurer of the ARRL.

Niswander -- an ARRL Life Member -- has been the Vice Chancellor for Administration and Finance for East Carolina University since 2010, where he is the senior executive responsible for all financial, administrative, and operational activities at the university. Prior to that appointment, he served as ECU's Assistant Dean for Graduate Programs and Dean of its College of Business. He is also a Professor of Accounting at the university. Niswander is also the Executive Treasurer for the ECU Foundation, the ECU Medical Foundation, the ECU Alumni Association and the Pirate Club (the ECU athletic booster club). A Certified Public Accountant since 1981, he holds a BBA in Accounting from Idaho State University and a PhD in Accounting from Texas A&M University. Read more here <http://www.arrl.org/news/arrl-board-welcomes-rick-niswander-k7gm-as-new-treasurer>.

==> + A REMINDER: POSTAGE RATES TO RISE THIS MONTH

Beginning Sunday, January 22, it will cost more to mail first class letters, postcards and packages within the US. The cost to mail a first class letter will be 45 cents, an increase of 1 cent. According to the USPS, this is the first increase since May 2009. The cost of mailing a postcard will be 32 cents, an increase of 3 cents. This is the second increase for postcard postage in less than a year; in April 2011, the USPS boosted the postcard stamp price from 28 cents to 29 cents. You will also pay more to send letters to Canada, Mexico and other international destinations. Click here <http://about.usps.com/news/national-releases/2011/pr11_factsht_pricechng_101

8.pdf>
for more information on all the postal increases.

==> + ARMY MARS RESUMES USE OF WINLINK 2000

According to Government Liaison for Army MARS
<http://www.netcom.army.mil/mars/> Pudge Forrester, AAA9GL, Lieutenant
General Susan Lawrence has reversed the decision to phase out the use
of the Winlink 2000 <http://www.winlink.org/> global radio e-mail
system by Army MARS members. General Lawrence stated that the Army --
after reviewing its capabilities -- had decided that the continued use
of Winlink 2000 was a valuable asset to Army MARS members and to the
agencies that were using the service. She issued a statement to that
effect on December 21, 2011. On January 5, 2012, the Chief of Army MARS
officially notified his membership that the phase out notice had been
rescinded. Army MARS members and agencies who had been using the
service hailed the decision by General Lawrence and resumed use of
Winlink 2000.

==> + US DISTRICT COURT FOR MAINE ISSUES ORDER GRANTING SUMMARY
JUDGMENT AGAINST GLENN BAXTER, K1MAN

On January 10, the US District Court for Maine issued a ruling in
the FCC's lawsuit to collect monetary forfeitures issued to Glenn
Baxter, K1MAN, of Belgrade Lakes, Maine. The FCC had assessed
forfeitures in the amount of $21,000 against Baxter
<http://www.arrl.org/news/us-charges-k1man-with-failure-to-pay-fine> on
three asserted violations of the Communications Act of 1934 and its
regulations: Failure to respond to an FCC inquiry in violation of Title
47, Section 308 of the US Code
<http://www.law.cornell.edu/uscode/html/uscode47/usc_sec_47_00000308----000-.
html>,
willful or malicious interference with other radio transmissions in
violation of Section 97.101(d)
<http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&sid=47ae9117aa64a743f2b
dfb3db7c32da6&rgn=div8&view=text&node=47:5.0.1.1.6.2.157.1&idno=47>,
and engaging in communications in which he has a pecuniary interest in
violation of Section 97.113(a)(3)
<http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&sid=47ae9117aa64a743f2b
dfb3db7c32da6&rgn=div8&view=text&node=47:5.0.1.1.6.2.157.7&idno=47>.

Chief US District Judge John A. Woodcock Jr, in writing for the Court,
agreed with the FCC on the first two counts -- willful or repeated
failure to respond to FCC requests for information, and willful or
malicious interference -- and granted summary judgments to the FCC in
the amount of $3000 and $7000, respectively. On the third claim --
communications in which an amateur station licensee or control operator
has a pecuniary interest -- the Court declined to grant a summary
judgment to the FCC, holding that there were issues of material fact to
be litigated in the Court in later proceedings. Find a link to the
complete decision here

==> SOLAR UPDATE

Tad "Fooling me like the Sun in the winter
<http://www.youtube.com/watch?v=4HVdT3D820Y>" Cook, K7RA, reports: New sunspot groups appeared on every day over the past week. On January 12, new sunspot group 1396 appeared, and the next day two more -- 1397 and 1398 -- popped into view. On January 14, four new sunspot groups appeared: 1399, 1400, 1401 and 1402. January 15 saw group 1391 vanish and new group 1403 emerge. Two more appeared January 16 -- 1404 and 1405 -- while 1397 vanished. On January 17, 1406 appeared and 1395 disappeared, while 1407 emerged on January 18. The average daily sunspot numbers rose this week, from 90.6 to 116.9, while the solar flux stayed about the same, changing from 134.9 to 133.4. The latest predictions have a solar flux of 150 on January 19-20, 155 on January 21-22, 160 on January 23-25, 155 on January 26, 140 on January 27-29, and 135 on January 30-February 6; we are still looking for a solar flux peak of 165 on February 17-21. The predicted flux values of 160 on January 23-25 are markedly higher than the 145 predicted last week for the same dates. The predicted planetary A index is 6, 8, 5, 8 and 12 on January 19-23, and 5 on January 24 through the end of the month. Look for more information on the ARRL website on Friday, January 20. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Max Graham's Sun in Winter
<http://en.wikipedia.org/wiki/Max_Graham>.

==> THIS WEEK IN RADIOSPORT

This week:

- January 20 -- NCCC Sprint Ladder
- January 21 -- Feld Hell Sprint; LZ Open Contest
- January 21-22 -- North American QSO Party (SSB); Hungarian DX Contest; YL-ISSB QSO Party (SSB)
- January 21-23 -- ARRL January VHF Sweepstakes
<http://www.arrl.org/january-vhf-sweepstakes>
- January 25 -- SKCC Sprint
- January 25-26 -- CWops Mini-CWT Test

Next week:

- January 27 -- NAQCC Straight Key/Bug Sprint; NCCC Sprint Ladder
- January 27-29 -- CQ 160 Meter Contest (CW)
- January 28-29 -- BARTG RTTY Sprint; REF Contest (CW); UBA DX Contest (SSB); SPAR Winter Field Day
- January 28 -- WAB 1.8 MHz Phone Contest
- January 29 -- QRP ARCI Fireside SSB Sprint
- January 29-30 -- Classic Exchange (CW)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 27-28 -- ARRL Mississippi State Convention <http://www.arrl.org/hamfests/mississippi-state-convention-capitol-city-hamfest-1>, Jackson, Mississippi
- February 4 -- ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>, Richmond, Virginia; ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-1>, Ladson, South Carolina
- February 10-12 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>, Orlando, Florida
- February 17-18 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>, Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>, South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention <http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest>, Del Rey Oaks, California; ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-2>, Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>, Birmingham, Alabama
- March 9-10 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana-hamfest>, Rayne, Louisiana; ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-green-country-hamfest-1>, Claremore, Oklahoma
- March 10-11 -- ARRL Roanoke Division Convention <http://www.arrl.org/hamfests/roanoke-division-convention-charlotte-hamfest-tm>,

Concord, North Carolina
- March 17 -- ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest
>,
Lincoln, Nebraska; ARRL Southern Florida Section Convention
<http://www.arrl.org/hamfests/southern-florida-section-convention-2>,
Stuart, Florida; ARRL West Texas Section Convention

Amateur Radio Newsline(tm) Report 1797 - January 20 2012

Amateur Radio Newsline report number 1797 with a release date of
January 20th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. QRZ.com joins the fight to kill the SOPA act
now in congress; MARS resumes using Winlink; D-Star will be going
on-orbit later this year and a tribute to the man who guided the change
from vacuum tubes to solid state. Find out the details are on Amateur
Radio Newsline(tm) report number 1797 coming your way right now.

**

RADIO LAW: QRZ.COM JOINS THE FIGHT TO STOP SOPA AND PIPA

The giant QRZ.com ham radio website has joined the fight to stop
passage of SOPA, the Stop Online Piracy Act, and PIPA, a similar bill
working its way through the U-S Senate. Amateur Radio Newsline's Robert
Sudock, WB6FDF, reports on why QRZ.com and its owner Fred Lloyd, AA7BQ
is taking this hard-line stand.

--

Why should ham radio care about these two bills? According to
publisher Fred Lloyd, AA7BQ, the measures are sponsored by Hollywood
entertainment corporations and the recording industry. They threaten to
destroy the internet as we know it. And in his front page posting on
the QRZ.com, he lists what he terms "the facts about the bills."

According to AA7BQ, websites will be required to police their own
content for copyright violations of all kinds. Any website found in
violation of the intellectual property of another party must be shut
down -- it's internet access blocked by its Internet Service Provider,
DNS de-listing, and all banking transactions via online payment
providers would be stopped.

Lloyd notes that there is no burden of proof required to shut down a
website. Any claim of copyright infringement could result in a court
ordered shutdown.

Website owners will be responsible for policing content uploaded by
their users. A violation could be ridiculously minor to qualify such as
uploading a trademarked image, a photo of a celebrity, a clipping from
a newspaper, an audio clip from movie, or the like. Also, uploading a
copyrighted song or video would become a felony under the US Code.

And it is not just domestic websites that would be impacted. The law would apply to foreign websites as well, requiring United States based Internet Service Providers to block access to those sites.

Lloyd then notes that this law could also kill his site, QRZ.com, as users know it. He notes that the site currently has some 300,000 photographs on its server, all of which would have to be taken down and manually verified to be in compliance. The same thing would hold true for each biography page where a photograph or other image exists.

Lloyd says that in his case, there's no way he could do it. If burdened with this sort of responsibility, QRZ would simply be found in violation and forcibly shut down by the federal government, all in an to protest both bills many websites went dark on Wednesday, January 18 effort to please what he terms as Hollywood and the music industries.

To protest both bills, many websites went dark on Wednesday, January 18. The Amateur Radio Newsline provides a short video insert in the TWiT network's Ham Nation podcast each Tuesday evening. That network did not go dark, but devoted its live programming to the SOPA and PIPA topics. As we go to air the programs should be rendered and posted for download in both audio and video formats. Go to www.twit.tv and look for "Security Now," "This Week in Google," "Tech News Today," and "Triangulation" for a more detailed and web centric discussion.

For the Amateur Radio Newsline, I'm Robert Sudock, WB6FDF, in Los Angeles.

--

AA7BQ ends his posting by asking those who use his website to contact their Congressmen and Senators to voice your opposition to both of these measures, especially SOPA. He says that it's not just QRZ.com that depends on their action. Rather he says, it's the entire internet as they know it today. (QRZ.com, TWIT.tv, ARNewsline(tm))

**

RESCUE RADIO: ARMY MARS RESUMES USE OF WINLINK 2000

The Army's Military Auxiliary Radio System better known simply as Army MARS is back using WinLink 2000. The ARRL reports that Lieutenant General Susan Lawrence has reversed the decision to phase out the use of the global radio e-mail system by Army MARS members that was issued late last year.

Lieutenant General Lawrence stated that the Army, after reviewing its capabilities, had decided that the continued use of WinLink 2000 would be in MARS best interest. She went on to call it a valuable asset to Army MARS members and agencies that were using the service.

On January 5, 2012, the Chief of Army MARS officially notified the membership that the phase out notice had been rescinded. Army MARS members and agencies who had been using the service hailed the decision by Lieutenant General Lawrence and have resumed use of the WinLink 2000

radio e-mail system.

More about WinLink 2000 is on the web at www.winlink.org. (ARRL)

**

RADIO GROWTH: DXCC SEES AN INCREASE IN APPLICATIONS

Interest in DX is growing. So says the ARRL as we hear from Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has more:

--

The ARRL reports that it appears as if more amateurs are working DX these days. This in turn means the ARRL's Membership and Volunteer Programs Department, especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus, are working very hard in processing applications and sending out cards via the different QSL Bureaus.

In 2010, the DXCC Desk processed 7134 applications for initial awards and endorsements. These 2010 applications included 853,462 QSOs. In 2011, the DXCC Desk processed 11,175 applications, representing 1,250,864 QSOs.

Sharon Taratula is the Membership and Volunteer Programs Administrative Manager. She explained that comparing 2010 to 2011 represents a 47 percent increase in the number of QSO's and a 57 percent increase in the number of applications received.

And that's quite an impressive increase in any area of ham radio.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, near Pittsburg, Pennsylvania.

--

To learn more about this increase in DX, go to tinyurl.com/dxcc-numbers on the world wide web. And we will have more DX related news later on in this weeks Amateur Radio Newsline report. (ARRL)

**

BREAKING DX NEWS: VP6T PITARICAN OPERATION SAYS NO 6 METERS

The VP6T DXpedition to Pitcarin Island will not be on 6 meters nor any exotic modes such as EME or SSTV. Nor will it likely even show up on 60 meters.

The operation which begins on January 20th and continues through February 4th has issued a press statement explaining its decision to concentrate its operations on the traditional and popular High Frequency bands.

According to the team they are a small group and are limited in baggage weight and size. As such they were forced to make choices. And while most of the team are 6 meter operators, they reached a decision not to

spend much their time and effort on this band.

For these reasons no 6 meter antenna will be taken with them and no time slot is booked for 6 meter operation. For more details, updates along the suggested frequencies for the VP6T DXpedition please visit the operations website at www.vp6t.org. (Southgate)

HAM RADIO IN SPACE: STUDENT HAM RADIO D-STAR SATELLITE TO LAUNCH LATER THIS YEAR

D-Star should be in space before the end of 2012. Students at the University of Liege in Belgium are hoping their D-Star based ham radio satellite OUFTI-1 will be launched towards the end of this year if at all possible.

Plans originally called for it to be carried to orbit on the maiden flight of the European Space Agency's Vega launch vehicle. That now appears to be out of the question. However team leaders say that other opportunities have been identified and discussions are ongoing with at least one launch provider.

If and when OUFTI-1 makes it to orbit it could mean a lot of those on the fence about purchasing D-Star based gear might just tape the plunge. This in turn would likely result in a major world-wide sales boost for Icom which to date is the only supplier of D-Star based ham radio gear.

An update on the satellite and plans to get it into space have been published in the January 2012 issue of the OUFTI-1 Newsletter. That issue focuses on the current status and near-future of D-Star based bird. You can read it on-line at tinyurl.com/oufti-1-2012. (Various sources)

**

RADIO LAW: JUDGE ISSUES SUMMARY JUDGMENT IN K1MAN FORFEITURE CASE

It's two for the government and one for Glenn Baxter, K1MAN, in the case involving a fine issued to the Maine radio amateur by the FCC several years ago.

In a 38 page ruling issued January 10th, U.S. District Judge John Woodcock Jr., chief of Maine's federal court, upheld two of the three

judgments the FCC sought against Glenn Baxter, K1MAN, of Belgrade Lakes, Maine.

The judge upheld forfeitures totaling $10,000 for violations of the Communications Act of 1934. The two violations were willful or repeated failure to respond to FCC requests for information and conducting willful or malicious interference with other radio transmissions.

Judge Woodcock, however, denied the FCC's request for judgment on a count of engaging in communications in which there is a pecuniary or monetary interest. Specifically, the judge questioned whether Baxter's promotion of his website during his transmissions rose to the level of a violation of FCC rules even though the FCC argued that the website sells merchandise.

The judge extensively cites Baxter's responses to the FCC, including referring to Baxter's personal attacks against a government attorney, and FCC personnel, including retired FCC Special Counsel Riley Hollingsworth, K4ZDH.

Woodcock conceded in his opinion such attacks by Baxter made it difficult to separate policy and factual disputes. However, the judge concluded that Baxter could not "avoid summary judgment by attempting to manufacture a factual dispute."

At one point, Judge Woodcock asserts: "Clearly, Mr. Baxter is bristling with irritation with the government."

Citing Baxter's arguments and demands for a trial on the ongoing matters, Judge Woodcock ruled that there must be a triable issue. He then ruled that the government had only proven its case for a summary judgment in two of the three matters before him.

But it's probably not over. Baxter is more than likely to file a further appeal on the two matters that Judge Woodcock found for the government. It's also believed that the government will proceed to take the third issue to trial before a judge and jury. (From Actual Court Transcript)

**

PUBLIC SERVICE: HAM RADIO AT THE EAGLE CAP EXTREME SLED DOG RACE

Ham radio will be providing the communications for Oregon's only Iditarod and Yukon Quest qualifier race. The 2012 Eagle Cap Extreme Sled Dog Race is January 25th to the 28th. Ham radio volunteer communicators we will be using a pair of linked repeaters tied to a remote base to cover the course. Some operators will be camping out in remote locations for the entire time to support the event. In addition, anyone can listen in on all of the events ham radio communications on Echolink conference Node number 367015. More information is on line at www.eaglecapextreme.com (KB7DZR)

**

RADIO AND EDUCATION: THE FOUNDATION FOR AMATEUR RADIO SCHOLARSHIPS

The Foundation for Amateur Radio has announced that it will be administering fifty scholarships for the 2012 to 2013 academic year. This, to assist licensed Radio Amateurs in the pursuit of higher education. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Foundation for Amateur Radio fully funds two scholarships. The remainder are administered by the foundation, without cost to the various donors.

Only licensed Radio Amateurs may compete for these awards. To qualify, a ham must be planning to pursue a full time course of studies beyond high school and be enrolled, or have been accepted for enrollment, at an accredited university, college or technical school.

The awards range from $300 to $5,000 with preference given in some cases to residents of specified geographical areas or the pursuit of certain study programs. Non-US residents are eligible to apply for some of the scholarships.

Additional information and an application form may be requested by letter or QSL card to FAR Scholarships, Post Office Box 911,Columbia, Maryland, 21044-0911.

For the Amateur Radio Nrewsline, Im Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Scholarship applications are also available for download at The Foundation for Amateur radio website. Its in cyberspace at wwr.farweb.org. (FAR)

**

THE SOCIAL SCENE: WINTERFEST 2012 IN ANNADALE VIRGINIA

Turning to the ham radio social scene, the 36th Annual Winterfest is slated for Sunday, February 26th . This, at the Northern Virginia Community College, Annandale Campus, in the city of Annandale, Virginia.

Tailgating starts at 6 am EST with the indoor sales area opening to the public at 8 am. The large, heated indoor area accommodates more than 100 tables operated by commercial vendors, clubs, ham radio organizations and individuals.

This event is sponsored by the Vienna Wireless Society which will also hold a ham radio testing session associated with the hamfest on Saturday, February 25th. More information is on the web at www.viennawireless.org/winterfest.php. (AI4SV)

**

THE SOCIAL SCENE: PALM SPRINGS CA. HAMFEST JANUARY 28

The annual Palm Springs Hamfest takes place on January 28th from 9 am to 5 pm Pacific Standard Time at 4193 Matthew Drive in Palm Springs, California. Hosted by the Desert RATS Club the show will feature 35 vendors, hands on equipment demonstrations, a swap meet and much more. Talk-in on is on the local 166.940 repeater that requires a 107.2 hertz sub-audible access tone. More information is on-line at desertrats.am. (VE7REZ)

**

HAM HAPPENINGS: TIME TO REGISTER FOR INTERNATIONAL MUSEUMS WEEKEND

The International Museums Weekend special event will this year take place on the double weekends of June 16th and the 17th and again on the 23rd and the 24th. Hams world-wide are being encouraged to participate by setting up stations in their local museums.

The events organizer is M1BYT. He asks that all those intending to take part to register their museum via the from on the International Museums Weekend website at www.ukradioamateur.co,uk/imw. M1BYT can also be contacted via e-mail to harry (dot) m1byt (at) tiscali (dot) co (dot) uk. (M1BYT)

(5 sec pause here)

**

SCIENCE AND TECHNOLOGY: 2012 TO BE A LEAP SECOND YEAR

Look for 2012 to be a tiny bit longer than years past. This is because 2012 will be a bit longer than 2011 or 2010. Confused? Bruce Tennant, K6PZW, is here to sort it all out:

--

The International Earth Rotation and Reference Systems Service has decided to add a leap second to Coordinated Universal Time at the end of June 2012.

The most recent leap was added on December 31, 2008. They have been necessary because of the Earth's unpredictable rotation.

Coordinated Universal Time, better known as UTC is based on highly accurate atomic clocks, but has been kept more or less synchronized with mean solar time by way of leap seconds.

Leap seconds were first introduced in 1972 but may not be with us much longer. Now however, a proposed revision of Standard-Frequency and Time Signal Emissions will be voted by the International Telecommunication Union Radiocommunication Assembly meeting, immediately before this years World Radiocommunication Conference. If the international panel agrees, Leap Seconds will be eliminated by 2018.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, leaping along in Los Angeles.

--

Meantime with this being a so called leap year, February will have a total of 29 days instead of the usual 28, to make up for our rotation around the Sun. So adjust your computer logging software accordingly. (VK3PC)

RADIO IN SPACE: DEDICATED CUBESAT SPECTRUM FOR RESEARCH PROJECTS

SmallSat, CubeSat, and Nano Satellite developers are seeking a spectrum allocation, outside of the 435 to 437 MHz amateur satellite band that could be dedicated to their specific bandwidth, data rate, and mission requirements.

In a press release ISIS notes that experimental, proof-of-concept demonstration missions find it increasingly more difficult to find spectrum on today's crowded bands. Also, obtaining commercial or research space frequency allocations is beyond the budgetary capability of many of these missions.

ISIS says that some satellite developers may be able to adapt their communication requirements to operate in the amateur radio spectrum. But in order to fully meet mission requirements on other projects a more suitable spectrum is quickly becoming a potential long term need for the emerging nano-satellite market.

ISIS says they plan to attend the World Radio Conference, WRC, this month as part of the Dutch national delegation. This is to make use of the opportunity to informally sound out the various opinions on this matter and investigate potential possibilities for creating a future solution ensuring the spectral needs of the community are met. (ANS)

ON THE AIR: HAM RADIO WILL HELP USHER IN THE CHINESE NEW YEAR

On the air, word that the station master for the Malaysian Amateur Radio Transmitter Society has announced that the special event callsign, 9M4CNY, will be active from Penang Island on January 29th, between 0700 to 1600 UTC. This in honor of the Chinese New Year Cultural and Heritage Celebration for 2012. Suggested frequencies are 7.088 MHz on 40 meters and 14.288 MHz on 20. The operating mode is SSB only. QSL direct only to address for 9M4CNY found on QRZ.com.

**

DX

In DX, F8APV will be active from Reunion Island from January 22nd until February 10th signing portable FR. QSL as directed on the air.

JA6CNH will be active as XV2CNH from Ho Chi Minh City, Vietnam between February 10th and the 15th. Activity will be on 160through 6 meters using CW, SSB and the Digital modes. QSL via JA6CNH, direct only.

Lastly, DF7ZS will be active from Aruba Island March 21st to the 27th signing P40S. QSL direct to DF7ZS as his address on QRZ.com.

(Above from various DX news sources)

THAT FINAL ITEM: NORMAN KRIM - CHAMPION OF THE TRANSISTOR -SK

And finally this week we pay homage Norman Krim, an electronics visionary who played a pivotal role in the industry's transition from vacuum tube to solid state electronics. Amateur Radio Newsline's Jeff Clark, N8TMW, takes a look back at the man who put solid state devices in the hands of experimenters, and ham radio operators world wide:

--

In a long career with the Raytheon Company Norman Krim made several important breakthroughs in popularizing the transistor to experimenters. He also had an early hand in the growth of the RadioShack chain,

Norman Krim did not invent the transistor. That was the work of a scientific team at Bell Laboratories back in 1947. Rather Krim saw the device's potential and persuaded Raytheon to begin manufacturing it on a mass scale, particularly for use in miniaturized hearing aids that he had designed. As a result, thousands of hearing impaired benefited from Krim's initial use of the transistor in compact hearing aids.

But not every transistor Raytheon made was suitable for that purpose and this is where Norman Krim's foresight took hold.

Harry Goldstein is an editor at IEEE Spectrum, the magazine of the Institute of Electrical and Electronics Engineers. He said that when transistors were first being manufactured by Raytheon on a commercial scale, there was a batch called CK722's that were too noisy for use in hearing aids. So Krim contacted editors at magazines like Popular Science and Radio Electronics and began marketing the CK722's to hobbyists. The result was that a whole generation of kid engineers, many likely young ham radio operators working in their garages and basements got to construct all kinds of electronic projects. Among these were early transistor radios, guitar amplifiers, code oscillators, Geiger counters and metal detectors.

Goldstein says that as a result, a lot of them went on to become engineers. And as a result, Norman Krim became known as the father of the CK722.

After leaving Raytheon, Norman Krim bought two electronics stores in Boston called RadioShack. By the time he sold the business to the Tandy Corporation two years later, it had seven stores. Today the chain has about 7,300.

For the Amateur Radio Newsline, Im Jeff Clark, K8JAC.

--

News reports say that Norman Krimm passed away of congestive heart failure last December 14th in a retirement home in Newton, Massachusetts, at age 98. As far as we can determine, he was not a radio amateur. That said, the impact he had on our hobby was and is truly immeasurable. (RW and other published reports)

SARL NEWS - SUNDAY 22 JANUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB.

SILENT KEYS

It is with deep regret that we have to announce that the key Jacques Bauermeister ZS1FE, member of Oakdale RAC committee, became silent during the night of 13 January 2012. Our sincere condolences go to his wife and children.

It is also reported that the key of Kobus van Rooyen, ZS2KVR (previously ZS1KVR), went silent earlier this week. Our sincere condolences to this wife Ansie, ZS2AVR, and children.

(PAUSE)

In the news today:

SARL ANNOUNCES THE 2012 RAE DETAILS

ANNUAL LICENSE RENEWAL

NOMINATIONS FOR COUNCIL OF THE SARL

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SARL ANNOUNCES THE 2012 RAE DETAILS

The SARL has announced the details of the 2012 Radio Amateur Examinations. The May exam will be held on 24 May 2012 with the closing date for registration on 27 April 2012. The October exam will be held on 18 October 2012 with the closing date for registration on 21 September 2012. The registration fees have been adjusted to align with the new ICASA rates for license application and the first year license fee.

Candidates will, on registration, receive complimentary membership of the SARL which include copies of the electronic Radio ZS and full access to the web. Candidates will enjoy free membership till 30 June 2013. The main objective of the complimentary membership is to involve candidates more in amateur radio and activities.

Full details can be found on www.sarl.org.za, select "Licensing" from the left hand menu on the home page.

ANNUAL LICENSE RENEWAL

Radio Amateurs are reminded that the license renewal date is 1 April 2012 when the new annual fee also comes into operation. An Amateur Radio License will cost R120. ICASA has indicated that license reminders will be posted soon. Should you however not receive an invoice the responsibility remains yours to pay the renewal fee by 1 April 2012. Payments can be made electronically or at any post office. Be sure to quote your callsign and your account number which you can find on your license or previous account.

NOMINATIONS FOR COUNCIL OF THE SARL

Members are reminded that nominations for the Council of the SARL close on 31 January 2012. A nomination requires a nominator and a seconder who both need to be current members of the SARL. Also required is a brief amateur radio related CV of the nominee and a letter that he or she is willing to stand for election and, if elected, serve on the council. Nominations should be addressed to the Secretary of the SARL. Scanned documents may be sent by email to secretary@sarl.org.za

DXCC SEES AN INCREASE IN APPLICATIONS

Interest in DX is growing. So says the ARRL. The ARRL reports that it appears as if more amateurs are working DX these days. This in turn means the ARRL's Membership and Volunteer Programs Department, especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus, are working very hard in processing applications and sending out cards via the different QSL Bureaus.

In 2010, the DXCC Desk processed 7 134 applications for initial awards and endorsements. These 2010 applications included 853 462 QSOs. In 2011, the DXCC Desk processed 11 175 applications, representing 1 250 864 QSOs.

Sharon Taratula is the Membership and Volunteer Programmes Administrative Manager. She explained that comparing 2010 to 2011 represents a 47 percent increase in the number of QSOs and a 57 percent increase in the number of applications received.

And that's quite an impressive increase in any area of amateur radio.

CLUB NEWS

THE PEARS VHF/UHF CONTEST IS NOW UNDER WAY

The PEARS National VHF/UHF Contest started on Friday evening and will continue until 14:00 CAT on Sunday afternoon. At the time of writing this bulletin a number of field stations in Divisions 1, 2 and 6 have announced that they will participate in the contest. We are hoping that La Nina will play along and not disturb the weather. There is still some time left this morning to give some points away to contestants, so give it a try. PEARS wishes all the contestants good luck and thank you for your participation.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is on the increase with some geomagnetic effects expected. Sunspot 1 401 continues to pose a threat for M-class flares.

For the people doing their own frequency predictions the expected effective sunspot number for the week will be around 104.

All the bands, from 20 to 10 m, will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day. With the increase in solar activity 6 m may also provide some exciting openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

22 January - Last day for the PEARS National VHF/UHF Contest. 31 January - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January - Closing date for submitting papers for SA AMSAT Space Symposium.

Remember that nominations may still be submitted for SARL awards which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

52. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2012-01-22 07:05:01 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1327215900@panix.com>
Source record: 3619
Cross-posted to: rec.radio.info,rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.answers,news.answers

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Ohio/Penn DX Bulletin No. 1046

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1046
BID: $OPDX.1046
January 23, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Relayed this week from Murfreesboro, TN

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, W1HEO, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, AI6V, KH6BZF, W6SZN, K8GI, K8YSE, W8GEX (60m News), W9OL, AT International, CO6CBF, CO8ZZ, CT1FKN, DK8JB & The DX News Letter, DK8ZZ, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, HB9IAJ, HP1AC, I1JQJ/IK1ADH & 425 DX News, IK7JWX, OH2BU, ON5NT, OZ6OM & 50 MHz DX News, RSGB IOTA Web Site, RSGB News, VA3RJ & ICPO, VHF-DX-Portal and for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-January, through Sunday, 22nd-January there were 217 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V8, VE, VK, VK0M, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U1, ITU HQ (Special Activity). The International Amateur Radio Club, 4U1ITU, will be operating with the special callsign 4U1WRC between January 23rd and February 17th. Activity will take place during the

ITU World Radio Conference 2012 (WRC-12) from Geneva, Switzerland.
Operations will be from 160-6 meters, eventually higher, all modes.
All QSOs will be confirmed with a special QSL available via 4U1ITU.
Short updates of the operation will be posted on twitter at:
http://twitter.com/4u1itu
More detailed information is availabe on the Web site at:
http://life.itu.int/radioclub

4W, TIMOR-LESTE. Vlad, UA4WHX, still continues to be active as 4W0VB from Timor-Leste (OC-148) and his length of stay is still not known. "The Daily DX" and other sources report that Vlad is operating in the mountains of Ermera, and activity is almost exclusively on CW with very little SSB. As posted on QRZ.com by Vlad [edited], "If you need 160 or 80, please note I am making an effort to be there every day at around 1500-2100 UTC. I have no Internet at the radio place. So, check 1815.0 or 1831.5 and 3503.0 at these times or any other time you think we may have an opening. Additionally, I will try to be at the same frequencies at 1100-1145 UTC for US LP and 1200-1245 UTC for US SP. Hence, the probability of your having a QSO is directly related to the amout of time you spend looking for 4W0VB." QSL via UA4WHX.

8Q, MALDIVES (False Info Being Sent Out!). Bert, CX3AN, informs OPDX that someone is sending false info out about Mario/CX4CR and him, and their activity as 8Q7HU from Maafushi Island, Kaafu Atoll (AS-013). Their operation will still take place between January 25th and February 5th, and not February 6-15th, as the fake E-mail states. Activity will be on 80-6 meters using CW, SSB and the Digital modes. There will be a special emphasis on South America.

C6, BAHAMAS. Look for C6ANM to be active from Nassau (NA-001, FL15) during the following contests with the following operators:
CQ 160-Meter CW Contest (January 27-29th) - Multi-Single entry; operators Tom/N1GN and William/NE1B; QSL via LoTW.
ARRL DX CW Contest (February 18-19th) - Multi-Single entry; operators Tom/N1GN and William/NE1B; QSL via LoTW.
CQ 160-Meter SSB Contest (February 24-26th) - Multi-Single entry; operators Tom/N1GN, William/NE1B and Karney/W2AFC; QSL
via LoTW.
ARRL DX SSB Contest (March 3-4th) - Multi-2 entry; operators Tom/N1GN, William/NE1B, Mike/N1IW and Karney/W2AFC; QSL
via LoTW.

CL, CUBA (Changing Cuban Regulations). Information from a few Cuban friends inform OPDX [edited]: "Cuba Cuban radio amateur service regulations have been modified to provide the use of segments of the 80 and 40 meters ham bands to the third class operators license holders which before this new rules could only operate on segments of the 160 and 2 meters band. The news was much welcomed by the more than two thousand operators that hold a CL prefix callsign... the first step in a Cuban radio amateur career... By the way, the CL prefix holders do not need to pass a CW Morse Code radiotelegraphy test, but they do have to take a 5 words per minute

receiving and also transmitting test in order to upgrade towards a second class operators certificate. This opens the way to obtain a CM prefix callsign that provides access to many more operating privileges... So, if you start hearing stations on the 40 meters band from 7100 to 7125 kiloHertz using a CL prefix, be aware that they are a new generation of Cuban radio amateurs that for the first time ever are having access to working DX on 40 meters... The segment assigned to the CL stations on 80 meters span from 3550 to 3750 kiloHertz, but very probably you will hear them much more often on 40 meters because the seven Mega-Hertz ham band is open for long distance contacts much more frequently than the 80 meters band. The maximum power allowed to the CL prefix stations, the Cuban beginners license has been set at 10 watts that they can use on CW, Single-Side Band and Double-Side Band voice."

DAYTON HAMVENTION EVENT (160m Dinner). Tim, K3LR, reports: "We are carrying on the great TopBand dinner tradition that George/K8GG and George/W8UVZ put together for so many years at Dayton. Dinner reservations and tickets are now available for the 23rd Annual Dayton TopBand dinner on Friday evening, May 18th, at the Crowne Plaza - downtown Dayton, Ohio. Frank Donovan, W3LPL, will be the main speaker. Reservations are available online with credit cards and PayPal. Also, use the online to contact us for information if you need to make other arrangements. All of the updated details are here: http://topbanddinner.com Scroll down to make your reservations. Hope to see you at the 2012 Dayton TopBand Dinner."

DAYTON HAMVENTION EVENT (Update to OPDX.1044 - Contest Dinner Speaker). Tim, K3LR, Dayton Contest Dinner Chairman - North Coast Contesters, reports: "North Coast Contesters are happy to announce that 'Tree' Tyree, N6TR, will be the featured speaker at the 20th Annual Dayton Contest Dinner to be held on Saturday, May 19th, in Dayton, Ohio. <http://contestdinner.com>
N6TR has an extensive and distinguished contesting resume that goes beyond his many top ten finishes in domestic CW contests. He was one of the founders of the popular Stew Perry Topband Distance Challenge and ARRL Kids Day operating events. Tree wrote the TRLOG contest logging software and he is responsible for log checking packages that are used to adjudicate many of the major radio contests. He was the log checker for the WRTC-2006 event and will be again in 2014. N6TR was honored as Amateur of the Year in 2003 by the Dayton Amateur Radio Association. Tree recently operated as a single operator from KL7RA in the 2011 Sweepstakes Phone contest and as part of the KL7RA multi op team in the CQ WW CW contest. This past August N6TR helped team USA win the gold medal in the HF on-air contest from RG20CF as part of the Tenth Friendship Radiosport Games in Khabarovsk, Russia.
Outside of contests, Tree spends most of his time chasing new countries on 160 meters."

EI80, IRELAND (Special Event). Members of the Irish Radio Transmitters Society (IRTS) will be active as EI80IRTS throughout 2012. Activity is to celebrate the IRTS's 80th anniversary. QSL via EI4GXB or LoTW.

GJ/MJ0, JERSEY. Richard, K2WR, will be active as GJ2A during the CQ 160-Meter CW Contest (January 27-29th) as a Single-Op/High-Power entry. QSL via K2WR or GJ3DVC. Look for him outside of the contest signing MJ0AWR. He will be there starting around January 24th or 25th.

HK0NA DXPEDITION (Update). By the time you read this, the whole HK0NA team should be on the island and operating immediately for 17 days. The team left on January 18th for Malpelo island and is not expected to return until February 10th. For more details and updates, visit: http://hk0na.com

HR, HONDURAS. G�rard, F2JD, will be once again be active as HR5/F2JD from Copan. He will leave on February 2nd and be back on May 6th. Activity will be on all bands and modes. QSL via F6AJA. The online log will be available at: http://lesnouvellesdx.fr/voirlogs.php

IOTA NEWS.....
SA-024/
SA-071. A team consisting of Italian and Brazilian operators will activate the Brazilian Islands - Comprida (SA-024) and Peruhibe (SA-071) between January 30th and February 9th. The callsign to be used will be PR2I. Operators mentioned are Leopoldo/I8LWL, Paki/IZ8GDO, Vespe/IW8EZV, Angelo/PY2VA and Toni/PY2YW. QSL via IK7JWX.

KH6BZF PROPAGATION FORECAST/REPORT (January 23-29th)....

LX, LUXEMBOURG. Operator Ron, DL3BPC , will be active as LX7I during the CQ 160-Meter CW Contest (January 27-29th) as a Single-Op/High-Power entry. QSL via LX2A. Logs will be put on the LoTW.

NCDXF PRESS RELEASE. Kip, W6SZN, NCDXF Secretary, sent out the following press release on January 16th: "NCDXF ANNOUNCES GRANT TO VP6T PITCAIRN ISLAND DXPEDITION -- The Northern California DX Foundation is pleased to announce a contribution of 6,000 USDs to the VP6T Pitcairn Island DX-pedition. The operation will take place from January 20th to February 4th, 2012. Pitcairn Island is No. 41 on the DX Magazine's Most Wanted List for 2011.
Five veteran DXpeditioners anticipate more than 30,000 QSOs and plan

to have three stations on the air around the clock on nine bands. A special effort will be made to work Europe and the U.S. East Coast. The group and the HK0NA DXpedition have coordinated operating frequencies to avoid mutual interference.
For the past 40 years the NCDXF has funded major DXpeditions to many Most Wanted countries. The credit for these large grants goes to the NCDXF contributors who make DX like this possible. Have you contributed yet? <www.ncdxf.org>"

ADDRESS CHANGE. QSL Manager Zik, DK8ZZ/VE3ZIK/YT3ZZ, reports effective March 1st, 2012, the DK8ZZ address will change. His new address is: Zrinko Zibert, Rothweg 1, 55494 Erbach, Germany. Please note, Zik is the QSL Manager for following callsigns: A65DLH, V55DLH, DK8ZZ, VE3ZIK, YT3ZZ, 9A1CKL (Direct only, all QSLs already sent via the Bureau), 9A/VE3ZIK, S5/VE3ZIK, E7/VE3ZIK and YU/DK8ZZ.

IRC-GS POSTAGE CHART. Bill, W9OL, has once again updated his IRC-GS Chart. It can be found at: http://www.qsl.net/w9ol/IRC_Chart.htm

QSL RECEIVED VIA LoTW: 3B8MM, C6ANM, CN8NK, CR6K, IK2CLB, JH4CPC, KP2TM, M4A, OK3RKA, PJ2/N6EE, RD3BZ, SO8A, V5/DJ4SO, VE6WQ, VE9DX, XE2AUD and YB1AR

QSLS RECEIVED VIA MAIL: 3D2R, 3X3X1D, 3YX1D, 4L1MA, 5N7Q, 5A1A, 8P0P, 9M6XRO, A45XR, C31CT, CN8KD, DL8GP, E4X, FP/G4EAG, HK4CZE, HK0GU, OJ0X, OH1VR/VP9, SU9VB, TI8AA, TR8CA, TU2T, V51AS, VK0TH, VP2ETN and XV2RZ

QSLS RECEIVED VIA THE BUREAU: 4K9W, 4L5O, 4U1VIC, 5W0OU, 8P9NX, 9M8Z, 9X0TL, 9Y4W, C36VM, C6AGN, CT9/DL3KWF, CU8AS, D44TOI, FH/DJ7RJ, FK/DJ7RJ, FK/AI5P, FR/DJ7RJ, HB75A, HK0GU, HK0GU/1, HS0ZEA, HS0ZJS, J45RDS, J48O, J48S, JW7QIA, KG4CN, KH6CW, KP2/AG1LE, KP4DJ, KP4ED, KP4KE, KP4RV, OX/DF9TM, P40D, PZ5YV, SU1KM, SV2FPU/8, SV5CJQ, SX5A, SY75NW, SY8WT,

TI5N, TK/DH8SL, TO4X, TO7RJ, V21ZG, V73QQ, VK9NW, VP2MXO, VP5/WA2VYA, XV4D, YB9/DL5CO, YJ0PX, YK1BA, YW6YL, ZF2XP, ZK3OU and ZL8X

R1MVI, MALYJ VYSOTSKI ISLAND (Deletion of MVI Coming!). Jari, OH2BU, reports: "The day of deletion has now been confirmed: Finnish and Russian ambassadors met today, January 17th, and exchanged the documents signed by the presidents of both countries. The new agreement of the lease of Saimaa Channel will be in force one month from today - February 17th. As the new agreement does not include Malyj Vysotskij (R1MV ...), the island will be deleted from the DXCC-list the day before, February 16th, 2012. This is, of course, subject to the decision of ARRL DXCC Committee. It's unlikely that any DXpedition will come on from the island before the deletion, although our Russian friends would have a possibility to do it."

SILENT KEY. Carl, AI6V/P49V, reports that Johan (Joop) Box, P43JB, became a Silent Key (SK) at approximately 1700z, Thursday, January 19th. He states, "He had a severely infected kidney. When the doctors tried to remove it, they found the area surrounding it full of infection, so they could not remove the kidney. His wife, Yvonne, and daughter, Barbara, Sue, myself and Lisandro, P43L, were with him when he passed away." OPDX and its readers would like to send out our deepest sympathy to the family and friends of P43JB.

T6, AFGHANISTAN. Look for Kurt, KE7KUS, to be active as T6KK from Bagram until mid-February. He states that after much waiting (over 5 months!), Kurt received his Afghanistan Amateur Radio License which was issued by the Afghanistan Telecommunication Regulatory Authority (ATRA). Kurt primarily spends his time on the HF bands working CW and the Digital modes. QSL via LoTW (preferred), eQSL or direct to his home callsign.

T6, AFGHANISTAN. Jose, CT1FKN, is now active as T6JM from Kaul until June 13th. He tells OPDX that he has been there since January 14th and is a member of the International Security Assistance Force (ISAF) based inside a military compound where there are restrictions to what size antenna can be installed, so he will only use a small horizontal loop wire. Activity is expected to be mainly on 20 meters using SSB and the Digital modes. QSL via CT1FKN, direct or by the Bureau.

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO, Carlos/TI2KAC, Juan Carlos/TI2JCY and TI2ZM will be active as TI8M from Costa de Pajaros, during the ARRL DX SSB Contest (March 3-4th) as a Multi-2 entry. QSL via TI2KAC, direct preferred but bureau "OK". Their operations will be on 160-10 meters. Look for operations before the contest.

TN, CONGO (Reminder). By the time you read this, six operators should be active as TN2T from the Republic of the Congo until January 31st, Using three stations. The DXpedition will be active on 160-10 meters using CW, SSB and RTTY. Their suggested frequencies are available on the TN2T Web page. Operators mentioned are Patrick/ON4HIL/OT2A, Marc/ON6CC/OR3A, Luc/ON4IA/OR2M, Ronald/PA3EWP, Carlo/ON4BR/OO4T and Stefaan/ON4FG/OP4T. QSL Manager is M0URX. More details and updates are available on the TN2T

Web page at: http://www.tn2t.be

TX5Q CLIPPERTON DXPEDITION (Postponed!). It was announced on January 19th: "We regret to announce that this operation had to be cancelled due to unforeseen problems with logistics and costs. We will plan to carry out a major DXpedition to Clipperton in early 2013. If you are interested in the project, please contact KK6EK at cordell.org." For more details, see: http://www.cordell.org/CI/CI_pages/CI_Main.html

UK STATIONS TO USE SPECIAL CALLSIGN. The Radio Society of Great Britain (RSGB) and Ofcom have reached agreement on the optional use of special callsigns for two significant events during 2012:
1) For the Queen's Diamond Jubilee, all UK amateur stations will have the option of applying for a variation to their licence if they wish to use a special prefix for a five week period. This will add or substitute the letter "Q" in the place of the Regional identifier in the callsign. Examples of callsign prefixes:
M3aaa becomes MQ3aaa 2E0aaa becomes 2Q0aaa
G3aaa becomes GQ3aaa 2M0aaa becomes 2Q0aaa
GM3aaa becomes GQ3aaa GX3aaa becomes GQ3aaa
Activity for the special prefixes will take place between 0000 BST, May 5th and 2359 BST, June 10th.

2) For the period of the Olympic Games and Paralympic Games, a similar facility will exist for a seven week period, using the letter "O" to substitute the letter "O" in the place of the Regional identifier in the callsign. Examples of callsign prefixes:
M3aaa becomes MO3aaa 2E0aaa becomes 2O0aaa (Two Oscar zero aaa)
G3aaa becomes GO3aaa 2M0aaa becomes 2O0aaa (Two Oscar zero aaa)
GM3aaa becomes GO3aaa GX3aaa becomes GO3aaa
Activity for the special prefixes will take place between 0000 BST, July 21st and 2359 BST, September 9th.

ADDED NOTES: Both the above facilities will also be available to Amateur Club licences. Furthermore, callsign in the series GB2012aaa will be available for special event stations relating to the Olympics, and licences will be issued for four "flagship" stations using the prefix 2O12a where "O" is the letter O, and a is a single letter relating to the location of the station. Further details of these arrangements are on the attached summary, and administrative details will be issued by Ofcom and the RSGB shortly. The complete press release can be seen at: http://www.rsgb.org/news/articlelinks.php?id63

V5, NAMIBIA (Update). Operators David/GI4FUM and XYL Gillian/GI8MIV, along with Richard/GI4DOH, Kalle/DM3BJ, Andre/V51B and possibly others will be active from Oranjemund for the CQ WPX SSB Contest (March 24-25th) as a Multi-Op entry. Callsign has not been announced yet. The week before the contest, operators will be active on the HF bands using CW, RTTY and PSK31. QSL via GI4FUM.

VK9L, LORD HOWE ISLAND. Chris, VK5CP, will be operating in the "holiday mode" from Lord Howe Island (OC-004) as VK5CP/9, and as of January 19th

(his birthday), through January 24th, he will be focusing on 30 meters (data), 20 meters and 6 meters depending on conditions. Chris will be using a IC-7000, LDG Z2Pro Tuner and a Buddistick vertical antenna. He also has a SignaLink USB interface and Mix W software which he plans to use the data modes PSK31 and RTTY. He expects to have InterNet access and should be logged into Skype as VK5CP. Chris plans to post his log on LoTW and eQSL upon his return to VK5. Please QSL via VK5CP (and be patient as he will have to print some cards).

VK0/AX0, MACQUARIE ISLAND (Special Event/Update). Look for Trevor, VK0TH, to be active as AX0TH on January 26th, to celebrate "Australia Day". QSL via JE1LET. UPDATE FROM TREVOR (on QRZ.com): "Thank You - Pile Ups have been much more controlled of late and I thank you for the efforts. I continue to try to do at least an hour or two of radio a day after my working day has finished on Macquarie. Operating hours are typically 0700-1200 UTC. Current Modes are SSB, CW, RTTY, PSK and Hell. Occasionally, I will visit the ON4KST chat room. I won't take individual requests in the chat room or via E-mail, however, am happy to work the bands when they are open and let you know where I am."

VP6, PITCAIN ISLAND. After a three day sail, the team of five operators are now active as VP6T from Pitcain Island (IOTA OC-044, WFF GFF-053) until February 4th. They arrived on the island on Friday, around 1700z, January 20th. Their activity will be on 160-10 meters CW, SSB and RTTY, and giving this extremely rare entity to deserving DXers on as many bands as possible, especially on the lower bands. QSL via G3XF, direct or by the Bureau, LoTW and OQRS. More details are available on their Web site at: http://www.vp6t.org
LAST MINUTE UPDATE: They have begun uploading QSOs to LoTW.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 22nd January 2012

Death Notice

We are sad to announce the death of Patricia Mulvihill, mother of Noel EI6HW who passed away last weekend. She will be sadly missed by her family and friends.

Ar Dheis D go raibh a h-anam.

IRTS Region 4

Radio theory classes will be starting in February depending on numbers. If you are interested please contact Ger McNamara EI4GXB on 087-2532512 or ei4gxb / at/ gmail/ dot/ com

---

EI80IRTS Certificate

The Irish Radio Transmitters Society was founded 1932 and we are proud to celebrate our 80th anniversary in 2012. As part of the celebrations the Society will be using the special callsign EI80IRTS. A special certificate, available to all amateurs and SWLs, is being offered to celebrate this occasion. Contact the special call EI80IRTS during the period of January 1st, 2012 to December 31st, 2012. Requirements: 2-way communication on Phone, CW or Digi modes on the HF (1.8-28) and VHF (50-1200MHz) bands. Cross band QSO's will not be accepted for this award. Contacts made via active earthbound reflectors, repeaters and EchoLink will not be counted. The certificate is available in three levels: a. Bronze - 3 different bands. b. Silver - 5 different bands. c. Gold - 8 different bands. Applicants should submit a list showing the date and time you worked or heard EI80IRTS, plus frequency and mode. QSL cards are not required. The declared QSO's will be cross-checked for validity based on the logs of EI80IRTS. The application fee is 5 or $US7. Thos EI2JD will be the manager for this award. Send applications to: Thos Caffrey, The Slip, Clogherhead, Co. Louth, Ireland. At the same time, please send an e-mail to contestmanager /at/ irts / dot/ ie to inform him that you sent your application by mail. IRTS members and affiliated clubs are invited to take part in the celebrations. If you or your club would like to

activate EI80IRTS, you can contact Co-ordinators Ger McNamara EI4GXB at ei4gxb/ at/ gmail / dot/com or 087 2532512 or Thos Caffrey EI2JD at thoscaffrey /at/ hotmail/ dot/com for details.

A very attractive certificate for working EI80IRTS is sponsored by Dundalk Amateur Radio Society, and details can be seen at http://www.ei7dar.com/ei80irts.html

---

IRTS Request for Return of Trophies

It is time once again to recall all trophies presented at the 2011 IRTS, AGM in Limerick.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday 12th February. or to any IRTS Committee Member before end of February 2012.

This will allow for engraving to be done and allow for repairs if necessary.

Early return will be appreciated. Peter EI4HX at ei4hxperimental /at/ eircom /dot/net

Nominations For Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS Trophies that are required from within the membership, this includes the awards for, 1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2 Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Jim EI4HH, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental /at/ eircom /dot/ net

Closing date for nominations is 29th February 2011.

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary this year 2012. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at

/irts / dot/ie

Shannon Basin Radio Club

The Shannon Basin Radio Club will be holding its AGM on the 27 January 2012 at 8.30pm in Hannons Hotel Roscommon. All members are requested to attend and all newcomers are welcome to attend. For more info please see www.shannonbasinradioclub.com.

Limerick Radio Club

The Annual General Meeting of Limerick Radio Club will be hold on Wednesday 8 February 2012 in the Limerick Institute of Technology at 7.30pm and all paid up members are requested to attend.

Rally: Limerick Radio Club rally will be held on Sunday March 11th 2012 at the Radisson Blue Hotel on the Ennis Road, Limerick. Doors open at 11am and all the usual traders will attend. Bring and Buy tables can be ordered from Dermot Gleeson EI2GT.

Tipperary Radio Group

The January meeting of the Tipperary Amateur Radio Group will take place on Wednesday next the 25th of January in Raheen House Hotel Raheen Road Clonmel at 8.30 pm All are welcome.

South Dublin Radio Club Talks

Following Joe EI7GY's interesting talk on the DXCC programme Colin McKeeman will give a talk on aeronautical radio communications on the North Atlantic on Tuesday the 31st January

The club plans on launching it's television repeater for Dublin at the Phoenix Amateur Radio Club Rally in February.

West Tyrone Amateur Radio Club

West Tyrone Amateur Radio Club is running a course for the Intermediate Exam which will take place on Tuesday 3rd April 2012.

The course will be on the following Saturday afternoons... Saturday 18th & 25th February, 10th, 24th 31st March, we will be holding a registration night before our regular monthly meeting on Tuesday 7th February cost of the course is ?65 which includes all materials needed for the course and the exam fee.

A registration form can be downloaded from our website at
www.wtarc.co.uk

DX News

Kurt KE7KUS has been active as T6KK since 19 January. He is based at Bagram Airfield in Afghanistan and will be there till mid-February. QSL info is via his home call (either direct or bureau) and Logbook of the World.

Another new station from Afghanistan is Jose CT1FKN who is signing T6JM. He is there until mid-June and is mainly QRV on 20m SSB and BPSK31. QSL to his home call.

Some activity has been heard from Malpelo Island where the HK0NA team are setting up the expedition station. The remainder of the team should now have arrived and a major operation will be underway. The expedition will last until around 8 February so everyone should manage to get at least one QSO in the log.

Laci HA0NAR is leading a small group which will be QRV as FW0R from the Pacific islands of Wallis and Futuna. Dates are 24 January until 23 February. QSL Manager is HA0NAR.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

56. [RAC-Bulletin] RAC Bulletin 2012-003E - New Quebec Director

RAC Bulletin 2012-003E - New Quebec Director
2011-01-22

Congratulations are extended to Mr. Sheldon M. Werner, VA2SH / VA6SH
who was recently elected as the RAC Director for Quebec. Mr. Werner
ran unopposed, eliminating the need for a balloted election. His role
as Director will be for the remainder of a two year term which ends
December 31, 2013. Mr. Werner has been a certified amateur operator
since 1976 and has been involved in many aspects of the hobby. He is
currently serving as the Vice President for the Montreal Amateur Radio
Club

Paul Burggraaf VO1PRB
RAC Corporate Secretary

RAC Bulletin 2012-004E - WRC-2012
2012-01-23

Blog Post - WRC2012

The World Radiocommunication Conference (WRC 2012) gets underway today
and runs until February 17 2012. What does the WRC +have to do with
Amateur Radio? Its just one way that the Radio Amateurs of Canada are
active in the rules governing not only our hobby, but radio as a
whole. This year, the delegation from Canada is composed of Industry
Canada Staff along with Bryan Rawlings VE3QN - our RAC representative.

Bryan is only part of the RAC team that deals with regulatory type
matters. George Gorsline VE3YV acts at the International Affairs
Officer. Norm Rashleigh VE3LC is the Industrial Liasion Officer.
Bill Gade VE4WO is the Regulatory Affairs Officer with a good amount
of help from Richard Ferch, who provides support for Regulatory Affairs.

Look forward to more details on WRC 2012 in a future TCA - and as
always - remember that everyone at RAC is here not only to promote the
hobby but to provide support to you, our members. Get in touch if we
can be of assistance!

Bill Gade VE4WO
Regulatory Affairs Officer

Vernon Ikeda - VE2MBS/VE2QQ

59. ARRL Foundation Scholarship Application Deadline is February 1

Newsgroup: rec.radio.amateur.misc
Date: 2012-01-24 05:13:08 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20120124045303.95BD423C28@bmail.arrl.org>
Source record: 3626
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Calling all college students and high school seniors!
The ARRL Foundation Scholarship Application Deadline is February 1!

Will you be nominated to receive one of the prestigious ARRL Foundation Scholarships? Only a week remains until the application period for the 2012 scholarships closes on February 1.

Each year the ARRL Foundation awards dozens of scholarships to young hams pursuing higher education. The total of those awards tops $80,000! Several hundred of the country’s top high school and college students vie for awards ranging from $500 to $5000.

It’s easy to apply!

All the selection criteria, application forms and instructions can be found on the web at www.arrl.org/scholarship-program. Some scholarships have geographic criteria, others have a preference for field of study, and still others have no curricular or residence requirement.

The fundamental requirement is that an applicant be active FCC-licensed radio amateur. The application process is completely electronic, including the required academic transcript.

If you know a young ham who is attending college or is a high school senior, let them know that the deadline is only a week away.

Any questions may be emailed to foundation@arrl.org. But do it soon! Time is running out!

73, Cliff K0CA

ARRL Midwest Division
Director: Cliff Ahrens, K0CA

GB2RS NEWS

Sunday 22 January 2012

The news headlines:

New RadCom Band Plans show substantial changes

D-Star node test in London

Leap Day and Leap Second in 2012

. In particular, please note that there have been major changes in the 40m, 10m, 6m, 4m and 23cm bands, so please ensure that any older editions are discarded.

The digital node test for the pending London 2012 Olympic Simplex D-Star Nodes is planned for this weekend, 21 and 22 January. The test will be carried out both on 2m and 70cm in Echo Test Mode only, without D-Star gateway, between hours of 1000 and 1600UTC. The D-Star node will record your digital test transmission and then retransmit it back to you and, at the same time, you will then be able to see what type of coverage will be available. Today, 22 January, the test will be on 145.3125MHz. Gary, 2E0ULA and Michael, 2E0MRE will be on hand for assistance and talk back will be on to be GB7OK. For more info visit www.gb7ok.com.

The International Earth Rotation and Reference Systems Service has decided that a positive leap second will be added to Coordinated Universal Time, or UTC, at the end of June 2012. While a leap second can be added and taken from any month, it has only occurred at the end of December and June. The most recent leap was added on December 31, 2008. A leap second is necessary because of the Earth's unpredictable rotation. UTC is based on atomic clocks, but has been kept more or less synchronised with mean solar time by way of leap seconds.

The Six and Ten Reporting Club is an informal group of amateurs, mostly from the UK, who are interested in propagation studies at frequencies around the HF-VHF boundary, mainly the 6 and 10 metre amateur bands. The club produces a monthly newsletter, the Six and Ten Report, that includes analysis of 28MHz propagation based on beacon monitoring, analysis of 50MHz activity reports broken down by propagation mode, reports and discussions on unusual propagation events, compilations of solar and geomagnetic data, lists of activity world-wide, beacon news, and results of on-going experiments.

And now for the details of rallies and events for the coming week

The Horncastle Winter Rally will take place on 29 January in the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission is ?1.50. Details from Tony, G3ZPU on 01507 527 835.

Now for the news of special events

In addition to the clubs mentioned in previous weeks' news, the Riviera Amateur Radio Club will be supporting SOS Radio Week. GB4TBL will be operating on HF and 2m from Beacon Quay, Torquay Harbour on Saturday, 28 January between 1100 and 1600GMT. For full details see www.rivieraarc.org.uk/events/gb4tbl/.

Special event station DL150BH is active on all bands and modes until 31 December to celebrate the 150th anniversary of the city of Bad Honnef. QSL via the bureau.

And now the HF DX news compiled from 425 DX News and other sources

F8APV will be active from Reunion Island from 22 January until 10 February, signing portable FR. QSL as directed on the air.

Take, JG8NQJ will be back to Minami Torishima, OC-073, for three months. In his spare time he will operate mainly CW with some SSB as JG8NQJ/JD1, running 50 watts in order not to interfere with the weather station equipment. QSL via the bureau to JG8NQJ or direct to JA8CJY.

The website for the Kiritimati DXpedition is now up and running at www.t32kiritimati2012.com. Look for T32AU, T32CO, T32LJ, T32TR, T32TX, T32WW and T32WW to be on the air on 6 to 160 metres CW, SSB and RTTY.

Six operators will be active as TN2T from Congo from 22 to 31 January. The will have three stations active on 160 to 10m SSB, CW and RTTY, with a focus on 160 and 80m. Further information can be found at www.tn2t.be. QSL via M0URX, preferably via the OQRS facility on his website, http://m0urx.com/oqrs for either direct and bureau requests.

Now the contest news

The 50MHz UK Activity Contest takes place on 24 January from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

Also on 24 January the SHF UK Activity Contest takes place at the same time, 2000 to 2230UTC. Using all modes on the 2.3 to 10GHz bands, the exchange is signal report, serial number and locator.

The CQWW 160m DX Contest takes place for 48 hours, starting at 2200 on the 27th, using CW only. Work only the contiguous 48 States plus Canada, giving a signal report and CQ Zone. The UK is Zone 14. USA stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code. Accurate log keeping is a must in this event, because there are penalties for bad or busted QSOs.

The BARTG RTTY Sprint takes place for 24 hours on 28-29th from 1200 to 1200UTC. Since last year it has become an event in the HF Championship, but it is still adjudicated by BARTG and competing stations need to submit their entries to BARTG. Single band entries are not allowed and the contest uses the bands from 3.8 to 28MHz. The contest exchange is serial number only. Stations who have been placed in the Top 10 of any BARTG event in the past three years must enter the Expert category.

The Worked All Britain 1.8MHz phone contest takes place next Saturday, 28 January, from 1900 to 2300UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website www.worked-all-britain.co.uk or from the Contest Manager, G3XKT, by email to aebbooks@ntlworld.com.

And now the solar factual data for the period from Friday the 13th to Thursday the 19th of January, compiled by Neil Clarke, G0CAS on the 20th of January.

On the 14th two new sunspot groups rotated into view and since then solar activity increased to moderate levels with M class solar flares taking place. The largest was a long duration M3 solar flare on the 19th. This flare lasted for just over four hours and was accompanied by a large coronal mass ejection. Several other flares produced sudden ionospheric disturbances and coronal mass ejections. Solar flux levels increased from 124 units on the 13th to 157 by the 19th. The average was 139. The 90 day solar flux average on the 19th was 144, that's one unit down on last week. X-ray flux levels increased to peak at C1 units on the 16th but declined back to B5.9 by the 19th. The average was B6.4 units. Geomagnetic activity was quiet every day. A very small disturbance arrived on the 16th with an Ap index of 8 units, which was the most disturbed day. The average was 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 560 kilometres per second on the 13th to 350 by the 19th. Particle densities were low except for an increase to 15 particles per cubic centimetre late on the 15th and early on the 16th. Bz showed little variation on most days but varied between minus 9 and plus 10 nanoTeslas on the 16th. A small aurora was reported during the afternoon and evening of the 16th but was restricted to stations in the far north. Lower down the spectrum, on 28MHz, all continents were worked every day. A small Sporadic-E opening was reported during the evening of the 19th.

And finally the solar forecast. This week the active side of the Sun is expected to be looking our way. Solar activity is expected to be at moderate levels on some days. Solar flux levels should be around 150's or even slightly higher. Geomagnetic activity is expected to be quiet every day, however, if a large solar flare takes place and an associated coronal mass ejection heads our way then activity would increase. A disturbance is expected to arrive late on the 21st or the 22nd from the M3 solar flare of the 19th. MUFs during daylight hours at equal latitudes should be about 29MHz. Darkness hour lows are expected to be around 8MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 27MHz. The optimum

working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 0700 and 1000 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 23 January Gloucester Amateur Radio & Electronics Society is having a newcomers night and informal evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 23 January Leicester Radio Society is holding its AGM. Details from John, G0IJM, on 07939 121 132.

On Monday 23 January South Birmingham Radio Society is putting the shack on the air and having a ragchew. Contact Don, on 01214 581 603.

On Monday 23 January Stratford Upon Avon District Radio Society is having an introduction to aerial modelling using a PC by Clive, G0CHO. Contact G0CHO, on 01608 664 488.

On Tuesday 24 January Derby & District Amateur Radio Society is looking at technical topics. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 24 January Lincoln Short-Wave Club is putting G6COL on the air and taking part in the Cumulative Club Contest. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 24 January Loughborough & District Amateur Radio Club is inviting members to bring along a vintage computer. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 24 January Worcester Radio Amateurs Association is on the air and looking at a high altitude balloon project. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 24 January Wythall Radio Club is revealing the results of its Christmas contest. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 25 January Lincoln Short-Wave Club is having a talk on digimodes in contesting by Dave, G3TBK. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 25 January Midland Amateur Radio Society is having a brainstorming session for its new programme and running training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 25 January South Kesteven Amateur Radio Society is having a visit by RSGB DRM Steve, M5ZZZ. Contact Nigel, M0CVO, on 01476 402 550.

On Thursday 26 January South Birmingham Radio Society is having training classes with Dave Murphy, G80WL. Contact Don, on 01214 581 603.

On Friday 27 January Bromsgrove & District Amateur Radio Club is on the air on HF. details from Chris, M0BQE, on 01905 776 869.

On Friday 27 January Coventry Amateur Radio Society is holding a quiz night. Contact John, G8SEQ, on 07958 777 363.

On Friday 27 January South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 28 January Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 23 January Angel of the North Amateur Radio Club is holding its AGM. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 23 January Bolton Wireless Club is having a talk on working in meteorology by Keith, G0OXV. For details, send an email to boltonwireless@gmail.com.

On Monday 23 January Sheffield Amateur Radio Club is having part 2 of the contest workshop led by Peter, G3PHO. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 23 January Thornton Cleveleys Amateur Radio Society is having a talk on error correction by John, G8RDP. Details from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 24 January Chester & District Radio Society is having an operating evening. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 24 January Halifax & District Amateur Radio Society is on the air and starting the first of a series of construction workshops. Details from Anthony Vinters, G0WFG, on 01422 822636.

On Wednesday 25 January Chorley and District Amateur Radio Society commences its licence training courses, which will be ongoing through 2012. Details from Nessie, M0NES, by email to nessie68@hotmail.com.

On Wednesday 25 January Hornsea Amateur Radio Club is having a club night and watching a DVD. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 25 January Maltby & District Amateur Radio Society is having a talk by Barry, M1CYJ, on the Rediffusion days. Contact Keith,

G1PQW, on 07801 156 678.

On Thursday 26 January South Manchester Radio and Computer Club is having a talk on the Cathode Ray Tube by Ged, G8RSI. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 26 January Wakefield & District Radio Society is having a quiz with Chris, 2E0CJL, and there is a prize for the winner. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 27 January East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 27 January Tynemouth Amateur Radio Club is having a talk on a holiday visit to SV5RW. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 28 January Wakefield & District Radio Society starts its Foundation course at 13:30 and its Advanced course, with Dave, G0EVA, continues from 13:30. Contact Ken, 2E0SSQ, on 07900 563 117.

NEWS FOR NORTHERN IRELAND

On Monday 23 February Greenisland Electronics Amateur Radio Society is having an enrolment night for its Intermediate course. The course itself will last ten weeks. Anyone interested should come along to the Knockagh Lodge, 236 Upper Road, Greenisland. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

Advanced notice now of an Intermediate course at West Tyrone Amateur Radio Club. Registration will be on Tuesday 7 February. The course will run on several Saturday afternoons between 18 February and 31 March, with the exam on 3 April. The total cost, including all materials and the exam fee, is ?65. Full details are online at www.wtarc.co.ok.

NEWS FOR SCOTLAND

On Tuesday 24 January Livingston & District Amateur Radio Society is having Morse practice. Details from Norman, on 07740 946 192.

On Wednesday 25 January Lothians Radio Society is having a talk on International Lighthouse Weekend 2011 by Geoff Crowley, MM5AHO. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 26 January Aberdeen Amateur Radio Society is on the air and holding a Morse class. Details from Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with advance notice that Chesham & DARS is running an Advanced training course and Exam and looking for more prospective students. The course is on eight Sunday afternoons between 25 March and 27 May, excluding Easter Sunday, 8 April, and the Spring Bank Holiday weekend, 6 May. The exam will be on 31 May.&#65533;The Cost of the course will be ?40 for

room hire etc plus ?37.50 for the RSGB exam fee. More information from Terry, G0VFW, on 01442 831 491, or email cdars.club@ntlworld.com.

On Sunday 22 January Hastings Electronics and Radio Club is having lunch at the Kings Arms, Ninfield. Details from Gordon, on 01424 431 909.

On Monday 23 January East Kent Radio Society is having a discussion and update about AROS by Brian Reay, G8OSN. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 23 January Surrey Radio Contact Club is having slide presentation on Croydon Airport by John King. Contact John, G3MCX, on 02086 883 322.

On Tuesday 24 January Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 24 January Dorking & District Radio Society is holding its AGM followed by a talk on Radio Scouting and the International Jamboree in Sweden by Stuart Barber, G6CJR. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 24 January Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524 844.

On Wednesday 25 January Chesham & District Amateur Radio Society is holding its AGM at WHC, starting at 20:30 prompt. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 25 January Hastings Electronics and Radio Club is having an illustrated talk on Echolink by Gordon, M3YXH. Details from Gordon, on 01424 431 909.

On Wednesday 25 January Newbury & District Amateur Radio Society is having a surplus equipment sale. Contact Rob, G4LMW, on 01635 862 737.

On Thursday 26 January Bittern DX Group is having an informal club meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 26 January Echelford Amateur Radio Society is having a quiz night with Neil, G8LPA. Contact John, G4GSC, on 01784 451 898.

On Thursday 26 January Edgware & District Radio Society is having a natter and subs night. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 26 January Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 26 January Reading & District Amateur Radio Club is having a talk on the valve industry by Alan Stepney. Details from Pete, G8FRC, on 01189 695 697.

On Friday 27 January Cambridge & District Amateur Radio Club is holding its AGM. Contact Ron, G3KBR, on 01223 501 712.

On Friday 27 January Itchen Valley Amateur Radio Club is having a talk on crystal filters by Richard Harris, G3OTK. Contact Liz, M0ACL, on 02380 254 599.

On Friday 27 January Radio Society of Harrow is having a talk on Nikola Tesla by Brian, G3YKB. More information from Linda, G7RJL, on 02083 868 586.

On Friday 27 January Wimbledon & District Amateur Radio Society is having a demonstration and talk on RF phenomena by Andrew, G4ADM. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 28 January Bittern DX Group starts rounding up its weekend event for RNLI SOS Week. Details from Linda, G0AJJ, on 01692 404 154.

NEWS FOR THE SOUTH WEST

On Monday 23 January Exeter Amateur Radio Society is having a club night at the Moose Centre. Contact Nick, 2E0NRJ, on 01363 775 756.

On Wednesday 25 January Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 26 January Swindon & District Amateur Radio Club is having a talk on crystal sets and early valve receivers by Geoff, G3TPQ. Contact Den, M0ACM, on 07810 317 750.

On Friday 27 January Torbay Amateur Radio Society is awarding its Construction Cup. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

We start with sad news that the Swansea Rally, planned for Sunday 26 February, has been cancelled. The reason is that only a handful of traders had expressed an interest in attending. The organisers are hopeful that it may be possible to organise another rally later in the year. More information from Roger Williams, GW4HSH, on 01792 404 422.

On Thursday 26 January Aberystwyth & District Amateur Radio Society is having a club night on the air, initially on 145.500 and then QSY to 145.550. Details from Ray, GW7AGG, on 01970 611 853.

CQ PRES RELEASE (ARRL, CQ, Sign Agreement to Provide Logbook of the World Support for CQ Awards). The following press release was sent out by Richard Moseson, W2VU:

For more information, contact:
Harold Kramer (WJ1B)
Chief Operating Officer
ARRL - The national association for Amateur Radio
(860) 594-0200 / wj1b@arrl.org

Richard Ross (K2MGA)
President
CQ Communications, Inc.
(516) 681-2922 / k2mga@cq-amateur-radio.com

FOR IMMEDIATE RELEASE: January 24, 2012

ARRL & CQ Sign Agreement to Provide
ARRL's Logbook of The World Support for CQ's Awards

(Hicksville, NY and Newington, CT - Jan. 24, 2012) – CQ Communications, Inc. (CQ) and ARRL – the national association for Amateur Radio, have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World (LoTW) electronic confirmation system.. The agreement was announced jointly today by ARRL Chief Operating Officer Harold Kramer, WJ1B, and CQ Communications President Richard Ross, K2MGA.

CQ's awards will be the first non-ARRL awards supported by LoTW and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow. The ARRL's LoTW system, an interactive database recording contacts between radio amateurs was created in 2003 and has been

adopted by 47,500 radio "hams" worldwide. It already has records of 400 million contacts and grows weekly. The target date for beginning LoTW support for WPX is April 1, 2012. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply.

ARRL Chief Executive Officer David Sumner, K1ZZ, observed that this step gives radio amateurs throughout the world an inexpensive and convenient means of gaining credits toward CQ's popular operating awards. "LoTW has significantly increased interest and participation in the ARRL's DXCC, Worked All States and VUCC awards programs. We anticipate a similarly positive response to the addition of the CQ WPX award. Amateurs will be able to spend more time operating and less time chasing QSL cards."

CQ President Richard Ross, K2MGA, said he is very pleased to be able to move forward with Logbook support for CQ awards. "We have had excellent results with electronic confirmations for several years," he said, "and I am glad that we are now able to begin expanding that convenience to those participants in our award programs who use Logbook of the World. We look forward to a smooth launch for WPX, and to the expansion of LoTW support to include the rest of our award programs as well."

ARRL (www.arrl.org) is the national association for Amateur Radio in the United States and publisher of its membership journal QST. CQ Communications, Inc. (www.cqcomm.com) is publisher of CQ Amateur Radio and several other magazines. There are currently over 700,000 Amateur Radio licensees in the USA and approximately 2.5 million worldwide.

To learn more go to < www.arrl.org/logbook-of-the-world>.

SPECIAL EVENT (Titanic Centenary • Station GR100MGY - Press Release No. 1, 23 January 2012): The sinking of White Star Line's RMS Titanic on 15th April 1912 sent shock-waves around the world and has touched our hearts ever since. Those who perished in this disaster will be remembered on its 100th anniversary during many commemorative events.
Within amateur radio we recognise that this event marked the first time that Morse code saved so many lives at sea. Jack Phillips (1887-1912) was the liner's Chief Marconi Wireless Operator. He perished only after sending distress signals in Morse right until the ship foundered, thereby saving hundreds of lives. Jack was from Godalming, Surrey, where his heroism is constantly recalled. A group of local radio amateurs commemorated his heroism on the 90th anniversary of the sinking by setting up a radio station in Godalming with the call-sign GB90MGY. The letters 'MGY' were used by RMS Titanic for all its radio transmissions. Five years later, the Wey Valley Amateur Radio Group (WVARG), activated a similar commemorative station in Godalming, this time using GB95MGY.
For the 2012 centenary a much larger project to honour Jack's memory

will be mounted in Godalming by the Wey Valley club. From Tuesday 10th April (when Titanic sailed from Southampton), until the day of the sinking, Sunday 15th April, two transmitters will be manned continuously, with the special call-sign GR100MGY (Godalming Remembers the Centenary of the Titanic Disaster). There will be a short pause in transmissions at 0547 GMT on the Sunday, the time when distress messages ceased minutes before the liner sank. The transmitters will make contacts around the world, mostly in Morse code, targeting 15,000 two-way exchanges. Each contact may be confirmed with a specially printed card depicting Titanic and Jack Phillips.
We offer our grateful thanks to Charterhouse for providing operating facilities at their excellent Godalming location, to Ofcom for allocating the special call-sign and to Waverley Borough Council and Godalming Town Council for their support and embodying this event in their commemorative programme.
During Saturday 14th and Sunday 15th April, from 12:00 noon until 4:00pm, the general public will be welcome to visit the station to observe the transmissions and to participate in this memorable commemorative event.
Further information: Michael Shortland, G0EFO, michaelgs1@talktalk.net

###############

For Amateur Radio Publications
Some fifteen operators will man two 400 watt transmitters on the eight HF bands from 3.5 to 28 MHz , using directional antennas. Only CW will be used except on the open days, 14-15th April, when SSB will help the public to understand the operation. Activity on VHF is also planned. QSL information can be found at: http://www.QRZ.com.
GR100MGY will be located at 0° 37° 18° West, 51° 11° 49° North, Locator
IO91qe: Charterhouse, Hurtmore Road, Godalming, Surrey, GU7 2DX.

:Product: Weekly Highlights and Forecasts
:Issued: 2012 Jan 24 2144 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
16 - 22 January 2012

Solar activity reached moderate levels as Regions 1401 (N18, L=213,
class/area Eki/540 on 19 January) and 1402 (N28, L=214, class/area
Eko/630 on 17 January) both produced M-class events. Region 1401
produced an M1/1n on 17/0453Z and an M1/1n on 18/1912Z. Region 1402
followed with an M3/2n on 19/1605Z. The 19 January event was
associated with and Type IV radio emission and a full halo CME. Type
II emissions were detected on 19/1252Z and 19/1933Z with speeds of
933 km/s and 694 km/s respectively. Partial halo CMEs were also
observed on 16 and 18 January. Activity decreased to very low levels
late on 19 January. Isolated low-level C-class flares were observed
on 20 - 22 January. Plage Region 1396 (N27, L=287, class/area
Dao/110 on 17 January) produced a C1 flare at 20/2112Z associated
with a Type II radio sweep (945 km/s) and a non-Earth-directed CME.
Region 1402 produced a long-duration C1 flare at 20/2333Z associated
with a weak Type IV radio sweep.

An enhancement of the greater than 10 MeV proton flux at
geosynchronous orbit began around 20/0800Z and continued through the
end of the period.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels the entire period.

Geomagnetic field conditions ranged from quiet to unsettled levels,
with a brief excursion into active-major storm levels at high
latitudes on 22 January. Field conditions were predominately quiet
from 17-21 January. On 22 January, an interplanetary shock passed
the ACE spacecraft at approximately 22/0514Z, likely indicating the
arrival of the full-halo CME observed on 19 January in LASCO
imagery. This was followed by a geomagnetic sudden impulse (SI) at
22/0614Z (31 nT observed by the boulder magnetometer). Field
activity increased to unsettled to major storm levels at high
latitudes following the SI.
```

Forecast of Solar and Geomagnetic Activity
25 January - 20 February 2012

Solar activity is expected to be low with M-class flares likely until Regions 1401 and 1402 depart on 28 January. Predominantly quiet levels are expected for the remained of the period.

Protons greater than than 10 MeV are expected to remain above event threshold from 25 - 26 January. A return to background levels is expected for the remainer of the period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels the entire period.

The geomagnetic field is expected to be at active to minor storm levels on 25 January as effects from the CME from 23 January wane. Quiet levels are expected on 26 January. Quiet to unsettled levels are expected on 27 January as a coronal hole high speed stream (CH HSS) becomes geoeffecitve. A return to quiet levels is expected until 02 - 03 February, with quiet to unsettled levels expected as another CH HSS becomes geoeffective. Predominantly quiet levels are expected from 04-08 February. Another CH HSS is expected to become geoeffective with quiet to unsettled levels expected from 09-10 February. Predominantly quiet levels are expected for the remainder of the period.

64. [DXNL] DXNL 1764 (Jan 25, 2012)

Newsgroup: rec.radio.amateur.misc

DXNL 1764 - Jan 25, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

3V, TUNISIA
Ash,KF5EYY, will be QRV again from the clubstation in Hammam Sousse
signing 3V8SS in the upcoming CQ 160m CW Contest (Jan 27-29) as SOLP.
QSL via LX1NO, unfortunately only direct. See: http://www.kf5eyy.com

4U, ITU HEADQUARTERS GENEVA
The "International Amateur Radio Club" (4U1ITU) uses the special call
4U1WRC during the World Radiocommunication Conference 2012 (WRC-12)
working in all modes on 160-6m from Jan 23 till Feb 17. QSL via 4U1ITU.
http://twitter.com/4u1itu http://life.itu.int/radioclub

8Q, MALDIVE ISLANDS, AS-013
Bert,CX3AN, and Mario,CX4CR, are going to become active as 8Q7HU from
Maafushi Island (AS-013, WLOTA 3911, Loc MJ63RW) in the Kaafu atoll
(North Male atoll) from Jan 25 until Feb 5. They will work in CW, SSB
and digital modes on 80m-6m. QSL via CX3AN (QRZ.com).
Their website is http://www.qsl.net/8q7hu

9M4, WESTERN MALAYSIA, AS-015
The members of the Malayan amateur radio club (M.A.R.T.S.) celebrate
the Chinese New Year with the special callsign 9M4CNY. They will be QRV
from Penang Island (AS-015) in SSB on 14.288 MHz and 7.088 MHz on
Jan 29 from 0700 UTC until 1600 UTC. QSL unfortunately only direct.

C6, BAHAMAS
N1GN and NE1B will be QRV as C6ANM in the M/S class of the upcoming
CQ 160m CW Contest. QSL via LoTW or direct via WA2IYO.

DL, GERMANY
The city of Schlitz, celebrates its 1200th city jubilee in 2012. The
picturesque castle town is nestled between the mountain ranges
Vogelsberg, Rhoen and Knuell. The medieval town center invites everyone
to explore the ancient walls and castles. The local HAMs are operating

the special event station DL0SLITISA. QSL via bureau.

FH, MAYOTTE, AF-027
Giovanni,IK5BCM, Giuseppe,IK5CBE, and Giovanni,IK5CRH, will be QRV as TO4M from Mayotte (AF-027) between Jan 28 and Feb 5. They will use two stations with amplifiers in SSB, CW, PSK31 and RTTY on 80m-10m with normal dipoles and two rotary dipoles for 10m and 12m.
QSL via IK5CRH, LoTW, eQSL. See also: http://to4m.xoom.it

HR, HONDURAS
Gerard,HR5/F2JD will show up again from Copan in all modes on all bands between Feb 2 and May 6. QSL via F6AJA. See also: http://f2jd.free.fr
An online log can be found at: http://lesnouvellesdx.fr/voirlogs.php

KH6, HAWAII, OC-019
Haru,JA1XGI/W8XGI, is visiting Hawaii from Jan 31 until Feb 4 and wants to become QRV as W8XGI/KH6. QSL via JA1XGI.

LX, LUXEMBURG
Ron,DL3BPC returns to Luxemburg to join the CQ 160m CW Contest as LX7I.
QSL via LX2A.

R1M, MALYJ VYSOTSKIJ ISLAND, to be deleted
Malyj Vysotskij Island is likely to be deleted from the DXCC entities list on Feb 17.

SM, SWEDEN
Fons,ON4AWT, Raf,ON5RZ, and Dirk,ON7DS, will be QRV as SI9AM from the "King Chulalongkorn Memorial clubstation" from Jan 25-30 including the UBA SSB DX Contest. QSL via SM3CVM. See also: http://www.si9am.se

V3, BELIZE, NA-180
Art,NN7A, will show up from South Water Caye (NA-180) between Jan 27 and Feb 1 signing V31JZ/p (same callsign like before). Listen for him mainly in CW on 160m-10m running 100 watts into wire antennas. If the conds are fair enough he wants to join the CQ 160m CW he Contest also.
QSL via NN7A.

VK0/M, MACQUARIE ISLAND, AN-005
The HAM spirit has improved od the bands again and thus Trevor,VK0TH, is now back again in SSB/CW/RTTY/PSK/Hell for 1-2 hours every day from 0700-1200 UTC. You can also find him in the ON4KST chatroom from time to time. He will use the special call AX0TH on Jan 26 (Australia Day).
QSL via JE1LET, unfortunately only direct.

VP8/F, FALKLAND ISLANDS, SA-002
Rich,G0ZEP, plans to activate the East Islands (WLOTA 1479) and also the West Islands (IOTA SA-002, WFF GFF-024) as VP8DFR.
QSLs via homecall, unfortunately only direct (see QRZ.com).

YA, AFGHANISTAN
Jose,CT1FKN, has a license for T6JM until Jun 13. As a member of the International Security Assistance Force (ISAF) he wants to find some

space to build a (small) HAM radio antenna despite all restrictions. If
everything works out he might show up in SSB and digital modes on 20m.
QSL via home call.

Kurt,KE7KUS is based in Bagram until the mid of February. After waiting
for five months his license has been issued on Jan 17 finally.
The first QSO was made as T6KK on Jan 19. QSL via homecall, LoTW, eQSL.
Kurt has limited antenna possibilities as well.

YS, EL SALVADOR
All WPX hunters will be pleased to hear that a group of DL3JJ, DF7TT,
DK8YY, DL4JS, DL5SE, DL2ARD, DL8ALU, OK4MM, YS1ZC, YS1MAE and YS1GMV
will be QRV as HU2DX with several stations (with focus on the lowbands)
from Jan 29 until Feb 10. QSL via DH7WW. See also: http://www.hu2dx.de

EK6LP on LoTW
If you want to get EK6LP confirmed via LoTW you should send an e-mail
with the QSL information to RN4LP.
Editor: An upload of the complete log would be much easier...

SILENT KEYS: The BCC member Joop,P43B, passed away after a severe illness
on Jan 19. Tur,YL2UZ (leader of YL4HQ), aged 49, passed away on Jan 9.
Our condolences and compassion to the families and friends.

UPCOMING CONTESTS

Jan 27-29 CQWW 160m Contest, CW
Jan 28/29 REF Contest
Jan 28/29 BARTG RTTY Sprint
Jan 28/29 UBA DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-007, JA1 etc, Honshu Island: The special event station 8J1YMS will be QRV
from Yoshikawa (JCC 1343, WLOTA 2376) between Feb 1 and Mar 31 from the
opening of the "Yoshikawa Minami Station", built by the East Japan
Railway Company (JR East). QSL via JARL bureau.

The special event station 8J9LITE will be QRV from Kanazawa (JCC 3001,
WLOTA 2376) during February 2012. QSL via JARL bureau.

EU-013, GJ/MJ, Jersey: Richard,K2WR, will show up as as SO/HP signing GJ2A
in the CQ 160m CW Contest (Jan 27-29). His QTH is St. Brelade on the
Isle of Jersey (WLOTA 0818). He will sign MJ0AWR before and after the
contest starting on Jan 24/25. QSL only direct via K2WR or via LoTW.

EU-089, CU8/9, Azores Western group: The Algarve STAR DX Team members
Toze,CT1GFK, Antonio,CU8AS, Rudi,HB9CQL, and Hermann,HB9CRV, will sign
CR2W in the CQWW 160m CW Contest from the QTH of Antonio,CU8AS, on
DFP FAZ-02, TWLHD WLH CU-008, ARLHS AZO-016, WLOTA 0947, DIP AZ-008.
QSL via HB9CRV (bureau/direct). See also: http://www.to-mk.com/neu

NA-085, W4, Florida State North West: Dennis,WA2USA/4, will be active from
St. George Island (ARLHS USA-1057, USI FL007S) on Feb 1-27.
More information can be found at: http://www.wa2usa.com
QSL via homecall (bureau/direct).

PY2, SA-024, Sao Paulo State West group/SA-071, Sao Paulo State Centre group
A Brazilian/Italian team plans to activate Comprida Island (SA-024) and
Peruhibe Island (SA-071) between Jan 30 and Feb 9. They will use the
same callsign PR2I from both islands. The team includes Leopoldo,I8LWL,
Paki,IZ8GDO, Vespe,IW8EZV, Angelo,PY2VA, and Toni,PY2YW.
More details can be found at: http://w.i8lwl.it
QSL via IK7JWX (NOT via I8LWL, like stated elsewhere).

OC-001, VK, Australia: Tino,VK3EGN, plans to join the CQ 160m CW Contest as
well using his 3 ele Lambda/2 vertical beam. These QSOs are also good
for WLOTA (LH 1520). Please send your QSLs via VK bureau.

//
Satellite demo in Palm Springs

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/Lw8AGB1_z9Y/satellite_demo_in_palm_springs.htm?utm_source=feedburner&utm_medium=email

AMSAT area coordination Clint Bradford K6LCS will again be attending and demonstrating working ham satellites with minimal equipment at the third annual Desert Radio Amateur Transmitting Society (Desert RATS) HamFest this Saturday, January 28, 2012

//
Hacking EU radio spectrum policy

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/r4sVoC86qIk/hacking_eu_radio_spectrum_policy.htm?utm_source=feedburner&utm_medium=email

A video of the presentation given by radio amateur Alexander List HB9/OE9LAJ of the Open Spectrum Alliance to hackers at the SIGINT 2010 event is now available

//
Recent solar disturbances

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/Fgn5jmVOvpk/solar_disturbances_bochum.htm?utm_source=feedburner&utm_medium=email

The disturbances have the potential of serious impact on terrestrial systems like communication and power systems

//
IOTA news from the Deutscher Amateur Radio Club

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/BfUnI4SOXW8/january_25.htm?utm_source=f

eedburner&utm_medium=email

Weekly IOTA News - compiled by Klaus, DL7UXG of the Deutscher Amateur Radio Club

//
RS-39 Telemetry Decoder

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/9r2pjRvSIIA/rs39_telemetry_decoder.htm?utm_source=feedburner&utm_medium=email

Mike Rupprecht DK3WN has made available software to decode the CW telemetry beacons of RS-39 (435.315 and 435.215 MHz)

//
WRC-12 Day 1 - IARU-R1 report

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/OhZcdb60fjw/wrc_12_day_1.htm?utm_source=feedburner&utm_medium=email

The opening of WRC-12 took place in Geneva on January 23, 2012. More than 3000 delegates from over 150 countries are represented

//
Article - 'OSCAR-1 Launched 50 Years Ago'

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/Dscx3NHqiZo/oscar1_launched_50_years_ago.htm?utm_source=feedburner&utm_medium=email

The ARRL have released an English translation of an article about the pioneering amateur radio satellite OSCAR-1

//
SI9AM live video broadcast

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/jD87fGI8xvY/si9am_live_broadcast.htm?utm_source=feedburner&utm_medium=email

3 Belgian hams will be operating the amateur radio special event station SI9AM from the King Chulalongkorn Memorial in Ragunda, Sweden between January 25 and January 30, 2012, and plan to have a live video stream in operation

66. MMMonVHF Newsletter / No. 1 - WEEK 04/2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-01-25 23:03:02 UTC
From: MMMonVHF News Mailer <noreply@mmmonvhf.de>
Message-ID: <201201252224.q0PMOqDj008527@server13.web4a.de>

** MMMonVHF Newsletter / No.1 - WEEK 04/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-01-25
We try to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 **

In the period Jan. 1th to Jan. 21th, it was possible to vote for
"The best VHF DX-pedition of the year 2011".
The voting has closed and the results will be published in february.

SOURCE: Jani, HA5CRX on behalf of the TEAM of MMMonVHF

** MS Sprint Contest 2011 **

Every year MMMonVHF and DUBUS are organizing the MS Sprint Contest
around the maximum of the Perseids meteorshower. The logs have been
processed and the winners for 2011 are known!

** DXCC R1/M will be deleted DXCC by Feb. 17th 2012 **

R1MV, MALYJ VYSOTSKI ISLAND (Deletion of MVI Coming!). Jari, OH2BU,
reports: "The day of deletion has now been confirmed: Finnish and Russian
ambassadors met today, January 17th, and exchanged the documents signed
by the presidents of both countries. The new agreement of the lease of
Saimaa Channel will be in force one month from today - February 17th.
As the new agreement does not include Malyj Vysotskij (R1MV ...), the
island will be deleted from the DXCC-list the day before, February 16th,
2012. This is, of course, subject to the decision of ARRL DXCC Committee.
It's unlikely that any DXpedition will come on from the island before the
deletion, although our Russian friends would have a possibility to do it."

SOURCE: OH2BU in dx-world.net

** PSK2k, new meteorscatter software available **

In the MMMonVHF newsletter 3, dated Jan. 18th, we informed you about the
recently developped PSk2k software.

The software is still in development and there was a lot of feed-
back and this resulted in some changes in the software. Main reason
were some issues with non-decodable bursts. This is not caused by the
signalstrenght or the decoder but is a software packed synchronisa-
tion issue.

A solution is worked out at the moment and will be released in the next
couple of weeks when the testing period is finished. As the new version
will use a different packetlenght and therefore the current verion 4.7
or earlier will not be able to decode the new code. Advised is to keep
version 4.7 in a seperate folder so you will be able to decode data
received with version 4.7 or earlier.

There are big advantages going down this route:

1) Non-decodes of the observed type cannot occur;
2) Less computational resourse needed;
3) Packet synchronisation will be very much better;
4) It will be simple to visualize all traffic on the channel (at the
moment you can only see genaral messages or messages adressed to you)

Downsides?

Other then not being able to decode te earlier data, the downside is than
the minimum packetlenght is going from 0.108s to 0.135s which will result
in the fact that ping shorter than 70 ms will not be decoded.

Klaus, DJ5HG, is working hard to work on the new concept and is running
short on free time to do this. It is expected to take a week or two
before hearing more.

The forwarded saved, non decoded data, is not longer needed. Thanks to all
who sent in copy.

http://uk.groups.yahoo.com/group/psk2k/

** Aurora **

Hot item in many newsbulletins was the recent activity of the sun. Last
week the sun produced the largest flare in almost 8 years... a M8.7-class.
The CME (Coronal Mass Eruption), who was directed towards Earth,
arrived on Thuesday Jan. 24th around 14.30 UTC. As the geomagnetic field
was still perturbed due to the CME impact from Jan. 22nd, the influence
could be much larger than normal and cause severe storms.
The visual aurora was amazing...however the radio aurora was not as good as many hoped.
Aurora was reported into the IOx0 and JOx0 locatorrows.

There are many sites showing graphics about the auroral activity. A nice one
to check is the SuperDARN Global Ionospheric Convection Map at URL:
http://superdarn.jhuapl.edu/rt/cnvmap/index.html
This radar, consisting of 14 radars on the northern hemiphere and 8 on the southern,
can measure the position and velocity of charched particles in the Earth's
ionosphere. It visualizes better what is going on than just looking at a
graphic.

** Meteorscatter February 2012 **

Only minor showers hit the Earth in February - March. The most significant is
Capricornids / Sagittariids (peaking February 2nd), a medium-ZHR daytime shower;
its radiant culminates at relatively low elevation in northern emisphere skies.
Sporadic meteors have reached their seasonal minimum, but MS contacts are still
possible, especially in early morning hours.
Have a look to MS predictions for February - March 2012, at our MMM MS-Propagation

page. The page will be updated end of month for February and March.

** Conway Reef, 3D2C **

The YT1AD team have planned their next DXpedition to be active from Conway Reef (OC-112, Grid Loc. RG78) between 25 September and 6 October, 2012. The team already has received the callsign 3D2C. They will be QRV on all HF bands 160-10m, all modes. They will also be active on 6 and 2 metre 6 EME with WSJT65 A,B,C on 50.375 MHz and 144.375 MHz. A 6 metre beacon will be setup on 50.095 MHz. Operators include Hrane YT1AD Team leader, David K3LP Technical Co-leader, Aleksej UA4HOX Organization Co-leader, Paul N6PSE PR, Atilano PY5EG, Vasily RW4NW, David WD5COV, Carlos EA1IR, Joe AA4NN, David AH6HY, Alan AD6E,Gabriele I2VGW and Alan K6SRZ Medical Doctor of our team. Note: They still have room for 2 more operators! Due to travel time between Suva, Fiji, and Conway Reef actual operating dates from Conway will be between 27 September and 4 October (approx.). QSL via YT1AD (Dr Hrane Milosevic, 36206 Vitanovac, Serbia - EU).
For direct QSL please send: QSL + SAE + SASE (1 US$ for normal post, 2US$ for Airmail). QSL via bureau - only send QSL card. Further information, frequencies and log search can be found at: www.yt1ad.info/3d2c/index.html

SOURCE: [dx-world.net] via ICPO Bulletin (13-20 January 2012)

** Maladives, 8Q **

8Q, MALDIVES (Date Change). Operators Bert/CX3AN and Mario/CX4CR will be
active as 8Q7HU from Maafushi Island, Kaafu Atoll (AS-013), between
Januari 25th - February 5th. Activity will be on 80-6 meters using CW, SSB and the
Digital modes. There will be a special emphasis on South America.

SOURCE: Ohio/Penn DX Bulletin #1046

** Malpelo Island, HK0NA **

By the time you read this, the whole HK0NA
team should be on the island and operating immediately for 17 days. The
team left on January 18th for Malpelo island and is not expected to
return until February 10th. For more details and updates, visit:
http://hk0na.com

SOURCE: Ohio/Penn DX Bulletin #1046

** Ogasawara, JD1 **

JD1, OGASAWARA. Koji, JI1LET, will once again be active as JI1LET/JD1
from Chichijima Islands (AS-031) between April 29th and May 5th. Activity
will be on 80-6 meters using CW, SSB and RTTY. QSL via his home callsign.

SOURCE: Ohio/Penn DX Bulletin #1045

** St. Kilda, GM **

Operators Allan GM3OZB, Barry GM3YEH, Bill GM3ZRT, John GM0DJG, Gordon MM0BIM
and Declan EI6FR will be active as GM7WCO/p from St. Kilda Islands (EU-059,
Grid Loc. IO57), individual island not known at this time, from 16-21 May, 2012.
QRV on on HF and 6m using CW, SSB and possibly RTTY. QSL via GM7WCO, bureau or direct.

SOURCE: [rsgbiota.org] via ICPO Bulletin (13-20 January 2012)

** Cayman Islands, ZF **

Daryl,W7TAE, is going to visit Grand Cayman (NA-016) from Jan 22-27.
Listen for ZF2TE in SSB/CW on 20m-6m running 100 watts into verticals.
He also plans to join the ARRL VHF Contest (MOSB 6m). QSL via homecall.

SOURCE: [DXNL] DXNL 1763 (Jan 18, 2012)

** 4U1, ITU HQ (Special Activity), qrv HF and 50 MHz **

The International Amateur Radio Club, 4U1ITU, will be operating with the special
callsign 4U1WRC between January 23rd and February 17th. Activity will take place
during the ITU World Radio Conference 2012 (WRC-12) from Geneva, Switzerland.

Operations will be from 160-6 meters, eventually higher, all modes.
All QSOs will be confirmed with a special QSL available via 4U1ITU. Short updates
of the operation will be posted on twitter at: http://twitter.com/4u1itu
More detailed information is availabe on the Web site at: http://life.itu.int/radioclub

SOURCE: [GOLIST] Ohio/Penn DX Bulletin #1046

** Democratic Republic of Congo, 9Q6

Barney, ZS4U (ZS6TQ) will be active from the Democratic Republic of Congo
between March 10 to April 5, 2012 as 9Q6/ZS4U.

QRV on 40-6m CW, SSB and PSK.

QSL via home call.

WIANEWS WEEK COMMENCING JANUARY 29 2012.

50th Anniversary Perth City of Light, John Glenn, TODAY you will hear
audio from John Glenn in space over Perth back in '62.

T-minus 18 and counting .. God Speed John Glenn .. 10, 9 ..

Stay tuned, more later... IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JANUARY 29 2012.

G'day everyone! And welcome from the members of the CCARC, I'm Rod VK2FVRJ.

Who's 55 years old and showing no sign of retiring?

The CCARC Field Day at Wyong, that's who!

The 26th of February, 2012, marks the 55th year of Australia's largest
gathering of ham radio enthusiasts.

And every year just gets better and better!

>From the flea market, to the major suppliers of Amateur Radio equipment, the
various AR clubs and exhibitors, the Field day is packed with plenty to
interest the Amateur Radio fraternity

And what would the Field day be without our usual lecture program, which promises yet again, to be a highlight of the day's activities.

This year's topics span the years, starting with Vintage Radio Repair, Radar before the Magnetron , right up to the new National Broadband Network. For our final lecture, we are very pleased to have a presentation from Hellenic Amateur Radio Assoc. Of Australia on the 2011 DXpedition to Lord Howe Island which included a member of our own CCARC.

Please check the fieldday.org.au website for more information regarding the lecture program and times.

So grab your calendar, mark the date and we'll see you at CCARC Field Day at Wyong - 26th February, 2012

P.S. Don't forget the raffle!

Christopher Lampe VK2FVKG let us know of an event that whilst not ham radio based is a family fun filled event and it's known as the Hastings American Motorcycle Club

Date : March 2nd-4th 2012 (Fri- Sun)
Hastings Motocross Complex
Burrawan Forest Drive (off Pacific Hwy South of Port Macquarie)

event includes

* Live Bands

* Market Stalls

* Motocross & Unicycle Racing and much more

* Camping Sites Available

* Showers and Toilets

Contact : Charlie 04 04 07 9835

Patch Clubs By Invitation for more information please contact
Cricket - 0447199443 or Stormy - 0439846442

Regards VK2FVKG

Hi again Folks, Neil VK4NF back again with a final reminder that the Ham & Wine fest at Maclagan is on this coming Saturday the 4th February commencing at 9am.

BBQ breakfast & Lunch available, 1940s & 50s radio display, new and preloved gear for sale, Multi draw raffle. Lucky door prize. And don't forget the wine.

And the monster Auction.

Look forward to seeing you there and good morning to all

The Centre Victoria RadioFest at the Kyneton Racecourse, an hour from Melbourne, Ballarat and Bendigo on Sunday the 12th of February.

All the major commercial traders would not miss it and neither should you.

Looking for bargains, components, bits and pieces, connectors, cable, sealed lead acid batteries or antennas? Then come and check out the second-hand market or car-boot sales alley.

Want to make a sales table or car-boot space booking? Then be quick and obtain an application form from the Amateur Radio Victoria website.

Other attractions are digital amateur television, emergency communications, mini-lectures, historical displays and lots, lots more.

Free tea and coffee. The venue is mostly under cover, fully catered for or bring your own picnic.

The Centre Victoria RadioFest at Kyneton on Sunday the 12th of February.

Points are contact are:
Commercial Traders Liaison, Barry Robinson VK3PV 0428 516 001
Second hand tables are space, Ross Pittard VK3CE 0408 533 107
Club Corner Precinct, Tony Hambling VK3VTH 0423 635 152

(Bruce Lees VK3FFF)

Melbourne Maker Faire a success

22 January's VK1WIA reported on a new Maker column in CQ magazine, intended to strengthen ties between radio amateurs and the maker community.

Closer to home, Melbourne's Connected Community Hackerspace held Australia's first Mini Maker Faire on Saturday January 14.

The event, held at Swinburne University, attracted an estimated 400 visitors. Think of it like a Hamfest but with practical stands replacing equipment sales.

Popular exhibits included 3 dimensional printing, electronic music and Arduino open source microcontrollers. There were also learn to solder workshops, Lego poetry and numerous demonstrations. These included a remote controlled blimp, traditional handicrafts and a self-righting electronic Segway scooter (developed by Malcolm Faed VK2TMF).

Key themes of Maker Faire included pulling apart, recycling, repairing and making. Computing, cheap components and easy to program microcontrollers is encouraging creative people to juxtapose art and electronics.

A number of VK3s attended and enjoyed the event. For those who wished they had gone several comprehensive videos of the event can be viewed on YouTube - just search for 'Melbourne Mini Maker Faire'

More info: http://makerfairemelbourne.wordpress.com/ &
http://www.hackmelbourne.org/

The World Radiocommunication Conference (WRC-12) opened in Geneva, Switzerland on Monday, January 23. Attendees will review and revise the Radio Regulations, the international treaty governing the use of radio frequency spectrum and satellite orbits.

One of the items to be considered at WRC-12 is Agenda Item 1.23:
To consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur Service on a secondary basis, taking into account the need to protect existing services.

More than 3000 participants are expected to attend the four-week conference.

IARU President Tim Ellam, VE6SH has been using Twitter to keep interested radio amateurs apprised of what is happening at WRC-12.

According to his tweets, the African Telecommunications Union (ATU), the East African Community (EAC), the Asia-Pacific Telecommunity (APT) and the South African Development Community (SADC) also support an MF secondary allocation to the Amateur Service.

To find out what is happening on a regular sometimes hourly basis you can check out the RSGB and ARRL web sites and follow Ellam on Twitter twitter.com/IARU_President

50th Anniversary Perth City of Light, John Glenn, ARISS contact

On the 20th of February 1962 a Mercury-Atlas 6 space craft called "Friendship 7" was launched. In the hot-seat was Astronaut, John Glenn. The objective was to place a man into earth orbit, observe his reactions to the space environment and safely return him to earth to a point where he could be readily found.

During the first orbit of 3, the spacecraft came into radio range of the Muchea Tracking Station where the first Australian Space Radio contact was made by Gerry O'Connor who spoke with John Glenn as he passed overhead.

Muchea contact audio

John Glenn reported that he saw the City of Perth and a very bright light as he overflew Perth and the Kwinana refinery which flared for the occasion.

Perth bright light

The event gave Perth the moniker, the City of Light.

Next month, 50 years after those 3 orbits, the WA State Records Office, the WA Museum, the City of Perth, ARISS, the Hills Amateur Radio Group and of course NASA are going to celebrate with a public event in the Northbridge Piazza in Perth where around 10 lucky primary and secondary school students will make a public ARISS contact together with web-streaming and other activities, such as a radio telescope, optical telescopes, museum exhibitions a presentation by the WA Chief Scientist and some others we're working on.

I have to say, it helps when there is an amateur at the State Records Office, hi Meg, VK6LUX.

>From a technical perspective, we'll be using a tele-bridge because we don't actually have an overhead orbit to the International Space Station, but Dick, AH6NM, the ARISS amateur in Honolulu will be wide awake at midnight to make the contact possible. In Perth, members of the Hills Amateur Radio Group will provide the amateur link between the technology and the students so they can talk to an Astronaut. Behind the scenes there is feverish activity by Tony VK5ZAI, who is the ARISS mentor in Australia - and I recommend you take a moment to have a look at some of the photo's he's published online, you'll see a NASA style console in his shack and a tracking antenna to make you drool.

This once in a life-time experience is going to introduce a whole new generation of kids into space and amateur radio.

If you have or know school
going children, primary or secondary, in Western Australia, get them to fill in the competition form on the WA Museum Web-site, museum.wa.gov.au/city-lights

If you're able to make it to Perth on February 20th, we'd love to see you at the Northbridge Piazza where we'll be setting up for the contact. Festivities start from 5pm.

So, get your kids to fill in the form, at museum.wa.gov.au/city-lights and watch this space!

NA1SS contact with WH6PN (lead in to Italy ARISS contact)

VK4 HOSTS "EARTH FIRE and RAIN".

Prevention, preparedness, response & recovery will be the focus of the Australian & New Zealand National Disaster and Emergency Management Conference to be held in Brisbane from April 16 - April 18 this year.

The conference will include keynote addresses, concurrent sessions and workshops covering human and social issues, economic and environmental challenges, infrastructure, community and communication topics.

It is a joint initiative of the Australian Institute of Emergency Services, the Australian and New Zealand Mental Health Association Inc. and the Association for Sustainability in Business Inc. Each association is a Non-Government, Not for Profit, Member Based organisation.

The "Provisional Conference Program" is now available on the website.

So how did WIA National News come by this story? No not from RAVERN or WICEN but from VU land and the hamradioindia@yahoogroups.com web service.

Tracey Toovey is a member of the Joint Association Committee for EFR and could be a contact point for any ham radio rescue group who would want to attend.

http://anzdmc.com.au

(hamradioindia@yahoogroups.com)

Newcastle amateur finally gets tower approval.

Charles Hunt VK2CLH, after a delay of some 12 months finally has tower back in the air.

George used to live at Stockton but moved to Wallsend, he brought his tower from Stockton and when he applied to re-erect it at Wallsend - the local council - the same for both locations - said NO.

With help from the Hunter Group and others approval was finally achieved.

George who is 86 can now resume his 20 metre skeds with his stateside buddies you might find him on 14.332 at 11 pm local VK2 times

SILENT KEY

It is with regret that we have to advise of the passing January 14 of Pierce Healy VK2APQ.

Pierce had celebrated his 100th Birthday last August.

Pierce was a Life Member of both ARNSW and the WIA.

Among many activities he wrote the Amateur Band notes in Radio & Hobbies from in the 1960's until they ended in the 1980's.

DISCUSSION POINT

I'm Geoff Emery, VK4ZPP, and I've been thinking.

http://www.wia.org.au/newsevents/news/2012/20120118-1/index.php

On the link given in the text edition of the news is a reminder of the World Radio Conference being held in Geneva, Switzerland from 23rd January to 17th February this year.

Readers of "Amateur Radio" magazine will have previously seen Michael Owen's VK3KI, WIA President, explanation of how this conference fits into the structure of administration of radio but with particular reference to the amateur service.

Dale Hughes, VK1DSH, will be attending as a member of the Australian contingent and representing the Wireless Institute of Australia.

Some people ask why the Institute spends its resources in attending these meetings.

For the Advanced Licensees they have a decision of a past conference for access to 10MHz, 17MHz and 24MHz collectively referred to as the WARC bands. At that time the meeting was called the World Administrative Radio Conference thus we get the acronym of WARC.

It was one of the first acts of this conference in the 21st century to recommend the removal of the Morse Code requirement which gave "Limited" licensees access to the HF spectrum below 29MHz.

In participating at the highest international levels of administration relevant to our hobby the Institute can take credit for maintaining and improving local licence conditions for all the amateur fraternity.

It may seem very remote to the individual but joining the WIA is a real way of supporting the hobby both in VK and around the world.

I'm Geoff Emery and that's what I think....how about you?

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, ARVictoria and the WW sources of the WIA.

Global radio experts float new mobile phone standard

Global radio experts have approved radio standards that are to usher in a new mobile phone operating system to replace third generation or 3G technology.

The newly-adopted 'IMT Advanced Spectrum' would result in faster and better quality mobile services, said the director of the ITU's Radiocommunication bureau at the organisation's Radiocommunication Assembly in Geneva.

Some phone providers have dubbed the new standard "4G".

"The term 4G remains undefined, but it is being applied by operators to the forerunners of IMT-Advanced technologies" and to others evolving from 3G systems, the ITU said in a statement.

The World Meteorological Organization warned however that increased pressure on the use of radio spectrum could hamper its observation work.
"Weather forecasts, disaster warnings and climate monitoring are all critically dependent on radio frequency bands which are used around the clock by meteorological services," the WMO said in a statement.

"Increasing pressure on the use of radio spectrum from wireless technology and other applications could hamper earth observations and efforts to understand and predict climate change."

As previously reported today, ITU officials are expecting 150 countries and 3,300 delegates at the WRC, which runs to February 17.

The demand for wireless technologies will more than double in London during the seven weeks of the Olympic and Paralympic Games.

The event includes the assignment up to 20,000 wireless frequencies.

Demand is due to the increasing use of wireless technologies such as wireless cameras and wireless microphones, for close-up action to a global audience of over 4 billion viewers.

The extensive use of walkie-talkies by the organisers, talkback systems for broadcasters, timing and scoring systems and sports commentary systems for the audience, will also be essential for the organisation of the Games.

Spectrum is already being used at full capacity. The extra demand includes borrowing spectrum on a short-term basis from public sector bodies, such as

the Ministry of Defence and parts of the amateur service secondary allocation on 70cm.

Ofcom will be using a large team of radio engineers to track down and deal with any cases of interference.

Read the full Ofcom announcement at http://media.ofcom.org.uk/2012/01/23/ofcom-prepares-for-record-spectrum-demand-at-london-2012-games/

BBC News - London 2012: Olympics to create 'record' wireless spectrum demand http://www.bbc.co.uk/news/technology-16686471

Long awaited modified rules mean that more than 2,000 CL prefix stations in Cuba will be able to use parts of the 80m and 40m for the first time!

Until now the Third Class code-less licence has been confined to segments on the 160m and 2m bands using 10w on CW and Phone.

Their new expanded allocation means CL holders will be heard also on 7100 to 7125 kHz and 3500 to 3750 kHz.

A bid lead by France and the USA to stop leap seconds has failed at the ITU Radio Assembly.

A revision of Standard-frequency and time-signal emissions failed to reach consensus at the International Telecommunication Union Radiocommunication Assembly meeting.

Since 1972 a leap second has been used to synchronise Coordinated Universal Time (UTC) with solar time.

The International Earth Rotation and Reference Systems Service has decided to add a leap second at the end of June 2012.

While a leap second can be added and taken from any month, it has only occurred at the end of December and June. The most recent leap was added on December 31st, 2008.

A leap second is necessary because of the Earth's unpredictable rotation. GMT is based on atomic clocks, but has been kept more or less synchronised with mean solar time by way of leap seconds, in addition to the normal Leap Day on February 29th.

The leap second is recognisable by the Greenwich Time signal having seven pips, an additional pip being inserted before the final beep.

Substantial UK Band Plan changes

The latest edition of RadCom features the 2012 RSGB Band Plans and a background article on the substantial changes that have occurred.

This information is now also available to all amateurs online at www.rsgb.org/operating/bandplans. In particular, please note that there have been major changes in the 40m, 10m, 6m, 4m and 23cm

bands, so please ensure that any older editions are discarded.

RADIO LAW: QRZ.COM JOINS THE FIGHT TO STOP SOPA AND PIPA

The giant QRZ.com ham radio website has joined the fight to stop passage of SOPA, the Stop Online Piracy Act, and PIPA, a similar bill working its way through the U-S Senate. Amateur Radio Newsline's Robert Sudock, WB6FDF, reports on why QRZ.com and its owner Fred Lloyd, AA7BQ is taking this hard-line stand.

Why should ham radio care about these two bills? According to publisher Fred Lloyd, AA7BQ, the measures are sponsored by Hollywood entertainment corporations and the recording industry. They threaten to destroy the internet as we know it. And in his front page posting on the QRZ.com, he lists what he terms "the facts about the bills."

According to AA7BQ, websites will be required to police their own content for copyright violations of all kinds. Any website found in violation of the intellectual property of another party must be shut down -- it's internet access blocked by its Internet Service Provider, DNS de-listing, and all banking transactions via online payment providers would be stopped.

Lloyd notes that there is no burden of proof required to shut down a website. Any claim of copyright infringement could result in a court ordered shutdown.

Website owners will be responsible for policing content uploaded by their users. A violation could be ridiculously minor to qualify such as uploading a trademarked image, a photo of a celebrity, a clipping from a newspaper, an audio clip from movie, or the like. Also, uploading a copyrighted song or video would become a felony under the US Code.

And it is not just domestic websites that would be impacted. The law would apply to foreign websites as well, requiring United States based Internet Service Providers to block access to those sites.

Lloyd then notes that this law could also kill his site, QRZ.com, as users know it. He notes that the site currently has some 300,000 photographs on its server, all of which would have to be taken down and manually verified to be in compliance. The same thing would hold true for each biography page where a photograph or other image exists.

Lloyd says that in his case, there's no way he could do it. If burdened with this sort of responsibility, QRZ would simply be found in violation and forcibly shut down by the federal government, all in an to protest both bills many websites went dark on Wednesday, January 18 effort to please what he terms as Hollywood and the music industries.

To protest both bills, many websites went dark on Wednesday, January 18. The Amateur Radio Newsline provides a short video insert in the TWiT network's Ham Nation podcast each Tuesday evening. That network did not go dark, but devoted its live programming to the SOPA and PIPA topics. As we go to air the programs should be rendered and posted for download in both audio and video formats. Go to www.twit.tv and look for "Security Now," "This Week in Google," "Tech News Today," and "Triangulation" for a more detailed and web centric discussion.

For the Amateur Radio Newsline,
I'm Robert Sudock, WB6FDF, in Los Angeles.

AA7BQ ends his posting by asking those who use his website to contact their Congressmen and Senators to voice your opposition to both of these measures, especially SOPA. He says that it's not just QRZ.com that depends on their action. Rather he says, it's the entire internet as they know it today.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Special callsigns for UK radio amateurs during 2012

The Radio Society of Great Britain and Ofcom have reached agreement on the optional use of special callsigns for two significant events during 2012.

For the Queen's Diamond Jubilee, all UK amateur stations will have the option of applying for a variation to their licence if they wish, to use

a special prefix for a five week period. This will add or substitute the letter "Q" in the place of the Regional identifier in the callsign.

Period: 00.00 BST 5th May 2012 to 23.59 BST 10th June 2012.

For the period of the Olympic Games and Paralympic Games, a similar facility will exist for a seven week period, using the letter "O".

Period: 00.00 BST 21st July 2012 to 23.59 BST 9th September 2012

Read the full details at
http://www.rsgb.org/news/articlelinks.php?id=0263

ITU HQ Special Activity

The International Amateur Radio Club, 4U1ITU, is operating with the special callsign 4U1WRC until February 17th.

Activity will take place during the ITU World Radio Conference 2012 from Geneva, Switzerland.

Operations will be from 160-6 meters, eventually higher, all modes.

All QSOs will be confirmed with a special QSL available via 4U1ITU.

Short updates of the operation will be posted on twitter at:
http://twitter.com/4u1itu

More detailed information is available on the Web site at:
http://life.itu.int/radioclub

WW SPECIAL INTEREST GROUPS --- DIGITAL

David Rowe VK5DGR gave a presentation on the amateur radio digital voice Codec2 to the linux.conf.au 2012 in Ballarat, Jan 16-20, and was voted best paper of the conference.

Codec2 is that open source low bit rate speech codec designed for communications quality speech at around 2400 bit/s.

Operating at 2000 bit/s it can send 32 phone calls using the bandwidth required for one 64 Kbit/s uncompressed phone call.

Watch Codec 2 - Open Source Speech Coding at 2400 bit/s and Below
David Rowe by googling on YouTube.

Also at that conference a presentation on a High Altitude Balloon project using amateur radio by Terry Baume VK5VZI, Foundation license holder Mark Jessop VK5FDRK, along with embedded hardware and software hacker Joel Stanley was give.

The presentation titled 'Tux in (near) space!' was given to hackers at the linux.conf.au 2012. The Project Horus group have flown several amateur radio repeaters as well as APRS and video payloads.

PSK2K - a new meteor scatter mode by DJ5HG

PSK2K is a meteor scatter mode that enables multiple contacts to take place on a single frequency.

PSK2k is high speed meteor scatter software written by Klaus DJ5HG (Prof. of Computer Science at University Hamburg). It allows 2 way MS QSO's to be conducted with any suitable transceiver/PC/soundcard combination.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

Winners in the ARISSat-1/KEDR Chicken Little Contest

The Chicken Little Contest received 77 entries from 17 different countries, and all continents except Antarctica.

Based on comments sent along with the submissions, a wide variety of techniques were used. These ranged from detailed calculations, to comparisons with past satellites, to guesses based on birthdays.

The winners came from USA, UK and Switzerland.

All three winners have received an appropriate Chicken Little Certificate, and the congratulations of the ARISSat-1/KEDR Team who thank all who entered.

Winners of the ARISSat-1/KEDR Grab the Last Telemetry Contest.

Thanks to the dedication of stations around the world, a nearly steady stream of digital telemetry reports were received in the final days from ARISSat-1/KEDR:

31 Dec -- 1125
01 Jan -- 1537
02 Jan -- 1541
03 Jan -- 1048
04 Jan -- 107

The final digital data received was copied by both JA8TCH, and JA0CAW. It was received at 06:02:14, 4 January, 2012, less than an hour before the estimated point of loss in the South Atlantic.

Their data, combined with the submissions of many others, constitutes the most comprehensive coverage of the re-entry of any amateur satellite.

JA8TCH and JA0CAW will receive a certificate for their achievement.

This will be the AGM followed by a General Meeting.

If members are interested in a position on the executive committee, then
please contact the Club for a Nomination form.

If you are not a member of the Club, and would like to join, then please
advise the Club to accommodate your request.

Contact information can be found on the WIA Website under Clubs.

Oh and a 12Volt / 12Amp Regulated Power supply has been donated as the
raffle prize.

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on
wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and
Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a
range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Amateur Radio Newsline(tm) Report 1798 - January 27 2012

Amateur Radio Newsline report number 1798 with a release date of January 27th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC nixes a waiver request from Anchorage VEC that would have lead to instant re-licensing of hams with expired licenses but the proposal is far from dead. Also ham radio to be discussed at WRC 2012; International cooperation removes a noise generator from 40 meters and the city of Los Angeles celebrate the life of a ham who started broadcast emergency alerting, Find out the details are on Amateur Radio Newsline(tm) report number 1798 coming your way right now.

RADIO LAW: FCC SAYS NO TO LICENSE ELEMENT WAIVER REQUEST

The FCC has turned away a request from Alaska's Anchorage Volunteer Examination Coordinator for a temporary blanket waiver of Section 97.505(a) of the Commission's Rules. This, to allow the VEC to give individuals whose amateur radio operator licenses have expired examination credit for test elements previously passed so that all former licensees could be re-licensed without retesting. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

The Anchorage VEC had filed for the waiver pending the outcome of a related rulemaking petition in FCC Docket WT 11-130. That request seeks the same end but on a permanent nationwide basis.

But in its denial order the FCC noted that individuals who do not hold a current or renewable amateur radio operator license, regardless of whether they have held one in the past, must demonstrate their qualifications to be amateur radio operators before obtaining a new license. As such, the approval of the requested waiver to allow examination credit to be granted for any previously held amateur service operator license would not serve the underlying purpose of the regulatory agency's licensing rules.

The FCC also stated that amateur radio testing opportunities are widely available. It said that Volunteer Examiner teams can administer tests at any location and time convenient to them and the examinee. As such

Anchorage VEC has not shown that requiring retesting of examinees whose operator licenses expired more than two years ago, including those of advanced years, is inequitable or unduly burdensome, or that these examinees have no reasonable alternative.

But this matter is far from closed. In its conclusion the FCC also noted that the dismissal of the Anchorage VEC's waiver request is a separate matter from the groups pending Rule Making request in FCC Docket WT 11-130. As such this action is without prejudice to Anchorage VEC's pending rule-making petition.

The Report and Order denying the Anchorage VEC's waiver request was issued on Tuesday, January 24th. As we go to air it's not known if the Anchorage VEC will appeal this decision or simply wait for the outcome on its underlying Rule Making request.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, near Pittsburgh, Pennsylvania.

--

The bottom line: At least for now if a ham lets his or her license expire and fails to renew it during the two year grace period, he or she will be back to ground zero and will have to go through the testing procedure before being granted a call sign to get back on the air.

**

RADIO REGULATION: AMATEUR RADIO AT WRC-2012

Amateur radio is mentioned in the preface of the International Telecommunication Union's agenda document for the World Radiocommunication Conference 2012 now taking place in taking place in Geneva, Switzerland. Of interest to the Amateur and Amateur satellite Services is item 1.15. This, to consider possible allocations in the range 3 to 50 MHz to the radio location service for oceanographic radar applications, taking into account the results of ITU-R studies and in accordance with Resolution 612 from WRC-07.

Also, there is item 1.19 to consider regulatory measures and their relevance, in order to enable the introduction of software-defined radio and cognitive radio systems. This one is based on the results of ITU-R studies, and in accordance with Resolution 956 of WRC-07.

Lastly, there are items 1.22 to examine the effect of emissions from short-range devices on radio communication services and item 1.23 which will consider an allocation of about 15 kHz in parts of the band from 415 to 526.5 kHz to the amateur service on a secondary basis. This, taking into account the need to protect existing services.

WRC 2012 runs through February the 17th. We will all know more once the final reports on all these measures are in and made public. (ITU)

**

INTRUDER WATCH: INTERNATIONAL COOPERATION TAKES WHITE NOISE OFF 40 METERS

Interference from All India Radio to the 40 meter band has been eliminated. Amateur Radio Newsline's Cheryl Lasik, K9BIK, has the details:

--

Wolfgang Hadel, DK2OM, in Siegbach, Germany, reports via the I-A-R-U Region 1 website that back last December 1st he and Peter Jost HB9CET of Zurich, Switzerland, noticed a band of white noise like interference on 40 meters. This from 6 dot 960 to 7 dot 040MHz and also on 7 dot 820 MHz and showing up every evening.

Calculation by DK2OM showed the center of the spurious emissions was expected to be on the center 7 dot 410 MHz. From this point the German and Swiss Departments of Post and Telecommunications became involved.

Both offices filed official complaints to their counterpart in India. VU2GMN assisted by filing a personal complaint. On January 13th the transmitter located near the city of New Delhi was reported as having been repaired, and all traces of this source of interference to 40 meters was gone.

For the amateur Radio Newsline, I;m Cheryl Lasik, K9BIK, in Zion, Illinois.

--

More on this story is on-line at www.iaru-1.org. (IARU Region 1)

**

RESCUE RADIO: ALABAMA AGAIN HIT BY TORNADOS

Ham radio was again called out as another group of tornadoes touch down in Alabama. Amateur Radio Newsline's David Black, KB4KCH, is at our South-East Bureau in Birmingham with more:

--

The January 22nd storms that pounded residents in Arkansas and Alabama were particularly difficult to deal with because they hit at night and couldn't be seen. Some tornadoes were wrapped in rain. Damage was reported in five Arkansas counties. One woman was trapped in her home for a time. At least six tornadoes hit areas south and east of Little Rock across the state's Delta region. A 150 year old church was hit and a transmission tower was destroyed. Members of Arkansas Skywarn activated at the request of National Weather Service forecasters in Little Rock. In all, about 60 radio amateurs helped with providing emergency communications across the state.

Hams remained busy as the storms swept east, hitting Alabama during the predawn hours January 23rd. A single supercell thunderstorm produces four tornadoes across central Alabama. Two of the twisters strike

neighborhoods north and west of downtown Birmingham. A 16-year-old girl dies when her home is hit by an 800-yard wide tornado packing winds of 150 miles an hour. An 81-year-old man dies when a tornado hits his mobile home shortly after 3am. In all, forecasters say Alabama was hit by at least eight tornadoes, some of them leaving long tracks of destruction while tearing up hundreds of homes and businesses, and injuring 150 people. The tornadoes hit very close to areas pounded during a series of storms that killed 239 people in the state April 27th, 2011.

Members of the Alabama Emergency Response Team, ALERT, provided severe weather reports to Weather Service forecasters who used the information to issue warnings to the public. Hams with amateur radio clubs in Birmingham and nearby Sylvan Springs were on the air throughout much of the night, as well, assisting emergency management officials. And members of the Amateur Radio Emergency Service were active, as well. They provided communications as officials set up shelters for people who lost their homes in the storms.

The winter months typically see what's called a secondary severe weather season across the Southeast. With that in mind, radio amateurs throughout the region are being thanked for their services...and reminded that their help will likely be needed again.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, at the South-East Bureau in Birmingham, Alabama.

--

More on this story in future Amateur radio Newsline reports. (KB4KCH, ALERT, ARRL, others)

RADIO LAW FOLLOW-UP: SEVERAL AMATEUR RADIO WEBSTES SUPPORTED THE SOPA - PIPA BLACKOUT PROTEST

A follow up to last weeks story about the involvement of ham radio in halting the progress of two measures working their way through the U-S Congress. Laws that many say would have destroyed the Internet as we know it today.

While the giant QRZ dot com website took what could best be described as the amateur radio point position in helping to halt the twin bills

in their tacks, it turns out that it was not alone. The Southgate News reports that at least two other ham radio websites took part in the protest. Both the amateur radio HF Link Forum and the APRS site aprs.fi were closed in the United States on Wednesday, January 18th.

The aprs.fi blog noted in advance that it would join Wikipedia and Reddit, and protest the proposed United States Stop Online Piracy or SOPA and the Protect Intellectual Property Act or PIPA legislation by closing down. The blog went on to note that if some APRS user were to post links to copyright infringing material, even when that material would reside somewhere other than aprs.fi itself, that aprs.fi could be shut down in the U.S. and there would not be much that the website owners could do about it.

As we go to air, both SOPA and PIPA have been withdrawn by their respective sponsors in Congress for retooling. That's a fancy way of saying that enough votes had defected to make passage at this time impossible. At the same time it's a way of keeping both pieces of legislation alive for re-introduction to the United States Federal law making process at some later date. And it's a sure bet that content providers such as the motion picture and music industries which basically wrote these two pieces of legislation will try again. (Southgate, ARNewsline(tm))

**

ENFORCEMENT: FORMER AUSTRALIAN HAM ADMITS TO INTERFERING WITH OTHERS

A former ham in VK-land has admitted to being a source of interference on the ham radio bands. This after the 63-year-old man from one of Melbourne's western suburbs pleaded guilty on January 11th to several offences under the Australian Radio Communications Act. Amateur Radio Newsline's Norm Seeley, KI7UP has more in this report:

--

In testimony, the Australian court hearing the case was told that, until August 2009, the defendant had been a licensed amateur radio operator but was investigated by the Australian Communications and Media Authority following complaints about interference. As a result of the inquiry, the regulatory authority cancelled the defendant's amateur licensee.

But it did not end there. The Australian Communications and Media Authority alleged that he continued to use his amateur radio gear his home to jam the communications other licensed amateur licensees. The execution of the search warrant by the authorities in September of 2011 confirmed that the defendant had a large quantity of radio communications gear. Tests confirmed that the equipment was set to the radio frequencies that had been interfered with.

In its sentencing, the court placed the defendant on a 12-month good behavior bond, ordered him to get rid of all of the seized equipment

within four months and prove to the Australian Communications and Media Authority in writing that he had disposed of the gear.

The unidentified ham is considered lucky. Under Australian telecommunications law the court hearing the case had the option to sentence him to up to 24 months in prison for these offenses.

For the Amateur Radio Newsline, I'm_Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

As is policy down-under, the defendants name was not made public by the Australian court. (WIA News)

**

ENFORCEMENT: FLORIDA LPFM FINE LOWERED TO $1500

Back in the United States, a low power FM station that interfered with FAA frequencies in Florida will only have to pay a $1,500 fine for operating without an FCC certified transmitter. This after it successfully convinced the commission to slash the penalty from the original $12,000.

Power Ministries is the licensee of low power station WRLE in Dunnellon, Florida. As reported here on Newsline, last September the Enforcement Bureau issued a notice of apparent liability, saying the station had operated with a non-certified transmitter for about three months in 2010. This action came after an investigation prompted by a complaint of interference it received from the Federal Aviation Administration's Jacksonville Center to Air Traffic Control on133.75 MHz.

The proposed fine was $12,000 but the station appealed in a letter from Power Ministries owner Anthony Downes. The FCC now has rejected his arguments that the fine should be waived on the grounds that he had acted promptly and had not been aware of interference. But the commission has accepted the station's documentation of inability to pay, and it cut the penalty to the $1500 level. (FCC)

**

RADIO LAW: LIGHTSQUARED ASKS FCC TO CONFIRM ITS RIGHT TO SPECTRUM

The seemingly never ending story continues. This with word that LightSquared, the company that wants to build a nationwide broadband data distribution system has asked the FCC to confirm its right to use the spectrum licensed to it by the federal government. It's also asking the regulatory agency to confirm that commercial G-P-S manufacturers have no right to interference protection from LightSquared's network since they are not licensed users of that spectrum. Amateur Radio Newsline's Burt Hicks has the latest in this report:

--

According to news reports, LightSquared claims that commercial GPS manufacturers are responsible for having designed and sold unlicensed devices that use adjacent spectrum licensed to LightSquared and its predecessor companies. In a petition recently filed with the FCC LightSquared claimed that commercial GPS receivers are not licensed, do not operate under any service rules, and thus are not entitled to any interference protection whatsoever. The petition also noted that the FCC itself has stated that the GPS industry has been on notice for almost a decade that LightSquared was planning to use its spectrum to launch a nationwide broadband network.

LightSquared's petition claims that it has had FCC authorization to build its network for over eight years, and that authorization was endorsed by the GPS industry, and fully reviewed and allowed to proceed by several other government agencies. A company spokesman added that commercial GPS device-makers have had nearly a decade to design and sell devices that do not infringe on LightSquared's licensed spectrum. They have no right to complain in the eleventh-hour about incompatibility when they had ample opportunity to avoid this problem.

As previously reported, LightSquared plans to deploy an open 4G network to be used by existing and new service providers to sell their own devices, applications and broadband connectivity. The company claims that the deployment and operation of the network represent more than $14 billion of private investment over the next eight years.

In its closing remarks the company did moderate its position a tiny bit. It said that while it asks the FCC to confirm its legal rights, LightSquared remains fully committed to cooperate with all parties including the GPS industry, GPS users and the federal government to ensure that its network is deployed in a way that is compatible with GPS users.

For the Amateur Radio Newsline, I'm Burt Hicks in Los Angeles.

--

LightSquared says that it has always recognized the critical importance of the GPS system. As such it firmly believes that a way can be found for GPS devices to peacefully co-exist adjacent to its network. That said, the GPS industry and Congress are not so sure. (Published News Reports)

RADIO BUSINESS: TAPR AND IQUADLABS ANNOUNCE AGREEMENT ON SDR BOARDS

Tucson Amateur Packet Radio and iQuadlabs have jointly announced a sourcing agreement for the open source Software Defined Radio or HPSDR boards. These are the ones best known by their nick-names of Magister, Mercury and Pennylane.

Under the new agreement, Tucson Amateur Packet Radio will acquire inventory of iQuadLabs creating a one-stop source for all open HPSDR boards. On the other side, iQuadLabs will gain the inventory from Tucson Amateur Packet Radio to build pre-configured and tested complete open HPSDR systems.

The end result will be that Tucson Amateur Packet Radio will have all open HPSDR boards in stock, in one place, for those wishing to buy boards, kits and components. And, for the first time in the history of open HPSDR, those who wish to by a completely assembled and tested radio will have a source at iQuadLabs. Zephyr Engineering, Inc will continue to manufacture the assembled boards. (TAPR)

STRANGE TECHNOLOGY UNKNOWN ANIMAL TAKES KENTUCKY TV STATION OFF THE AIR

A TV station went dark for a short time due to damage from one of the creatures of the wild. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the details:

--

An unidentified animal has been blamed for taking a Kentucky television station off the air. Lexington CBS affiliate WKYT announced on its Facebook page Wednesday, January 11th that it was in the midst of broadcasting a University of Kentucky basketball game when a power outage shut it down.

It turns out that the power interruption was caused by an animal gnawing through a power line on the station's property. Mike Kanarek, WKYT's vice president of operations, told the Lexington Herald-Leader newspaper that the station switched to a back-up generator almost immediately after the animal cut off electricity but it took a few minutes for the transmitter to resume broadcasting.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

WKYT didn't specify what type of animal caused the disturbance or if it survived the ordeal. (RW)

AWARD NEWS: LOGBOOK OF THE WORLD TO SUPPORT CQ OPERATING AWARDS

CQ Communications and ARRL have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World electronic confirmation system. CQ's awards will be the first non-ARRL awards supported by Logbook of the World and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow.

The target date for beginning Logbook of the World support for WPX is April 1st. Amateurs will be able to use Logbook of the World logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard Logbook of the World credit fees and CQ award fees will apply.

The ARRL's Logbook of the World system is an interactive database recording contacts between radio amateurs was created in 2003 and has been adopted by 47,500 radio amateurs worldwide. It already has records of 400 million contacts and grows weekly.

The agreement was announced jointly on Tuesday, January 24th by ARRL Chief Operating Officer Harold Kramer, WJ1B, and CQ Communications President Richard Ross, K2MGA. (CQ)

HAMVENTION 2012: DAYTON DX DINNER INFORMATION ANNOUNCED

The Southwest Ohio DX Association has announced that it will again sponsor the DX Dinner to be held in conjunction with the 2012 Dayton Hamvention. The date is Friday, May 18th at the Dayton Marriott Hotel in downtown Dayton, Ohio. There will be a cash bar starting at 5:30 p.m. with dinner served at 7:00 o'clock Eastern time. Reservation information can be found on line at www.,swodxa.org. (SWODXA)

**

HAM HAPPENINGS: ORLANDO HAMCATION FEBRUARY 10 To 12

The 66th annual Orlando HamCation Amateur Radio and Computer Show will take place on February 10th through the 12th at the Central Florida Fairgrounds, in Orlando, Florida. Presented by the Orlando Amateur Radio Club, HamCation 2012 will feature over 150 commercial vendors offering a wide variety of radio gear, antennas, accessories, test equipment, tools, software and books. There will also be over 400 swap vendors and a large outdoor tailgating area. More information on this fun winter get-away event in the Florida sun is on-line at www dot hamcation.com. (Orlando HamCation)

**

HAMVENTION 2012: N6TR TO BE FEATURED SPEAKER AT DAYTON CONTEST DINNER

2003 Radio Amateur of the Year Larry "Tree" Tyree, N6TR, will be the featured speaker at the 20th Annual Dayton Contest Dinner to be held on Saturday, May 19, 2012 in Dayton, Ohio.

According to the North Coast Contesters who sponsor the dinner, N6TR has an extensive and distinguished contesting resume that goes beyond his many top ten finishes in domestic CW contests. He was one of the founders of the popular Stew Perry Top Band Distance Challenge and the creator of the twice-a-year Kids Day operating events. Tyree is also the author of the popular TRLOG contest logging software and is responsible for log checking packages that are used to adjudicate many of the major radio contests.

Outside of contests, Tyree spends most of his time chasing new countries on 160 meters. More about this event is on-line at contestdinner.com. (K3LR)

SCIENCE AND TECHNOLOGY: LEAP SECONDS GET A REPRIEVE

The Leap Second is getting a temporary reprieve. This after delegates at an international telecommunications meeting in Geneva failed to reach a consensus on whether or not to delete these sporadic additions from the global time standard system.

As reported last week, attendees to the conference were supposed to decide whether to recommend the elimination of leap seconds. Since no decision was made, the issue has been referred back to a panel of experts for further study. A revised proposal will be introduced no earlier than 2015.

Leap Seconds are time increments which are occasionally added to the world's atomic clocks to keep them synchronized with Earth's rotational cycles. The last leap second was added in 2008. The next one is this year at the end of June.

Also one correction to last weeks report. As pointed out to us in an e-mail from John Rabold KS6M, the Earth doesn't rotate around the sun. Rather it revolves around the sun.

Thank you John for catching that one. It was our bad. (Space & Science)

**

HAM RADIO IN SPACE: NASA AND W5KWQ WORKING ON RELEASE OF FIRST MOVIE SHOT IN SPACE

The first science fiction film shot in space could be coming to viewers here on Earth. This after NASA confirms it's almost ready to give approval for the project.

Titled Apogee of Fear, the film was shot by space tourist Richard Garriott, W5KWQ, during his 2008 trip to the International Space Station. Garriott shot the basic footage for the film, using astronauts as his cast. He then added scenes and visual effects after his return to Earth.

The film was privately shown at Dragon*Con last year, but has been in legal limbo since then. This is because it wasn't included in Garriott's deal with NASA. Now the space agency confirms that it is

working with W5KWQ to facilitate the video's release. The complete story is on-line at tinyurl.com/movie-in-space. (The UK Register, Wired, others)

**

EMERGING TECHNOLOGY: THE IPAD PASSPORT

A Canadian man traveling by car to Vermont claimes that his iPad helped save the day. This after he realized he left his passport, which is required to cross into the United States, at his home in Quebec.

According to news reports, Martin Reisch said that on December 30th he arrived at Canada's Stanstead crossing and proceeded to the U.S. border post. He then showed the U.S. officer his Canadian driver's license, his Medicaid card and a digital scan of his passport he had on his iPad. At that point says Reisch he was permitted to enter the United States.

But the U.S. Customs and Border Protection agency says that it did not happen that way calling Reisch's story false. In a statement the agency said that in this case, the individual had both a driver's license and birth certificate, which the CBP officer used to determine identity and citizenship in order to admit the traveler into the country.

But Reisch isn't backing down from his story. He told the press that he does not even know where his paper birth certificate is. He added that his experience does however make him think about how technology can be used for identification purposes when traveling at some point in the future. (Various published news sources)

DX

In DX, members of the Buddies in the Caribbean will mount a mini-DXpedition to Grenada between February 1st through the 9th. The team specializes in 100 watts or less low power radios and the Buddipole portable antenna systems They will have fixed operations from a cliff-top villa and portable operations from various points on the island. Modes used will be CW, SSB, and the Digital on 160 through 10 meters. Licensing is not yet complete, but each operator is expected to receive their J3/callsign. QSL via Logbook of the World, eQSL, or regular mail to operator's home callsign and include a self addressed stamped envelope if you go the postal route.

JA1XGI will be active from Hawaii as W8XGI/KH6 between January 31st and February 4th just prior to his upcoming trip to Tonga. Operations will probably be on 20 through 6 meters with an emphasis on 30, 17 and 12 meters. He is expected to operate mainly CW, with some SSB and the Digital modes. QSL via JA1XGI, direct or by the Bureau. QSO's will be uploaded to Logbook of the World.

DL7AFS and DJ7ZG will be operational as V21FS and V21ZG, respectively, from the Villa Sundowerns on the island of Antigua beginning March 5th for an unknown stay. Focus of this operation on 160 through meters as propagation conditions allow. Modes noted are RTTY, PSK and SSB. QSL via the DARC German QSL bureau or direct to DL7AFS.

(Above from various DX news sources)

THAT FINAL ITEM: LOS ANGELES CELEBRATES THE 57TH ANNIVERSARY OF THE SIGALERT DEVELOPED BY THE LATE LLOYD SIGMON, W6LQ

Los Angeles transportation leaders gathered at Caltrans headquarters Monday January 23rd to commemorate the 57th anniversary of what may be Los Angeles' most iconic gift to the rest of the world: the SigAlert. And it was developed by a ham radio operator. Amateur Radio Newsline's Bill Pasternak, WA6ITF, tells about this legacy gifted to the people of

Southern California by a broadcasting pioneer:

--

It's hard to fathom that it was 57 years ago this week that the late Lloyd Sigmon, W6LQ, developed the SigAlert. At the time Lloyd was a vice president and engineer at Gene Autry's Golden West Broadcasting AM radio station KMPC.

In the pre Internet world of the 1950's KMPC had revolutionized Southern California driving by launching a fleet of fixed wing aircraft and helicopters to report live on traffic conditions during rush hours. But what became known as the "KMPC Air Force" could not fly around the clock.

In off hours Lloyd Sigmon had wanted Los Angeles Police Department officers to simply phone KMPC's news department when freeways or streets were clogged but the department rejected that idea. So W6LQ used his ham radio know how to develop a hardware-based work around that has been a region wide standard for more than half a century.

Today the California Highway Patrol and other police authorities still use the term SigAlert to advise motorists to an unplanned lane closure lasting more than 30 minutes. And over the years SigAlerts have not only aided in traffic reporting but have also been used in disaster alerting.

The first such emergency notification SigAlert took place in 1955 when it urged medical personnel to respond to a train derailment. It reportedly caused a traffic jam when many doctors and nurses showed up to assist at the scene.

W6LQ's SigAlert is also credited with saving the lives of hundreds when the Baldwin Hills Dam collapsed on December 14, 1963. And even today Lloyd Sigmon's basic alerting concept is in use nationwide in the form of the high-tech Emergency Alert System or E-A-S.

During his time in Southern California, Lloyd Sigmon, W6LQ, was very active and well known in the Los Angeles ham radio community. He was also a frequent guest on late-night talk shows, especially that of Ray Briem, N6FFT. There he could be heard discussing both his love of ham radio and, once in a while, a bit of the technology on the development of the SigAlert.

In later year after his retirement from KMPC Lloyd Sigmon moved back to his native Oklahoma. There, W6LQ, became a Silent Key in 2005 at age 90.

I was fortunate to have known Lloyd and to have appeared with him several times on the Ray Briem Show. I can tell you first hand that Lloyd Sigmon, W6LQ, was one truly nice guy.

For the Amateur Radio Newsine, I'm Bill Pasternak, WA6ITF, in the newsroom here in the City of Angels.

--

You can learn more about both Lloyd Sigmon, W6LQ, and the SigAlert at tinyurl.com/3myftzl. (Various published news reports and ARNewsline(tm) Archive)

SARL NEWS - SUNDAY 29 JANUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

In the news today:

INTECNET IS BACK

SARL APPOINTS A NEW HONORARY LEGAL ADVISER

7 135 kHz THE FREQUENCY TO TALK ABOUT VHF

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

INTECNET IS BACK

The first INTECNET of 2012 will be held on Sunday 5 February at 19:30. History will be made when this will be the first INTECNET that will be joined by members of the Namibian Amateur Radio League. The NARL repeater in Windhoek will be linked giving Namibian amateurs the opportunity to participate in the discussions.

The subject will be "Greater DXing with propagation forecasting". Two speakers will be looking at the science of forecasting and practical applications. A scientist from SANSA's Space Sciences at Hermanus will discuss how forecasts are made and Hannes Coetzee, ZS6BZP, will look at the practical aspects of using propagation forecast and how to put them to best use. Diarize the date. If you would like your repeater linked, send a request to artoday@sarl.org.za by Monday 30 January.

SARL APPOINTS A NEW HONORARY LEGAL ADVISER

The Council of the SARL has appointed Johann Marais as legal adviser. He is the owner of a legal practice in Stellenbosch. Johann is vice

chairman of the 4WDCSA Western Cape and a member of Hamnet. He spends most of his amateur radio time on research and rescue operations and is an active member of the Off-Road Rescue Unit and chairman of the Wilderness Search and Rescue Trust.

7 135 kHz THE FREQUENCY TO TALK ABOUT VHF

If VHF is your passion, leave a receiver tuned to 7 135 kHz. This is the frequency that a group of radio amateurs have decided on for skeds, VHF band opening alerts and discussion on VHF operation. The idea is being promoted by John, ZS6JON, and Mike, ZS6TAF.

"One does realize that the Internet is the easiest way but all amateurs don't have Internet 24/7. Some don't have Internet in the shack", says John, ZS6JON. "We all seem to read the contact reports on email or on the forum once they have already taken place. It's too late to get the full use of the opening. As most amateurs have an extra radio or receiver that could be left on and as 40 m is a common and very active band in South Africa it will be the ideal band to announce VHF band openings around the country and overseas contacts. After listening around the band 7 135 kHz appears to be a good choice", John said.

WORLD RADIO COMMUNICATION CONFERENCE 2012 AND WILL CONSIDER SECONDARY MF AMATEUR ALLOCATION

The World Radio Communication Conference opened in Geneva, Switzerland on Monday, January 23. Attendees will review and revise the Radio Regulations, the international treaty governing the use of radio frequency spectrum and satellite orbits. One of the items to be considered at WRC-12 is Agenda Item 1.23: To consider an allocation of about 15 kHz in parts of the band 415-526,5 kHz to the Amateur Service on a secondary basis, taking into account the need to protect existing services.

More than 3 000 participants - representing more than 150 out of the International Telecommunication Union's 193 Member States - are expected to attend the four-week conference. About 100 observers from among the ITU's 700 private sector members - along with international organizations, including the International Amateur Radio Union - are also in attendance. A number of WRC-12 delegates are radio amateurs.

On the first day of WRC-12, various interests have introduced several ways to implement the proposed MF secondary allocation, while some are not interested in making any changes that would grant it. The European countries, represented by CEPT, offered an 8 kHz wide band between 472 and 480 kHz. CITEL, which represents the Americas, has proposed the secondary allocation be at 461-469 and 471-478 kHz. Colin Thomas, G3PSM, introduced the CEPT proposal, while ARRL Technical Relations Specialist Jon Siverling, WB3ERA, had the honor of introducing the CITEL proposal to the Conference.

IARU President, Tim Ellam, has been using Twitter to keep interested radio amateurs apprised of what is happening at WRC-12. According to

his tweets, the African Telecommunications Union, the East African Community, the Asia-Pacific Telecommunity and the South African Development Community also support an MF secondary allocation to the Amateur Service. The Regional Commonwealth in the Field of Communications which represents Russia, has proposed no change to the current frequency allocations, aligning themselves with the Arab States, China, Iran and the International Maritime Organization. You can follow Ellam on Twitter at twitter.com/IARU_President. During WRC-12, 4U1ITU - the ITU HQ station, will be signing 4U1WRC.

INTERNATIONAL COOPERATION TAKES WHITE NOISE OFF 40 METRES

Interference from All India Radio in the 40 metre band has been eliminated. Wolfgang Hadel, DK2OM, in Siegbach, Germany, reports that back last December he and Peter Jost, HB9CET, of Zurich, Switzerland, noticed a band of white noise-like interference on 40 metres covering from 6 960 to 7 040 kHz and also on 7 820 kHz. Calculation by DK2OM showed that the centre of the spurious emissions was on 7 410 kHz, a frequency used by All India Radio. From this point the German and Swiss Departments of Post and Telecommunications became involved. Both offices filed official complaints to their counterpart in India. VU2GMN assisted by filing a personal complaint.

On January 13 the offending transmitter located near New Delhi was reported as having been repaired.

HAMNET GAUTENG SOUTH MEETING

There is a HAMNET Gauteng South Meeting scheduled for Thursday 2 February 2012. The meeting venue is 9th Benoni Scout Hall, Arrow Park in Benoni. The meeting is scheduled for 19:00 until 21:00. Discussions will include The Ride for Sight and Carnival Mac Steel Cycle races in February. HAMWAN and APRS will also be on the menu. Come join them and serve your community.

CLUB NEWS

On Saturday the 4th February, the East Rand Branch of the SARL will be holding a flea market. The time is from 12:00 to 15:00 and will be held at the Scouts Arrow Park in Benoni. The park runs alongside Ebenezer st., Kleinfontein Agricultural Holdings, Benoni which is just off the Atlas road off ramp on the N12 East. There will be food and cool drinks available. For anyone wishing to book a table, please contact the club secretary Judy (ZS6JDY) via zs6jdy@vodamail.co.za.

PO Box 12320, Benoryn,

1504. E-mail: andyzs6ady@vodamail.co.za Closing date for log submission: Monday 20 February 2012.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity on the sun, as far as solar flares go, is declining after the major M-class flare of Monday. Region 1 402 is currently the largest visible sunspot and produces C-class flares from time-to-time.

The other sunspots continue to shrink in spot count. These regions will soon begin to rotate onto the western limb and out of direct Earth view.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 64.

All the bands from 20 to 10 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

31 January - Last day for submission of nominations for Council members and also for submission of motions for the 2012 SARL AGM. 31 January - Closing date for submitting papers for SA AMSAT Space Symposium. 2 February - Hamnet South Gauteng meeting. 4 February - ZS6ERB flea market. 5 February - Antique Wireless Association CW activity day. 20 February - Last day for submission of logs for Antique Wireless Association CW activity day.

Remember, nominations for SARL awards, which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM may still be submitted. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays

on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

[IARU-R2-News 151] Looking for a new amateur radio band
2012-01-28

Ramon Santoyo V. - Secretary - IARU Region 2 wrote:

WRC-12 report from G3PSM.

Progress was made with a compromise proposal on agenda item 1.23, drafted to take into consideration the views of those for and those against an amateur service allocation around 500kHz. This proposal suggests a 7kHz segment between 472-479kHz, very close to the CEPT position of 472-480kHz. Initial indications are that this could be acceptable to many administrations and regional organisations. However, various meetings need to take place to have these formally accepted.

In order to tidy up the draft for the next meeting of the sub working group, a weekend meeting of the drafting group will be held. At the time of writing the NOC No Change advocates steadfastly maintain their positions.

Only 3 weeks left!

2012 DXU (Update/Press Release). Roger/G3SXW and Wayne/N7NG provided the following [edited]: DX University
First Session: The Holiday Inn, Visalia, California

Friday 20 April, 2012

Press Release Nr 2 (25 January 2012)
This all-day program will take place on the Friday of the Visalia
International DX Convention, 20th April 2012. Among the lecturers are
AA7A, G3SXW, K4UEE, K9LA, N7NG, W3UR, W6OAT, W9KNI, XE1KK, many of whom
are inductees of the CQ DX Hall of Fame. Learn the secrets of operating
techniques for working DX, optimizing stations & antennas for DXing,
about propagation, information sources, awards, ethics, remote operating,
QSLing and much more. You will also get the DXpeditioner's view of how
DXers should operate to get into the log.
Over half of the limited student places have already been reserved
since Registrations opened only three weeks ago. The fee is only 50
USDs, including lunch and breaks, but this will increase to 55 USDs for
places reserved after 1st February. Sign up now at:
http://www.dxuniversity.com
Further information from Wayne Mills, N7NG@arrl.net or Roger Western,
G3SXW@btinternet.com
Main Sponsor -- Elecraft

3C0, ANNOBON ISLAND. Operators Elmo/EA5BYP and Javier/EA5KM will once
again be active from Annobon Island (AF-039) and Bioko Island (AF-010,
DXCC - Equatorial Guinea) using the callsigns 3C0E and 3C6A, respectively.
According to their Web page they arrive at Malabo, Equatorial Guinea, by
the middle of February. (dates to be determined). In Malabo, they will
purchase all needed provisions as there are on stores on the island of
Annobon. A representative of the Ministry will also be traveling with
them to Annobon. If they have free time, they will have a active station
on the air on CW or SSB and RTTY using the callsign 3C6A from Malabo,
Bioko Island, Equatorial Guinea. Then they will travel to Annobon and
be active as 3C0E. Activity will be on 160-6 meters. Suggested frequencies
are:
CW - 1826.5 (*RX), 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 3785, 7075/7145, 14190, 18140, 21295, 24960 and 28480
RTTY - 3580, 7035, 10140, 14082, 18102, 21082, 24920 and 28080 kHz
6m - 50.104/CW and 50.145/SSB MHz
*RX AS/OC 1821.5
RX EU/NA 1834.0
QSL both callsigns via EA5BYP: Elmo Bernab' Coll, P.O.Box 3097,
03080 Alicante, Spain. They are looking for sponsors for this very
expensive operation. For more details and updates, watch the Web pge at:
http://www.gdgdxc.net/3c0e/index.php

9Q, DEM. REPUBLIC OF CONGO. Barney, ZS6TQ/ZS4U, will once again be active
from here, but this time as 9Q6/ZS4U between March 10th and April 5th.
Activity will be limited, probably mainly on the weekends and some
days during the week between 1200-1600z because of his work duties.
Operations will be on 40/20/15/10/6 meters using CW, SSB and PSK31. QSL
via his home callsign.

EE8, CANARY ISLANDS. Operator Felipe, NP4Z, will be active as EE8Z from the Los Chachos Contest Club during the CQ WW WPX SSB Contest (March 24-25th) as Single-Op/All-Band entry. QSL via EA8AY.

FP, ST. PIERRE AND MIQUELON. Allan, W6HGF, will be active as FP/W6HGF from Miquelon Island (NA-032,DIFO FP-002, WLOTA 1417) between February 10-20th, depending on transportation and weather. Activity will be on 160-10 meters but focused on the Digital modes, mostly RTTY, including an entry into the CQWW WPX RTTY Contest (February 11-12th) and ARRL CW Contest (February 18-19th). QSL via LoTW (Uploaded every night) or to W6HGF, direct or by the Bureau. For updates, watch: http://www.qsl.net/w6hgf/FP_W6GHF_2012.html

FW0/TW0, WALLIS & FUTUNA (Update). Laci, HA0NAR, and his wife Susanne, HA0SR, will be active as FW0NAR from Uvea Island (aka Wallis, OC-054, DIFO FW-001, WLOTA 0389, WW Loc. AH16VS) between January 28th and February 20th. Operator Steve, HA0DU, (their third operator) could not make the trip. The plans were to have two stations active on 160-6 meters using CW, SSB and RTTY, with a focus on the lower bands. However, this may change since they lost an operator. There are also plans for a week long side trip to Futuna Island (OC-118) as TW0F. Laci will also take part in the ARRL CW Contest. QSL for both FW0NAR and TW0F via Laci HA0NAR. For updates, watch the FW0NAR Blog page at: http://fw0nar.blogspot.com

HK0, MALPELO ISLAND (Update). Bob, N2OO, QSL Manager for HK0NA reports: "Be advised that Op A logs from the top of the mountain arrive late and some QSOs therefore may not be in the current online log until the next upload. Overall, logs are uploaded about once a day. If you notice that your QSO is not showing up before the 'last' QSO in the database date/time posted here, wait for the next upload. If still not there, you may want to work them again. We do realize that there are some log gaps, and the team is doing everything they can to correct the situation. The gaps seem to be related to a software issue with their logging program. These gaps should not reoccur since the log collection process has been changed. At this time we cannot guarantee that we can recover the missing log data. We hope that this is not the case. But we probably will not know for sure until well after the DXpedition is over. If you have any missing QSOs from before January 27, we suggest that you try to work them again. The HK0NA team apologizes for the inconvenience. If anyone has any inquiries for any QSOs made AFTER Jan 27, and you waited one log upload past the last QSO date, please drop an email to me and I will research for
you.n2oo@arrl.net
will work. NOTE: I will not make any corrections to the log until I process QSL cards. If you think that there was a busted call, include a note with your QSL request." For updates and photos of the DXpedition, visit: http://69.89.25.185/~trexsoft/t-rexsoftware.com/hk0na

IOTA NEWS.....
NA-085. Dennis, WA2USA, will be active as WA2USA/4 from St. George Island (USI FL007S, Franklin county, Florida) between February 1-27th. Activity will be on all HF bands. QSL via WA2USA, direct or by the Bureau. Visit his Web site at:

http://www.wa2usa.com

SA-024/
SA-071. (Correction/Update) A team consisting of Italian and Brazilian operators will activate the Brazilian Islands - Comprida (SA-024) and Peruhibe (SA-071) between January 30th and February 9th. The callsign to be used will be PR2I. Operators mentioned are Leopoldo/I8LWL, Paki/IZ8GDO, Vespe/IW8EZV, Angelo/PY2VA and Bruno/PY2EN (NOT Toni/PY2YW as mentioned earlier). QSL via IK7JWX. The team needs sponsors, supporters, and individual contributions. For more info and online log, see: http://www.i8lwl.it

SA-064. Marco, CE1TBN, will be active as CE1TBN/7 from Huichas Island between February 18-20th. Activity will be on 20/15/10 meters mainly on SSB with some CW. QSL via his home callsign.

SA-088. Operators Marcelo/PP5BK, Fabio/PP5BZ, Ed/PP5VK, Roni/PP5ZB, Jose/PU5ATX and Claudio/PY3OZ will be active as PS5F from Santana de Fora (DIB SC-10) between February 3-6th. QSL via PP5BZ, by the Bureau or direct.

ISWL CALLSIGNS (For February). The following ISWL club callsigns will be used throughout the month of February:
GX4BJC/A - Operated from Tewkesbury, in Gloucestershire, by Walt, G3NYY. (/A WAB Square ◆O83 - England & IOTA ◆U-005).
MX1SWL/A - Operated from Dagenham, in Essex by John, M0HEM. (/A WAB Square ◆Q48 - England & IOTA ◆U-005).
For more information, see <http://www.iswl.org.uk> or QRZ.com and eQSL.cc

JX, JAN MAYEN (Limited future activity!). The "DX-World.net" reports: "Recently the Norwegian government declared most of Jan Mayen a Nature Reserve and banned landings and camping on most of the island. This means that tour operators can no longer visit since the main landing area is part of the Reserve. The only places left on the island which could be used as landing and camp sites are in Kvalross-bukta and in B◆tvika, in the very extreme (weather-wise) southern part of Jan Mayen. This will mean that most visits to the north part of the island (where previous landings occurred) will soon be impossible. Whilst radio amateur operations may still be possible from these two locations, which are difficult to get to (rough landing, very strong winds with sand storms, no access to any shelters or resources etc), it now appears JX5O was probably the last major expedition to Jan Mayen and may well be for the coming years. It also seems that only professional, licensed staff members at the Olonkin base will be able to activate the island, with that in itself a rare occurrence." However, Svein, LA9JKA, is expected to be based on the island beginning March 22nd, and is expected to stay until March 2013. No eQSLs, SWL reports are welcome. QSL only direct to: Svein Rabbevag, Brendlia 12, N-6013 Alesund, Norway. Also, see details on QR.com for postage info.

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during the ARRL DX SSB Contest (March 3-4th) as a Single-Op/All-Band entry. QSL via LoTW. For more details, see: http://www.wix.com/n2tta1/kp2mm

NH0, MARIANA ISLANDS. Operators Hal/W1NN and Joe/JA1LZR will be active as NH0J and NH0Z, respectively, from Tinian, Northern Marianas, until February 4th. Activity will be focused on the lower bands including this past weekend's CQWW 160 Contest. They will be using a K3 into 1.5 kW amp and a 1/4 wave verticals and RX antennas.

PZ, SURINAME. Operators Redd/AI2N, Ken/N2ZN and Dave/WJ2O will be active as PZ5RO between February 16-21st. The trio will staying at Ramon's (PZ5RA) QTH. Activity will include the ARRL DX CW Contest (February 18-19th) as a Multi-Single/High-Power entry. QSL via AI2N. For more details, see: http://wj2o.com
ADDED NOTE: Redd and Dave plan to spend 3 days visiting Aruba (P4) on the way home. Look for them as P40/AI2N and P40/WJ2O.

QSL INFO AND NEWS.....
NEW QSL MANAGER. Patrice "Pat", 3B8FA, has been inactive for a long time and is now QRV again. He has chosen Buzz, NI5DX, as his QSL Manager. Pat has only begun using a computer about a month ago, and Buzz has recommended a few logging programs for Pat to use. There will be a learning curve for computer logging, but Pat will master it quickly. Buzz will be able to confirm only those contacts made with 3B8FA from January 23, 2012, forward. Buzz will be designing a card and having it printed. It will take about 5 weeks for Buzz to receive the cards from the printer.

NEW QSL MANAGER. It was announced that as of January 23rd, Rene, NP3O, would be the QSL Manager for WP3A, KP2B, NP3X and NQ2A. Please follow the instruction on QRZ.com.

QSL TIP FOR OD5NH QSLS. Chuck, W3ON, informs [edited]: "I have recently received a reply from Puzant Azirain, OD5NH, about what is required to obtain a QSL card from him. Puzant stated that it now costs 3 USDs for him to send a QSL card from his home in Lebanon to the U.S.A.. Puzant

further stated that he sends reply QSL cards as post cards, so that his outgoing mail does not get intercepted and opened. A friend of mine has twice in 2011 sent QSL card requests to Puzant and received a reply sent to him as a post card. Puzant also stated that if you want to be sure that he gets your QSL card, request to send it as registered mail. Just be sure that you print his name on the envelope, as he has to sign for it. If his name is not on the envelope, then he can not sign for it. He also stated that he frequently changes his P.O. Box to try and thwart those who want to open his mail and steal any enclosed monies. You still cannot send IRCs, as they can't be used in Lebanon. His current address as seen on www.qrz.com is: PUZANT AZIRIAN, BOX 80431, BOURJ HAMMOUD, BEIRUT, LEBANON. As usual, do not enter any callsigns on the envelope. Some folks have suggested using nested envelopes, to ensure delivery. On a personal note, it seems that sending an SAE is not useful to Puzant as he sends reply QSL cards as post cards."

QSL STATUS. Bill, VK4FW, informs that the 3D2T and T2T QSLs are now at the printer, and he expects to start sending QSLs out at the end of January.

QSL RECEIVED VIA LoTW: HG6N, HH2/PY1ZV, IK0LZR, JA1FNO, KH7Y, ON4IQ, PV8ADI, PY1KN, RA2FF, RV6ALI, S58N, SV1CQN, V5/DJ4SO, VA7ST and VP6T

QSLS RECEIVED VIA MAIL: 4U1UN, 5N7M, 9A2AA, 9N7MD, BV100, C5A, C50C, CY0AA, E51PDX, EK7DX, EX2A, HC1MD/HC4, HH4/K4QD, HL2DC, HS0ZBS, J6/W0MU, JI1LET/JD1, K8LEE/CY0, KG4AS, N0TG/CY0, OH0Z, P49X, PJ2T, PJ4/W9NJY, PJ4T, PJ7E, PV8ADI, PY2FN/p, RC0F, RI1FJA, S50A, SP200BCA, TF/K5NA, T30OU, T30YA, TA3X, TU2T, UN7QX, UA0LSG, UA0ZS, UK8OM, V25RV, V63QQ, V63RR, V85NL, VP2MTA, VP2MWG, VR2XLN, WH0AU, XF1C, YN2CC, YS3/I2JIN, Z2/K0YY, ZF1A, ZL4LI, ZL7V and ZS2DL

QSLS RECEIVED VIA THE BUREAU: H40FN, J5V, OD5/DL6SN, V5/DK1CE and V63YT

T8 PALAU. Operators Kiyoshi/JA0EKI and Kazue/JJ0LUH will be active as T88XH and T88XG between February 26th and March 1st. Activity will be on 160-10 meters using CW, SSB, RTTY, PSK31 and JT65. They will have 1k amp, yagi and dipole antennas. QSL both callsign via JA0EKI.

TO2, REUNION ISLAND. Stephane "Stef", F5UOW, will be once again be active as TO2R from Reunion Island (AF-016) between March 26th and April 9th. QSL via his home callsign.

TO3, ST. BARTHELEMY. Operators Takayuki/JA1MZL and Yutaka/JJ1LIB will be active as TO3J from St. Barthelemy (NA-146) between February 1-7th. Activity will be on 80-6 meters using CW, SSB and RTTY. Online log will be available via ClubLog. QSL via JA1HGY. QSL cards will be available four ways: OQRS DIRECT (ClubLOG) after the DXpedition
OQRS BUREAU (ClubLOG) after the DXpedition
DIRECT MAIL WITH SASE/GS/IRC(s)
QSL BUREAU via JA1HGY

TM9, FRANCE (Special Event). Look for special event station TM9AAW to be on the air between February 10-26th. Activity is to celebrate the 9th Antarctic Activity Week (AAW). Operations will be made by Fran&#65533;ois, F8DVD, from his QTH of M&#65533;con in the east part of France. The WAP reference number for TM9AAW is 220. Operations will be on 40-10 meters mostly SSB. QSL via F8DVD, by the Bureau or direct (w/SAE + 1 IRC or 2 USDs to: Fran&#65533;ois Bergez,
6, Rue de la Libert&#65533;, F-71000 MACON, FRANCE. For more details, see <http://tm9aaw.monsite-orange.fr> or TM9AAW on QRZ.com.

V3, BELIZE (Update). Will, AA4NC (W4MR), will be active as V31RR between February 16-25th. Operation will include all-band entries in the ARRL DX CW Contest and the NAQP RTTY Contest. Emphasis will be on RTTY, lowbands and 6 meters if propagation allows. QSL via LoTW or AI4U (direct only).

V6, MICRONESIA. William, V63YWR, is a new operator on Federai Island, Ulithi Atoll (OC-078), in the state of Yap, Micronesia. However, he mainly uses amateur radio for family phone patches with Rich, AH7G, in Hawaii, but will gladly exchange reports after (0900z) he is done with his phone patch which starts at 0730z on 14245 kHz. There are apparently no telephone lines on the island and local inhabitants cannot afford to use satellite phones. John, KH6DLK, is also/may be on frequency during the phone patches. John holds the callsign V63JB and is helping them install an HF radio system on Federai. William is currently using an IC-718 and longwire, but will soon have a Hexbeam sent from Hawaii. It was also mentioned that William is not much into pile-ups. AH7G will be getting QSL cards printed for V63YWR later.

VISALIA DX CONVENTION NEWS (Top-Band Dinner). During the 2012 Visali DX Convention, look for the Top-Band Dinner Banquet to take place on Friday, April 20th, at the Convention Hotel, Holiday Inn, Visalia, CA, in the Birch Room. Check-in and no-host bar starting at 6:30 PM. The program is by Bob Alphin, K4UEE, - "HK&#65533;NA, Top Band from Malpelo." There will be door prizes. Menu is - Miner 49er BBQ self-serve buffet dinner. COST: 37 (USDs)/person. If you wish to attend, please send an E-mail to Steve, WB6RSE, at his QRZ.com address, with the number of reservations you would like along with CALL (or XYL/guest), FIRST and LAST NAME, and contact E-MAIL address for each person. You will receive a return E-mail confirming availability along with payment information. THIS DINNER SELLS OUT IN ADVANCE. FIRST COME, FIRST SERVED!

VP6, PITCAIRN ISLAND. On Friday, January 27th, Nigel, G3TXF, released the following VP6T statement: "We are now about half way through the VP6T Pitcairn operation. The exact close-down time will depend on the weather forecast for the three-day sail from Pitcairn back to Mangareva in French Polynesia. But at a guess, we'll probably be starting to pack up in the morning (local time, i.e around 1700z) on Thursday Feb 2. The 34,800 VP6T QSOs made so far have all been up-loaded regularly to both ClubLog and LoTW. It's interesting to see that the 'QSL' percentage on LoTW is well over 25% within a few hours of each up-load. The LoTW up-load process itself has speeded up massively of late. It now only takes a minute or so for our daily batch of 5,000 QSOs to up-load. Jacques/F6BEE, Michel/

FM5CD, Vincent/F4BKV and Gilles/VE2TZT are all making huge efforts on both 80m and 160m. However, sadly (apart from the first night) Top Band has been very frustrating with only a handful of European QSOs. But they will keep trying every night!"
On Saturday, January 28th, Nigel reported: "There is no fixed plan, VP6T is just on the air with up to four stations around the clock. Just keep checking our published frequencies. We use them whenever we can. Otherwise check the Cluster. As I sit here sorting out the daily VP6T up-loads to both ClubLog and LoTW, the other four operators are currently on 28035-CW, 24960-SSB, 21035-CW and 18083-CW. They are each knee-deep in pile-ups. During our night (our sunset is 0330z) we are usually on 160m, 80m, 40m and 30m all at the same time. Once the LF bands close to Europe, we then typically operate 20m, 17m, 15m and 12m in parallel. Just to show that you don't need to be a colossal signal to get through, I was pleased to work George GM3OXX on 40m CW this morning (Saturday). George, I believe, typically only ever runs 1 watt. However as Laurie, G3UML, mentioned we do expect to be on 30m CW tomorrow (Sunday) morning. The excellent graphs on ClubLog show there's a significant peak in propaga-tion to England at 0800z, with good sigs up to 1000z or beyond. You ask for the 'best times' on the HF bands. Look at the (real) Propagation graphs on ClubLog. There's no better source!"

WEBINAR (Contest University 2012 - Date Change). Tim Duffy, K3LR, will present a look at Contest University (CTU) 2012, including the course line up, list of professors, and the WWROF endorsed Contester's Code of Ethics, on Monday, February 6th, at 9:30 PM 10:00 PM EST, during a WEBINAR. The CTU welcomes six new professors this year. Tim will review past years and tell you what makes CTU 2012 the best yet. You will find out what previous students have had to say about CTU and why you should attend this year. Registration is FREE! Go to:
https://www2.gotomeeting.com/register/890795762

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2012-005E - Outstanding ARES ID cards
2012-01-29

Good morning,

I am happy to advise that all outstanding ARES ID Cards are now "in the mail". Please accept my thanks for your patience. This has been a frustrating time that started with an absent supplier, then a sick supplier, then on to sourcing a new supplier at a reasonable cost, to eventually purchasing our own machine so I now do the cards in house here at my home office. Future turn around time will be days instead of weeks.

The other advantage we now have is the ability to print custom cards. As a benefit to affiliated Clubs and ARES Groups we can now offer printing in house of ID cards that are unique to your group, at the same cost ($4.00) as the ARES cards. Not only is this a benefit to you our members, but it will assist in the cost recovery time of our printer. Again, many thanks for your patience!

Later today I will be e-mailing some of you who did not send a picture with your card application. If you get this e-mail just send me a picture and I'll send your card out post haste.

73,

Doug Mercer VO1DTM CEC
Chief Field Services Officer

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 29th January 2012

IRTS AGM & Rally 2012

The IRTS AGM, Annual Dinner and Rally this year is hosted by Dundalk Amateur Radio Society at the Fairways Hotel on the weekend of April 21st & 22nd 2012. Please keep your diaries free for this special event in our 80th Anniversary year celebrations. More details to follow.

EI80IRTS Certificate

The Irish Radio Transmitters Society was founded 1932 and we are proud to celebrate our 80th anniversary in 2012. As part of the celebrations the Society will be using the special callsign EI80IRTS. A special certificate, available to all amateurs and SWLs, is being offered to celebrate this occasion. Contact the special call EI80IRTS during the period of January 1st, 2012 to December 31st, 2012.

A very attractive certificate for working EI80IRTS is sponsored by Dundalk Amateur Radio Society, and details can be seen at http://www.ei7dar.com/ei80irts.html

---

IOTA Contest Results

Provisional results of the 2011 Islands On The Air contest have now been published. Despite low sun-spots levels, the contest organisers received over 2,300 logs - the highest number yet - covering 632,000 QSOs and sufficient to enable them to adjudicate 75% of all QSOs.

The highest scoring station in the contest was the Bristol Contest Group (GJ6YB) who operated from Jersey and achieved a score of just under 15 million points from over 3,300 QSOs. The Bristol Contest Group were also the IOTA contest winners in 2010.

Irish stations submitted 21 contest logs and one check log. The full provisional results for EI and GI stations are on the IRTS web site - see Contest Results page or the link on the home page. The highest score was achieved by the EI/GI group on Rathlin Island, with a total of 2.7 million points from 1,606 QSOs. Other groups had higher QSO

numbers, but the Rathlin group had a better mix of multipliers and island stations. There are also some excellent results from stations in the Single-Operator categories.

The IOTA contest is one of the best supported contests in Ireland. The 2012 contest takes place on 28th / 29th July. The contest organisers have indicated that there will be a number of significant rule changes in 2012, notably to the scoring to emphasise island QSOs and, for the same reason, there will no longer be a World multi-op category as they are anxious to refocus the contest on working islands rather than building points through non-island stations working other non-island stations.

85th Armenian Anniversary

In honour of the 85th anniversary of DOSAAF of Armenia from January 21 to February 1, radio amateurs of Armenia will work using call sign of a special prefix EK85. QSL cards for QSOs with special stations should be send to the address of QSL-manager EK7DX. (www.qrz.com)

The electronic version of the diploma "85 years of DOSAAF of Armenia" shall be issued for the QSOs and SWLs with special stations on different bands, including WARC bands, using different types of modulation CW, SSB and Digital. For obtaining a diploma you have to dial 5 QSO / SWL. Applications must be mailed to the address of the manager: ek7dx /at/yahoo / dot/ com

---

Declan EI9HQ

Declan will be out on Sunday 12th February on a run to Kilkenny starting around 0930 in WAI Square Oscar22. He will be on 7.170mhz. Anyone looking for squares from this route please email before 10th February at ei9hq/ at/ O2/ dot/ ie.

RAOTA

RAOTA, the Radio Amateur Old Timers Association is looking for more members and will have a stand at the Lough Erne Rally on Sunday 1 April. RAOTA seeks to keep alive the pioneer spirit and traditions of the past in today's amateur radio. Its friendly gatherings and nets on the bands, the hundred issues to-date of its quarterly journal, OT News, and RAOTA's other publications amount to an important, historic and technical treasure of amateur radio lore, that remains pertinent today.For more information visit :-www.raota.org gi0lec.blogspot.com

WRC-12 Gets Underway

The opening of the World Radiocommunications Conference (WRC-12) got under way in Geneva on Monday last and will continue until 17 February.

More than 3000 delegates from over 150 countries are represented.

The work started with the election of various committee and working group chairpersons. Brennan Price, N4QX, the ARRL Chief Technical Officer and a member of the US delegation was elected Chairman of the Sub Working Group which will be dealing with agenda item 1.23 on a secondary allocation to the amateur service around 500 kHz.

The IARU is well represented at the conference and of course many countries, including our own, have licensed amateurs as members of their national delegations.

In addition to item 1.23 on 500 kHz the other agenda items of particular interest to radio amateurs are:

1.15 to consider possible allocations in the range 3 to 50 MHz to the radiolocation service for oceanographic radar applications

2.19 to consider regulatory measures and their relevance, in order to enable the introduction of software defined and cognitive radio systems

3.22 to examine the effect of emissions from short range devices on radiocommunications services.

We will try to keep you informed of developments on 500 kHz as news develops.

Cork Radio Club

Cork Radio Club will meet in the River Room at the Commons Inn, New Mallow Road in Cork City at 8.00 p.m. on Monday February 6th. Computer logging in the shack will be the theme of the meeting and some popular logging packages will be demonstrated and evaluated. The 100th anniversary of the sinking of the Titanic is being marked by several special event stations at ports associated with the ships maiden voyage. These include Belfast, Southampton, Cherbourg, Cobh, Cape Race, VO1MCE and a maritime mobile station, VE0MGY at the site of the sinking. The special call sign EI100T has been issued for the year 2012 and Cork Radio Club members will operate the station from Cobh throughout the year. The main event will happen over the weekend of April 13/14th and everyone is encouraged to visit the special event station over that weekend in Cobh. Information on EI100T from Cormac EI4HQ QTHR. Further information on Cork Radio Club is available from Jeremy EI5GM on 083-3317710. Visitors and new members will be very welcome at the Commons Inn on February 6th.

Limerick Radio Club

The Annual General Meeting of Limerick Radio Club will be hold on Wednesday 8 February 2012 in the Limerick Institute of Technology at 7.30pm and all paid up members are requested to attend.

Rally: Limerick Radio Club rally will be held on Sunday March 11th 2012 at the Radisson Blue Hotel on the Ennis Road, Limerick. Doors open at 11am and all the usual traders will attend. Bring and Buy tables can be ordered from Dermot Gleeson EI2GT.

South Dublin Radio Club Talks

Following Joe EI7GY's interesting talk on the DXCC programme Colin McKeeman will give a talk on aeronautical radio communications on the North Atlantic on Tuesday 31st January

The club plans on launching it's television repeater for Dublin at the Phoenix Amateur Radio Club Rally in February.

DX News

A group of Italian amateurs will be active from the Indian Ocean island of Mayotte from now until 5th February. The callsign is TO4M. As well as being a DXCC entity this one counts for the Island on the Air Award with reference AF-027. QSL manager is IK5CRH.

An international team will air the callsign HU2DX from El Salvador from 29 January until 10 February. The usual prefix in El Salvador is YS so this operation will also be of interest to prefix hunters. The QSL manager is DH7WW.

Two Japanese amateurs will operate as TO3J from the Caribbean island of St Barthelemy from 1 - 6 February. They will be active on all bands 80-6m using CW, SSB and RTTY. QSL info is via JA1HGY.

For those who still need the DXCC entity of the ITU HQ in Geneva look out for 4U1WRC from now until 17 February. This call is active from the 4U1ITU station during the ITU World Radio Conference 2012.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

78. [RAC-Bulletin] Special WRC Report Number One

Newsgroup: rec.radio.amateur.misc
Date: 2012-01-30 03:55:57 UTC
From: rac-bulletins@eton.ca
Message-ID: <4F26153A.4050209@rac.ca>
Source record: 3645
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

Special WRC Report Number One
2012-01-29

The International Telecommunication Union ("ITU") World Radiocommunication Conference 2012 (WRC-12) started 23 January 2012 in Geneva, Switzerland. This is the "big show" for spectrum allocation matters and a very important meeting if you are an amateur radio operator anywhere in the world. Every 4 or 5 years a WRC takes place. The last one was in 2007. Approximately 3,000 people will attend WRC-12. These are government officials, telecommunication industry people and others, like the IARU, who have an interest in the use of the radio spectrum. The agenda items discussed during WRC-12 were established at the previous WRC in 2007. In the past 4.5 years there have been many committee meetings within the ITU to try to arrive at solutions that will satisfy each of the agenda items. In the case of some of the agenda items, several possible methods to satisfy the agenda item have been identified. Itis up to the WRC to select the most appropriate method to satisfy the agenda item, that is, to arrive at an worldwide solution to the issue presented in the agenda item.

There are a number of agenda items for WRC-12 that have some impact on amateur radio, immediately or sometime in the future. Each of the agenda items is assigned to a committee and also sub-working groups. Within each of these sub-working groups the agenda items are discussed in detail, the proposals from regional telecommunication organizations are analyzed, and the discussion proceeds toward developing a consensus on the agenda item. It seems to the casual observer to be a slow, tedious process but it works quite well in developing consensus, assuming the parties are at least a little bit flexible in their views.

AI 1.23. The agenda item that has been discussed widely within the amateur community over the last 5 years is agenda item AI 1.23. In 2007, the agenda item was stated as follows: "to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services" There are a number of suggested ways to satisfy this agenda item that are being discussed at the WRC: 1. A secondary allocation of up to 15 kHz to the ARS on a worldwide basis between 472 kHz and 487 kHz. 2. Two non-contiguous worldwide secondary allocations to the ARS at 461-469 kHz and 471-478 kHz, totalling 15 kHz. 3. A CEPT proposal for a worldwide secondary allocation of 8 KHz from 472 to 480 kHz. 4. No change.

It appears from the first several days of committee meetings that many of the member states attending the WRC are in favor of granting the amateur radio service an allocation but the details remain to be established. The member states that are in favor of No Change (NOC) have stated that they are primarily concerned with possible interference to Non Direction Beacons that currently operate in the spectrum under consideration. It is still early in the process to determine if the amateur service will succeed in gaining an allocation in this portion of the spectrum.
AI 1.10. This agenda item is as follows: "to examine the frequency allocation requirements with regard to operation of safety systems for ships and ports and associated regulatory provisions, in accordance with Resolution 357 (WRC-07)" This agenda item might have impacted the IARU goal of achieving a secondary allocation under AI 1.23. However, with the dropping of the AI 1.23 Method for an amateur allocation between 493 and 510 kHz, there should no longer be a conflict between maritime service objectives for AI 1.10 and amateur service objectives for AI 1.23.

AI 1.15. This agenda item is as follows: "to consider possible allocations in the range 3-50 MHz to the radiolocation service for oceanographic radar applications, taking into account the results of ITU-R studies, in accordance with Resolution 612" ITU committee meetings leading up to WRC-12 have identified the following bands to be studied under this Agenda Item: 3.5 . 5.5 MHz, 8 . 10 MHz, 12 . 14 MHz, 24 . 30 MHz, 39 . 45 MHz. These have been refined to particular candidate sub-bands including 5.060-5.450 MHz, 13.870-14.000 MHz, 24.000-24.890 MHz and 29.700-30.000 MHz. The IARU position is that oceanographic radar applications are incompatible with the amateur and amateur satellite services in the range 3 to 50 MHz and should not be allocated in bands already allocated to the amateur and amateur satellite service, including 5.250-5.450 MHz in which a growing number of administrations are providing for some access by amateurs on a domestic basis.

Footnotes. At each WRC, there is an agenda item that deals with footnotes contained within the Radio Regulations. Generally, this is a situation where an administration (a country) has "opted out" of the decision of a WRC and therefore creates an exception to the table of frequencies in the Radio Regulations. For example, a country may say that it will not use a certain service in a portion of the spectrum that has been designated for that service by the WRC. Therefore, a footnote is created in the Radio Regulations for that portion of the spectrum indicating a designated use is not available in that country even though it may be available in many other parts of the world. There are a number of examples of footnotes that relate to amateur radio. One of IARU's tasks during each WRC is to try to get administrations to remove their country's name from footnotes that prevent amateurs in that country from using spectrum that is available for amateur radio usage in other countries.

There are other agenda items which the IARU has determined to be a low threat to the amateur radio and the amateur-satellite services but those items will be closely watched by the IARU Team at the WRC-12 to make sure they do not negatively impact amateur radio.

WRC-12 started on Monday, 23 January and will conclude on Friday, 17 February. During this four week period, as the working groups and sub-working groups go through the agenda items I will report any significant developments in subsequent electronic newsletters.

* Latest news from the World Radiocommunications Conference

* Acting Chairman for ARDC announced

CQ Communications and the Amateur Radio Relay League in the USA have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World electronic confirmation system. CQ's awards are the first non-ARRL awards supported by Logbook of the World and will be phased in, beginning with the CQ WPX award. Amateurs will be able to use Logbook of the World logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard Logbook of the World credit fees and CQ award fees will apply.

RSGB Past President, Colin, G3PSM is attending the World Radiocommunication Conference 2012 as part of the UK delegation until 17 February. He is posting daily news on the RSGB website at www.rsgb.org/WRTC-12-news/. Over 3000 participants, representing more than 150 out of the ITU's 193 Member States are attending the four-week conference, making it one of the most significant ITU events. About 100 Observers from among ITU's 700 private sector members, along with international organisations are also attending.

As notified in the February edition of RadCom, the RSGB is seeking a new Chairman for the Amateur Radio Development Committee. Until that appointment is made, Steve Hartley, G0FUW, has been appointed Acting Chairman, ARDC with immediate effect.

The Chibis-M microsatellite, also known as RS-39, was jettisoned from the Progress M-13M cargo spacecraft Tuesday 24 January. The satellite is designed to study atmospheric phenomena such as Terrestrial Gamma Ray Flashes associated with lightning. RS-39 has CW beacons on 435.315 and 435.215MHz and amateurs are asked to submit reception reports via e-mail to the Space Research Institute of the Russian Academy of Sciences at amateur-rs39@chibis.cosmos.ru. Each report will be acknowledged with a special QSL.

The Irish Radio Transmitters Society was founded 1932 and, as part of the 80th anniversary celebrations, the IRTS will be using the special callsign EI80IRTS. A certificate will be available to all amateurs and SWLs with bronze, silver and gold levels for contacting the station during 2012. The certificate is sponsored by Dundalk Amateur Radio Society and details can be seen at www.ei7dar.com/ei80irts.html. You can now read about some of the activities and decisions of the RSGB Board in a new running log on the RSGB website. Check out www.rsgb.org/boardprogress/.

And now for the details of rallies and events for the coming week

The Horncastle Winter Rally will take place today, 29 January, in the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10.30am and admission is £1.50. Details from Tony, G3ZPU on 01507 527 835.

Next weekend, 5 February, the 27th Canvey Radio & Electronics Rally will be held at The Paddocks, Long Road, Canvey Island, Essex SS8 0JA, which is at the southern end of A130. Doors open at 10.30am. Details from Dave, G4UVJ, on 01268 697 978 during the evening please.

Also on 5 February, the Radio-Active Rally will take place in the Civic Hall, Nantwich, Cheshire CW5 5DG. Doors open at 10.30am and there will be trade stands and Bring & Buy. More information from Simon Chettle, G8ATB, on 01270 841 506.

Now for the news of special events

Listen out for stations taking part in SOS Radio Week in conjunction with the RNLI. Lots of stations will be on the air fund raising for the charity. See www.sosradioweek.org.uk/stations/ for details of those taking part.

Station personnel at 4U1ITU, the amateur radio station at the International Telecommunication Union in Geneva, have installed a webcam in the station, allowing anyone with an Internet connection to view live happenings at the station. 4U1ITU will be signing as 4U1WRC during the 2012 World Radio Communication Conference that runs until 17 February. The station will revert back to 4U1ITU just in time for the ARRL International DX CW Contest on 18 and 19 February.

And now the HF DX news compiled from 425 DX News and other sources

Members of the Buddies in the Caribbean will mount a mini-DXpedition to Grenada between 1 and 9 February. The team specialises in 100 watts or less low power radios and the Buddipole portable antenna systems. Modes used will be CW, SSB, and the digital on 10 through to 160 metres. QSL via Logbook of the World, eQSL, or regular mail to operator's home callsign and include a self addressed stamped envelope if you go the postal route.

JA1XGI will be active from Hawaii as W8XGI/KH6 between 31 January and 4 February just prior to his upcoming trip to Tonga. Operations will probably be on 6 through to 20 metres with an emphasis on 30, 17 and 12

metres. He is expected to operate mainly CW, with some SSB and the digital modes. QSL via JA1XGI, direct or by via the Bureau. QSOs will be uploaded to Logbook of the World.

Laci, HA0NAR is leading a small group that will be on the air as FW0R from the Pacific islands of Wallis and Futuna until 23 February. QSL Manager is HA0NAR. Dennis, WA2USA/4, will be active from St. George Island from 1 to 27 February. More information can be found at: www.wa2usa.com. QSL via his home callsign either through the bureau or direct.

Now the contest news

The CQWW 160m DX Contest takes place for 48 hours ending at 2200 today, 29 January, using CW only. The UK is CQ Zone 14. USA stations will send a signal report and their 2-letter State code, while Canadian stations will send a signal report and their 3-letter Province code. Accurate logkeeping is a must in this event, because there are penalties for bad or busted QSOs.

The BARTG RTTY Sprint finishes at 1200UTC today, 29 January. Since last year it has become an event in the HF Championship, but it is still adjudicated by BARTG and competing stations need to submit their entries to BARTG. Single band entries are not allowed and the contest uses the bands from 3.8 to 28MHz. The contest exchange is serial number only. Stations who have been placed in the Top 10 of any BARTG event in the past three years must enter the Expert category

The 70MHz UK Activity Contest takes place on 31 January from 2000 to 2230UTC. Using all modes on the band, the exchange is signal report, serial number and locator.

The 432MHz AFS contest is the final Super League event of the 2011/2012 season. It takes place for four hours on the morning of the 5th from 0900 to 1300UTC. A French contest coincides with the first couple of hours, so don't forget to take advantage of the activity by beaming that way early on. The exchange is signal report, serial number and locator.

The European Phase Shift Keying Club's PSK63 Contest takes place next weekend on 4 and 5 February. Last year there was a big increase in participation but in several of the categories there were no entries at all from parts of the UK. Using the 3.5 to 28MHz bands between 1200 and 1200UTC, the exchange is signal report and serial number

And now the solar factual data for the period from Friday the 20th to Thursday the 26th of January, compiled by Neil Clarke, G0CAS on the 27th of January.

The two large sunspot regions mentioned in last week's report continued to dominate the solar disc and solar activity. Numerous C class solar flares took place on a daily basis but the largest event was a long duration M8 proton solar flare during the morning of the 23rd.

Associated with this event were multi-frequency radio emissions spanning from 25MHz through to 15.4GHz, a fast moving large coronal mass ejection and a sudden ionospheric disturbance. Solar flux levels declined from 142 units on the 21st to 126 by the 25th. The average was 137 units. The 90 day solar flux average on the 26th was 143, that's one unit down on last week. X-ray flux levels varied little day to day and averaged B5.8 units. Geomagnetic activity started at quiet levels but during the early hours of the 22nd a coronal mass ejection arrived from the solar flare of the 19th. The Ap index for the 22nd was 24 units. This was the first disturbed day since the 1st of November last year. Then around 1500 hours on the 24th a second, faster coronal mass ejection arrived associated with the M8 flare from the 23rd. This disturbance did not last as long but the Ap index for the 24th was also 24 units. Activity then declined back to quiet levels by the 26th. The average was Ap 13 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 290 kilometres per second on the 21st to 650 by the 25th. Particle densities increased to 63 particles per cubic centimetre during the 22nd. Bz varied between minus 4 and plus 6 nanoTeslas on the quietest day and between minus 29 and plus 28 nanoTeslas on the 22nd and between minus 18 and plus 29 nanoTeslas during the 24th.

Radio aurora took place on four consecutive days from the 22nd. By far the strongest was the evening of the 22nd, which lasted into the 23rd, when stations on the south coast could participate. Northern England and Scotland also had the pleasure of an exceptional visual aurora, where skies were clear of clouds. Further down the radio spectrum, the HF bands were badly degraded especially the high latitude paths. However, they recovered quite rapidly with MUFs back up to 27MHz or higher with paths to Africa and South America on 28MHz better than expected considering magnetic levels.

And finally the solar forecast. This week the slightly quieter side of the Sun is expected to be facing our way. Solar activity should be low on most days with only a slight chance that activity will increase to moderate levels. Solar flux levels should be in the 120s for most of the week. Geomagnetic activity is expected to be quiet everyday. This week there is only a small chance that any coronal mass ejections will head our way. MUFs during daylight hours at equal latitudes should be around 29MHz. Darkness hour lows are expected to be about 8MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 50 per cent success rate will be about 21MHz. The best time to try this path will be between 1300 and 1800 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on

the RSGB website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 30 January Gloucester Amateur Radio & Electronics Society is having an informal, workshop and construction evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 30 January South Birmingham Radio Society is having a field day planning meeting and equipment review. Contact Don, on 01214 581 603.

On Tuesday 31 January Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 31 January Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 31 January Wythall Radio Club is having a talk on VHF by Tim Kirby G4VXE, VHF columnist of Practical Wireless. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 1 February Midland Amateur Radio Society is holding an open meeting and training classes. Contact Norman, G8BHE, on 07808 078 003.

On Wednesday 1 February South Birmingham Radio Society is having a lecture in the main hall. Contact Don, on 01214 581 603.

On Wednesday 1 February Telford & District Amateur Radio Society is putting G3ZME on the air and having a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 2 February Salop Amateur Radio Society is having a natter night and holding a committee meeting. Details on the club website at www.salop-ars.org.uk.

On Thursday 2 February South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 3 February Coventry Amateur Radio Society is holding its construction competition. Contact John, G8SEQ, on 07958 777 363.

On Friday 3 February South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Sunday 5 February Wythall Radio Club is taking a trip to the Radio Active Rally, Nantwich. Details from Chris, G0EYO, on 07710 412 819.

NEWS FOR THE NORTH OF ENGLAND On Monday 30 January Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 30 January Sheffield Amateur Radio Club is having a talk by G3PHO on the G7FEK multiband HF antenna. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 30 January South Manchester Radio and Computer Club is holding a technical forum. Details from Ron, G3SVW, on 01619 693 999.

On Monday 30 January Thornton Cleveleys Amateur Radio Society is having a talk on the birth of radio by Jack, G4BFH. Details from Jack Duddington, G4BFH, on 01253 853 554.

On Tuesday 31 January Chester & District Radio Society is having talks by construction competition entrants. Details from Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 31 January Halifax & District Amateur Radio Society is having a talk by Raymond, 9H4RN on getting started with ham radio in Gozo, Malta. Details from Anthony Vinters, G0WFG, on 01422 822 636.

On Tuesday 31 January Warrington Radio Club is having a talk on Home Antennas Plus by Roger Spensley, M0DWQ. Information from Leigh Jepson, 2E0LDJ by e-mail to leigh@2e0ldj.net.

On Wednesday 1 February Denby Dale Radio Club is watching the VP8ORK and T32C DXpedition videos. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 1 February Hornsea Amateur Radio Club is dining at Driffield. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 1 February Maltby & District Amateur Radio Society is on the air. Details from Keith, G1PQW, on 07801 156 678.

On Wednesday 1 February Mid-Cheshire Amateur Radio Society is making final assignments for the Radio Active rally. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Thursday 2 February Spen Valley Amateur Radio Society is having a talk on a simple and cheap antenna analyser by Russell, G0FOI. Further details from Russell Wilde on 01274 875 038.

On Thursday 2 February South Manchester Radio and Computer Club is having a talk on the wonders of China by Dave, G4UGM. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 2 February Wakefield & District Radio Society is holding a rally planning meeting. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 3 February East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 3 February Tynemouth Amateur Radio Club is discussing Noises Off. Contact Bob, M6KLO, by email to mail@g0nwm.com. On Sunday 5 February Wakefield & District Radio Society is having a training day from 13:30. Contact Ken, 2E0SSQ, on 07900 563 117.

NEWS FOR NORTHERN IRELAND Lough Erne Amateur Radio Club plans another course for the Intermediate amateur radio licence, both practical assessments and examination. The first session will be at 1pm today, 29 January, in the SHARE Centre, BT92 OEQ. It may be possible to join the course at subsequent sessions. Contact Michael MI5MTC by e-mail to sec@learc.eu.

On Thursday 2 February Bangor & District Amateur Radio Club a presentation about Logbook of the World by Richard, GI4DOH. Contact Mike, GI4XSF, on 02842 772 383.

On Saturday 4 February Mid Ulster Amateur Radio Club is having an informal radio, computer and electronics bring and buy sale with coffee morning. For more information send an email to cqmuarc@gmail.com.

NEWS FOR SCOTLAND On Tuesday 31 January Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946 192.

On Thursday 2 February Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 2 February Moray Firth Amateur Radio Society is having a talk and demonstration of Radio and TV of Yesteryear by Steve Liley and John Rennie, GM4UWX. Contact Jim Nicol, MM0SMD, on 01340 820 134.

On Thursday 2 February Paisley Amateur Radio Club is having a talk on microwaves by MM1HMZ. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

On Friday 3 February Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Chesham and District Amateur Radio Society will be running an Advanced licence course at the White Hill Centre, Chesham HP5 1AG, which is accessible by road via the M25 or M40 and a few minutes walk from Chesham underground station (Metropolitan Line). Classes will be held on Sunday afternoons between 2 and 6pm starting on 25 March. For further information please contact the tutor, Roger, G3MEH, by e-mail to g3meh@hotmail.co.uk or 01442 826651.

On Tuesday 31 January Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815. On Wednesday 1 February Worthing & District Amateur Radio Club is having a talk on PICs by Gary Matthews. Details from John, G8FMJ, on 01273 593 232.

On Thursday 2 February Cray Valley Radio Society is having a talk on amateur radio test equipment by G8MCA. Details from Malcolm Bryan,

G8MCA, on 07906 433 965.

On Thursday 2 February Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 2 February Horsham Amateur Radio Club is having a talk on vector network analysis using the Mini VNA by John Matthews. Details are on the web at www.harc.org.uk.

On Thursday 2 February Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Friday 3 February Crystal Palace Radio and Electronics Club is holding its AGM and construction contest. Contact Bob, G3OOU, on 01737 552 170.

On Saturday 4 February Brede Steam Amateur Radio Society is holding its AGM at the shack at 11am. For more information contact Steve, on 01424 720 815.

On Sunday 5 February South Essex Amateur Radio Society is at the Canvey Radio Rally. Details from Dave, G4UVJ, on 01268 697 978.

NEWS FOR THE SOUTH WEST On Monday 30 January Bristol RSGB Group is holding its AGM. Details from Robin, G3TKF, on 01225 420 442.

On Wednesday 1 February Cornish Radio Amateur Club is holding a committee meeting at Perranarworthal Church Hall. Details from Steve, G7VOH, on 01209 844 939.

On Wednesday 1 February Taunton & District Amateur Radio Club is watching a selection of relevant amateur radio videos. Contact Peter Robinson, G0EYR, on 07811 635 819.

On Wednesday 1 February Thornbury & South Gloucestershire Amateur Radio Club is having a talk on Linux in the shack by Adrian, 2E0SDR. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 2 February Cornish Radio Amateur Club is having a main club meeting. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 2 February Saltash & District Amateur Radio Club is having an introduction to Morse. Contact Brian, M0BHG, on 01752 844 321.

On Thursday 2 February South Bristol Amateur Radio Club is having a music night with Daygan. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 2 February Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750. On Friday 3 February Bournemouth Amateur Radio Society is having a talk by Ted Nelson on his experiences as a young airman during World War Two. Contact Russell Saunders on 01202 885 278.

On Friday 3 February Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES No news items have been received for Wales this week.

Op A logs from the top of the mountain arrive late and some QSOs therefore
may not be in the current online log until the next upload. Overall, logs
are uploaded about once a day

83. Nebraska Hams Featured in the February 2012 QST

Newsgroup: rec.radio.amateur.misc
Date: 2012-01-31 15:28:03 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20120131135209.5231020436@bmail.arrl.org>
Source record: 3650
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

In my Section News for January, I mentioned the good work Dar Piatt, W9HCZ, is doing with the Midwest Homebrew and QRP Group. I am proud to recognize that Dar was featured in the latest QST for his participation in the ARRL Teacher's Institute on Wireless Technology. A major part of the text is devoted to his comments about the Institute. You will find the article on page 78 of the February 2012 QST. The Midwest Homebrew and QRP Group's website is: http://www.hbqrp.org.

If you turn to page 62 in the same issue, you will see a review of the HamGadgets PicoKeyer-Plus. This tiny keyer is one of the kits sold by Hamgadgets which is an Omaha company belonging to Dale Botkin, N0XAS. Dale has some great, easy to build and operate products. Please take a look at the review in QST and at Dale's website: http://hamgadgets.com.

Thanks to Dar and Dale for representing the Nebraska ham radio community so well!

I received the following from Steve Ewald, WV1X, Supervisor of the Field Organization Team:

On Sunday, February 12th at 5 p.m. Eastern time, ARRL and Al Petrunti of The New Day Group will webcast a LIVE tour of W1AW – the ARRL flagship station. Amateurs around the country (and the world) will be able to watch it at http://www.awecast.tv/channels/arrl/ .

“Hams around the world know of W1AW and thousands have made contacts with this impressive station, but most never get to see it,” said Allen Pitts, W1AGP, who is producing the event. “Thanks to Al Petrunti’s group, we hope that folks enjoy seeing what’s at the other end of the signals.”

You will be there as Petrunti, KA1TCH, local weatherman Geoff Fox, K1GF, and others are given a tour by Station Manager Joe Carcia, NJ1Q. As in all live broadcasts, you never know just what might happen. We invite you to join us. Petrunti, KA1TCH, also created the video about HR-607 for ARRL.

You can learn more about W1AW at http://www.arrl.org/w1aw and about the New Day Group at http://www.NewDayHD.com .

73,

Steve Ewald, WV1X
Supervisor, Field Organization Team

# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
23 - 29 January 2012

Solar activity ranged from low to high levels. Region 1402 (N28,
L=214, class/area=Eko/630 on 17 January) produced a long duration
M8/2b flare at 23/0359 UTC. Multiple radio emissions from 25 MHz to
15.4 GHz, including a 5100 sfu Tenflare, and a Type IV sweep were
also observed. Finally, an approximately 1600 km/s asymmetric
full-halo coronal mass ejection (CME) was seen in SOHO/LASCO C2
imagery beginning at 23/0412 UTC. Activity returned to low levels as
Region 1402 made its way across the visible solar disk producing
occasional low to mid level C-class flares. On 27 January, Region
1402 moved to N29W71 before producing an X1/1f flare at 27/1837 UTC.
Radio phenomena, including a Type II (1523 km/s) and a Type IV radio
sweep with an 810 sfu Tenflare accompanied this flare. An asymmetric
halo CME was later observed in LASCO C2 coronagraph imagery with an
estimated plane-of-sky speed near 2000 km/s. Region 1402 rotated off
the west limb on 28 January. Region 1402&rsquo;s counterpart, Region
1401 (N18, L=213, class/area=Eki/540 on 19 January) was the second
largest and most magnetically complex (beta-gamma) region on the
disk during the period. Region 1401 was only responsible for a
couple of low level C-class flares during the period. Region 1401
decayed to spotless plage on 26 January.

Energetic proton flux levels reached strong levels during the period
as two proton events energized the Earth&#39;s magnetosphere. The
first event began minutes after the M8/2b flare on 23 January. The
10 MeV proton flux crossed the 10 pfu event threshold at 23/0530
UTC. The 10 MeV protons increased steadily to a peak flux of 6310
pfu at 24/1530 UTC, following the arrival of the interplanetary
shock. This 10 MeV proton event ended at 27/1025 UTC when the
enhancement dropped below the 10 pfu level. This 10 MeV proton event
was the largest enhancement since Oct 29, 2003 (29,526 pfu) and the
11th largest since January, 1975. Also with this event, the 100 MeV
proton flux exceeded the 1 pfu threshold. The 100 MeV flux began at
23/0445 UTC, increased to a peak of 2 pfu at 23/0750 UTC, then
```

steadily declined until it dropped below the 1 pfu threshold at 23/2050 UTC. The second event began on 27 January, after the X1.7/1f flare. The 10 MeV proton flux crossed the 10 pfu event threshold at 27/1905 UTC. The 10 MeV protons increased steadily to a peak flux of 796 pfu at 28/0205 UTC. The 10 MeV proton event was still in progress at the time of this report. The associated 100 MeV event began at 27/1900 UTC, reached a maximum of 11 pfu at 27/2140 UTC and ended on 28/2120 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit began at background levels, but increased to moderate levels late on 23 January. Values increased to high levels on 27-28 January, before decreasing to moderate levels through the end of the period.

Geomagnetic field activity ranged from quiet to minor storm levels at mid-latitudes and briefly reached severe storm conditions at high latitudes. The magnetic field was mostly quiet on 23 January with an isolated minor storm observed at high latitudes from waning effects from a CME. On 24-25 January, activity increased to isolated minor storms at low latitudes and severe storms at high latitudes, due to the arrival of a CME, associated with the 23 January M8/2b flare. An interplanetary shock was observed at the ACE spacecraft at 24/1431 UTC followed by a 37 nT increase in total field, as measured by the ACE spacecraft, at 24/1439 UTC. A corresponding sudden impulse was observed in the Boulder magnetometer with a 22 nT deviation at 24/1504 UTC. Solar wind speed, as measured by the SOHO spacecraft, was approximately 750 km/s at the time of the shock passage before decreasing to approximately 650 km/s. The geomagnetic field decreased to predominantly quiet levels for the remainder of the period.

Forecast of Solar and Geomagnetic Activity
01 February - 27 February 2012

Solar activity is expected to be at very low to low levels from 01-09 February until old Regions 1401 and 1402 are due to return. Solar activity is expected to increase to low levels with a chance for M-class flares and a slight chance for X-class flares for the remainder of the period.

The greater than 10 MeV proton flux at geosynchronous orbit is expected to remain elevated from 01-02 February but below the 10 pfu threshold values. A return to background levels is expected from 03-08 February. On 09 February, old Regions 1401 and 1402 are due to return to the visible disk. From 09 February until the end of the forecast period, there will be a slight chance for a proton event.

The greater than 2 MeV electrons at geosynchronous orbit are expected to be at normal to moderate levels for the entire forecast period.

The geomagnetic field is expected to be at predominantly quiet
levels for the entire period. Quiet to unsettled levels are expected
on days 03-04 February, 09 February, 12 February, and 23 February.
This increased activity can be attributed to multiple, recurrent
coronal hole, high speed wind streams.

86. The ARRL Contest Update for February 1, 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-01 05:02:03 UTC

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

February 1, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Radio Drag Races - North American Sprints
- School Club Roundup - After-class Fun
- LOTW to Support CQ Operating Awards
- 75 Years in Ham Radio by W5DM
- It's a Bird, It's a Plane, It's a Balloon!
- 2011 ARRL CW Sweepstakes - Initial Results
- Radial Calculator by G4FGQ
- What's on the Back Burner?
- How It's Done

NEW HF OPERATORS - THINGS TO DO

February is jam-packed with contests. If you feel up to the pressure,
try one of the North American Sprints. Digital operators will be
punching the keyboard in CQ WPX or XE RTTY contests. If you have some
"big iron" (old tube radios) holding down the table, try the Classic
Exchange's phone weekend.

BULLETINS

There are no bulletins in this issue

BUSTED QSOS

Occasional problems with URLs have been traced to the web editor tool
adding "%20" to URLs at the end of a line of text. Should a URL seem to
be non-functional, trying removing those characters and try again.
(Thanks, Bob N6TV)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

February 4-5
```

- SNS and NS Weekly Sprints--CW (Feb 3)
- YLISSB QSO Party--CW
- EPC WW PSK Contest
- Vermont QSO Party
- Ten-Ten Winter Phone QSO Party--Phone
- Black Sea Cup International
- FYBO Winter QRP Field Day
- Minnesota QSO Party
- Straight Key Party
- British Columbia QSO Party
- Delaware QSO Party
- XE Int'l RTTY Contest
- North American Sprint--CW

February 11-12

- ARS Spartan Sprint--CW (Feb 7)
- CWops Monthly Mini-CWT Test (Feb 8)
- YL-OM Contest (Feb 10)
- CQ WW RTTY WPX
- Asia-Pacific Sprint--CW
- Dutch PACC Contest
- Louisiana QSO Party-
- OMISS QSO Party--Phone
- New Hampshire QSO Party
- FISTS CW Winter Sprint
- RSGB - First 1.8 MHz Contest
- North American Sprint--Phone
- Classic Exchange--Phone
- Milwaukee FM Simplex Contest--Phone
- Maine FM Simplex Challenge--Phone

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Making a lot of award-chasing contesters happy, the ARRL's Logbook of the World <http://www.arrl.org/logbook-of-the-world> program (LOTW) will soon support CQ-sponsored operating awards. Announced on January 24th by ARRL COO Harold Kramer WJ1B and CQ Communications President Dick Ross K2MGA, the first award to be supported will be CQ WPX with a target date of April 1st, 2012. (No joke!) Standard LOTW and CQ award fees will still apply. As ARRL CEO Dave Sumner K1ZZ observes, "LoTW has significantly increased interest and participation in the ARRL's DXCC, Worked All States and VUCC awards programs. We anticipate a similarly positive response to the addition of the CQ WPX award. Amateurs will be able to spend more time operating and less time chasing QSL cards." Amen to that!

Having made a big splash across the pond with high-performance VHF+ antennas, the British company InnovAntennas <http://www.innovantennas.com/> has appointed its first American dealer - Hamilton, Ohio's R&L Electronics <http://www.randl.com/>. Featured in European journals such as DUBUS, American "early adopter" hams began trying designer Justin Johnson G0KSC's LFA (Loop Fed Array) and OP-DES

(Opposing Phase - Driven Element System) Yagis. InnovAntennas' American partner is well-known contester Bill Hein AA7XT.

Dinner reservations and Tickets are now available for the 23rd Annual Dayton TopBand Dinner <http://topbanddinner.com/> to be held on Friday evening, May 18, 2012 at the Crowne Plaza hotel in downtown Dayton, Ohio. Frank Donovan, W3LPL will be the main speaker. (Thanks, Tim K3LR)

More HF activity from Thailand is expected soon, at least partially due to the effective emergency search and rescue communications provided by Thai hams during the recent severe floods in that country. According to Fred K3ZO, "Effective immediately Thai authorities have announced that any Thai ham holding a US General Class or Extra Class license can apply to have their Thai license upgraded to Thai Intermediate Class which means they will have HF privileges. Thai authorities have also granted permission for the Radio Amateur Society of Thailand to conduct a Thai Intermediate Class examination on May 19. This will be the first time in nine years that this examination has been offered. The Intermediate Class license affords HF privileges with 200 watts power." This is good news to DXers and contesters - a tip of the cap to the Thai hams for an emergency communications job well done!

The Contest Update has on occasion mentioned articles in High-Frequency Electronics, edited by contest aficionado Gary K9AY. Well, Gary has a new magazine, RF Technology International <http://www.rfti.com/>. The inaugural Jan 2012 issue features include an article on HF aviation receivers and a tutorial on the Magic Tee hybrid combiner/divider which, by sheer coincidence, Gary uses for his receiving antenna system at home. Good stuff!

Stitching Morse code into the fabric of our lives has moved beyond the metaphorical and described in this how-to article <http://yarnover.me/2012/01/13/morse-code-cowl-free-knitting-pattern/> on knitting. (Thanks, Mark N5OT)

If you want to know where that tower base hole would emerge if you kept right on digging, now you can find out at Tunnel to the Other Side of the Earth <http://www.freemaptools.com/tunnel-to-other-side-of-the-earth.htm>. I think I'll need a wet suit. (Thanks, Steve WB8IMY)

Doug KR2Q found out that the version of the Firefox add-on Propfire at the URL given in the last issue only worked with Firefox version 3. Fortunately, he also discovered an updated version <https://addons.mozilla.org/firefox/1253/> that works with the current revisions of Firefox.

This week's handy map gadget was contributed by Bob N6TV who located this interactive topo map <http://bmproto.esri.com/WorldTopoMap/WorldTopographicMap.html> that offers features useful to hams scouting out QTHs and antenna locations. Not only does the map tell you the elevation, it tells you the slope

angle and slope direction of US locations, as well.

Sad news came last week of the death of Aruba contest operator and host, Joop P43JB. Frequent Aruba operator Andy AE6Y recalls, "Joop and Yvonne have been extremely hospitable to visiting hams on Aruba. I and others using the P40L-P49Y station would get together with them on every trip, and have fond memories of drinking Heinekens and Balashis (Aruban beer) on his outdoor patio. There are some pix of Joop (and his key collection and very complex shack) on our website <http://arubaqth.com/social.html>. He will be greatly missed." (Thanks also to Carl AI6V/P40V)

Web Site of the Week - Paul W5DM touched a lot of ham radio heartstrings recently with his post on the TopBand reflector <http://lists.contesting.com/archives/html/Topband/2012-01/msg00186.html> recounting his 75 years of ham radio experience. It makes for great reading - what will we be writing in our memoirs 75 years from now?

WORD TO THE WISE

Attenuation - often neglected, the attenuator button can be your receiver's best friend when a band full of gigantic signals is proving too much to handle. Attention to receiver gain pays big dividends in listening comfort and reducing operator fatigue.

==> SIGHTS AND SOUNDS

This recent video <http://www.youtube.com/watch?v=mooIW92f9hA> of Erin AK4JG's balloon launch and APRS tracking has garnered quite a bit of attention as a good example of the Do-It-Yourself aspects of Amateur Radio. Ballooning is really taking off as a popular ham radio hybrid for students and science-oriented groups. (Thanks, Allen W1AGP)

The position of the Sun in the sky moves around with the seasons and this Astronomy Picture of the Day <http://apod.nasa.gov/apod/ap120121.html> shows the result of a year's worth of photography - in a single shot!

Would you wait for a traffic light at -51 C&#65533;? Watch this video <http://www.youtube.com/watch?v=1Pi9yQQVQeA> to see these residents of Yakutsk, Siberia take the frigid temperatures in stride. (Thanks, Doug K1DG)

==> RESULTS AND RECORDS

Initial results for the 2011 ARRL CW Sweepstakes are now live on the ARRL Contest Branch website <http://www.arrl.org/contest-results-articles>. SSB preliminary results are not far behind. Remember, this article is the "just-the-facts-ma'am" numbers. The searchable database, log checking reports and the Expanded Results article will be online in April. Certificates for the 2011 ARRL DX CW hit the mail today and the Phone contest's certificates and plaques will follow shortly. (Thanks, Sean

KX9X)

2009 ARI International DX Contest results
<http://www.ari.it/images/stories/hf/ARIDX-2009-DX-RESULTS.pdf?> are
now available on the ARI web site <http://www.ari.it/> in the HF >
Contest > Risultati section. (Thanks, ARI HF Contest Manager, Bob
I2WIJ)

Final results of the Portugal Day Contest 2011
<http://www.rep.pt/portugal_day_contest/results2011.html> were uploaded
to the web. The sponsors remind everyone that the rules for the contest
have changed to a 24-hour period. (Thanks, Filipe CT1ILT / CR6K)

OPERATING TIP

Don't forget to turn OFF or clear the RIT after a QSO - or you'll be
off frequency for the next one and wondering why you don't get through
so quickly! Some logging programs allow you to command the radio to do
that at the end of the QSO but it's a good habit to develop on your
own. (Thanks, Tom W8TK)

==> TECHNICAL TOPICS AND INFORMATION

The late G4FGQ created a number of useful calculator utility programs
<http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=14293> such as this
radial calculator <http://www.zerobeat.net/G4FGQ/> that includes the
conductivity of the soil. With it you can begin to answer the question,
"How many ground mounted radials do I need and how long do they need to
be?" All such calculators are a model and probably deviate from an
exact simulation but you can get an idea of what might work. Another
tack is to vary the radial length but keep the number of radials
constant. (Thanks, Bob N6TV)

Fork-lift pallets are cheap, sturdy, and widely available - how
about making some furniture out of them? Like maybe an operating desk
<http://www.instructables.com/id/Pallet-desk/> as shown in this
Instructables article!

Chris N7ZWY has released a paper on his KISS Mixer
<http://www.home.earthlink.net/%7Echristrask/Paper022.html> that
includes a PCB layout for the mixer and an LO driver circuit. The paper
goes into quite a bit of detail including comparisons to other mixer
designs.

In the quest for connector tightening tools, Greg W8WWV came up with
this screwdriver-style tool
<http://www.homedepot.com/h_d1/N-5yc1v/R-100598647/h_d2/ProductDisplay?selectedCatgry=SEAR
CH+ALL&jspStoreDir=hdus&catalogId=10053&navFlow=3&keyword=35-046&Ntpc=1&langId=-1&Nu=P_PAR
ENT_ID&storeId=10051&Ntpr=1&ddkey=Search>
for type F and BNC connectors via the Home Depot stores. If the URL
proves too long for your browser, search for Ideal 35-046.

Speaking of tools...when we go to multiops or Field Days or work parties, it's easy to lose track of your tools. To avoid tool trauma, here's a Boing Boing article with some ideas for marking your tools <http://boingboing.net/2012/01/20/how-to-mark-your-tools-for-ea.html?utm_source=feedburner&utm_medium=feed&utm_campaign=Feed%3A+boingboing%2FiBag+%28Boing+Boing%29> for easy identification. (Thanks, Zhu Zhu Xiao)

Randy AB9GO reminds us to be extremely cautious when using a voltmeter to measure high voltages. Be SURE the meter is adequately. Older meters in particular are often unsafe - such as the popular Simpson 260 that had a 5 kV range. Modern meters such as the Fluke 87 series are rated for 600V category IV and 1000V category III environments, can withstand high voltage transients and are constructed to protect the user against arc flash. Even with all the protection, remember that power supply capacitors store a lot of energy that can do significant damage.

Here's a tip for solder tips from Instructables <instructables.com> that reminds us inexpensive brass kitchen scrubbing pads can be used instead of expensive specialized solder tip cleaners; stick one in a container and dab away!

Ian G3NRW has just spruced up his AIM4170 antenna analyzer resources <http://homepage.ntlworld.com/wadei/aim4170.htm> web page including a recent RadCom article that shows how to set up custom scanning, perform time-domain reflectometry (TDR) measurements and operate it via a WiFi connection.

Magazine Roundup

- elektor magazine <http://www.elektor.com/> for February 2012 contains a construction project for the Pico-C 'small-C' capacitance meter. It's specially designed to measure capacitance below 10 pF such as values used in VHF and UHF circuits or encountered in measuring leakage at HF. Elektor may be available on newsstands or in the library.
- Nuts and Volts <http://www.nutsvolts.com/> columnist George Steber's article "The Radio Whisperer" in the January 2012 issue gives a good account of propagation beacon mode WSPR and includes the design of a simple receiver.
- The March 2012 issue of Sky and Telescope <http://www.skyandtelescope.com/> features two solar telescopes for observing "an active Sun" and techniques for tracking and photographing the ISS.
- In the Winter 2012 edition of QRP Quarterly <http://www.qrparci.org/content/view/7675/118/>, Mike WA8MCQ reminds us that power attenuators are often asymmetrical, meaning that the power rating is different for the input versus the output. Gary K9AY also discusses finding the reason for unexpected behavior by antennas.
- Ed KE4ZNU's column on RFI Bypassing in Circuit Cellar <http://www.circuitcellar.com/> for February 2012 is a close-up look at the behavior of bypass capacitors of various styles at various frequencies. Aimed at electronic design technicians and engineers, the article shows the effect of packaging very clearly and you might be surprised by the behavior of even SMT capacitors!

If you need small waterproof cases for storage, making outdoor connections, go kits, foxes for hunting, and so forth, David K1TTT recommends bulk purchases of various surplus containers from Cheaper Than Dirt. <http://www.cheaperthandirt.com/ItemListing.aspx?catid=290>

Technical Web Site of the Week - Analog Dialogue's "Back Burner <http://www.analog.com/library/analogDialogue/back_burner.html>" section has a lot of good design articles, such as the recent entries on FSK/PSK modulators that use DDS to perform zero-crossing switching and another on using DC-DC step-up and step-down regulators effectively.

==> CONVERSATION

How It's Done

When I was getting my start in DX contesting there was this guy out in Hawaii who was always running enormous pileups at huge rates. Every Friday night, the little pistols and medium guns stood in line on 20 meters and waited their turn to work Katashi Nose, KH6IJ. Beams west, we listened in rapt attention as he picked out full calls one after another and put them in the log. It just wasn't a DX contest until he had you on his dupe sheet.

Thus it was fun to see a February 1968 article by Katashi, long a Silent Key, reprinted from 73 magazine <http://www.archive.org/details/73-magazine> in the latest issue of the Potomac Valley Radio Club newsletter <http://pvrc.org/Newsletters/feb12.pdf>. In the article, "Tips for the CW Contester and DXer", he recounts how he came to be a potent force from a 5000-square-foot lot with tribanders and wires. While the technology may have changed, the game is very much the same as in these few bits of wisdom from the article.

"Would you care to compete in the Indianapolis Classic in your family car? Get the best there is that you can afford, either homebuilt or commercial made. The qualities to look for in a CW receiver are controllable selectivity, fast recovery and freedom from front-end overloading." I'd say that's still pretty good advice!

"One must keep in condition to be able to work a successful contest. Be able to copy 50 words per minute in your head and to take down 35 words per minute solid." This is a good goal for any aspiring Top Gun and there is no substitute for practice. If you have to think about it, you're already behind! Code should be like conversational speech. Regardless of mode, hone your technique until it becomes second-nature.

"Know when special openings are going to take place and be there with proper schedules. Special openings sometimes are of only a few minutes duration. For instance you can work that W1 on 160 meters just as the sun is rising on the East Coast. He will peak up and rise out of the noise level and disappear again only once." There are "special openings" on all of the bands, too, not just the low bands - study long path and skew path and the "midnight specials".

"Don't fold up in the face of competition, the opposition can always blow up a power transformer or have a social engagement..." Today, we call this "keeping your butt in the chair" and there is still no substitute for it, even with automation running half the show.

Here's one tip that probably has seen its day - "Hang on to that ballpoint pen at all times and don't lay it down. Learn to send on the bug while holding the pen in the same hand. The other hand can be arranging papers or adjusting controls while you are sending. Can you imagine picking up a pen and laying it down 8000 times which is what one would do in the course of a good hot contest." The reminder to be efficient in your operating details is as important as ever, though.

I've only touched a few of the treats KH6IJ dished out in that article. It's worth a read for all of us from the littlest of pistols to the topmost of guns. As he sagely observes (ladies, he would have surely included you today), "Traffic handling, ragchewing, net operation, RTTY, VHF, have been tried but there is nothing like a good hot DX contest to test men and equipment." There are a few of those "hot DX contests" on the calendar - mahalo, Katashi - see you there!

73, Ward N0AX

==> CONTESTS

1 February through 14 February 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American Sprint--CW, from Feb 5, 0000Z to Feb 5, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/>

North American Sprint--Phone, from Feb 12, 0000Z to Feb 12, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/>

School Club Roundup--Phone,CW,Digital, from Feb 13, 1300Z to Feb 17, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T), Class, S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup>

SNS and NS Weekly Sprints--CW, from Feb 3, 0200Z to Feb 3, 0300Z. Bands (MHz): 1.8-14. Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

YLISSB QSO Party--CW, from Feb 4, 0000Z to Feb 5, 2359Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 18. Rules <http://www.ylsystem.org/>

EPC WW PSK Contest--Digital, from Feb 4, 0000Z to Feb 5, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.epcwwdx.srars.org/index.php/contest-rules.html>

Vermont QSO Party--Phone,CW,Digital, from Feb 4, 0000Z to Feb 5, 2400Z. Bands (MHz): 1.8-28, 50,144. Multiple operating periods. Exchange: RS(T) and VT county or S/P/C. Logs due: 30 days. Rules <http://www.ranv.org/>

Ten-Ten Winter Phone QSO Party--Phone, from Feb 4, 0001Z to Feb 5, 2359Z. Bands (MHz): 28. Exchange: Call sign, name, QTH, 10-10 number. Logs due: Feb 20. Rules <http://www.ten-ten.org/>

Black Sea Cup International--Phone,CW, from Feb 4, 1200Z to Feb 5, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and org'n ID, member nr or ITU zone. Logs due: 30 days. Rules <http://www.bscc.ucoz.ru/>

FYBO Winter QRP Field Day--Phone,CW, from Feb 4, 1400Z to Feb 4, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T), S/P/C, name, power, temp in deg F. Logs due: 30 days. Rules <http://www.azscqrpions.com/>

Minnesota QSO Party--Phone,CW,Digital, from Feb 4, 1400Z to Feb 4, 2400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.850, 3.550, 7.050, 14.050, 21.050, 28.050; SSB 1.870, 3.850, 7.250, 14.270, 21.350, 28.450. Exchange: Name and MN county or S/P/C. Logs due: Mar 15. Rules <http://www.w0aa.org/>

Straight Key Party--CW, from Feb 4, 1600Z to Feb 4, 1900Z. Bands (MHz): 3.5,7. Exchange: RST, serial, category, name, age. Logs due: Feb 28. Rules <http://www.agcw.de/>

British Columbia QSO Party--Phone,CW,Digital, from Feb 4, 1600Z to Feb 5, 0400Z. Bands (MHz): 1.8-28. Frequencies: CW 1.815, 3.535, 7.035, 14.035, 21.035, 28.305; SSB 1.845, 3.85, 7.23, 14.25, 21.3, 28.4; Dig per band plan. Exchange: RST and BC district or S/P/Territory or DX. Logs due: Mar 31. Rules <http://orcadxcc.org/>

Delaware QSO Party--Phone,CW,Digital, from Feb 4, 1700Z to Feb 5, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.825, 3.55, 7.05, 14.05, 21.05, 28.05, 50.95; SSB 1.86, 3.96, 7.26, 14.26, 21.36, 28.36, 50.135; Digital per band plan. Exchange: RS(T) and DE county or S/P/C. Logs due: 30 days. Rules <http://www.fsarc.org/>

XE Int'l RTTY Contest--Digital, from Feb 4, 1800Z to Feb 5, 1759Z. Bands (MHz): 3.5-28. Exchange: RST and XE state/district or serial. Logs due: 30 days. Rules <http://www.fmre.org.mx/>

ARS Spartan Sprint--CW, from Feb 7, 0200Z to Feb 7, 0400Z. Bands (MHz): 3.5-28. Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

CWops Monthly Mini-CWT Test--CW, from Feb 8, 1100Z, Multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member

number or S/P/C. Logs due: 2 days. Rules
<http://www.cwops.org/onair.html>

YL-OM Contest--Phone,CW,Digital, from Feb 10, 1400Z to Feb 12, 0200Z.
Bands (MHz): 1.8-28. Exchange: Call sign, RST, serial and S/P/C. Logs
due: 30 days. Rules <http://www.ylrl.org/>

CQ WW RTTY WPX--Digital, from Feb 11, 0000Z to Feb 12, 2400Z. Bands
(MHz): 3.5-28. Exchange: RST and serial. Logs due: Mar 1. Rules
<http://www.cqwpxrtty.com/>

Asia-Pacific Sprint--CW, from Feb 11, 1100Z to Feb 11, 1300Z. Bands
(MHz): 7,14. Exchange: RST, serial. Logs due: 7 days. Rules
<http://jsfc.org/apsprint/aprule.txt>

Dutch PACC Contest--Phone,CW, from Feb 11, 1200Z to Feb 12, 1200Z.
Bands (MHz): 1.8-28. Exchange: RS(T) and Dutch province or serial. Logs
due: Mar 14. Rules <http://www.dutchpacc.com/>

Louisiana QSO Party--Phone,CW,Digital, from Feb 11, 1500Z to Feb 12,
0300Z. Bands (MHz): 3.5-28. Frequencies: CW 1.84, 3.54, 7.04, 14.04,
21.04, 28.04; Phone 1.865, 3.865, 7.255, 14.255, 21.365, 28.465; VHF
50.095, 50.135,144.05,144.21. Exchange: Call sign, RS(T), LA parish or
S/P/C. Logs due: Mar 15. Rules <http://laqso.w5yl.org/>

OMISS QSO Party--Phone, from Feb 11, 1500Z to Feb 12, 1500Z. Bands
(MHz): 3.5-28. Exchange: RS, S/P/C and OMISS nr or "DX". Logs due: Mar
30. Rules <http://www.omiss.info/>

New Hampshire QSO Party--Phone,CW,Digital, from Feb 11, 1600Z to Feb
12, 0400Z. Bands (MHz): 1.8-28. Frequencies: CW - 1.815 and band edge +
45kHz; Phone - 1.875, 3.935, 3.950, 7.235, 14.280, 21.380, 28.390.
Exchange: RS(T) and NH county or S/P or "DX". Logs due: Mar 31. Rules
<http://www.w1wqm.org/>

FISTS CW Winter Sprint--CW, from Feb 11, 1700Z to Feb 11, 2100Z. Bands
(MHz): 3.5-28. Exchange: RST, S/P/C, first name, FISTS nr or power.
Logs due: 30 days. Rules <http://www.fists.org/>

RSGB - First 1.8 MHz Contest--Phone,CW, from Feb 11, 2100Z to Feb 12,
0100Z. Bands (MHz): 1.8. Exchange: RST, serial, UK district. Logs due:
Feb 28. Rules <http://www.rsgbcc.org/>

Classic Exchange--Phone, from Feb 12, 1400Z to Feb 13, 0800Z. Bands
(MHz): 1.8-28, 50,144, Frequencies: AM--1.890, 3.880, 7.160, 7.290,
14.286, 21.420, 29.000, 50.400, 144.300; SSB--1.885, 3.870, 7.280,
14.270, 21.370, 28.390, 50.125, 144.200. Exchange: RST, QTH, model of
rcvr and xmtr. Logs due: 30 days. Rules
<http://www.classicexchange.org/>

PODXS Valentine Sprint--Digital, from Feb 14, 8 PM to Feb 15, 2 AM.
Bands (MHz): 1.8-7. Frequencies: 1.807, 3.580, 7.070/7.035 EU/7.028 JA.
Exchange: Name, OM or YL, S/P/C. Logs due: Feb 28. Rules
<http://www.podxs070.com/>

VHF+ CONTESTS

School Club Roundup--Phone,CW,Digital, from Feb 13, 1300Z to Feb 17, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T), Class, S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup>

Vermont QSO Party--Phone,CW,Digital, from Feb 4, 0000Z to Feb 5, 2400Z. Bands (MHz): 1.8-28, 50,144. Multiple operating periods. Exchange: RS(T) and VT county or S/P/C. Logs due: 30 days. Rules <http://www.ranv.org/>

Minnesota QSO Party--Phone,CW,Digital, from Feb 4, 1400Z to Feb 4, 2400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.850, 3.550, 7.050, 14.050, 21.050, 28.050; SSB 1.870, 3.850, 7.250, 14.270, 21.350, 28.450. Exchange: Name and MN county or S/P/C. Logs due: Mar 15. Rules <http://www.w0aa.org/>

Delaware QSO Party--Phone,CW,Digital, from Feb 4, 1700Z to Feb 5, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.825, 3.55, 7.05, 14.05, 21.05, 28.05, 50.95; SSB 1.86, 3.96, 7.26, 14.26, 21.36, 28.36, 50.135; Digital per band plan. Exchange: RS(T) and DE county or S/P/C. Logs due: 30 days. Rules <http://www.fsarc.org/>

Classic Exchange--Phone, from Feb 12, 1400Z to Feb 13, 0800Z. Bands (MHz): 1.8-28, 50,144, Frequencies: AM--1.890, 3.880, 7.160, 7.290, 14.286, 21.420, 29.000, 50.400, 144.300; SSB--1.885, 3.870, 7.280, 14.270, 21.370, 28.390, 50.125, 144.200. Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://www.classicexchange.org/>

Milwaukee FM Simplex Contest--Phone, from Feb 12, 1900Z to Feb 12, 2130Z. Bands (MHz): 50-440. Exchange: Call sign and grid square. Logs due: Mar 12. Rules <http://www.w9rh.org/>

Maine FM Simplex Challenge--Phone, from Feb 12, 1900Z to Feb 12, 2300Z. Bands (MHz): 144. Frequencies: FM simplex frequencies only. Exchange: Call sign, power, city name. Logs due: 30 days. Rules <http://www.qsl.net/ws1sm/contest.html>

==> LOG DUE DATES

1 February through 14 February 2012

- February 1 - Locust QSO Party <http://www.k6vva.com/lqp/LQP55_2012_Rules.pdf>
- February 4 - North American QSO Party, SSB <http://www.ncjweb.com/naqprules.php>
- February 7 - Kid's Day Contest <http://www.arrl.org/kids-day>
- February 7 - EUCW 160m Contest <http://www.agcw.de/eucw/eu160.html>
- February 7 - ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>
- February 12 - QRP ARCI Fireside SSB Sprint <http://www.qrparci.org/content/view/8391/118/>
- February 13 - UBA DX Contest, SSB <http://www.uba.be/en/hf/contest-rules/uba-dx-contest-rules>

- February 14 - WW PMC Contest
<http://www.s59dcd.si/english/index.php?option=com_content&view=article&id=72&Itemid=114>
- February 14 - MI QRP January CW Contest
<http://www.qsl.net/miqrpclub/contest.html>
- February 14 - UK DX Contest, RTTY
<http://www.ukdx.srars.org/ukdxc.pdf>

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

** MMMonVHF Newsletter / No.1 - WEEK 05/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-02-01
We try to distribute our Newsletter, once a week on thursday;
if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 **

The team of MMMonVHF is very proud to publish the results of the
"Best VHF DX expedition 2011"

During the voting period, Jan 1th to Jan 20th, we counted 145 voters,
the highest number since 2007.
These voters were from 25 different countries and they have made 353
votes for 50 different expeditions. All these expeditions were
published on the REVIEWS pages of MMMonVHF during the year 2011:
http://mmmonvhf.de/review.php

The voting was divided in a section MS (terrestical) and EME

The winners:

SECTION MS

1st place and "Best VHF MS expedition 2011" : C37MS
2nd place: 7P8EME
3rd place: US8ZAL/P

SECTION EME

1st place and "Best VHF EME expedition 2011" : C56EME
2nd place: 7P8EME
3rd place: 8P9DL / 8P9MS / 8P9HP

C37MS was organized by Chris, PA2CHR, who is known for many
expeditions in the past.

C56EME was organized by Rene, PE1L, together with Eltje, PA3CEE, and
Johan, PE9DX. This team set a new worldrecord with making 361 initials
in 10 days from Gambia.

On behalf of the whole VHF-community, the team MMMonVHF is congratulating
the members of both expeditions with their title of honour. This is our
way to thank them for their efforts and great expeditions.

But our thanks and respects are also going to all who went on expeditions
and spended time and money in giving us new DXCC's and squares and we hope
that many more are encouraged to do so also!

As always we also give an extra T-shirt to one of the voters that was
selected random. The winner of this T-shirt is Eene, PA3CEG.

The complete results are published om the MMMonVHF webpage:

http://mmmonvhf.de/trophy.php

SOURCE: Jani, HA5CRX, on behalf of the team of MMMonVHF

** MS Sprint Contest 2011 **

Every year MMMonVHF and DUBUS are organizing the MS Sprint Contest
around the maximum of the Perseids meteorshower. The logs have been
processed and the winners for 2011 are known!

Section QRP

1st Place: ON6NL
2nd Place: UT5U
3rd Place: RK1AA/1

Section QRO

1st Place: RX1AS
2nd Place HB9FAP
3rd Place UT2UB

Section Team:

QRP F/SV1NZX
QRO US8ZAL
/P YU2DX

Best station outside Europe

W7OJT

Complete list of results and soapbox is available on:
http://mmmonvhf.de/ctest.php?year=2011

All stations will receive an E-award from the contestmanager DK5EW.
The team of MMMonVHF and DUBUS congratulates the winners of each section.

SOURCE: Erwin, DK5EW, on behalf of the MMMonVHF-team

** Meteorscatter February / March 2012 **

Only minor showers hit the Earth in February - March. The most significant is
Capricornids / Sagittariids (peaking February 2nd), a medium-ZHR daytime
shower; its radiant culminates at relatively low elevation in northern
hemisphere skies. Sporadic meteors have reached their seasonal minimum,
but MS contacts are still possible, especially in early morning hours.
Have a look to MS predictions for February - March 2012, at our
MMM MS-Propagation page. The page will be updated end of month for February
and March.

****
HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire (PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on
the equator.

The plan is to leave May 21st and build up the station before the weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit insecure but
we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We have to
come back as often as possible. We can't resist....

73 Rene PE1L and Eltje PA3CEE

SOUrCE: Rene, PE1L, and Eltje, PA3CEE direct to MMMonVHF

****

** 3C0, ANNOBON ISLAND **

Operators Elmo/EA5BYP and Javier/EA5KM will once
again be active from Annobon Island (AF-039) and Bioko Island (AF-010,
DXCC - Equatorial Guinea) using the callsigns 3C0E and 3C6A, respectively.

According to their Web page they arrive at Malabo, Equatorial Guinea, by
the middle of February. (dates to be determined). In Malabo, they will
purchase all needed provisions as there are on stores on the island of
Annobon. A representative of the Ministry will also be traveling with
them to Annobon. If they have free time, they will have a active station
on the air on CW or SSB and RTTY using the callsign 3C6A from Malabo,
Bioko Island, Equatorial Guinea. Then they will travel to Annobon and
be active as 3C0E. Activity will be on 160-6 meters. Suggested frequencies

are:
CW - 1826.5 (*RX), 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 3785, 7075/7145, 14190, 18140, 21295, 24960 and 28480
RTTY - 3580, 7035, 10140, 14082, 18102, 21082, 24920 and 28080 kHz
6m - 50.104/CW and 50.145/SSB MHz
RX AS/OC 1821.5
RX EU/NA 1834.0
QSL both callsigns via EA5BYP: Elmo Bernabï¿½ Coll, P.O.Box 3097,
03080 Alicante, Spain. They are looking for sponsors for this very
expensive operation. For more details and updates, watch the Web page at:

** Spratly Islands, 9M0 **

Plans for the expedition to Layang Layang, Spratly Islands are developing.
A large team of operators from Malaysia, Japan and England, divided up
into three groups, is expected to be active as 9M0L indicatively between
5 and 17 April. A website is under construction at http://9m0l.legendchew.com/

SOURCE: (Sixitalia Weekly) 30 Jan. 2012

** Niue, ZK2 **

A German team consisting of Heidi DK1MA, Sid DM2AYO, Rolf DL7VEE, Jan DL7JAN, Klaus DK1AX, J?rgen DF1AL, Heye DJ9RR, Dietmar DL2HWA and Uwe DJ9HX plan to be active as ZK2C from the Namukulu Cottages, located in the north-west part of the Niue Island (IOTA OC-040, WFF ZLFF-021, WLOTA 2139, WW Loc. AH51BB), from 3-17 February, 2012. They will be QRV on all bands (160m to 6m) in CW, SSB and RTTY with three stations on air simultaneously using 500 watt solid state amplifiers and various antennas. QSL Bureau via DL7JAN or direct and OQRS.
Online log will be available at ClubLog. Further information and updates on their website at: http://zk2c.hkmann.de/

SOURCE: dx-world.net via ICPO

** Ogasawara, JD1 **

JD1, OGASAWARA. Koji, JI1LET, will once again be active as JI1LET/JD1 from Chichijima Islands (AS-031) between April 29th and May 5th. Activity will be on 80-6 meters using CW, SSB and RTTY. QSL via his home callsign.

SOURCE: Ohio/Penn DX Bulletin #1045

** St. Kilda, GM **

Operators Allan GM3OZB, Barry GM3YEH, Bill GM3ZRT, John GM0DJG, Gordon MM0BIM and Declan EI6FR will be active as GM7WCO/p from St. Kilda Islands (EU-059, Grid Loc. IO57), individual island not known at this time, from 16-21 May, 2012. QRV on on HF and 6m using CW, SSB and possibly RTTY. QSL via GM7WCO, bureau or direct.

SOURCE: [rsgbiota.org] via ICPO Bulletin (13-20 January 2012)

** 4U1, ITU HQ (Special Activity), qrv HF and 50 MHz **

The International Amateur Radio Club, 4U1ITU, will be operating with the special callsign 4U1WRC between January 23rd and February 17th. Activity will take place during the ITU World Radio Conference 2012 (WRC-12) from Geneva, Switzerland. Operations will be from 160-6 meters, eventually higher, all modes.
All QSOs will be confirmed with a special QSL available via 4U1ITU. Short updates of the operation will be posted on twitter at: http://twitter.com/4u1itu
More detailed information is availabe on the Web site at: http://life.itu.int/radioclub

SOURCE: [GOLIST] Ohio/Penn DX Bulletin #1046

** Democratic Republic of Congo, 9Q6

Barney, ZS4U (ZS6TQ) will be active from the Democratic Republic of Congo between March 10 to April 5, 2012 as 9Q6/ZS4U.

QRV on 40-6m CW, SSB and PSK.

QSL via home call.

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV
(e-mail: dj5av@darc.de)

3B8, Mauritius:
Find Slavo, SP2JMB, and his XYL Dorota, SP2TO, February 5th - 25th as
3B8GY on Mauritius (AF-049) using all HF bands on CW, SSB, and RTTY.
They will also take part in ARRL International DX CW Contest.
QSL via SP2JMB.

Patrice (Pat), 3B8FA, is on the air again after a long break. Buzz,
NI5DX, manages his QSLing for contacts since January 23rd, 2012. Buzz
is just designing the QSL, the printing will take another 5 weeks.

6Y, Jamaica:
Look for Gerhard, OE3GEA/6Y5, working holyday stile on JaMayka
(NA-097, WLOTA 0214) February 2nd - 15th using 50 Watts to an
Outbacker antenna and/or dipoles on CW only. QSL via homecall.

FJ, St. Barthelemy:
Callsign TO3J from NA-146 is operated February 1st - 7th by Takayuki,
JA1MZL, and Yutaka, JJ1LIB. They will use 160 - 10 meters on CW, SSB,
and RTTY. QSL via JA1HGY.

FS, St. Martin:
Benoît, FS/F8PDR, operates from the French part of the island (NA105,
WLOTA 383, DIFO FS-001) February 5th - 16th. There might be a trip to
St. Maarten operating as PJ7/F8PDR. Main interest is to 80 - 10 meters
on CW and RTTY using 100 watts and dipoles or verticals. QSL via
homecall, LoTW.

FW0/TW0, Wallis & Futuma (Update):
Laci, HA0NAR, and XYL Susanne, HA0SR, as FW0NAR will stay until
February 20th. There are still plans to visit Futuna Island (OC-118)
as TW0F. QSLs via HA0NAR. http://fw0nar.blogspot.com

HK0, Malpelo Island (Update):
Obviously some parts of the computer log are lost. If you do not find
your QSO after the correction of January 27th you better look for
another contact.
http://69.89.25.185/~trexsoft/t-rexsoftware.com/hk0na

HS, Thailand:
John, ZB2JK, will be on Phuket (AS-053) February through April as
HS0ZIQ using 40 - 10 meters with an FT 1000 MP, 200 watts, and home
brew antennas. QSL via ZB2JK after mid of April, direct only.

Currently Eddy, ON4AFU, as HS0ZJF/8 operates from Koh Samui Island
(AS-101) and with same call February 5th through 14th from Koh Butang
(AS-126). Look for him February 16th through 25th as XU7AFU from
Kampang Song in Kambodscha. QSLs via homecall. http://www.on4afu.net

J3, Grenada:
Team #1 der "Buddies in the Caribbean" with Chris, W6HFP, Budd, W3FF,
Bill, W7ZT, Steve, WG0AT, Mike, KC4VG, Guy, N7UN, Paul, KB9AVO, and
Weymouth, K8EAB, will be on a mini DXpedition February 1st through 9th.
They will use max. 100 watts and Buddipole antennas on 160 - 10 meters
on CW, SSB, and digital modes. They expect to operate as J3/homecall.
QSLs via homecall, direct only with SASE, LoTW, eQSL.

KG4, Guantanamo Bay:
In February an March there will be several activities from Guantanamo
Bay (NA-015):
4. - 18. February: Ed, KN4KL (KG4KL), on SSTV, RTTY, SSB, PSK, and
perhaps CW.
6. - 14. February: Gary, WB4DNL (KG4DL), mostly on CW.
6. - 23. February: Bill, W4WV (KG4WV) on SSB, PSK, RTTY, and maybe CW.
18. - 25.February: Tip, N4SIA (KG4AS), on CW, SSB, RTTY, and PSK.
25. February - 3. March: Emmett, KD4OS (KG4OS), on CW and SSB.
25. February - 10.March: Stu, K4MIL (KG4SS) on CW, SSB, and RTTY.
QSLs via homecalls.

KH0, Mariana Islands:
Hal, W1NN, and Joe, JA1LZR, will be active through February 4th as NH0J
resp. NH0Z on Tinian with K3, 1,5 KW-PA and lambda/4 verticals and
seperate antennas for receiving on the low bands.

PY, Brasilia:
"Liga de Amadores Brasileiros de Radio Emissao" (LABRE) will be 78 years
February 2nd. For this event there will be activity by stations from all
Brasilian districts and the federal district operating February 1st
through 5th: PT8AA, PP7AA, PP8AA, PQ8AA, PY6AA, PT7AAC, PT2AAA, PP1AAA,
PP2AA, PR8AA, PY4AA, PT9AA, PY9AA, PY8AAP, PR7AA, PY7AA, PS8AA, PY5AA,
PY1AA, PS7AA, PW8AA, PV8AA, PY3AA, PP5AA, PP6AA, PY2AA, PQ2AA) on all
bands and modes - a good chance to complete Brasilian diplomes. Special
call ZY78AA will be activated during the whole month of February.
QSLs via PT2AA. Look for the diplomes of LABRE at:
http://www.labre.org.br/extras/imagens/diplomas_english.htm

RI1, Antarctica:
Oleg, UA1PBA/ZS1ANF, will be at Basis Bellinghausen (WAP RUS-01) as RI1ANF in February/March through late 2012/early 2013. He intends to be on the air as /mm during his voyage with ice-breaker "Ak. Fedorov" late February.

V2, Antigua:
Darren, VA3EGG, will be on holydays in February on Antigua operating 40 - 10 meters as V25DH. QSL via homecall.

V3, Belize:
Alex, DO5ALX (V31RU), and Torsten, DG7RO (V31TF), will go to Corozal in the Northern part of Belize February 4th through 26th and will use RTTY and SSB on the WARC bands. They will be in CQ WPX RTTY contest (11./12. February) as a M/2 operation. QSLs via homecalls.

V6, Micronesia:
William, V63YWR, is a new resident on Federai des Ulithi Atoll, (OC-078). He is using an IC-718 and wire antennas and waits for a Hexbeam. He is using ham radio for phonepatch with AH7G mainly, but does also do some chatting on amateur radio after that. Obviously there is no land line telephone on the island and satellite telephones are to expensive for the inhabitants.

ZF, Cayman Islands:
Paul, W3GQ, and Paul, W3HGT, as ZF2GQ resp ZF2GT will be on Grand Cayman (NA-016) February 4th through 11th. QSLs via homecalls, LoTW after the DXpedition; eQSL on request only.

ZK2, Niue:
Heidi, DK1MA, Sid, DM2AYO, Rolf, DL7VEE, Jan, DL7JAN, Klaus, DK1AX, Juergen, DF1AL, Heye, DJ9RR, Dietmar, DL2HWA, and Uwe, DJ9HX, will present ZK2C from Niue (IOTA OC-040, WFF ZLFF-021, WLOTA 2139, WW Loc. AH51bb) February 3rd - 17th on all bands 10 - 160 meters on CW, SSB, and RTTY - also on 6 meters if the band is found open. There will be 3 stations simultaneosly, K3 and 500-Watts PAs, on various antennas, Spiderbeam through verticals. QSL via OQRS http://zk2c.hkmann.de/ via DL7JAN.

ARRL's LoTW Support for CQ's Awards:
This year will be the start for using LotW also for non-ARRL awards, starting with WPX award in April, other CQ awards to follow.

WUST Award:
Metro DX Club in Chicago newly presents the award "Worked US Territories. http://www.metrodxclub.com/wust_award.htm

OPs needed:
There is still need for two more operators to take part in the upcoming DXpedition to Conway Reef (OC-112, Grid Loc. RG78) September 25th through October 6th. Contact Hrane, YT1AD, (yt5a@yahoo.com) if interested. http://www.yt1ad.info/3d2c/index.html

QSL de OD5NH:
Puzant needs 3$ to send his QSL as post card and he cannot use IRCs in
Lebanon. Postcards also cannot be opened and stolen. He suggests to
send registered letters, no SAE needed, but write his name (never the
call) on the envelope, because he has to sign for it.
The POBox often is changed, look it up on QRZ.com.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

Two websites dealing with a good operating technique are:
DX Code of Conduct: http://dx-code.org/home.html
Ethics and Operating Procedures for the Radio Amateur:
http://www.ham-operating-ethics.org

UPCOMING CONTESTS

4./5.2. AGCW-DL Straight-Key-Party 80m
4./5.2. Mexico International RTTY Contest
5.2. North American Sprint
5.2. February-QSO-Party 2012

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:

EU-089, CU8,9; Western Group; Hermann CT3FN/HB9CRV will be in the
Mexico International RTTY Contest (4/5th February) as CR2V from the
QTH of Antonio/CU8AS (DFP FAZ-02, TWLHD WLH CU-008, ARLHS AZO-016,
WLOTA 0947, DIP AZ-008). QSL via HB9CRV (d/B)
http://www.to-mk.com/neu/

SA-088, PP5, Santa Catarina State South Group: Marcelo/PP5BK, Fabio/PP5BZ,
Edson/PP5VK, Roni/PP5ZB, Jose/PU5ATX and Claudio/PY3OZ will be on the
air from "Santana de Fora" island (SA-088, DIB SC-10) on 40-6 meters
on CW and SSB, also digimodes, if possible. Activity will last February
3rd through 6th as PS5F. QSL via PP5BZ (d/B).

==> + WRC-12: THE FIRST WEEK

By IARU Secretary Rod Stafford, W6ROD

The International Telecommunication Union (ITU) 2012 World
Radiocommunication Conference (WRC-12) began January 23 in Geneva,
Switzerland. This is the "big show" for spectrum allocation matters and
a very important meeting if you are an Amateur Radio operator anywhere
in the world. Every four or five years, a WRC takes place; the last one
was in 2007. Approximately 3000 people are attending WRC-12. These are
government officials, telecommunication industry people and others --
like the IARU -- who have an interest in the use of the radio spectrum.
The agenda items discussed during WRC-12 were established at the
previous WRC in 2007. In the past 4.5 years, there have been many
committee meetings within the ITU to try to arrive at solutions that
```

will satisfy each of the agenda items. In the case of some of the agenda items, several possible methods to satisfy the agenda item have been identified. It is up to the WRC to select the most appropriate method to satisfy the agenda item, that is, to arrive at a worldwide solution to the issue presented in the agenda item. Read more here <http://www.arrl.org/news/wrc-12-the-first-week>.

==> + WRC-12: AGENDA ITEM 1.23 UPDATE

According to Colin Thomas, G3PSM, CEPT Coordinator for Agenda Item 1.23, WRC-12 delegates are progressing with what he calls a "compromise proposal" for an MF secondary allocation to the Amateur Radio Service. Agenda Item 1.23 calls for WRC-12 delegations to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur Service on a secondary basis, taking into account the need to protect existing services.

"Progress was made with a compromise proposal on Agenda Item 1.23, drafted to take into consideration the views of those for and those against an amateur service allocation around 500 kHz," Thomas explained. "This proposal suggests a 7 kHz segment between 472-479 kHz, very close to the CEPT position of 472-480 kHz <http://www.arrl.org/news/european-proposal-for-amateur-secondary-mf-allocation-clears-important-hurdle>.
Initial indications are that this could be acceptable to many administrations and regional organizations. However, various meetings need to take place to have these formally accepted. In order to tidy up the draft for the next meeting of the sub-working group, a weekend meeting of the drafting group will be held. At the time of writing [Saturday, January 28], the NOC (No Change) advocates steadfastly maintain their positions."

==> + FCC NEWS: FCC SETS DATE FOR MEDICAL DEVICES ON 70 CM

In November 2011, FCC Commissioners unanimously agreed <http://www.arrl.org/news/fcc-grants-secondary-service-allocation-to-wireless-broadband-medical-micropower-networks>
to allocate spectrum and adopt service and technical rules for the utilization of new implanted medical devices that operate on 413-457 MHz (70 cm). These devices will be used on a secondary basis as part of the Medical Device Radiocommunication (MedRadio) Service in Part 95 of the FCC rules. In the Federal Register for Friday, January 27 <http://www.gpo.gov/fdsys/pkg/FR-2012-01-27/pdf/2012-1540.pdf>, the FCC announced that the effective date for these new rules is Monday, February 27. The new rules expand the existing MedRadio Service rules to permit the use of new wideband medical implant devices that employ neuromuscular microstimulation techniques to restore sensation, mobility, and other functions to paralyzed limbs and organs. These medical devices hold enormous promise to advance the state of medical care, lower health costs, and improve the quality of life for countless Americans. The rules will allow these new types of MedRadio devices to access 24 megahertz of spectrum in the 413-419, 426-432, 438-444, and

451-457 MHz bands on a secondary basis.

==> + ARRL HQ: SAVE THE DATE! TAKE A VIRTUAL TOUR OF W1AW ON FEBRUARY 12

Join W1AW Station Manager Joe Carcia, NJ1Q, on a virtual tour of W1AW, the Hiram Percy Maxim Memorial Station <http://www.arrl.org/w1aw-antenna-farm>, the Amateur Radio station at ARRL Headquarters in Newington, Connecticut. Carcia will lead this tour via a live webcast on Sunday, February 12 at 5 PM EST (2200 UTC). Anyone with an Internet connection will be able to watch the tour here <http://www.awecast.tv/channels/arrl/>.

"We want viewers of this live Internet tour to feel as if they are actually at W1AW," Carcia explained. "If you came to W1AW in person, you would see the same things that we are going to show on the virtual tour: The three operating stations, the W1AW workshop, the transmitter racks that we use to send out our bulletins and use for the code practice transmission, the control console and Old Betsy <http://www.arrl.org/images/view/web_008.jpg>, Hiram Percy Maxim's personal spark gap transmitter."

Al Petrunti, KA1TCH, of the New Day Group <http://www.newdayhd.com/>, will follow Carcia as he leads viewers through the station. ARRL Staff members, including Media and Public Relations Manager Allen Pitts, W1AGP, and Chief Operating Officer Harold Kramer, WJ1B, as well as local television weatherman Geoff Fox, K1GF <http://www.geofffox.com/>, will also be on hand at W1AW during the tour.

"Hams around the world know of W1AW, and thousands have made contacts with this impressive station -- but most hams never get to see it," Pitts said. "Thanks to Al Petrunti's group, we hope that folks enjoy seeing what's at the other end of the signals. As in all live broadcasts, you never know just what might happen. We invite you to join us." Pitts is producing the live web tour.

This is the second video that the New Day Group has made for the ARRL. In 2011, they created the HR 607 video <http://www.arrl.org/hr-607> that educated radio amateurs of a bill in Congress that addressed certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network using current Amateur Radio spectrum.

==> + ARRL HQ: VOLUNTEER TOUR GUIDES MAKE YOUR VISIT TO ARRL HEADQUARTERS PLEASANT AND INFORMATIVE

When you visit ARRL Headquarters in Newington, Connecticut, the first smiling face you're likely to see is a tour guide. ARRL's Tour Guide program now includes 19 volunteers who donate thousands of hours of their free time per year, giving tours to hundreds of visitors. ARRL's tour guides are an integral part of the ARRL. When not giving tours, they are busy accomplishing tasks in various HQ departments -- sorting QSL cards, working on special projects in the lab, updating the

periodicals archive, and much, much more. Read more here
<http://www.arrl.org/news/volunteer-tour-guides-make-your-visit-to-arrl-hq-pl
easant-and-informative>.

==> +ARRL FIELD DAY: 2012 FIELD DAY PACKET NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL
Field Day, June 23-24, 2012! ARRL's flagship operating event -- always
held the fourth full weekend in June -- brings together new and
experienced hams for 24 hours of operating fun. Field Day packets are
now available for download <http://www.arrl.org/fieldday> and include
the complete rules, as well as other reference items such as forms,
ARRL Section abbreviation list, entry submission instructions, a
Frequently Asked Questions section, guidelines for getting bonus
points, instructions for GOTA stations and a kit to publicize your
event with the local press. A brief one-page flyer with basic "What is
Field Day" information has also been included in this year's Field Day
packet. Amateur Radio clubs and individuals are encouraged to reproduce
this flyer as a handout for information tables.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that
the ARRL is doing on behalf of its members. This installment -- which
covers the month of January -- takes a look the 2012 World
Radiocommunication Conference, the ARRL Board of Directors' 2012 Annual
Meeting, new ARRL books, new antennas at the W1AW antenna farm, FCC
decisions affecting Amateur Radio, reports from the Official Observer
Desk and more. Read more here
<http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-42>.

==> + ON THE AIR: 4U1ITU NOW 4U1WRC DURING WRC-12

4U1ITU <http://life.itu.ch/radioclub/> -- the Amateur Radio station
at the ITU -- will be signing as 4U1WRC during the 2012 World
Radiocommunication Conference (WRC-12), through February 17. The
station will revert to 4U1ITU just in time for the ARRL International
DX CW Contest <http://www.arrl.org/arrl-dx>, scheduled for February
18-19. According to ARRL Chief Executive Officer David Sumner, K1ZZ,
who is attending WRC-12 as the IARU International Secretariat, the
station is in really good shape, with two operating positions capable
of going on any two bands at the same time. "A number of delegates are
active amateurs, so the station should be quite active for the next
several weeks," he said. Amateurs who work 4U1WRC between January
23-February 17, 2012 can receive a special QSL card via the HB9 Bureau
or by QSLing direct to IARC, PO Box 6, CH-1211 Geneva 20, Switzerland.

==> SOLAR UPDATE

Tad "Strolling slowly toward the Sun
<http://www.youtube.com/watch?v=jYix2LttoB0>" Cook, K7RA, reports: Over
the past reporting week -- January 26-February 1 -- the average daily
sunspot number declined nearly 37 points to 62, while the average daily

solar flux was off nearly 21 points to 120.4. The predicted solar flux for the near term is 120 on February 2-5, 110 on February 6-9, 150 on February 10, 155 on February 11-13, 150 on February 14-19, and then 145 on February 20-23. The forecast in mid-January for flux levels at 165 on February 17-21 are but a distant memory. Shortly after the last bulletin was released on Friday, January 27, a powerful X-class solar flare was released at 1837 UTC, but it was not Earth-directed. Look for more information on the ARRL website on Friday, February 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Sugarloaf's Green Eyed Lady <http://en.wikipedia.org/wiki/Green_Eyed_Lady>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 3 -- NCCC Sprint Ladder
- February 4 -- Minnesota QSO Party; FYBO Winter QRP Sprint; AGCW Straight Key Party
- February 4-5 -- Vermont QSO Party; Delaware QSO Party; British Columbia QSO Party; Mexico RTTY International Contest; 10-10 International Winter Contest (SSB); YL-ISSB QSO Party (CW); Black Sea Cup International; EPC WW DX Contest
- February 5 -- North American Sprint (CW)

Next week:

- February 10 -- NCCC Sprint Ladder
- February 11 -- FISTS Winter Sprint
- February 11-12 -- Louisiana QSO Party; New Hampshire QSO Party; CQ WW RTTY WPX Contest
- February 12 -- North American Sprint (SSB); SKCC Weekend Sprint
- February 12-13 -- Classic Exchange (Phone)
- February 13-17 -- ARRL School Club Roundup <http://www.arrl.org/school-club-roundup>
- February 14-15 -- PODXS 070 Club Valentine Sprint (local time)
- February 15 -- NAQCC Straight Key/Bug Sprint; AGCW Semi-Automatic Key Evening

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ARRL CONGRATULATES: RALPH TAGGART, WB8DQT , WINS JANUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for January is Ralph
Taggart, WB8DQT , for his article "Vintage Low Power Radios. "
Congratulations Ralph! The QST Cover Plaque award -- given to the
author or authors of the best article in each issue -- is determined by
a vote of ARRL members on the QST Cover Plaque Poll Web page
<http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your
favorite article in the February issue today.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 4 -- ARRL Virginia State Convention
<http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2012>,
Richmond, Virginia; ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-1>,
Ladson, South Carolina

Amateur Radio Newsline(tm) Report 1799 - February 3 2012

Amateur Radio Newsline report number 1799 with a release date of February 3rd, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amateur radio is still live and well at WRC 2012; an Arizona ham files a petition with the FCC to expand the scope of PRB-1; medical implant devices coming to 70 centimeters on February 27th and meet a young ham who not only flies high altitude balloons but makes amazing videos with the pictures that they capture. All this and more on Amateur Radio Newsline(tm) report number 1799 coming your way right now.

(Billboard Cart Here)

RADIO LAW: WRC-2012 STILL CONSIDERING NEW HAM RADIO ALLOCATION NEAR 500KHZ

Ham radio is very much alive as a discussion topic at the 2012 World Radiocommunications Conference now taking place in Geneva Switzerland. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the latest:

--

Rod Stafford, W6ROD, secretary for the International Amateur Radio Union's Region 2, says from his vantage point, it appears that there are several member countries that are in favor of granting the amateur radio service an allocation somewhere in the 415 to 526.5 kHz range.

It had been proposed to carve out a 15 kHz section for amateur use.

However, Stafford says those engaged in the discussions say there is a need to protect existing services.

And, Stafford says in a report on the WRC proceedings so far that there appear to be a couple of options:

First, a secondary allocation of up to 15 kHz to the amateur radio service on a worldwide basis between 472 kHz and 487 kHz.

Second, two non-contiguous worldwide secondary allocations to the amateur radio service between 461 and 469 kHz and 471 to 478 kHz, totalling 15 kHz.

Third, a proposal for a worldwide secondary allocation of 8 KHz from 472 to 480 kHz.

And, finally, no change or allocation.

He says some countries are concerned that non-direction beacons that operate in the spectrum could be subject to possible interference from any new allocations to amateur radio. Stafford's assessment is that it's still early in the process to determine whether amateur operators will succeed in getting the spectrum allocation.

He says there's one other item of concern to amateur radio operators and the IARU being discussed at the conference.

That's a bid for oceanographic radar applications in the 3 to 50 MHz range.

Stafford says the IARU's position is the oceanographic radar applications are incompatible with the amateur and amateur satellite services in the range 3 to 50 MHz and should not be allocated in bands already allocated to the amateur and amateur satellite service, including 5.250 to 5.450 MHz.

WRC-12 wraps up on Feb. 17 and Stafford promises he'll keep the amateur community apprised of developments as they occur.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

As an aside, the International Amateur Radio Club in Geneva is on the air using the special call 4U1WRC during the 2012 World Radiocommunication Conference. It's operating all modes on 160 through 6 meters until the close of the conference on February 17th. If you work this special commemorative station please QSL via 4U1ITU.

(WRC 2012)

**

BREAKING DX NEWS: A GLOOMY FUTURE FOR DXPEDITIONS TO JAN MAYEN ISLAND

Jan Mayen Island could soon head to the top of the DX worlds most wanted this. This as the result of a recent decision by the Norwegian government that declared most of Jan Mayen a Nature Reserve and banned landings and camping on most of the island. This means that tour operators can no longer visit since the main landing area is part of the Reserve.

The only places left on the island which could be used as landing and camp sites are in the very extreme southern part of Jan Mayen which suffers from extreme weather conditions. Amateur radio operations may still be possible from the two locations but both are difficult to get to due to stormy seas and other severe weather conditions. As such it now appears that the recent JX5O operation was probably the last major DXpedition to Jan Mayen for many years to come.

There is the chance that hams who might be assigned as staff members at the islands Olonkin base will be able to activate Jan Mayen. Late word is that LA9JKA, is to be there beginning March 22nd and is expected to stay until March 2013 but what plans he has to operate from the island at this point are unknown. (Southgate)

**

RADIO LAW: MEDICAL IMPLANT DEVICES COMING TO 70CM ON FEB. 27

Monday, February 27th is the date when medical monitoring and control devices previously approved by the FCC could start showing up in various segments of the 70 centimeter band. Amateur Radio Newsline welcomes Chris Szpila who has this report:

--

As reported here on Newsline, last November the FCC voted to allocate spectrum for use by new implanted medical devices that operate on 413 to 457 MHz range. These devices which range from short range monitors to more advanced diagnostic and treatment gear will be used on a secondary basis as part of the Part 95 Medical Device Radiocommunication Service. The rules established by the FCC allow access 24 megahertz of spectrum on a secondary basis in the 413 to 419, 426 to 432, 438 to 444, and 451 to 457 Megahertz bands.

Amateur radio should hear little in the way of interference from any of these devices to signal reception. What's not known is the effect of nearby high power transmitters from various services across the spectrum to the operation of these devices or the ability of any remote transceiver system to hear their telemetry and send instructions back to these implanted units. Most researchers believe this to be minimal to none at all.

For the Amateur Radio Newsline, I'm Chris Szpila, in Los Angeles.

--

The most important aspect of these devices will be their benefit to mankind by restoring mobility and other functions to paralyzed limbs for those who cannot now use them now. (FCC)

**

RADIO LAW: ARIZONA HAM FILES FOR RULE MAKING TO EXTEND PRB1 TO OVERIDE CCR RESTRICTIONS

A petition to the FCC to extend PRB-1 exemptions to cover outdoor antennas in communities with Condition, Covenant and Restrictions has been filed with the FCC by Arizona resident Leonard J. Umina, W7CCE.

Umina's petition is based on an Equal Rights claim. He says that to establish the assertion it is necessary to ascertain that certain classes of amateurs are and / or were in identical situations with regard to those who received relief from PRB-1 but were not equally

treated by the regulation.

Umina states that what he terms as the "move elsewhere" philosophy of PRB-1 fails to address classes of amateurs who were born into restrictive areas and those who had no part in selecting where they would reside.

Umina notes that because over 66% of Americans now rent and that that Homeowners Association market penetration has skyrocked. This at the same time that the urban population has increased to 75%. As such, Umina suggests that it is finally time for the FCC to act by extending PRB-1 in its present form to negate private contracts better known as CC&R's.

Umina asks that special exemptions be applied to wire antennas so that simple rules exist in allowing for easier participation by youth and those who otherwise might be confused by complex regulation and court decisions. Umina also asks that Shortwave Listener and the commercial shortwave market be considered.

Most important, Umina asks that no significant changes be made which would compromise existing District Court decisions which upheld PRB-1 application. As we go to air the FCC has not yet assigned a rule making designation to W7CCE's petition filing. (QRZ.com)

HAM RADIO IN SPACE: RS-39 NOW ON-ORBIT: RECEPTION REPORTS WANTED

The Chibis-M microsatellite, also known as RS-39, was placed on-orbit from a Russian Progress M cargo spacecraft on Tuesday January 24th. The satellite is designed to study atmospheric phenomena such as Terrestrial Gamma Ray Flashes associated with lightning.

RS-39 also carries CW beacons on 435.215 and 435.315 MHz. Hams hearing these signals are being asked to submit reception reports via e-mail to the Space Research Institute of the Russian Academy of Sciences at amateur-rs39 (at) chibis (dot) cosmos (dot) ru. Each report will be acknowledged with a special QSL card.

We will have more ham radio space related news later on in this week's Amateur Radio Newsline report. (Southgate)

**

HAM HAPPENINGS: ARRL TO PRESENT LIVE WEB TOUR OF W1AW ON FEBRUARY 12

Never seen the ARRL Headquarters station W1AW? Well you can do so vicariously through a webcast. Amateur Radio Newslines Heather Butera-Howell, KB3TZD, has the details:

--

The ARRL and Al Petrunti, KA1TCH, of The New Day Group have teamed up to present the first ever on-line tour of the League's flagship station W1AW. The live webcast takes place on February 12th beginning at 5 p.m. Eastern time.

According to ARRL Public Relations and Media Coordinator Allen Pitts, W1AGP, many hams around the world know of W1AW. Thousands have made contacts with this impressive station, but few ever get to observe it in person.

Pitts who is producing the event says that thanks to Petrunti's media streaming group, people world-wide should enjoy seeing what's at the other end of the signals from W1AW.

Pitts notes that through the webcast viewers will be there as Petrunti, along with local weatherman Geoff Fox, K1GF, and others are given a tour of W1AW by Station Manager Joe Carcia, NJ1Q. W1AGP says that as in all live broadcasts, you never know what might happen.

Again, you can watch the webcast live on Sunday, February 12th beginning at 5 p.m. Eastern at www.awecast.tv/channels/arrl. W1AGP says that he hopes you enjoy the tour.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburgh, Pennsylvania.

--

Al Petrunti, KA1TCH, is no stranger to ham radio video projects. He was the creative force behind the ARRL video about HR-607. More about the New Day Group at www.NewDayHD.com. (ARRL)

**

RADIO LAW: NEW TOWER RULES FOR THE BIRDS

The FCC's new rules affecting tower sitting for certain tall towers, meant to protect migratory birds, have been published in the Federal Register. However, they have not yet become effective.

Some aspects of the new rules adopted in December need approval by the Office of Management and Budget. The FCC will publish a subsequent notice in the Federal Register announcing the effective date.

To recap, towers above 450 feet tall will face more analysis. Owners will need to do an environmental assessment and allow the public time to comment on where a new tower would be placed before construction accomplishing this through methods such as a newspaper notice or local

zoning public notice process. An environmental notice will also be required if an applicant changes the lighting of an existing tower to a less preferred style.

Very few if any ham radio towers are 450 feet or higher and are not affected by the new rules. However they do make for some very interesting reading. You can see these new bird safety tower rules at tinyurl.com/tower-birds-two. (FCC)

**

ENFORCEMENT: ANOTHER FLORIDA UNLICENSED BROADCAST FINE AFFIRMED

The FCC has affirmed a $10,000 fine to Willis Cernogg, Jr. of Miami, Florida. This for willful and repeated violation of Section 301 of the Communications Act by operation of an unlicensed radio transmitter on the frequency 90.7 MHz.

Back on October 25th, 2011, the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Cernogg. The FCC says that Cernogg never filed a response to the N-A-L. So, based on the information before it, the FCC has now affirmed the forfeiture.

As is normal procedure, Cernogg was given the customary 30 days from the January 25th date the order was released to pay the fine or file an appeal. If he fails to do either, the FCC will likely turn the matter over to the Department of Justice for collection. (FCC)

**

PUBLIC SERVICE: HAMS TEAM WITH CRIME STOPPERS IN MISSOURI

Members of the Barry-Lawrence Chapter of Crime Stoppers in Cassville, Missouri are joining forces with ham radio operators. This, to help keep an eye out for the thieves who have been stealing and burning vehicles in two counties.

Katherine Parker, KD0ETX, is the Assistant District Emergency Coordinator for both Barry and Lawrence counties. She says that general warnings could be issued to operators across the region to be aware of the situation and report suspicious activities occurring in their neighborhoods.

During their January meeting, the Crime Stoppers board members also approved offering a reward for information leading to the arrest of those responsible for the hundreds of thousands of dollars in property damage resulting from these recent crime sprees. Chairman John Strong also recommended organizing citizen patrols for parts of both counties, with suspicious activity reported back to local law enforcement agencies. (Cassville Democrat)

**

ON LINE NEWS: QRZ.COM ADDS GRIDMAPPER SERVICE

Another service has been added to QRZ.com. Called the Gridmapper this feature allows you to see the grid square on a Google map of the station you are looking up. A six character square is outlined. This is very handy for VHF and UHF enthusiasts who try to find and activate rare locations in the Maidenhead Grid Square location system. (K8YSE)

**

HAM MARKETPLACE: UK INNOVANTENNAS COME TO NORTH AMERICA

InnovAntennas have come to North America. According to Bill Hein, AA7XT, the full line of high performance British built High Frequency, VHF and UHF amateur radio antennas from InnovAntennas are now available to customers across the United States at R&L Electronics in Hamilton, Ohio.

By way of background, InnovAntennas was launched in 2011 by Justin Johnson, G0KSC. This after his hobby of designing antennas for his personal use led to a flood of make one for me requests from amateur radio operators who recognized that Johnson's designs outperformed they could buy in any U-K store.

Today, InnovAntennas is building antennas at a former boat factory in Canvey Island, England and selling its products directly via InnovAntennas.com and via a network of dealers in Europe, Australia, and now, the United States. Designs include the Loop Fed Array and Opposing Phase - Driven Element System Yagis both of which have become very popular in the world of Moonbounce or E-M-E operations.

For more information on the introduction of InnovAntennas to the United States ham radio marketplace, you can e-mail AA7XT to bill (at) innovantennas (dot) com. You can also check the R and L website at www.RandL.com. (AA7XT)

HAM MARKETPLACE: YAESU HINTING IT WILL BRING OUT C4FM DITIAL VOICE GEAR FOR AMATEUR RADIO

Yaesu is hinting that they will be coming out with new digital amateur radios in 2012.

A new pamphlet discussing amateur digital radios shows the new Vertex Standard APCO P-25 commercial radios, as well as new amateur radios based on the C4FM FDMA digital audio system commonly known as MotoTrobo.

The pamphlet makes it appear that Yaesu will be offering amateur gear based on the MotoTrobo digital standard sometime this. The new vertex radios look identical to their Motorola counterparts.

Our guess is that any launch of such a project would likely take place at the Dayton Hamvention in mid-May. (Adapted from Yaesu Press

Release)

HAM HAPPENINGS: AARA TO HOLD ITS 52ND HAMFEST IN RAYNE LOUISIANA MARCH 9-10

The Acadiana Amateur Radio Association will hold its 52nd annual hamfest at the Civic Center in Rayne, Louisiana. The dates are March 9 and 10 and the event will feature ARRL Education and Technology Program Coordinator Mark Spencer WA8SME as its special guest speaker. For entertainment Norm Helms K5SAC will be heading up the Texas Ham Playboys band.

This hamfest has been designated as the 2012 ARRL Louisiana State Convention and planners say that they are looking forward to seeing many of you there. More information about this fun event is on-line at www.w5ddl.org/hamfest. (KN5GRK)

**

HAM HAPPENINGS: DX UNIVERSITY 2012 APRIL 20TH IN VISALIA CA.

The 2012 DX University will take place on the Friday April 20th in conjunction with the International DX Convention in Visalia, California. Among this years lecturers are Bob Allphin, K4UEE; Bernie Mc Clenny, W3UR; Rusty Epps, W6OAT; Bob Locher, W9KNI, and a number of other world famous DX'ers many of whom are inductees of the CQ DX Hall of Fame. Together they will teach many of the operating techniques for working DX. You will also get the DXpeditioner's view of how DXers should operate to get into the log. Registration is available on line at www.dxuniversity.com. For further information please contact Wayne Mills by e-mail to N7NG (at) arrl (dot) net or Roger Western, at G3SXW (at) btinternet (dot) com. (DX University)

HAM RADIO TECHNOLOGY: ROS JOINS US EXPERIMENTAL SPREAD SPECTRUM TEST STA

R-O-S is among a number of modes raking part in spread spectrum experiments in the USA. The R-O-S data mode group reports that the FCC has issued a Special Temporary Authority to a United States based experimental group for the purpose of investigating Spread Spectrum

modes within the USA.

According to the press release from Graham Brown, G0NBD, Phil Williams, KA1GMN, of Euless, Texas has been issued the first license with the call WF9XJD. Williams was scheduled to become active on February 1st.

Brown says that anyone wishing to apply for a STA or be one of the designated receiving stations, should contact Williams directly at ka1gmn (at) gmail.com for details of the application process. Reports and QSO's are of course, most welcome from all.

The licenses are issued on a 6 month rolling basis and can also be applied directly from the FCC at tinyurl.com/fccsta. (G0NBD, Southgate)

**

HAM RADIO IN SPACE: SUMBANDILLASAT FAILS ON-ORBIT

South Africa's Defence Web reports that the nations second satellite, SumbandilaSat also known as SO-67 is no longer fully operational.

Rob Olivier is the head of Business Development at SunSpace. He told Defence Web that although contact can still be made with the satellite, it cannot capture images. As such it is no longer fulfilling its main purpose.

Oliver added that chances of repairing the satellite onorbit are virtually none. As such SunSpace has moved on to other projects.

SumbandilaSat was damaged during a solar storm in the June of 2011. The power supply to its onboard computer stopped working and the satellite stopped sending back images.

In addition to its primary mission SumbandilaSat also carried an radio payload as well. This consisted of a voice beacon, a store and forward parrot repeater and VHF to UHF FM repeater. (Defence Web)

HAM RADIO IN SPACE: WINNERS OF ARISSAT-1 CHICKEN LITTLE CONTEST ANNOUNCED

AMSAT and ARISS announced the winners of its ARISSat One Chicken Little Contest to predict when the hand-deployed bird would fall from the sky. The contest received 77 entries from 17 different countries, from all continents except Antarctica.

In the Kindergarten through grade 8 grade sector the winner was Cora Haefner, KK4ECV, of Fort A.P. Hill, Virginia. In grades 9 through 12 it was the Cameron School in Lancashire, in the United Kingdom. The Adult category winner was Thomas Frey, HB9SKA, of Birr, Switzerland.

Based on comments sent along with the submissions, a wide variety of techniques were used. These ranged from detailed calculations, to comparisons with past satellites, to guesses based on birthdays. In

the end, both KK4ECV and HB9SKA were within 15 hours of the best data from Space Track. It had reported that the remnants of ARISSat One splashed down in the South Atlantic approximately 07:00 UTC on January 4th.

All three winners have been sent a Chicken Little Certificate, and the congratulations of the ARISSat One team. The contest sponsors say that they also want to tank all those who entered, especially educators who worked with students on this project. (AMSAT / ARISS)

**

ON THE AIR: BCARA TO COMMEMORATE WASHINGTON'S BIRTHDAY ON THE AIR

On the air, word that Ohio's Butler County Amateur Radio Association will be sponsoring special event station W8WRK from February 18th to the 26th. This to commemorate a historic Washington's Birthday amateur radio message relay which was originally accomplished on February 22, 1916 by members of the American Radio Relay League. The special event will be conducted from the clubs home station which is located in the original building of Special Land Station 8ZU. For operating times, frequencies and QSL information please visit tinyurl.com/6og8epf on the World Wide Web. (KD8RLA)

**

DX

In DX, W1NN and JA1LZR will be operational as NH0J and NH0Z, respectively, from Tinian, in the Northern Marianas, until February 4th. Their activity is focused on the lower bands using an Elecraft K3 transceiver an amplifier and a quarter wave verticals. QSL this one as directed on the air.

EA5BYP and EA5KM will once again be active from Annobon Island and Bioko Islands. The pair plan to arrive in Equatorial Guinea by the middle of February and then travel first to Bioko using the callsign 3C6A and then on to Annobon as 3C0E. Activity will be on 160 through 6 meters. Exact dates of this operation should be announced shortly. QSL both callsigns via EA5BYP.

W6HGF, will be on the air stroke FP from Miquelon Island between February 10th through the 20th. Activity will be on 160 through 10 meters but focused on the Digital modes, mostly RTTY. QSL via Logbook of the World or to W6HGF, direct or via the bureau.

NP4Z will be active as EE8Z from the Los Chachos Contest Club in the Canary Islands. This, during the CQ World Wide SSB Contest from March 24th to the 25th. QSL via EA8AY.

Lastly, ZS4U will be operational portable 9Q6 from the Republic of the Congo between March 10th and April 5th. Activity will be limited, probably mainly on the weekends and some days during the week. Listen out for him between 1200 and 1600 UTC on 40 through 6 meters using CW,

SSB and PSK31. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: HACK THE TUBE - A TRIP TO THE EDGE OF SPACE BY TEEN HAM ERIN KING, AK4JG

And finally this week, Erin King, AK4JG, of Columbia, Georgia, may only be a teenager but she has already left a very positive imprint in our world of amateur radio. Cheryl Lasek, K9BIK, has the details on Erin's magic carpet ride to the edge of space and the video that is taking the ham radio community by storm:

--

Erin King, AK4JG has posted a video of her recent amateur radio high altitude balloon mission for the 'Hack the Tubes' project. This, for the Massachusetts Institute of Technology's class of 2016's early admissions program. And when you see it you will find it hard to believe that both the flight and the video are the work of a very, very talented teen.

According to AK4JG, she decided to send her Tube to the edge of space by turning it into an amateur radio high-altitude ballooning project. To accomplish this, Erin used two GPS and APRS-equipped transmitters for payload tracking. One of these signed the call AK4JG-11 and the other beaconed her fathers call sign of K4ETY-11. Each one sent out position packets from the Tube so Erin could follow it on the ground.

Also on board the tube-shaped payload was an Earth viewing GoPro Hero camera shooting high definition video. And capture some breathtaking video of the entire flight it did.

Erin's payload was carried aloft by a Helium filled 800 gram weather balloon. Takeoff took place on January 16th at around 1 P.M. Eastern time from Lumpkin, GA. The entire flight from launch to landing lasted about 2 hours. That is all compacted to 8 [illegible] minutes during which Erin's video takes you from initial payload assembly of the trackers to the edge of space at over 90,000 feet and to recovery of the payload from where it landed in a pine tree.

The video is set to the music of "Circuit" by Sonic Adventure Project. There is no narration. Instead Erin and her very professional video editing skill lets the pictures tell the entire story. You can see it for yourself by taking your web browser to tinyurl.com/AK4JG-balloon video.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Again, you will find Erin's video on-line at tinyurl.com/AK4JG-balloon-video. Go take a look. You will be glad that you did.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350.

Before we go, a note to those listeners who have reported hearing Amateur Radio Newsline played in what might best be called unexpected places and asking why we are doing it. The answer is that we are not. Amateur Radio Newsline only produces a newscast and distributes it via the Internet and automated telephones. We have no transmitting equipment and we broadcast nothing. Since our inception as the Westlink Radio Network back in 1976 right on to today as the Amateur Radio Newsline, we have been and continue to be a ham radio news program supplier and nothing more.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, in sunny Vero Beach, Florida, saying 73 and we thank you for listening.

Amateur Radio Newsline(tm) is Copyright 2012. All rights reserved.

NZART Headquarters Infoline Issue 244

3rd February 2012
NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Correction from Break In Editor

· Philippines Amateur Radio Golden Anniversary

· IARU News

· APRS Digi Licences

· FMTAG

· Golden Shears Award 2012

· Jock White Field Day

>From the desk of HQ…Welcome to the first issue of HQ Info-line for 2012, I hope you all had an enjoyable Christmas and new year festivities.

This issue has some very important dates to remember, so make sure you circle your calendar for the activities that interest you.

Break In will be in your mail boxes any day now, so be sure to take a look at the front wrapper that includes all the Conference registration costs to be held in Nelson over Queens Birthday weekend.

If you have not received Break In, and you feel sure that you have paid your subscription, can you please check that your cheque has been deposited or your credit card debited before you enquire with me as to its whereabouts. There are genuine cases that some may have been misplaced in the mail, however I can assure you, that all those who I am aware have paid have been included in the mailing list sent to the distributors.

Speaking of Break In…I have received the following from John Walker, please make sure you contact him for further details.

An apology. Unfortunately the circuit for the DSB Demodulator (p4-5) was omitted from the Jan/Feb Break-In. It will be included in the next issue of Break-In but meantime pdf copies may be obtained from the Editor

email <john.zl3ib@ihug.co.nz>

Talk soon…Debby ZL2DL

Phillipines Amateur Radio Golden Anniversary

Dear fellow hams from New Zealand Association of Radio Transmitters
[NZART]
The Philippine Amateur Radio League (PARL) is celebrating its Golden
Anniversary this year 2012. To commemorate this milestone of our radio
club, the members have agreed to initiate a commemorative diploma that
can be obtained by establishing 2-way QSO's with its members.

The rules to qualify for the award and sample diploma can be viewed over
at http://www.dx1l.dxhams.net/Awards.htm

Further, throughout 2012, we will be putting on air a special event call
sign 4G0LD. We look forward to having QSO's with you and your
members.

APRS Digi Licences:

NZART recently asked Radio Spectrum Management to put in place a licence
class that would allow us to have multiple repeaters on the same
frequency under a single licence. A similar licence class is available
in the commercial world but is not available to amateur repeaters.

Such a licence would be of great benefit to the APRS community as all
APRS digipeaters could be grouped under one licence paying one fee. This
fee is likely be more than the current individual repeater licence fee

however the benefits would be a net reduction in fees, as well as no extra cost for additional APRS repeaters.

RSM carefully considered the suggestion and, while they saw its benefits to the amateur community, they unfortunately declined to grant us this licence class at this time, suggesting we raise the issue at the next fee review.

NZART is always looking for ways to improve the conditions for amateur radio in New Zealand and we intend to look further at this (and other licensing issues) at the next fee review.

Roy Symon, ZL2KH

President, NZART (Inc)

FMTAG NOTES FOR HQ INFOLINE

PROPOSALS

None this month.

FINAL RECOMMENDATIONS TO COUNCIL

Branch 60 Taupo has applied for a VHF Linking Station (VLS) at Maroanui, located at TOPO50 BF36 634.01 323.75, to provide a link between the Maroanui 675 repeater and the Taraponui 725 repeater. The link transmit frequency will be 147.850 MHz and the receive frequency will be 147.250 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

The current status of Applications can be viewed on the NZART website:

http://www.nzart.org.nz/nzart/fmtag/fmtag-apps-being-processed/

>From the VHF/UHF/SHF Contest Manager:

RESULTS OF THE VHF/UHF/SHF FIELD DAY CONTEST

3rd & 4th December 2011

Congratulations to the overall winning team: ZL4AA.

Also, congratulations to the band winners:

ZL4AA 2 metres and 70 centimetres

ZL2AS 6 metres

ZL1SWW 23 centimetres

The Contest highlight was a 6 metre opening to North America on Sunday the 4th of December.

The full results are available at:

www.vhf.org.nz/results-vhf-field-day-contest-december-2011

THE NEXT CONTEST

The next contest is the DX Weekend Contest, 50 MHz and up, on Saturday the 4th and Sunday the 5th of February 2012. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The contest after that is the Low Band Contest, 50 MHz to 440 MHz, on Saturday the 14th and Sunday the 15th of April 2011. This is the weekend after Easter. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz with Contest Log in the subject line, or by post to:

Contest Manager
Wellington VHF Group

GOLDEN SHEARS WORLD SHEARING COMPETITION AWARD 2012.

1. This Award is offered by Branch 46 NZART to celebrate the Golden Shears Society’s World Shearing Championship Competition, an event of International significance. This competition draws competitors from New Zealand and worldwide. The award will run from Monday 20th February 2012 and conclude at mid night on Saturday 3rd March 2012, the night on which the competition finals are held.

2. The award is available to all amateurs and short wave listeners,

3. Contacts will be confined to 80m SSB, local repeaters and National system. Any contact made on repeaters, National system or with Branch 46 members operating mobile are permitted.

4. New Zealand Stations require 10 points from those listed below:

(a) Compulsory contact with ZL6 WSC 5 points

(b) Contact with Club Station ZL2OA 3 points

(c) Contacts with Branch member’s 1 point

5. Overseas stations require 5 points from those listed above but no compulsory

contact with ZL6WSC is needed.

6. A copy of log details with appropriate fee is to be received at the following

address before the 31st March 2012.

The Award Custodian

Branch 46 NZART

PO Box 860

Masterton

New Zealand

7. Award applications from New Zealand and Australian stations will cost $A/NZ 5.00

8. Award applications from other overseas stations will cost US$ 5.00

9. Award fees cover all NZ postage charges.

10. The Award Certificate will be a colour print portraying a scene of significance to the Wairarapa overprinted with the Golden Shears Emblem.

11. ZL6WSC, ZL2OA and Branch members will operate on a roster basis during the Award period on or about the following frequencies

(a) The Awards Net – 3.677hz SSB most nights.

(b) The repeaters within Wairarapa and the National system will be monitored most evenings.

This information sheet is available by e-mail on application to zl2fc@xtra.co.nz

Jock White Field Day February 25 and 26

Field day is approaching once again.

The event commences at 1500 (local time) on Saturday, with a break from 2400 until 0600 Sunday, then concludes at 1500.

For the up to date rules please see the NZART contest page:

http://www.nzart.org.nz/activities/contest-rules/rules-jock-white-field-day/

Scoring

Each year some teams seem to want to come up with their own score sheets, please use the score sheets which can printed from the following link, it makes my job a lot easier.

http://www.nzart.org.nz/activities/contest-rules/

Incorrectly scored

In 2011 several teams sent in logs with no attempt to score them, or an incomplete attempt. I did score some of these which took a lot of my time, this year they will be listed as a check log.

If you are struggling with scoring, contact me as I am more than happy to help.

Branch Number

The rules in the past have not allowed flexibility for field teams that need to operate a distance from what has been arbitrarily referred to as their “branch area”. Examples for the need for this have included:

A branch where a number of members live away from the branch area

A field team or single operator not aligned to a particular branch wishing to use a branch number.

Rule 12 has been altered to accommodate these contingencies:

12. Branch Number

12.1 Field stations will usually operate in the area of their Branch. They will use the NZART Branch number in their cypher.

12.2 It is recognised that for various reasons some field teams may need to venture beyond their ‘normal branch area’ to operate.

12.3 Some teams may not have affiliation to a particular branch but wish to operate as a field station. To provide a branch number in this case nearby branches not active in field day should be approached for permission to use their number. (see 12.5 below)

12.4 If the field station chosen location is within another Branch area care must be taken not to clash with the other Branch station. The onus is on the 'moved' station to ensure that there is no clash.

12.5 The Branch number of Branches in recess may be used.

12.6 The field day manager should be contacted well before the event if there is any potential difficulty with the use of branch numbers.

The intention here is to encourage activity and get the maximum number of branch numbers in use, which makes the event more interesting.

I cannot stress the point enough that care must be taken to ensure geographical separation between field stations.

As always, if there is anything that needs clarification, contact me prior to the event.

I look forward to hearing many of you on, I will be part of the branch 22, ZL2KS effort.

Stuart Watchman

Greetings!

Just a few notes to remind you that the next School Club Roundup is approaching February 13-17. You'll find all the information you need about this contest on our website at www.arrl.org/school-club-roundup-scr, including some valuable advice for teachers who are getting students organized to participate for the first time.

You might also want to check out a new flyer ARRL has just released telling kids about "22 Things You Can Do With Amateur Radio." Check it out in our Forms & Media Warehouse at: www.arrl.org/shop/Ham-Radio-Youth-flyer-pack-of-25/

The schedule for 2012 Teachers Institute on Wireless Technology seminars has been announced. Go to www.arrl.org/teachers-institute-on-wireless-technology for details and to download an application. Currently, we do not have confirmation on funding for the proposed session of TI-2 on Space on the Classroom. Check the website in a few weeks for an update on status.

73,

Debra

WIANEWS WEEK COMMENCING FEBRUARY 05 2012.

Burglary at the Domain

CCARC WYONG FIELD DAY

Radio Amateurs Old Timers Club of Australia

CENTRE VICTORIA HAMFEST

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 5 2012.

Aggravated Burglary at the Domain

Domain club rooms in Hobart which belong to REAST were entered by unknown
persons causing substantial damage to locks. The locks that were in place
were more than adequate which goes to show how tooled up the average crooks
are these days.

Although the repeater and ATV shed were entered they were fortunate that
nothing was stolen or damaged.

Security has been beefed up which will hopefully slow up or stop any future
attempts to gain entry.

This serves as a timely reminder to consider the security we have in place in our own shacks. Why not take a look around your own shack after the broadcast and see if there is a loose link in the chain and fix it before it's too late.

FISTS Club Down Under are reporting how Brisbane (VK4) will be active in the event to remember the Titanic from Queensland's Maritime Museum, Southbank and look forward to contacting CW operators from everywhere.
This will be during a FISTS contest, April 15.

Wicen VK3 writing on ARVictoria web site have a timely reminder!

With summer well and truly here radio amateurs are increasingly giving thought as to how to keep their station on air in severe weather conditions that could result in power shortages, storms or fires.

This will enable them to continue to enjoy amateur radio should the power fail, but also it may assist them in learning more about summer bushfires in their area.

Last summer "self-help" groups of radio amateurs regularly got on their local repeater to keep in touch and share information.

To do this of course it is essential to have an independent power source. A diesel or petrol generator can be used to not only keep your radio on air but also give energy for lighting or other household uses.

Many seem to have a back-up 12v battery to keep their rigs on air. These are relatively affordable if bought new or even cheap second-hand. Emergency service authorities also recommend having spare batteries on hand for torches and a battery or wind-up powered broadcast receiver to keep up with the news.

Solar power may also be available.

So this summer have a think about how to stay on air.

Amateur Radio Victoria encourages the use of the major 2m repeaters to keep in touch, particularly on days of total fire ban or Code Red.

Should WICEN (Vic) or anyone else need any repeater to pass emergency messages please give them priority, or follow the guidance of any emergency net control station on a repeater.

On the HF bands there are a number of designated Emergency Centre of Activity (CoA) frequencies. Within the Asia/Pacific Region these are
3.6MHz
7.110Mz

Globally the CoA include 14.3MHz, 18.160MHz and 21.360MHz.

During emergency training exercises and disasters please keep them clear.

(ARVICTORIA)

HAMS ACROSS AUSTRALIA.

VK1

CRARC would like to have a small stash of 2012 WIA Call Books on hand available for members at the upcoming AGM on 25th February.

As they are ordered by the box (25 in a box, and to keep the cost down, CRARC will pay for the shipping) and if you would like one put aside, email the committee (committee@crarc.ampr.org).

(sourced to Glenn vk1nut)

VK2

G'day Everyone, I'm Rod, VK2FVRJ, from the CCARC.

Educating the Coast

On Saturday 18th February, the CCARClub will be running a Foundation Licence course at the club rooms in Dandaloo Street, Kariong

The foundation course starts at 8:30am, followed by the exam the same day.

Higher levels of AR accreditation (Standard and Advanced) will also be conducted on the day, by appointment with the CCARC club's education officer, Chris, VK2YY.

For those interested in taking the courses please email Chris, chrisvk2yy@gmail.com

It is highly recommended that those sitting for the Foundation Licence read the excellent manual ("Your Entry into Amateur Radio") prior to attending the course. Copies of the manual can be purchased from the CCARC, from ARNSW or from the WIA.

That's all from the CCARC - See you at the Field Day!

VK3
web service:- http://www.amateurradio.com.au/news/
Police Roundup http://www.vicpolicenews.com.au/

The biggest of its type in Victoria and the only one that has been supported by all the major commercial traders. They would not miss it and neither should you.

The Centre Victoria RadioFest No. 5 offers three different ways people can sell second-hand radio equipment and accessories, non-commercial lots, bits and pieces.

There traditional table sales, car-boot sales or trailer and van loads. It's your choice!

Add to this interesting program of mini-lectures and this is truly a major event and great social occasion for anyone with an interest in radio.
The Centre Victoria RadioFest, Kyneton Racecourse on Sunday the 12th of February which is mostly under-cover, free tea and coffee, fully catered, or bring your own picnic.

Points are contact are:

Welcome to QNews from VK4WIA.

I'm Geoff Emery, VK4ZPP, and I've been thinking I should repeat the story
I had in VK1 National News a couple of weeks ago this time for VK4 QNEWS Locals.

http://www.wia.org.au/newsevents/news/2012/20120118-1/index.php

On the link given in the text edition of the news is a reminder of the
World Radio Conference being held in Geneva, Switzerland until February 17.

Readers of "Amateur Radio" magazine will have previously seen Michael Owen's
VK3KI, WIA President, explanation of how this conference fits into the
structure of administration of radio but with particular reference to the
amateur service.

Dale Hughes, VK1DSH, will be attending as a member of the Australian
contingent and representing the Wireless Institute of Australia.

Some people ask why the Institute spends its resources in attending these
meetings.

For the Advanced Licencees they have a decision of a past conference for
access to 10MHz, 17MHz and 24MHz collectively referred to as the WARC bands.
At that time the meeting was called the World Administrative Radio Conference
thus we get the acronym of WARC.

It was one of the first acts of this conference in the 21st century to
recommend the removal of the Morse Code requirement which gave "Limited"
licensees access to the HF spectrum below 29MHz.

In participating at the highest international levels of administration
relevant to our hobby the Institute can take credit for maintaining and
improving local licence conditions for all the amateur fraternity.

It may seem very remote to the individual but joining the WIA is a real way
of supporting the hobby both in VK and around the world.

I'm Geoff Emery and that's what I think....how about you?

North Queensland Radio Amateurs will be involved with the AM for ANZAC DAY
event on the 25th of April from 0300UTC,

The Townsville Amateur Radio Club will be operating Club Station AX 4 WIT on
AM and CW in the Club Rooms at West End - situated in a fortified World War

2 RAAF Communications Centre.

TARCinc, led by Mal VK4MSS, will activate a number of World War 2
fortifications in Charters Towers, primarily on Towers Hill.

Participants in the Friendly Afternoon Net on 7115kHz from 0600UTC
will be using Amplitude Modulation, with net control for
the Friendly Afternoon Net from Towers Hill.

During the Friendly Afternoon Net, a message will be released
from Townsville, relayed by participants as accurately as possible
through to Charters Towers and then to the Atherton Tablelands.
This activity to simulate message handling on AM, including the
noise, distortion and fading experienced by message handlers of old.

The annual general meeting for NTARC will take place on 8 February at
Skills Institute Alanvale 7.30pm. The agenda has been published in
the NTATC Yahoo group.

Radio and Electronics Association of Southern Tasmania let us know that
Callbooks & Foundation Licence Manuals are available from the Caltex Service
Station on Main Road MOONAH.
You can also arrange copies by contacting the secretary@reast.asn.au

DISCUSSION POINT

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au
under F-troop.)

When I came out of the examination room where I'd just passed my Foundation
License, after the obligatory congratulations and back slaps, I walked out
into the sun and wondered:

"Now what?"

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Amateur Radio Exams in DR Congo

On January 27 the first Amateur Radio Exams took place in the A.R.A.C.
clubhouse in Kinshasa, Democratic Republic of Congo.

Pascal 9Q1PM did an excellent job preparing the candidates for the test.

All 21 candidates passed!

The exam was supervised by Mr Mpatamana of the Minist&#65533;re des Postes
Nouvelles Technologies de Communication.

The club has great plans to be on the air with their club station 9Q0AR on a regular basis.

Of Martian Lines

A new novel featuring Morse code and radio signals is on the internet.

"Of Martian Lines", is written by Andy Thomas G0SFJ,

It is set on the Mars of two generations in the future, and in modern Russia and Ukraine, this blend of cosmology, radio, space technology and Russian literature - the second novel in the "Dmitri" series - explores the first Russian colony on Mars, and the lies and tensions the first Cosmonaut colonists bring from Earth.

Fiji signals it may switch Radio Australia back on

Andy Sennit reports on the Media Network that Radio Australia may broadcast again from Fiji.

Fiji's coup-installed military government has signalled it is looking at allowing Radio Australia to broadcast inside the country again.

Power to the two transmitters, one in Nadi and the other in Suva, was switched off by the interim government in 2009.

Fiji's permanent secretary of information, Sharon Smith Johns told Pacific Beat's Geraldine Coutts that she is looking at reversing the policy.

FCC sets date for medical devices on 70 cm

The ARRL report that the FCC has permitted medical devices to use 426-432 MHz and 438-444 MHz from February 27.

This utilization of new implanted medical devices that operate on 413-457 MHz will be used on a secondary basis as part of the Medical Device Radiocommunication (MedRadio) Service in Part 95 of the FCC rules.

The new rules expand the existing MedRadio Service rules to permit the use of new wideband medical implant devices that employ neuromuscular micro stimulation techniques to restore sensation, mobility, and other functions to paralysed limbs and organs.

The rules will allow these new types of MedRadio devices to access 24 megahertz of spectrum in the 413-419 MHz, 426-432 MHz, 438-444 MHz, and 451-457 MHz bands currently in the US on a secondary basis.

4U1ITU -- the Amateur Radio station at the ITU -- is now signing as 4U1WRC during the 2012 World Radiocommunication Conference (WRC-12).

The station will revert to 4U1ITU just in time for the ARRL International DX CW Contest scheduled for February 18-19.

==========

NEWS FROM ARNEWSLINE USA

DXCC SEES AN INCREASE IN APPLICATIONS

Interest in DX is growing. So says the ARRL as we hear from Amateur Radio Newsline's Heather Butera-Howell, KB3TZD:

The ARRL reports that it appears as if more amateurs are working DX these days. This in turn means the ARRL's Membership and Volunteer Programs Department, especially the DXCC Desk and the ARRL Incoming and Outgoing QSL Bureaus, are working very hard in processing applications and sending out cards via the different QSL Bureaus.

In 2010, the DXCC Desk processed 7134 applications for initial awards and endorsements. These 2010 applications included 853,462 QSOs. In 2011, the DXCC Desk processed 11,175 applications, representing 1,250,864 QSOs.

Sharon Taratula is the Membership and Volunteer Programs Administrative Manager. She explained that comparing 2010 to 2011 represents a 47 percent increase in the number of QSOs and a 57 percent increase in the number of applications received.

And that's quite an impressive increase in any area of ham radio.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, near Pittsburg, Pennsylvania.

To learn more about this increase in DX, go to tinyurl.com/dxcc-numbers

K5B TO COMMEMORATE THE BATAAN DEATH MARCH

The Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating special events station K5B on March 25th. This, in conjunction with the 23rd annual Bataan Memorial Death March Marathon to be held at the near-by White Sands Missile Range.

K5B will operate from 1000 to 2300 UTC on or near 21.337, 14.330, 7.225, and 3.893 megahertz. A commemorative card will be available by request. If you make contact please QSL with a self-addressed stamped business sized envelope to Special Events Station K5B, in care of the Mesilla Valley Radio Club, P. O. Box 1443 Las

Cruces, NM 88004-1443. All QSL requests must be
received by Friday, April 20th. More information
is on-line at www.n5bl.org/bataan

STUDENT HAM RADIO D-STAR SATELLITE TO LAUNCH LATER THIS YEAR

D-Star should be in space before the end of
2012. Students at the University of Liege in
Belgium are hoping their D-Star based ham radio
satellite OUFTI-1 will be launched towards the
end of this year if at all possible.

Plans originally called for it to be carried to
orbit on the maiden flight of the European Space
Agency's Vega launch vehicle. That now appears
to be out of the question. However team leaders
say that other opportunities have been identified
and discussions are ongoing with at least one launch provider.

If and when OUFTI-1 makes it to orbit it could
mean a lot of those on the fence about purchasing
D-Star based gear might just tape the
plunge. This in turn would likely result in a
major world-wide sales boost for Icom which to
date is the only supplier of D-Star based ham radio gear.

An update on the satellite and plans to get it
into space have been published in the January
2012 issue of the OUFTI-1 Newsletter. That issue
focuses on the current status and near-future of
D-Star based bird. You can read it on-line at
tinyurl.com/oufti-1-2012

NASA AND W5KWQ WORKING ON RELEASE OF FIRST MOVIE SHOT IN SPACE

The first science fiction film shot in space
could be coming to viewers here on Earth. This
after NASA confirms it's almost ready to give approval for the project.

Titled Apogee of Fear, the film was shot by space
tourist Richard Garriott, W5KWQ, during his 2008
trip to the International Space Station. Garriott
shot the basic footage for the film, using
astronauts as his cast. He then added scenes and
visual effects after his return to Earth.

The film was privately shown at Dragon*Con last
year, but has been in legal limbo since
then. This is because it wasn't included in
Garriott's deal with NASA. Now the space agency
confirms that it is working with W5KWQ to
facilitate the video's release. The complete
story is on-line at

tinyurl.com/movie-in-space

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

VK JOHN MOYLE MEMORIAL FIELD DAY March 17-18
VK/ZL AM/CW on ANZAC DAY April 25
VK/ZL Trans Tasman Contest 80 metres SSB May 5
VK Shires Contest June 9-10
VK/ZL Trans Tasman Contest 160 metres SSB June 25
ZL NZART Memorial Contest July First full weekend
VK Remembrance Day Contest August 11-12
WW International Lighthouse Lightship Wknd August 18-19

FISTS have sponsored a Titanic 24 Hour Sprint on Sunday the 15th April 2012. (0001 to 2359 UTC).

All licensed Amateur Bands except the WARC Bands.

Recognising the 100th anniversary of the loss of the RMS Titanic on the 15th April 1912. This event is to be a standard exchange, between stations.

Scoring: -
10 Points for any Titanic special events station
5 Points for a FISTS HQ Station (GX0IPX, GX3ZQS, MX5IPX, VK2FDU, ZL6FF, JL3YMV, KN0WCW)
3 Points for a FISTS Affiliated Club Station
2 Points for a FISTS Member
1 Point for a Non Member

Logs: - To include Date/Time/Call/Name/QTH/QRG/FISTS No/or Non Member Points.
by e-mail to m0bpt@yahoo.co.uk
in Excel/csv/tabbed word document format if possible.

To be received no later than 30th April 2012.

RD Contest Manager Steps Down

Peter Harding VK4OD has advised the WIA Board that he wishes to stand down as Contest Manager for the WIA Remembrance Day Contest.

WIA President Michael Owen VK3KI acknowledged Peter's contribution as the RD Contest Manger for many years.

Peter asked that his reason for retiring be made public, he needs to undergo treatment for prostate cancer and he wants to remind all men over 50 to make sure that they are checked for this disease."

The WIA Board will be meeting in Melbourne on 18/19 February and will be appointing a new RD Contest Manager then.

Anyone who would like to be considered for that position make sure that they give the WIA Manager Mal Brooks at the WIA office as much information as possible at least a week before the meeting.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Antarctic Activity Week thanks to FISTS downunder

The first teams and individuals are already lining up to be active in the 9th Antarctic Activity Week that will take place February 20-26th.

This is an all band, all mode, world-wide amateur radio event celebrating the international scientific work in Antarctica.

Certificates may be obtained from the World Antarctic Program using the QSLs from the WAP Reference Numbered stations worked.

For more details see: http://www.waponline.it/Default.aspx?tabid=113

DF7ZS will be active from Aruba Island March 21st to the 27th signing P40S. QSL direct to DF7ZS as his address on QRZ.com.

F8APV active from Reunion Island until February 10th signing portable FR. QSL as directed on the air.

G3SWH and G3OLU will be active from the Hawane Resort in western Swaziland between February 21st to the 29th. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Operation will be on CW only on 80 through 10 meters.
QSL via G3SWH

GB80PW Practical Wireless 80th year

In the UK Ofcom have issued the special callsign GB 80 PW to Practical Wireless magazine. This special callsign is to celebrate the publication's 80th year in print.

Practical Wireless Magazine
http://www.pwpublishing.co.uk

ITU HQ Special Activity

The International Amateur Radio Club, 4U1ITU, is operating with the special callsign 4U1WRC until February 17th.

Activity will take place during the ITU World Radio Conference 2012 from Geneva, Switzerland.

Operations will be from 160-6 meters, eventually higher, all modes.

All QSOs will be confirmed with a special QSL available via 4U1ITU.

Short updates of the operation will be posted on twitter at:
http://twitter.com/4u1itu

More detailed information is available on the Web site at:
http://life.itu.int/radioclub

JS6RRR will be operational stroke KH2 from Guam between February 10 and 14. Activity 160 through 6 meters using CW, SSB, FM, RTTY and PSK31.
QSL via JS6RRR.

JA6CNH will be active as XV2CNH from Ho Chi Minh City, Vietnam between
Feb 10 and 15. Activity will be on 160 through 6 meters CW, SSB and the
Digital modes. QSL via JA6CNH, direct only.

Philippine Amateur Radio League 50th anniversary special event

Look for special event station 4G0LD to be active during 2012.

Activity is to celebrate the 50th anniversary of the Philippine Amateur Radio
League (PARL).

QSL via the Bureau.

Also, the P.A.R.L. is sponsoring a commemorative Diploma for amateur radio
stations that have established two-way communications with at least 12 QSOs
with PARL members.

Look for more details at:
http://www.dx1l.dxhams.net/events.htm

T6JM

Another station from Afghanistan is Jose CT1FKN who is signing T6JM.
He is there until mid-June and is mainly QRV on 20m SSB and BPSK31.
QSL T6JM to CT1FKN his home call.

T6KK

Kurt KE7KUS has been active as T6KK since 19 January.
He is based at Bagram Airfield in Afghanistan till mid-February.
QSL info for T6KK is via ke7kus his home call and Logbook of the World.

Malpelo Island DXpedition log problems

Bob, N2OO, QSL Manager for HK0NA reports:

"Be advised that Op A logs from the top of the mountain arrive late and
some QSOs therefore may not be in the current online log until the next
upload. Overall, logs are uploaded about once a day.

If you have any missing QSOs from before January 27, he suggest that you
try to work them again. The HK0NA team apologizes for the inconvenience.

WW SPECIAL INTEREST GROUPS --- ATV (Every pixel tells a story) - Video
arvideonews.com
hamradiotube.com
youtube.com
qdg.org.au

You can receive DATV signals in Hobart.

The Digital TV frequency of 446.5MHz is a standard DVB-T broadcast which
means that many standard and high definition set-top boxes and Digital TVs
may be able to tune into the broadcast.

A directional antenna pointed toward the VK7 domain, with a reasonable amount of gain and a set-top box or TV that can tune 446.5MHz is all you need.

(Justin, VK7TW)

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

Provisional results of the 2011 Islands On The Air contest have now been published. Despite low sun-spots levels, the contest organisers received over 2,300 logs - the highest number yet - covering 632,000 QSOs and sufficient to enable them to adjudicate 75% of all QSOs.

The highest scoring station in the contest was the Bristol Contest Group GJ6YB who operated from Jersey and achieved a score of just under 15 million points from over 3,300 QSOs.

WW SPECIAL INTEREST GROUPS --- ILLW

VK leads the way for ILLW

Among the latest to join the International Lighthouse and Lightship Weekend in August is South Africa, with entries at Great Fish Point and Doring Bays lighthouses.

Australia on 31 is in the forefront with VK3 and VK4 ahead of VK2, VK7, VK5 and VK6.

Germany has a worthy 20 entries putting it ahead of the USA on 15, followed by England with nine.

Among the others are Argentina, Belgium, Chile, Denmark, France, Honduras, Italy, Netherlands, New Zealand, Northern Ireland, Poland, Portugal, Romania, Scotland, Sweden and Wales.

With only 22 countries and 115 entries so far there was a long way to go to last year's record of 55 countries and entries reaching 470.

The International Lighthouse and Lightship Weekend a 48 hour fun event. For guidelines, an entry form and other information about August the 18th and 19th this year visit illw.net

JULY 14 VK4 Wide Bay Hamfest. West Maryborough Scout Hall

JULY 21 VK3 Gippsland Gate Radio & Electronics Club Hamfest @ Cranbourne

NOV 12 VK3 SPARC HAMFEST (ROSEBUD BY THE BAY)

G'day Everyone, I'm Rod, VK2FVRJ, from the CCARC and here's some trivia for you,

The following events all have something in common

1935 - Robert Watson-Watt carries out a demonstration which leads directly to the development of RADAR in the United Kingdom.

1977 - First flight of the Space Shuttle takes place.

2011 - The space shuttle Discovery docked with the International Space Station for the last time.

So what do these events have to do with Amateur Radio?

They all happen on the 26th February, the same day as Amateur Radio's Big Day Out, the CCARC Field Day at Wyong.

So remember, the southern Hemisphere's largest AR event is just three weeks away, and there's nothing trivial about that!

Finally, here's one last piece of trivia for you, Australia's first "King" was born on the 26th February 1945. Our very own "King of the Mountain" - Peter Brock

That's all from the CCARC - See you at the Field Day!

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

[IARU-R2-News 160] Special WRC Report Number Two
2012-02-03

The procedures used by the International Telecommunication Union (ITU) before and during a World Radiocommunication Conference (WRC) seem complicated. They are somewhat complicated but they are understandable with a bit of background.

Each agenda item that will be decided at a WRC has been studied for at least 3 or 4 years leading up to a WRC. ITU Working Parties discuss the issues involved in the agenda item. Compatibility studies, sharing studies, experiments, etc. take place whenever needed so that discussions and decisions can be made based upon facts rather than opinions. Within a year prior to the start of a WRC an important meeting called the Conference Preparatory Meeting (CPM) occurs. The CPM report pulls together all of the information dealing with each of the agenda items and sets forth the various ways, if there is more than one, that an agenda item can be satisfied or decided. By the time of the CPM, most all of the arguments in favor of the agenda item and opposed to the agenda items have been thoroughly discussed in the many meetings that take place regarding each agenda item. When a national administration arrives at the WRC, decisions have generally been made by that administration whether to be in favor or opposed to any particular agenda items. However, it is usually not that clear cut. Some administrations may be in favor if certain adjustments or modifications are made to one or more of the proposed methods to satisfy the agenda item. In other words, discussions and negotiations really get started during the earlier stages of the WRC. For example, Administration X may withhold support or opposition on a specific proposal until other administrations agree to support Administration X.s position on other agenda items that Administration X is very interested in.

At the beginning of the WRC, each agenda item is assigned to a Sub-Working Group (SWG) to allow interested administrations and other interested attendees the opportunity to discuss the agenda item. This is the stage where most of the negotiations and compromises are made in order to arrive at a consensus as to how to decide the agenda item. The preferred way is to have a consensus by the SWG attendees. Many times the consensus is achieved by all parties realizing that the result may very well turn out to be a situation where "everyone is a little bit unhappy".

The flow of the work is that the output of the SWG goes to the Working Group level. After the WG (WG)level deals with the issue it moves to the Committee level. By the time the issue gets to the Committee level, revisions to the work done at the lower levels is generally not done. Once the agenda item passes the Committee level, it goes to the Plenary for two readings. If it passes the two readings the agenda item appears in the Final Acts of the WRC.

There are also times when a consensus by ALL parties is just not possible. An agenda item can move from the SWG stage to the Working Group stage where most administrations have reached a consensus on how to resolve the issue but there are still some administrations that are in favor of No Change (NOC).

Agenda Item 1.23. In the case of agenda item 1.23, there was a good deal of support among administrations at the SWG level for a secondary allocation to amateur radio just below 500 kHz. However, there was strong resistance by several administrations to the allocation based upon a stated concern that amateur operation in that portion of the spectrum could cause interference to Non-Directional Beacons. SWG 4C3 (the SWG dealing with agenda item 1.23) met 12 times over a period of ten days trying to arrive at a consensus on 1.23. Finally, a consensus was achieved on the issue by adding various footnotes dealing with the allocation that satisfied most of the administrations opposing the allocation. At the end of the day, there were still a couple of administrations opposing the allocation. As a result, the SWG elevated the issue to the Working Group level with 2 options to satisfy the agenda item:

1) a secondary allocation to the amateur service in the band 472-479 kHz with certain operating conditions set forth in footnotes to the allocation, or

2.) No Change (in other words, no amateur allocation).

The proposal that has been agreed to by most administrations that support the amateur allocation calls for a worldwide secondary allocation to the amateur service at 472 to 479 kHz with a power limit of 1 watt e.i.r.p., but with a provision for administrations to permit up to 5 watts e.i.r.p. for stations located more than 800 km from certain countries that wish to protect their aeronautical radionavigation service (non-directional beacons) from any possible interference. Proposed footnotes provide administrations with opportunities to opt out of the amateur allocation and/or to upgrade their aeronautical radionavigation service to primary if they wish to do so. In addition to these protections for aeronautical radionavigation, the amateur service must avoid harmful interference to the primary maritime mobile service.

At the Working Group meeting, there was no shifting of positions so the matter was elevated to the next level to Committee 4 with the same 2 options. The Committee 4 meeting takes place on Tuesday, 7 February. I will report on the results of that Committee 4 meeting but based

upon the results thus far, I am cautiously optimistic that the amateurs will have a new secondary allocation at 472-479 kHz.

Agenda Item 1.15. Another agenda item being carefully watched by the IARU is agenda item 1.15 dealing with oceanographic radar. One of the candidate bands for the placement of oceanographic radar is 5.250 to 5.275 MHz. There have been a number of administrations that have granted amateurs access to spectrum around 5 MHz. In fact, one of the bands listed by IARU as a future allocation is 5 MHz. If oceanographic radar is operating in the 5.250-5.275 MHz band, that may impact the ability of the amateurs to obtain an allocation in that area. The candidate bands have not been finalized as yet at the WRC.

Rod Stafford W6ROD
IARU Secretary - Region 2

SARL NEWS - SUNDAY 05 FEBRUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that w&#65533; have to announce that the key of Henry Schoeman, ZS6AHS, became silent on 22 January in the age of 78 years. Years ago Henry compiled a question/answer type of study guide for the RAE and he also trained a number of radio amateurs. H&#65533; was a honorary life member of the Centurion Amateur Radio Club. For the last number of years he and his YL Rhoda stayed near Paarl with a son of theirs.

Our deepest condolences to Rhoda, their other relatives and friends.

In the news today:

SUMBANDILASAT AMATEUR RADIO OPERATION MAY RESUME NEXT WEEK

SARL MEMBERSHIP CLOSE TO 1 600

NEW SARL FAX NUMBER

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SUMBANDILASAT AMATEUR RADIO OPERATION MAY RESUME NEXT WEEK

Ingenuity and innovation by the SumbandilaSat ground control team has resulted in bringing the satellite back to life with a real possibility that Amateur Radio communication may resume next month while the satellite is in sunlight.

The ground stations at SANSA Space operations at Hartbeeshoek and the Electronic Systems Laboratory at Stellenbosch University are receiving telemetry when the satellite's solar panels are illuminated by the sun.

Johann Lochner, ZR1CBC, said that in early June 2011, for an unknown reason (but probably related to a major radiation event on 7 June), the primary controller on the power distribution unit (PDU) powering the On-Board Computer (OBC) stopped responding to commands from the ground station.

It later appeared that the battery had failed and nothing was heard from the satellite for some time. The ground segment software to monitor the passes over South Africa and to contact the satellite to initiate the recovery procedure was automated. After a month contact was made again. This was mid November. "We set in place a planned recovery procedure and within 3-4 days we came to the conclusion that the main battery had failed", Johann said. With SumbandilaSat responding when it is in full sunlight Johan Lochner is confident that some operations will be restored even to the point where it may be possible to do some imaging and have the amateur radio transponder back in operation. More on recovery efforts are on line at www.amsatsa.org.za.

SARL MEMBERSHIP CLOSE TO 1 600

The SARL membership reached 1 563 today, welcome all new members. If you have not yet taken the right step to join SARL, the national body for amateur radio, do it now. Call Mariska on Monday at 011 675 2393.

NEW SARL FAX NUMBER

The SARL has a new fax number. It is 086 299 0566. The old number will still operate for some time. The new number is a fax to email service. The number again 086 299 0566

AMATEUR SEGMENT AT 500 kHz STILL IN THE RUNNING AT WRC12

Rod Stafford, W6ROD, secretary for the International Amateur Radio Union says from his vantage point, it appears that there are several member countries that are in favour of granting the amateur radio service an allocation somewhere in the 415 to 526,5 kHz range. It had been proposed to carve out a 15 kHz section for amateur use.

However, Stafford says those engaged in the discussions say there is a need to protect existing services. Stafford says in a report on the WRC proceedings so far that there appear to be a couple of options:

First, a secondary allocation of up to 15 kHz to the amateur radio service on a worldwide basis between 472 kHz and 487 kHz.

Second, two non-contiguous worldwide secondary allocations to the amateur radio service between 461 and 469 kHz and 471 to 478 kHz, totaling 15 kHz.

Third, a proposal for a worldwide secondary allocation of 8 kHz from 472 to 480 kHz.

He says some countries are concerned that non-directional beacons that operate in the spectrum could be subject to possible interference from any new allocations to amateur radio. Stafford's assessment is that its still early in the process to determine whether radio amateurs will succeed in getting the spectrum allocation.

At WRC12 there is another item of concern to amateur radio. It is a bid for oceanographic radar applications in the 3 to 50 MHz range. Stafford says the IARU's position is that the oceanographic radar applications are incompatible with the amateur and amateur satellite services in that range.

WRC-12 wraps up on 17 February.

SARL NATIONAL CONVENTION

The 2012 SARL National Convention will be held in Pinetown from 20 t0 22 April at the Premier Hotel. The event kicks off with a finger supper at the Highway Clubhouse on Friday evening and a presentation highlighting how South Africa's electronic industry found it's origin in Pinetown and the local development off SSB.

The AGM will be held on Saturday morning at the Premier Hotel followed by a light lunch and two presentations covering VHF antennas and Logbook of the World. The Awards banquet will also be held at the Premier Hotel.

The SARL National Convention will conclude with a breakfast at the Japanese Gardens.

The full programme and booking details will be available on www.sarl.org.za from early next week.

JOIN THE INTECNET TONIGHT

The first INTECNET of 2012 will be held this evening, Sunday 5 February, at 19:30. History will be made when this will be the first INTECNET that will be joined by members of the Namibian Amateur Radio League. The NARL repeater in Windhoek will be linked giving Namibian amateurs the opportunity to participate in the discussions.

The subject will be "Greater DXing with propagation forecasting". Two speakers will be looking at the science of forecasting and practical applications. Dr Donald Danskin from the Geomagnetic Lab in Ottawa, Canada will lead-in the discussion with an overview of how HF forecasts are made. He is currently a visiting scientist at SANSA Space Sciences at Hermanus. Hannes Coetzee, ZS6BZP, will look at the practical aspects of using propagation forecast and how to put them to best use. The discussion will also be available on Echolink.

CLUB NEWS

The Overberg Amateur Radio Club will be operating a field station in the Malagas area on the Breede River during the Field Week End competition. Please contact Andre, ZS1AZ, at 072 729 1680 for further information and directions.

The ZS6KTS repeater is now active on 145,162 5/145,762 5 MHz for a test period. Everyone is invited to submit comments/reports to vubandplanning@sarl.org.za and also to vivdold@bestwebs.co.za.

COMPETITION NEWS

SARL National Field Day

The aim of the SARL National Field Day is to work as many stations as possible and in doing so to learn to operate in abnormal situations in less than optimal conditions. A premium is placed on developing skills to meet the challenges of emergency preparedness as well as to acquaint the public with the capabilities of Amateur Radio. The first leg of the Field Day will take place on the second full weekend of February - 10:00 UTC Saturday 11 February to 10:00 UTC Sunday 12 February 2012.

Activity is on 160, 80, 40, 20, 15 and 10 metres using Phone, CW and Digital modes. There are five categories of participation, namely: Class A - Field Station -Multi operator: Class B - Field Station -Multi operator - QRP: Class C - Field Station -Single Operator; Class D - Field Station -Single Operator - QRP Class E - General stations.

The exchange is the Number of transmitters, Field Day operating Class and Province, e.g. 3AFS = 3 transmitters, Class A in the Free State.

Logs must be sent by e-mail to zs4bfn@netactive.co.za or by post to the SARL National Field Day, Box 12104, Brandhof, 9324. The closing date for your log submission is 19 February 2012. The full set of rules can be found on Page 24 of the 2012 SARL Contest Manual.

LEAP YEAR CHALLENGE

You are invited to take part in the Leap Year Challenge on Wednesday 29 February 2012 and make as many contacts as you can on this day. The challenge starts at 00:01 and ends at 23:59 CAT with phone, CW and digital activity on all bands - HF, VHF, UHF and microwaves. Work a station once only regardless of band, mode or call sign.

Submit your log by e-mail to zs4bfn@netactive.co.za by midnight Friday 2 March 2012. A SARL membership is up for grabs for the log received with the most QSOs made.

If you do not take part, you will have to wait until 2016 to put the date 29 February into your logbook!

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is at low levels. All of the sunspots on the Earth's side of the sun are quiet.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 64.

All the bands from 20 to 10 m and especially 15 m will provide lots of DX fun with the higher bands typically opening first and the lower bands opening later during the day.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

5 February - ANTIQUE WIRELESS ASSOCIATION CW ACTIVITY DAY 5 February - Intecnet tonight at 19:30 CAT. 11 - 12 February - SARL Field Day contest 19 February - last day for submitting logs for SARL field day contest 20 February - Last day for submission of logs for Antique Wireless Association CW activity day. 29 February - Leap year Challenge from 00:01 till 23:59. 21 March - ZS6ERB construction day. 20 - 22 April SARL Convention in Pinetown.

Remember, nominations for SARL awards, which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM may still be submitted. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

IRTS AGM & Rally 2012

The IRTS AGM, Annual Dinner and Rally this year is hosted by Dundalk Amateur Radio Society at the Fairways Hotel on the weekend of April 21st & 22nd 2012. Please keep your diaries free for this special event in our 80th Anniversary year celebrations.

IRTS Request for Return of Trophies

It is time once again to recall all trophies presented at the 2011 IRTS, AGM in Limerick.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday 12th February. or to any IRTS Committee Member before end of February 2012.

This will allow for engraving to be done and allow for repairs if necessary.

Early return will be appreciated. Peter EI4HX at ei4hxperimental /at/ eircom /dot/net

Nominations For Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS Trophies that are required from within the membership, this includes the awards for, 1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2 Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Jim EI4HH, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental /at/ eircom /dot/ net

Closing date for nominations is 29th February 2012.

IRTS 80th Anniversary

IRTS will be celebrating its 80th anniversary this year 2012. Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day, Saturday 17th March 2012 have just been announced. Full rules and information are available at www.irts.ie/cqir or by email to cqir /at /irts / dot/ie

---

Cork Radio Club

Cork Radio Club will meet in the River Room at the Commons Inn, New Mallow Road in Cork City at 8.00 p.m. on Monday next February 6th. Computer logging in the shack will be the theme of the meeting and some popular logging packages will be demonstrated and evaluated. The special call sign EI100T has been issued for the year 2012 to commemorate the 100th sinking of the Titanic and Cork Radio Club members will operate the station from Cobh throughout the year. The main Titanic event will happen over the weekend of April 13/14th and everyone is encouraged to visit the special event station in Cobh. Information on EI100T from Cormac EI4HQ QTHR. Further information on Cork Radio Club is available from Jeremy EI5GM on 083-3317710. Visitors and new members will be very welcome at the Commons Inn on February 6th.

Limerick Radio Club

The Annual General Meeting of Limerick Radio Club will be hold on Wednesday 8 February 2012 in the Limerick Institute of Technology at 7.30pm and all paid up members are requested to attend.

Rally: Limerick Radio Club rally will be held on Sunday March 11th 2012 at the Radisson Blue Hotel on the Ennis Road, Limerick. Doors open at 11am and all the usual traders will attend. Bring and Buy tables can be ordered from Dermot Gleeson EI2GT.

Practical Wireless

Practical Wireless is celebrating its 80 th anniversary this year. Rob Mannion G3FXD/EI5IW, Editor of PW, will be on the air from his home QTH with the callsign GB80PW on the second Thursday of each month, PW publication day, during 2012 on 7 and 14MHz mainly using s.s.b. and PSK31. Hours of operation will be from 1000 to 1600 UTC. Next Thursday, the 9 th, is the second Thursday in February so have a listen on 7 MHz. IRTS send best wishes to Practical Wireless on the occasion of its 80th year of publication.

Galway Radio Experimenters Club

The Galway Radio Experimenters Club will be holding their next meeting in the Anno Santo hotel in Salthill on Monday 6th of February at 8pm. On the night Enda (ei2ii) will be giving a demonstration on the advantages of computerising the ham shack. Beginning with getting the most from your logging software to propagation prediction and DXClusters. Should anybody wish to have help setting up software please feel free to bring along your laptop on the night. We would like to welcome any interested amateurs, SWLs or indeed anyone with an interest in amateur radio

---

South Eastern Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place on Monday 27 February at 8:00 p.m. in the Roanmore GAA Club, Cleaboy Road, Waterford. Members are asked to attend and as always, visitors are welcome.

Please note that membership renewals for 2012 are now due. Membership costs 30 Euro and is available at a reduced rate of 20 Euro for pensioners, students and the unemployed. Please pass your payment on to any committee member or you can renew at the AGM on 27 February. Those who paid in November or December are fully paid up for 2012.

For information about the group, visit www.searg.com and you can also follow SEARG on Facebook and Twitter.

DX News

A large group of German operators will be active from Niue Island in the Pacific until 17 February. They are using the callsign ZK2C and can be found on all bands 160 - 6m using CW, SSB and RTTY. QSL manager is DL7JAN.

The American military base of Guantanamo Bay on the south-east coast of Cuba will be quite active over the coming month. This separate DXCC entity will see at least 6 stations on the air with the KG4 prefix.

Franco I1FQH will operate as 5V7V from Togo in west Africa until 17 February. He will be mainly found on the low bands and QSLs go via his home call and Logbook of the World.

Two Polish amateurs will activate 3B8GY from Mauritius until 25 February. They will use CW, SSB and RTTY. QSL info is via SP2JMB.

Laci, HA0NAR, and his wife Susanne, HA0SR, will be active as FW0NAR from Uvea Island (aka Wallis, OC-054, DIFO FW-001, WLOTA 0389, WW Loc. AH16VS) between now and February 20th. For updates, watch the FW0NAR Blog page at: http://fw0nar.blogspot.com

Meanwhile the Mapelo Island DXpedition (call sign HK0NA) continues, with big signals into Europe on many bands. So far there are almost 100 EI call signs in the log, 15, 17 and 20 metres being the best bands to hear HK0NA in Ireland. Not surprisingly, Top Band QSOs to EI have been few and far between, Doug EI2CN and John EI7BA being the only EIs with 160 metre QSOs in the log at the time of writing. The Mapelo Island DXpedition continues until next Friday, 10th February.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

105. [RAC-Bulletin] RAC Bulletin 2012-006E - Ontario Section restructuring Update

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-05 23:25:10 UTC
From: rac-bulletins@eton.ca
Message-ID: <4F2F0F64.4010700@rac.ca>

RAC Bulletin 2012-006E - Ontario Section restructuring Update
2012-01-05

As announced in Radio Amateurs of Canada Bulletin 2011-021E, a RAC Ontario Section Restructuring Commission was appointed by President Geoff Bawden on the advice of the Vice President for Field Services and with the support of the Board, with the objective of "improving representation to our members and to ensure that the task of our Section Managers is realistic in terms of member access and service". The Commission was tasked to "determine the most effective number of Section Managers and other positions as well as any further such regional divisions which may be required". The difficulties of effectively managing such a large geographical area as Ontario were well known and the need for a greater number of sections had been discussed at various levels for some years.

Under the chairmanship of Bill Unger VE3XT (Ontario Director North/East), the Commission commenced its proceedings on August 7, 2011. The other members of the Commission are Jeff Stewart VA3WXM (Ontario Director South), Dave Hayes VE3JX (Algoma ARC), Vic Henderson VE3FOX (Peel ARC), Al Boyd, VE3AJB (current Ontario Section Manager and Pat Barrett VE3RNH (Barrie ARC). Dave, Vic, Al and Pat are active participants in the ARES. Also included in the deliberations was Ian Snow, VA3QT, special advisor to the Vice President of Field Services and Doug Mercer, VO1DM Vice President of Field Services for RAC. To the best of its ability the Commission sought input from the Ontario clubs and individual Amateurs.

The Commission recognized that Section Managers are elected by the membership to manage a range of RAC programs. They report on Section operations through the Vice President Field Services, who is accountable to the President for the overall operation of the Field Organization, but like the Regional Director, the Section Manager holds overall responsibility within their Section. The Commission also recognized that Ontario is a large province, that Field Services may have different responsibilities based on where in the Province they are located, and that it has proven difficult for one person to coordinate all programs across the province. It recommended that the existing relationship between ARES Districts and EMO Sectors should continue to be respected. Finally, the task force recognized that VPFS has instituted an advisory Council composed of the Section Managers to coordinate Field Organization activities nationally.

The Commission recommended that Ontario be divided into four sections: Ontario North, Ontario East, Ontario South, and the Greater Toronto Area. The Toronto District ARES Coordinator will retain responsibility for the operation of the ARES station located within the Provincial EOC. The Commission recommended that the four Ontario SM.s meet in the form of an Ontario Council to coordinate activities at the provincial level, selecting from amongst themselves a Chairman.

The provincial council will be responsible for the Field Organization administrative functions that sensibly belong at the provincial level, and will appoint appropriately qualified Amateurs to represent the Council to provincial government authorities, non-government organizations (NGO) and external agencies, within the authority vested in the Field Organization.

The Commission recommended that initially the new Section Managers be appointed by the VPFS from qualified persons recommended by the membership. The SM terms would be staggered so that two are elected each odd year and the other two in even years. (Each SM term of office is two years.) The formal Commission Report is available at the RAC website at
http://www.rac.ca/en/rac/public-service/field-org-review/files/120122%20Ont%20Restructure%20Report.pdf.

The RAC Board of Directors approved the Commission's report and recommendations on 26 January, 2012. A consultation process with the Ontario clubs will be initiated immediately for the purpose of soliciting nominations for the interim Section Manager appointments. All Ontario Amateurs are encouraged to contribute to this consultation through their local clubs. If that is not possible, Amateurs may forward their nomination to CFSO (VO1DTM at RAC dot CA). Please recognize that under the Constitution of Radio Amateurs du/of Canada a requirement for appointment/election is that the candidate be a RAC member in good standing.

Geoff Bawden VE4BAW
President

Bill Unger VE3XT
Director Ontario North/East

Jeffery Stewart VA3WXM
Director Ontario South

Doug Mercer VO1DTM
Chief Field Services Officer

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th-January, through Sunday, 5th-February there were 229 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HK0/m, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1006 GRIDS ON THE BIRDS. A special congratulations goes out to OPDX's Webmaster John Papay, K8YSE, for reaching 1006 confirmed grids for his satellite VUCC award!

3W, VIETNAM. Jacek, SP5APW, is expected to visit Phu Quoc Island (AS-128) between March 7-12th. He has applied for the callsign 3W4JK. Activity will be holiday style on 40-10 meters using SSB, PSK31 and RTTY, with possible operations on 6 meters. He mentions that he will use a Elecraft K3 with microKEYER II and Buddipole antennas. For updates, watch Jacek's Blog page at: http://as-128.blogspot.com

5H, TANZANIA. Chas, NK8O/VE3ISD, has traveled to Mwanza on Lake Victoria for several years working there but has never operated any amateur radio from Tanzania. Look for him for the first time to operate as 5H9CP between June 11-22nd. Chas states, "I am primarily a CW operator. QRP and straight key operators, please be ready! After fighting through pile-ups with my QRP station at home, I understand the challenges. The rig on this trip will be an Elecraft KX3 and antenna arrays will depend on the trees, how high I can get the ropes to go, and whether a dipole, loop, or vertical will be the best for the site from which I choose to operate. Times and frequencies will be published [QRZ.com] before my departure for Tanzania, but they definitely will not be written in stone. Operating times will depend entirely on my responsibilities and schedule at the Nyakato Health Center." QSL via NK8O.

5V, TOGO. Franco, I1FQH, will once again be active from Kpalime Village in central Togo, but this time as 5V7V (last year he was 5V7DX). Activity will be between February 5-17th. Activity will be on 160-6 meters using a 20-10 meters Spiderbeam, and on 160-80m and 40-30m using a homebrew vertical. There was mention that he will have an emphasis on lower bands. His rig will be a K3 w/KL500 solid state amplifier and a Yaesu FT-817 for 6 meters. QSL via the LoTW (preferred) or via his home callsign, direct (w/SASE) or by the Bureau. Visit the 5V7V Web page (with an online log check) at: http://www.mdxc.org/5v7v
LAST MINUTE UPDATE: Before going to print, the "DX-World.net" is reporting that Franco, I1FQH, appears to have received some equipment damaged upon arrival due to severe turbulence affecting the aircraft. Franco is now seeing if he can repair anything with the limited means available in Togo.

6Y, JAMAICA. Allen, N2KW, will be active as 6Y0A between March 5-23rd, with as much fishing as radio. He tells OPDXX that he will be a serious entry in the Commonwealth Contest [BERU] (March 10-11th). Outside of the contest, his preference is CW, and he will try to work areas that are "propagation challenged" to the Caribbean. QSL via Kappy, WA4WTG. Kappy is a stamp collector, so please put your unwanted stamps in the envelope. Allen will also upload his log to LoTW.

7P, LESOTHO (Early Announcement). Gert, ZS6AYU, will be active as 7P8GF during next year between February 5-7th and sometime in May in 2013. Activity will be holiday style on 40-10 meters, CW only and using just 100 watts into a vertical. QSL via ZS6AYU (see QRZ.com).

9H, MALTA. Zoltan, HA5PP, will be active as 9H3PP during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/Single-Band (possibly 15 or 10m) entry. Activity outside of the contest will be on 6 and 12 meters, and possibly 17 meters. Zoli informs OPDX that this will be a short operation (3-4 days), and he will leave the Thursday after the contest. QSL via

HA5PP.

A3, TONGA (Update). Haru, JA1XGI, will be active as A35XG from Tonga between April 2-9th, 2012. Activity will be on 20-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. Suggested frequencies are:
CW - 10115, 14015, 18080, 21015, 24895 and 28015 kHz
SSB - 14175, 18135, 21260, 24940 and 28450 kHz
DATA - 10140, 14088, 18102, 21088, 24920 and 28088 kHz

He is expected to use a IC 7000 into a 2 element beam and a fishing rod antenna system on the HF bands. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW. Haru informs OPDX that he now has a Web page up for his A35XG operation at:
http://www.geocities.jp/a35xgtonga

AFRICAN TOUR (Update). Luc, F5RAV, is expected to be active as 6V7T from 6W7RV's QTH in Somone, Senegal, between February 24th and March 7th. During his stay, Luc plans to be in the REF and ARRL contests. After his operation in Senegal, look for him to be active as C5LT (not C56/F5RAV as first announced) from Kololi, The Gambia, between February 27th and March 2, 2012. Original announcement stated that Francisco, EA1BT, is expected to be with him. Activity from both locations should be on SSB and PSK. QSL via his home callsign only direct with 2 USDs or IRC with a SAE. NO BUREAU QSLS, and PLEASE do not QSL via Africa.

C6, BAHAMAS. Operators Bob/N4BP (C6AKQ), Kevin/K4PG (C6APG) and Brian/K7RE (C6ALK) will be in Freeport, Lucaya, Bahamas (NA-080, WLOTA 0527), for the ARRL International DX CW Contest (February 18-19th) as a Multi-Single entry signing C6AKQ. QSL via N4BP direct. They will arrive on February 13th and depart on February 20th. Prior to the contest, they will be operating on the 30/17/12 meter bands, HF bands using CW and probably the Digital modes. QSL via operator's home callsign. All QSOs will be uploaded to LoTW.

C6, BAHAMAS. Operators George, K4IIO/GM0IIO, will be active as C6AZZ between March 1-8th. Activity will be on 160-6 meters, mainly CW with some SSB. His activity will also include the ARRL DX SSB Contest (March 24-25th). QSL via K4IIO.

CN, MOROCCO. Richard, F8FGU, will be active as CN2RN from High Atlas, Morocco (IM72ER), between April 3-30th. Activity will be on the HF bands using CW and SSB. QSL via his home callsign, by the Bureau or direct.

CO, CUBA. Luis, CO6LP, will be active during the ARRL DX CW Contest (February 18-19th) as a Single-Op/Single-Band (160m) entry. QSL via CO6LP.

CQ NEWS. From the CQ Newsroom... "Armond Noble, N6WR, founder and publisher of WorldRadio magazine for 37 years, died February 1st in Sacramento, California after a short illness.
Noble, publisher of Sacramento-based International Travel News magazine, was hospitalized about two months ago, according to Editor David Tykol,

< http://www.intltravelnews.com/>.
WorldRadio was published monthly from July 1971 until the end of 2008, when Noble sold the magazine to Hicksville, New York-based CQ Communications, Inc. With its February 2009 edition, it was renamed WorldRadio Online and became the first online-only major amateur radio publication.
Noble had a long and distinguished career in communications. From 1953 to 1955 he served in the U.S. Army with a VHF radio relay unit. He went on to positions at commercial radio and TV stations around the United States, including: KTWO-TV and KATI in Casper, Wyoming; KOOK-TV, Billings, Montana; KTVB, Boise, Idaho; KERO-TV, Bakersfield, California, WOOD-TV, Grand Rapids, Michigan, and KCRA Radio in Sacramento.
During the Vietnam War, Noble was a reporter-photographer for TIME magazine and the Milwaukee Journal. He also served in the TIME-LIFE bureau in Sacramento."

CR3/CT9, MADEIRA ISLANDS. Operators Adam/DJ0IF and Mek/SP7VC will be active as CR3L from Santana, Madeira Island (AF-014) during the ARRL DX SSB Contest (March 3-4th) as a Multi-Single entry. QSL via DJ6QT. Operators will be active as CT9/homecall before and after the contest. They are expected to be there between February 29th and March 7th. QSL via their home callsigns. Checkout the CR3L station's Web page at: http://www.cr3l.de

CY9, ST. PAUL ISLAND. Reports indicate that an international group of 10 operators will activate St. Paul Island (NA-094) during the middle part of 2012. More details are forthcoming.

DIAMOND DXCC Challenge. Some have noticed that the current operation from the entity Nauru (C21HA) can not be found on the 1937 ARRL Diamond DXCC entity list -- that is because it is NOT there and will not count toward the award. If you go to the bottom of the January 3, 2012, entity list for the Diamond DXCC Challenge Award, it states - "Note: The intent of this 75th anniversary award is to capture the essence and spirit of the first DXCC List with a fun operating activity that allows us to look back and appreciate the wonderful geography of Amateur Radio. We don't intend to try to fit every existing scrap of land into one of the 1937 entities. Some stations we work today will not count towards any entity from 1937. Nor do some of the places we have chosen to represent a certain entity fully match what existed in 1937." The few glitches initially found were corrected on their January 3, 2012, list. It looks like anything after that will just be ignored. If you can't find it specifically on the January 3, 2012, list, it doesn't count, period.

E5, SOUTH COOK ISLANDS. John, N5JB, will be active as E51NJB from the South Cook Islands (specific island was not provided) between February 13-21st (possibly through the 25th). Activity will be mainly CW and he plans to be in the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or N5JB.

FG, GUADELOUPE. Jean-Pierre, F6ITD, will once again be active as FG/F6ITD from Guadeloupe and two islands between February 9th and March 13th. Activity will be on SSB and the Digital modes. He plans to visit the following two islands in the IOTA NA-102 group: Basse Terre Island

(February 9-20th) and La Desirade Island (February 20th-March 13th).
QSL via his home callsign, by the Bureau or direct.

FM/TO5, MARTINIQUE. Valery, R5GA, will be active as FM/R5GA between February 13-20th. Activity will probably be on CW mainly and on 160-10 meters, especially on the 30/17/12 meters. His activity will also include the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/High-Power entry and using the callsign TO5X. QSL via LoTW or via UA3DX.

FR/TO2, REUNION ISLAND (Update). Stephane "Stef", F5UOW, will once again be active as FR/F5UOW from Reunion Island (AF-016) between March 24th and April 14th. During this period he will also use the callsign TO2R between March 26th and April 9th. Activity will be limited to his free time on 40-10 meters mostly on CW. QSL via F5UOW, direct or by the Bureau.

FROZEN NEWS FROM RADIO ARCALA, CR2X, OH8X AND OH0X. Jarmo, OH2BN, sent out the following press release on February 1st: "It is today, February 1st, when the Northern Village of Arcala is gripped by an arctic frost weighing down on the massive antenna structures. The thermometer has hit a 2012 low - an icy reading of minus 27 C (minus 16.6 F) which makes the towers turn rather slowly. Slow are the movements of those frozen people as well.
Radio Arcala has decided to send the Frozen Four (FF) of OH2BH, OH2MM, OH2PM and OH8NC to more southerly latitudes as their balancing act. FF will soon embark on a three week long operating stint taking them to the Azores to activate CR2A and CR2X along with CU2KG and CU2KH in a variety of configurations in the ARRL CW & SSB Contests, in addition to the CQWW 160M SSB Contest.
Up in the Frozen North, their mothership OH8X will be piloted by OH6KZP in the ARRL CW Contest and by OH6UM in the ARRL SSB Contest. Moreover, the team of OH6CT, OH8WW, OH8KTN and OH8GDU will be at the controls in the WPX RTTY Contest on February 11-12. Please note that Kim, OH6KZP, 33, is the latest addition to the team at Radio Arcala. See <www.radioarcala.com>
Additionally, their associate station OH0X from Aland Islands will be activated by Pekka, OH2TA, in the ARRL CW Contest.
As Radio Arcala is now celebrating their 5th anniversary, the WPX SSB Contest of March 24-25 is scheduled to be featured as an all-out team effort when OH8X members, local and overseas, will be gathering at the Northern Village of Arcala to set their strategy for the next few years, using a special callsign to be released at a later date. OH8/CU2CE and OH8/CU2DX will also be activated.
Please note that Radio Arcala is in the process of including a remote station section along with discussing the future of Amateur Radio through their Mission X, both tentatively presented at their website. <www.radioarcala.com>
And finally, QSLing for the 2011 Market Reef, OJ0X activities are well underway and 80 percent of direct QSL requests have been answered. With the completion of this phase, over the next few weeks, the OJ0X log will be posted at LoTW.
CR2A/CR2X QSL via OH2BH

OG8X/OH8X QSL via OH2UA
OH0X QSL via OH2TA "

FW0/TW0, WALLIS & FUTUNA (Update). Laci, HA0NAR, and his wife Susanne, HA0SR, are currently active as FW0NAR from Uvea Island (aka Wallis, OC-054, DIFO FW-001, WLOTA 0389, WW Loc. AH16VS). It seems that they will be able to reach Futuna Island (OC-118) for a few days during the next week. As their baggage is very limited, they report that they will only run 100 watts and use a multiband wire antenna from there. Activity is planned for 40-10 meters, mainly on CW. Due to the very limited condition there, they request that only one QSO for each station will be accepted. No multiply contacts with the Futuna Island station please! Also, online log updating will be also provided daily from there. QSL for both FW0NAR and TW0F via Laci HA0NAR. For updates, watch the FW0NAR Blog page at: http://fw0nar.blogspot.com

H44, SOLOMON ISLANDS. Noel, W1XB, will be active as H44XB from the Solomon Islands between February 7-28th. Activity is expected to be limited to his spare time and from Guadalcanal Island (OC-047). Operations will be QRP (5 watts) on 20/15/10 meters using CW and SSB. QSL via his home callsign.

HK0, MALPELO ISLAND (Update). By the time you read this, the HK0NA DXpedition should be QRT (UPDATE - QRTed at 1647z, Feb. 5th). They were expected to dismantle the last four stations mid-day on Sunday and planned for a sunset departure on the boat back to Buenaventura. The DXpedition team expected to break the record set by VP6DX of 183,686 QSOs by a comfortable margin at the end of their operation. As of print time, the final comments by the HK0NA team state that they have worked over 190k QSO.
The HK0NA log shows (per ClubLOG dated Feb. 5th, at 1646z): 192089 Total QSOs and 43176 with Unique Calls. Mode breakdown: 85229/CW, 90775/SSB and 16082/RTTY. Continent breakdown: 1554/AF, 6/ANT, 14207/AS, 78909/EU, 89088/NA, 1480/OC and 6845/SA. Remember, QSL cards will be available four ways: OQRS DIRECT DIRECT MAIL W/SASE/GS/IRC(s)
OQRS BUREAU QSL BUREAU
Use only ONE of the above ways to save them a lot of extra work. Should you choose to QSL directly to N2OO via direct mail, send your QSO information and SASE/GS/IRC(s) to: Bob Schenck, N2OO, QSL Manager for HK0NA, PO Box 345, Tuckerton, NJ 08087-0345, USA. The DXpedition team intends to upload the HK0NA log to "Logbook of the World" (LoTW) about 6 months after the conclusion of the DXpedition.

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, during the CQ WW WPX SSB Contest (March 24-25th) as a Single-Op/Single-Band (??) entry. QSL via eQSL.

NA-189. Look for a team of ten operators to be active as XF1AA from Isla Isabel between March 16-21th. Activity will be on CW, SSB and the Digital modes. QSL via IT9EJW.

J3, GRENADA. Operators Bill/K4LTA and XYL Ruby/K4UPS will be active as J38A and J37RO, respectively, from Grenada Island between February 8th and March 7th. Activity will be active on 160-10 meters. Look for Bill to be active as J38A during the ARRL DX CW Contests (February 18-19th) as a Single-Op entry. QSL via LoTW or direct to their home callsign. NO Bureau.

J8, ST. VINCENT. Dave, G3TBK, will once again be active as J88DR between February 15th and March 14th. Activity will include the ARRL DX CW Contest (February 18-19th) and the ARRL DX SSB Contest (March 3-4th) as a Single-Op/All-Band/Low-Power entry. He will also be in the RSGB's 74rd Commonwealth Contest (March 11-12th). Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, using CW, SSB and RTTY. QSL via G3TBK, direct or by the RSGB Bureau.

KH0, MARIANA ISLANDS. Sosho, JA4JWD, will be active from here between February 12-16th. Callsign TBA. Activity will be on 80-6 meters using mainly SSB and the Digital modes - perhaps some CW. QSL via JA4JWD.

NP2, U.S. VIRGIN ISLANDS. Operators Randy/N0TG and Jeff/N1SNB will be active as NP2/N0TG and NP2/N1SNB, respectively, from St. Croix (NA-106) between March 7-14th. Activity will be on all bands and modes including 60 meters. QSL via N0TG, direct or Online Request (www.N0TG.com).

P4, ARUBA. Andy, AE6Y, will be active as P49Y from Aruba (SA-036) during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band entry. QSL via LoTW or AE6Y.

PA100, THE NETHERLANDS (Special Event). Fred, PA0FAW, will activate special event station PA100NOM between March 1-28th. Activity is to celebrate the 100th anniversary of the National Open Air Museum in Arnhem. QSL via PA0FAW. (Direct, Bureau and eQSL.cc - No LoTW).

PJ2, CURACAO. Operators Jan-Willem/PA7JWC and YL Monique/PD7DB will be active as PJ2/homecall from Curacao (SA-099, WLOTA LH-0942) between April 2-9th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK. QSL via LoTW or to their home callsigns. More details and updates

are available at: http://www.pa7jwc.nl

VE8EV, VP2MTA, VP2MWG, VP2V/K6TOP, W1M, ZA1G and ZD7JC

QSLS RECEIVED VIA THE BUREAU: 4B1MW, 5J0A, 5V7SI, 6V7Z, 8Q7SV, 9G5SI,
9L7NS, 9U0A, CT8/DL7JAN, DR1A, FJ/W2VQ, FJ/WQ2N, FO8RZ, H7/AJ9C, HQ3Z,
JV1A, JV5A, OD5/DL6SN, P40W, OS3XR, PJ2/DL8OBQ, RA2FF, SX24VIO, SY9VHF,
T32AJ, TI7KK, TO7ZG, TY2SI, V31MD, VP2MUM, XE1AJ, XE1IH, XE1REW, XZ1DB,
YK9SV, YV200ARV and ZL7NV

S7, SEYCHELLES. Operators Tom/DL5NEN and XYL Claudia/DO5NEN will be
active as S79NEN from Mahe (AF-024) and La Digue Islands (AF-024) between
March 12-28th. They are calling this a "Honeymoon Dxpedition". Look for
activity to be in the CQWW WPX SSB Contest (March 24-25th). QSL via DO5NEN.

T8, PALAU. Operators Kazu/JA1IST and Masami/JA9BFM will be active as
T88ZO and T88ZT, respectively, from Koror Island (OC-009) between February

10-20th. Activity will be on all HF bands using CW, SSB and RTTY. Kazu informs that he will listen 3-10 kHz UP. He also states, "Please always call me with your FULL CALLSIGN and please follow my instructions otherwise your call will be in the BLACK LIST." QSL T88ZT via JA3HZT. QSL T88ZO via JA1IST, by the Bureau or direct. All QSLs will be sent via the Bureau, but if you need his QSL directly, please send your QSL with a SAE and 1 IRC or 2 USDs or 2 Euros to: K. Naguro, 2620-1-711 Nijyo-Fukui, Itoshima, Fukuoka 819-1631, JAPAN. Kazu will upload his log to LoTW, eQSL and Clublog after returning to home.

V2, ANTIGUA. Operators Bob/W4OWY and Tom/AA9A will be active as V25WY and V25AA, respectively, from Antigua (NA-100) between February 14-22nd. Activity will be on 160-10 meters using CW, SSB and possibly RTTY. Look for V25AA to be active during the ARRL DX CW Contest (February 18-19th). QSL via their home callsigns, by the Bureau or direct.

V5, NAMIBIA. Mathew, DJ2HD, will once again be active as V5/DJ2HD between March 17-27th. Activity will probably be on all bands 160-10 meters using CW, SSB and RTTY, but with a focus on 160/80/40m and RTTY. QSL via his home callsign (see QRZ.com). ADDED NOTE: Operators Winfried/DK9IP, Suad/DK6XZ and Tobias/DH1TW will join Mathew and be active as V55V during the CQ WPX SSB Contest (March 24-25th). QSL V55V via DJ8VC.

V7, MARSHALL ISLANDS. Jim, K4FW, will once again be heading to Kwajalein Island (OC-028) in March because of his job with the Orbital Sciences Corporation. He works with the Pegasus launch vehicle. More specifically, as the Launch Panel Operator (LPO) and is part of the flight crew on the Orbital's L-1011. Jim will be using the Kwajalein club station on the island and will once again sign V73FW. QSL via K4FW.

VP6, PITCAIRN ISLAND (VP6T QRT). After 11.5 days of continuous operations, the VP6T team went QRT on February 1st, at 1640z. The final upload of logs to CLUBLOG and LoTW were expected before they set sail to Mangareva (OC-063) where they are planning to give out more QSOs as TX6T/p. The operations from Mangareva are expected by the time you read this, weather dependent. QSO count for VP6T (per ClubLOG) are: 56287 Total QSOs and 17049 with Unique Calls. Mode breakdown: 33095/CW, 18897/SSB and 4295/RTTY. Continent breakdown: 476/AF, 3/ANT, 9801/AS, 16091/EU, 27185/NA, 1015/OC and 1716/SA. QSL via G3TXF, direct or by the Bureau, LoTW and OQRS. More details are available on their Web site at: http://www.vp6t.org

XX9, MACAU. Nine members of the "A DX Group" (ADXG) will be active from Coloane Island (AS-075, WW Grid OL62SC) between May 17-23rd. Operators mentioned are Ruben/EA5BZ (Team leader), Jose/EA1ACP, Jose/EB5BBM, Pasqua/EA5CEE, Fernando/EA5FX, Biel/EA6DD, Francoisco/EA7FTR, David/EB7DX and Adrian/F5VLY. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY, with at least 3 stations on the air at the same time on different bands and modes. Suggested frequencies are:
CW - 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893 and 28023 kHz
SSB - 1825, 3780, 7065/7160, 14145, 18145, 21295, 24945 and 28495 kHz
RTTY - 7035, 10140, 14080, 18100, 21080, 24921 and 28080 kHz
6M - 50103/CW and 50115/SSB kHz

A survey is available on their Web page for most wanted bands/modes.
The group's callsign will not be announced until the beginning of their
DXpedition. QSL via EB7DX, direct or by the Spanish Bureau. All QSOs will
be confirmed via LoTW. For more details and updates, visit the ADXG Web
page at: http://www.adxg.org/xx9

ZA, ALBANIA. Tevfik, TA1HZ, will once again be active as ZA1TC from Durres
(thanks to Fatos/ZA1FD) between March 23-26th. Activity will be on 80-10
meters using a Kenwood TS570D, FD-4 Multi-Band Windom antenna and 80m
dipole. Operations also include an entry in CQWW WPX SSB Contest. During
his spare time from the contest, he will try to work some PSK31, especially
on 30 meters. More details and QSL info are available on QRZ.com and the
TCSWAT Web page.

ZK2, NIUE (Reminder/Update). A group of German operators will be active
as ZK2C from Namukulu, Niue (OC-040, WFF ZLFF-021, WLOTA 2139), between
February 5/6-17th. Operators mentioned are Heidi/DK1MA, Sid/DM2AYO, Rolf/
DL7VEE, Jan/DL7JAN, Klaus-Dieter/DK1AX, J�rgen/DF1AL, Heye/DJ9RR, Dietmar/
DL2HWA and Uwe/DJ9HX. Activity will be on all bands 160-6 meters using
CW, SSB and RTTY, with three stations on air simultaneously using 500
watt solid state amplifiers and various antennas. QSL via DL7JAN, by the
Bureau or direct or OQRS. Online log will be available at ClubLog. For
more information and updates, visit their Web site at:
http://zk2c.hkmann.de

GB2RS NEWS

Sunday 5th February 2012

The news headlines:

* The first two weeks of WRC-12

* Using Olympics logos, also called Games Marks

* Advanced exam processed in record time

Colin Thomas, G3PSM, is the RSGB representative on the UK Delegation to WRC-12. He reports here on the first two weeks of work. After two weeks of intense discussions, the 3000 plus delegates at the World Radio Conference 2012 are slowly but surely coming to consensus on many of the agenda items. A number of items have been finalised, including agenda item 1.22 that looked at the subject of Short Range Devices. It was decided that no changes were necessary to the Radio Regulations with regard to this subject. Unfortunately no such consensus has yet been reached on agenda item 1.23, which proposes an allocation to the amateur service in the region of 500kHz. After 12 meetings of the sub working group dealing with this matter, the segment 472-479kHz has been identified as the most suitable band. This represents a very small compromise from the European proposal of 472-480kHz. It is however a major compromise by those administrations and regional groups who proposed 461-469 plus 471-478kHz or 472-487kHz. Despite this, and considerations taking into account the protection of aeronautical non-directional beacons, the Arab Spectrum Management Group and Iran still maintain a position of no allocation to the amateur service. This agenda item will next be discussed next Tuesday in a higher authority committee. Another agenda item taking up a lot of talk time is 1.15, which deals with allocations for HF Oceanic Radars. While not directly affecting existing amateur services, there have been discussions around a possible allocation around 5MHz. This is the frequency area in which many countries, including the UK, have agreed channels for the amateur service. The original proposal from the United States for a 200kHz allocation has been drastically reduced to a 25kHz allocation in this area, but discussions continue. Under agenda item 8.2, Future Conference Agenda Items, Cuba has proposed a 50kHz allocation to the 5MHz amateur service. This proposal was unexpected and has little support from other administrations; however, the International Amateur Radio Union has pledged their support and is lobbying administrations to support it. The conference still has two weeks to run and nothing concerning the amateur service has yet been decided. Colin Thomas is

posting daily reports from WRC-12 on the RSGB website.

Although Ofcom has now granted permission for UK radio amateurs to use special prefixes over this summer, this permission does NOT extend to use of the various logos associated with the Games on QSL cards etc. These logos, or Games Marks as they are called, are strictly controlled by LOCOG and are not free for individuals and organisations to use without express permission. You can read about their use at the Frequently Asked Questions on the www.london2012.com website. Project ECHO, concerned with the two main special stations, is the exception and has been granted permission to use the Inspire logo in a limited way. If any further information emerges we will inform members.

An Advanced licence exam took place across the country on the evening of Tuesday 31 January. By 3pm on Friday 3 February, all papers that had arrived back at RSGB HQ had been processed and the results uploaded to Ofcom. A few papers have not yet reached RSGB HQ; these will be processed when they arrive.

Provisional results of the 2011 Islands On The Air contest have now been published. Despite low sunspot levels, the contest organisers received over 2,300 logs, the highest number yet. More than 632,000 QSOs were made and this has enabled them to adjudicate 75% of all QSOs. The highest scoring station in the contest was the Bristol Contest Group, GJ6YB, who operated from Jersey and achieved a score of just under 15 million points from over 3,300 QSOs. The 2012 contest takes place on 28 and 29 July. The contest organisers have indicated that there will be a number of significant rule changes in 2012, notably to the scoring to emphasise island QSOs. For the same reason, there will no longer be a World multi-op category, as they are anxious to refocus the contest on working islands, rather than building points through non-island stations working other non-island stations.

On 12 February, amateurs worldwide will be able to enjoy a virtual tour of the station at ARRL HQ in a live webcast starting at 2200UTC. W1AW, the Hiram Percy Maxim Memorial Station, at ARRL Headquarters in Connecticut has appeared in many logs. Anyone with an internet connection will be able to watch the tour at www.awecast.tv/channels/arrl/.

The FCC Spread Spectrum tests have got off to a good start. At 0052UTC on 1 February, Jose Ros, EA5HVK made the opening decode of the first FCC &#65533; SS authorised experimental station, WF9XJD, on 10.132MHz, at a rock bottom level of -22dB S/N. With worsening conditions and after a change to 7.055MHz, the QSO was completed using MF-4 mode. Taking advantage of the north-south propagation, a 10 minute QSO with YV5MM followed at substantially higher signal levels. A further eight or more experimental stations are due on the HF bands over the next few weeks, taking the first steps to clarify the data mode designations applicable to the USA amateur radio data mode operators.

And now for the details of rallies and events for the coming week

Today, 5 February, the 27th Canvey Radio & Electronics Rally will be held at The Paddocks, Long Road, Canvey Island, Essex SS8 0JA, which is at the southern end of A130. Doors open at 10.30am. Details from Dave, G4UVJ, on 01268 697 978 during the evening please.

Also today, 5 February, the Radio-Active Rally will take place in the Civic Hall, Nantwich, Cheshire CW5 5DG. Doors open at 10.30am and there will be trade stands and Bring & Buy. More information from Simon Chettle, G8ATB, on 01270 841 506.

The G3TFC Silent Key Auction of ex military & commercial radio equipment will take place on 11 February in the Coventry area. Admission is by ticket only. Details and lists of the equipment for sale can be obtained from Stuart J Mckinnon, G0TBI on 07860 496 516, or by email to stuartjmckinnon@aol.com.

The Harwell Radio & Electronics Rally will take place on 12 February at Didcot Leisure Centre, Mereland Road, Didcot. Doors open at 10.30am and there is plenty of free carparking. Admission is £2.50 with accompanied under 12s free. There will be trade stands and a flea market as well as special interest groups at the event. More details from Ann, G8NVI on 01235 816 379.

The Northern Cross Rally will take place at Thornes Park Stadium, Horbury Road, Wakefield WF2 8TY on Sunday 12 February. The usual mix of traders and groups will attend, including the RSGB bookstall and a local wind up mast manufacturer. Entrance is £3 per person and refreshments are available. Doors open at 10.30am. You are advised NOT to park on the road outside as it has double yellow lines on it, but use the available car parks. For more information, contact Ken, 2E0SSQ on 07900 563117, before 8pm please.

The organisers of the Swansea Rally, planned for 26 February, have been obliged to cancel it. They hope to be able to re-schedule it later in the year. Details from Roger, GW4HSH, on 01792 404 422. Now for the news of special events

GB80PW will be on the air on 9 February to celebrate the 80th anniversary of Practical Wireless magazine. On air on the 2nd Thursday of the month throughout 2012, Rob Mannion, G3XFD and Phil Ciotti, G3XBZ plan to be active from 10am to 4pm. They will be concentrating on 7MHz, mainly SSB and PSK31, with some operation on 14MHZ SSB and PSK 31.

GB50WVR will be on the air, starting on Friday 10 February, and then throughout 2012 on various dates, to celebrate 50 years of the Keighley & Worth Valley Railway. Full details are on qrz.com.

And now the HF DX news compiled from 425 DX News and other sources

W6HGF will be on the air stroke FP from Miquelon Island between 10 and 20 February. Activity will be on 10 through to 160 metres but focused on the digital modes, mostly RTTY. QSL via Logbook of the World or to W6HGF, direct or via the bureau.

HU2DX will be on the air from El Salvador until 10 February. The usual prefix in El Salvador is YS so this operation will also be of interest to prefix hunters. The QSL manager is DH7WW.

3B8GY will be on the air from Mauritius Island, IOTA reference AF-049, from 5 to 25 February. They will be on all HF bands using CW, SSB and RTTY. They will participate in the ARRL DX CW Contest on 18 and 19 February. QSL via SP2JMB.

Expect quite a bit of activity to take place from Guantanamo Bay in February. KN4KL will operate as KG4KL until 18 February using SSTV, RTTY, SSB, PSK and maybe CW. WB4DNL will operate as KG4DL from 6 to 14 February using mostly CW. Finally, W4WV will operate as KG4WV from 6 to 23 February using SSB, PSK, RTTY and maybe CW. QSL via their home callsigns.

DO5ALX, operating as V31RU and DG7RO, operating as V31TF plan to be active from Belize until 26 February. They plan to concentrate on 30, 17 and 12 metres RTTY and SSB and to take part in the CQ WW WPX RTTY Contest as a Multi-Two entry. QSL via home calls.

Now the contest news

The 432MHz AFS contest is the final Super League event of the 2011/2012 season. It takes place for four hours today, Sunday 5th, from 0900 to 1300UTC. A French contest coincides with the first couple of hours, so don't forget to take advantage of the activity by beaming that way early on. The exchange is signal report, serial number and locator.

The European Phase Shift Keying Club's PSK63 Contest finishes today, 5 February, at 1200UTC. Using the 3.5 to 28MHz, the exchange is signal report and serial number.

The wait for the start of the new 80m Club Championship series is over and it begins this month with an SSB session on the 6th. Remember please that for the entire Club Championship series the maximum power that should be run is 100 watts output. For Foundation licensees and those who welcome an additional challenge, there is also a QRP, 10 watt output, section. Look out for SSB activity from 2000 to 2130UTC, with the exchange being signal report and serial number. The 144MHz UK Activity Contest takes place from 2000 to 2230 on 7 February. Using all modes on the band the exchange is signal report, serial number and locator.

The First 1.8MHz Contest takes place for four hours, from 2100 on the evening of the 11th to 0100 on the 12th. Entries can be CW-only, SSB-only or mixed mode. Exchange a signal report, serial number and your District Code, which is the first two letters of your postcode. For those who live in postcode areas that begin with a single letter, these are padded out to two letters. A full list of District codes can be found on the Contest Committee website or in the RSGB Yearbook.

The first of this year's CQWW WPX contests is the RTTY, which takes place for the entire 48 hours of the weekend of 11/12th. There are

categories for QRP, low and high power, single or multi-operator stations, various numbers of transmitters and even single-operator stations where the operator has been licensed for less than three years. With the HF bands now in good shape, 10m could well be busy for long hours. The exchange is signal report and serial number.

For 24 hours of the same weekend the PACC Contest will be running on CW and SSB. Work as many Dutch stations as possible per band, giving RST and serial number. Dutch stations give RST + two-letter Province abbreviation and there are twelve in all. The multiplier is the number of provinces worked per band and once again there are numerous entry categories.

And now the solar factual data for the period from Friday the 27th of January to the 2nd of February, compiled by Neil Clarke, G0CAS on the 3rd of February.

On the 27th, as one of the large active sunspot groups was rotating out of view, it produced an X1 solar flare. This is the first X class solar flare since the beginning of November. Associated with this flare was a coronal mass ejection and a sudden ionospheric disturbance. After this flare, solar activity was very low to low, with only small C class solar flares taking place on some days. Solar flux levels on the 27th were 142 units, this figure was enhanced due to the X class solar flare, a more realistic figure would have been around 120 units. Levels then declined to 110 units by the 29th but then recovered to 118 units by the 2nd. The average was 119 units. The 90 day solar flux average on the 2nd was 141 units, that's two units down on last week. X-ray flux levels declined from B5.9 units on the 28th to B2.2 units by the 1st. The average was B3.3 units. Geomagnetic activity was quiet every day. The coronal mass ejection from the X1 solar flare missed planet Earth and headed for the STEREO ahead spacecraft. The solar wind measuring equipment there detected the blast as it passed. Back here, the average for the period was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 580 kilometres per second on the 27th to 330 by the 31st. Particle densities were low except for the morning of the 31st, which increased briefly to 23 particles per cubic centimetre. Bz varied between minus and plus 8 nanoTeslas on the 30th and between minus 4 and plus 3 nanoTeslas on the quieter days.

And finally the solar forecast. The slightly more active side of the sun is expected to rotate into view as the week progresses. At first solar activity is expected to be at low levels but activity could increase to moderate levels later in the week. Solar flux levels should increase and by next weekend be around the 130s. Geomagnetic activity is expected to be mostly quiet but could increase slightly around the 12th when a weak coronal hole disturbance could take place. MUFs during daylight hours at equal latitudes should be around 29MHz for the south and 26MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 30MHz. The optimum working

frequency with a 90 per cent success rate will be about 24MHz. The best time to try this path will be between 1000 and 1400 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 5 February Wythall Radio Club is taking a trip to the Radio Active Rally, Nantwich. Details from Chris, G0EYO, on 07710 412 819.

On Monday 6 February Gloucester Amateur Radio & Electronics Society it having a talk by Les, G0ULH, on whether valves are still of any use. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 6 February Lincoln Short-Wave Club is taking part in the 3.5MHz Club Contest, SSB. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 6 February South Birmingham Radio Society is inspecting and repairing its aerials. Contact Don, on 01214 581 603.

On Monday 6 February Welland Valley Amateur Radio Society is running a club net on 145.275MHz FM then QSYing to PSK32. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 7 February Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 7 February Friskney and East Lincolnshire Communications Club is having a talk on radiation patterns by Colin, M0EAO. Contact Chris, M0MFP, on 01507 442 240.

On Tuesday 7 February Lincoln Short-Wave Club is taking part in the 144MHz UKAC. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 7 February Loughborough & District Amateur Radio Club is having a hands-on test equipment session. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 7 February Wythall Radio Club is taking part in the 2m UKAC. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 8 February Lincoln Short-Wave Club is having a talk on Morse training by Ian, G4XFC. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 8 February Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 8 February South Kesteven Amateur Radio Society is having a talk on organising a field day station by Jim, M0JHW. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 8 February Telford & District Amateur Radio Society is looking at construction projects for under a fiver. Contact Mike, G3JKX, on 01952 299 677. On Thursday 9 February Lincoln Short-Wave Club is having a simplex club net on 145.375MHz. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 9 February Salop Amateur Radio Society is having a video night. Details on the club website at www.salop-ars.org.uk.

On Thursday 9 February South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 10 February Coventry Amateur Radio Society is closed. Contact John, G8SEQ, on 07958 777 363.

On Saturday 11 February Lincoln Short-Wave Club is holding its Saturday surgery. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND On Sunday 5 February Wakefield & District Radio Society is holding a training day from 13:30. Contact Ken, 2E0SSQ, on 07900 563 117.

On Monday 6 February Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 6 February Bolton Wireless Club is having a talk by Glen, G6HFF and Val, G6MML on their Sanday Island adventure, plus a contest debrief by Ross, G6GVI. For details, send an email to boltonwireless@gmail.com.

On Monday 6 February Hornsea Amateur Radio Club is taking part in the 80m Club Contest SSB. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Monday 6 February Sheffield Amateur Radio Club is having a social evening and taking part in the RSGB 80m Club Contest SSB as G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 6 February Thornton Cleveleys Amateur Radio Society is having a natter night. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 7 February Chester & District Radio Society is having a talk on antennas the Army way by G0KKO. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 7 February Halifax & District Amateur Radio Society planning its summer activity schedule. Details from Anthony Vinters, G0WFG, on 01422 822 636.

On Tuesday 7 February Morecambe Bay Amateur Radio Society is having a members' night. Contact Sheila, on 07867 516 836

On Tuesday 7 February Stockport Radio Society is having a talk on receiver tuning by John Shufflebotham, 2E0GCX. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 8 February Hornsea Amateur Radio Club is having the RAF Lissett Memorial talk. Contact Gordon MacNaught, G3WOV, on 01377 240 573. On Wednesday 8 February Maltby & District Amateur Radio Society is having an introduction to contesting by Peter Day, G3PHO. More information from Keith, G1PQW, on 07801 156 678.

On Wednesday 8 February Mid-Cheshire Amateur Radio Society is making final assignments for RadioActive. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Thursday 9 February South Manchester Radio and Computer Club is having a talk on the evolution of the amateur station by Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 9 February Wakefield & District Radio Society is having a rally planning meeting. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 10 February East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 10 February Tynemouth Amateur Radio Club is looking at standing waves. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 11 February Hornsea Amateur Radio Club commences its weekend event for the 1.8MHz contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Saturday 11 February Wakefield & District Radio Society is preparing for the rally. Contact Ken, 2E0SSQ, on 07900 563 117.

On Sunday 12 February Wakefield & District Radio Society is running the Northern Cross Rally at Thornes Park Athletics Stadium, Horbury Road, Wakefield, WF2 8TY. Contact Ken, 2E0SSQ, on 07900 563 117.

NEWS FOR NORTHERN IRELAND Enniskillen Amateur Radio Society is planning another course for the Foundation licence, including both practical assessments and examination. The first session will be at 8pm on Wednesday 7 March in the Cathedral Hall, BT74 7DW. It may be possible to join the course at a subsequent session. The Society is also seeking correspondence from those interested in taking the Intermediate Level

exam. For more information contact Chris, 2I0NIE by email to earsni@btopenworld.com.

NEWS FOR SCOTLAND On Tuesday 7 February Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, on 07740 946 192.

On Wednesday 8 February Glenrothes & District Radio Club is having Morse practice and a training session. Details from Laurie, MM0LJA, by email to mm0ljasecgr@btinternet.com.

On Wednesday 8 February Lothians Radio Society is having Aurora explained by Dr David Gavine. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 9 February Aberdeen Amateur Radio Society is having a talk by Jim MacKinnon, GM4EKC. Details from Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 10 February Borders Amateur Radio Society is having a surplus equipment sale. Details from MM0YLG on 07944 912 751.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 5 February South Essex Amateur Radio Society is at the Canvey Radio Rally. Paddocks Canvey Island, SS8 0JA. Details from Dave, G4UVJ, on 01268 697 978.

On Monday 6 February Braintree & District Amateur Radio Society is having a talk on Ham Radio Deluxe by Richard, 2E0XRS. For more information contact John, M5AJB, on 01787 460 947.

On Monday 6 February Burnham Beeches Radio Club is having a talk on the T32C DXpedition by Don, G3XTT. Contact Dave, G4XDU, on 01628 625 720.

On Monday 6 February East Kent Radio Society is having a talk on screen reading computers by Brian, M0DCO. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 6 February Maidstone YMCA Amateur Radio Society is having a general natter and coffee night. More information from Howard Vicary, G0RJN, by email to hvicary@hotmail.com.

On Monday 6 February Norfolk Amateur Radio Club is holding its club net from 19.30 on GB3NB and taking part in the RSGB 80m Club Championship SSB. Details from Chris Danby, G0DWV, on 01603 898 678.

On Monday 6 February South Essex Amateur Radio Society is on the air. Details from Dave, G4UVJ, on 01268 697 978.

On Monday 6 February Surrey Radio Contact Club is having a fix-it, advice, chin wag and move-it-on evening led by John, G8MNY. Contact John, G3MCX, on 02086 883 322.

On Tuesday 7 February Bedford and District Amateur Radio Club is having a talk on specifying heatsinks by Andy, G3HUE. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2012-007E - Update on the Ontario Section Restructure process.
2012-02-06

To Ontario Amateurs:

RAC Bulletin 2012- 006E - Ontario Section Restructuring update 2012-02-05, announced the intention to restructure the Province of Ontario into four Sections:

Ontario North, composed of the ARES Districts of Albany, Amethyst and Killarney;
Ontario East, composed of the Districts of Capital, Loyalist, Seaway and Severn;
Ontario South, composed of the Districts of Bruce, Golden Horseshoe, Lakes and St. Clair; and
the Greater Toronto Area (GTA) composed to the Toronto, Halton/Peel, Durham and York Districts.

The Section boundaries conform with Emergency Management Ontario section boundaries in order to respect existing relationships and agreements with political authorities and non-government agencies. The purpose of this Bulletin is to describe the transition plan that will be followed to inaugurate the new Sections. A third Bulletin, from the current Ontario Section Manager, will follow with more detailed information on the mechanics of the nomination process for the new Section Managers.

The transition milestones are as follows:

01 Feb Call for Section Manager nominations
31 Mar Nominations Close
01 Apr Selection Committee convenes
01 May New Provisional Section Managers Appointed, Transition Council Formed,
31 Aug Ontario Section Decommissioned
01 Sep New Section Manager appointments effective, four new Ontario Sections and Provincial Council inaugurated.

The principal reason for the Ontario restructure is to create a management model that better communicates with, and represents the interests of, the overall Ontario Amateur population. For that reason the new Sections will be organized and administered in accordance with the recently adopted Field Organization structure (see RAC Bulletin

2011-033E). In the past the Section Manager's role has focused only on the operation of a Field Service, the component that delivers public services. The Field Organization adds four new components (provincial government liaison, public information, affiliated club coordinator, and technical coordination) which will be the basis for a new communication and accountability relationship between the clubs and the RAC Section management team. The scope of the four functions is not yet fully defined, deliberately, so that a consultation with the clubs can be conducted during the transition period before submission to the VPFS Council for ratification and the RAC Board for confirmation as national policy.

The role of Section Manager takes on new importance with the adoption of a full Field Organization. The persons nominated for this position will need more than Field Service experience, they will need demonstrated leadership and administrative skills in order to lead the transformation process within their Section and to stand-up the new provincial council. The four Section Managers will initially serve as the transitional provincial council, and will have available to them the advice and assistance of the national Field Organization Advisors and the VPFS Council secretariat until the end of the transition period.

The clubs, in their capacity as the collective representative of the local Amateur population, also have a new partnership role within the Field Organization. It begins with nominating appropriate candidates for the inaugural Ontario East, South and GTA Section Manager appointments. The current Ontario Section Manager, Allan Boyd VE3AJB, will assume the appointment of Section Manager Ontario North for the remainder of his current term. Subsequent Section Manager appointments will follow the established process as the new Sections fit into the established election cycle.

During the transition period the new Section Managers will be recruiting their Section component heads and establishing their Cabinets (councils). Collectively they will form the transitional provincial council whose initial task will be to determine which functions should properly remain at the Section level, and which would be better accomplished at the provincial council level. Undoubtedly the advice of the clubs will be sought during this transition period, and the support of the Ontario Amateur community as a whole will be needed to fill the new Section Field Organization and secretariat positions if we are to achieve the ultimate goal of open and effective communication both up and down the RAC organization.

The current Ontario Section, which will be responsible for the provision of RAC services during the transition period, will cease operation effective 31 August, 2012. The four new Sections will become effective on 1 September, 2012. A further Ontario Bulletin from Section Manager Al Boyd VE3AJB will follow shortly with additional details on the transition process.

I would like to conclude with two comments. First, I would like to acknowledge the considerable effort and participation by the many Ontario Amateurs and clubs towards achieving this innovation. The project has enjoyed the full support of the RAC Board of Directors and President Bawden VE4BAW from the outset. Second, I recommend to the club presidents that you engage with your fellow club presidents within your new Sections. Don't wait, begin the consultation process now, and determine if you can collectively nominate candidates for Section Manager and Field Organization positions it will greatly assist in identifying the best available talent.

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

February 5th - 17th Franco, I1FQH, uses the call 5V7V (2011 he was
avtive as 5V7DX) in Kpalime Village on 160 - 6 meters. For 20 - 10
meters he uses a Spiderbeam and on 160 - 80 meters as well as for
40 - 30 meters he has home brew verticals. There is a focus to the
low bands. Rig is a K3 with KL500-PA and an FT-817 for 6 meters. Due
to turbolences during the flight the equipment was damaged and now
Franco looks for repair under the limited possibilities in this
country. QSL prefered via LoTW or via homecall. Online-Log at
http://www.mdxc.org/5v7v

8P, Barbados:

Larry K3VX (8P9VX), Bill, W3WH (8P9WH), and Carl, K9CS (8P9CS), will go
to Barbados (NA-021, WLOTA 0999) February 14th - 22nd. They will be
active on all bands and in all modes. They will participate in ARRL DX
CW Contest (18/19th February) as 8P5Y. QSLs via K9CS.

A5, Bhutan:

Look for Iain, G4SGX, February 11th - 15th as A52JF on 40 - 10 meters
using CW, SSB, and PSK. Good operating by the DX hunters in the pile
up should help for a high QSO score. QSL via homecall, direct only,
LoTW.

C6, Bahamas:

Find Drew, N2RFA (C6ABB), Gene, K2KJI (C6ALC), and Ivars, KC4PX (C6APX)
in Cable Beach on New Providence Island (NA-001, WLOTA 1115, WW Loc.
FL15HB) 13th - 23rd February on 80, 20, 15, 12, and 10 meters using
SSB, PSK31, RTTY, SSTV, and JT65. QSLs via homecalls, direct only, LoTW,
and eQSL.

At about the same time frame there will be Kevin K4PG (C6APG), Bob N4BP

(C6AKQ), and Brian K7RE (C6ALK) 13th - 20th February active on Grand Bahama Island (NA-080, WLOTA 0527) and participating n the ARRL DX CW Contest (18./9. February) M/S as C6AKQ. QSLs via homecalls, direct only, LoTW

E5, South Cook Islands:

E51NJB will be activated by John, N5JB, 13th - 21st or 25th February Mostly on CW and in the ARRL DX CW Contest (18./9. February) as SOABLP. QSL via homecall, LoTW.

FG, Guadeloupe:

February 9th - 19th Jean-Pierre, FG/F6ITD, will be on Basse-Terre (NA-102, DIFO FG-019) and 20th February - 13th March on La Desirade (NA-102, DIFO FG-004, WLOTA 1121) using an FT450D, VR7C verticals and dipoles on SSB and digital modes. QSL via homecall.

FM, Martinique:

Look for Valery, FM/R5GA February 13th - 20th on 160 - 10 meters mostly using CW. He will be in the ARRL DX CW Contest(18./19. February) SOABHP as TO5X. QSL via UA3DX, LoTW.

FP, St. Pierre et Miquelon:

On Miquelon (Grid GN17tc NA-032 DIFO FP-002 WLOTA 1417) there will be Al, FP/W6HGF, February 10th - 20th with IC-7000, 300-Watts-PA, multiband dipole for 160 - 10 meters and SteppIR vertical for 40 - 10 meters - if weather and transport are suitable. Look for him in CQWW WPX RTTY Contest and ARRL DX CW Contest also. QSL via homecall, LoTW, OQRS.

http://www.qsl.net/w6hgf/FP_W6GHF_2012.html

H4, Salomon Islands:

Noel, W1XB, will be on the air 7th - 28th February as H44XB on Guadalcanal (OC-047) using 20, 15 and 10 meters on CW and SSB with a QRP rig. QSL via homecall.

H40, Temotu:

There will be a new activity by Sigi, DK9FN, and Peter, DG1FK, as H40FN

(CW) and H40FK (digimodes) from Nendo (OC-100) February 11th - 24th.

QSL H40FN via HA8DD (new QSL-Manager), H40FK via DG1FK.

http://www.hari-ham.com

HK0, Malpelo:

HK0NA finished 1647 UTC on February 5th and logged 192.089 QSOs with

43.176 different stations, with pile ups until the very end of the

activity.

I, Italy:

Have a look at the unusual resort of IR4T on internet:

http://www.dxcoffee.com/eng/2012/02/05/ir4t/?utm_source=feedburner&utm_medium=eMayl&utm_campaign=Feed%3A+dxcoffee%2Feng+%28DxCoffee+-+Hamradio+Magazine%29

J3, Grenada:

Roy, KE4TG, will be at Grenada (NA-024, WLOTA 0718) again February 8th

through March 8th and will operate as J38RF on digital modes mainly

with some CW and SSB. QSL via homecall.

During the same time frame 8th February - March 7th Bill, K4LTA (J38A),

and XYL Ruby, K4UPS (J37RO), will be on 160 - 10 meters. Bill will also

be in ARRL DX CW Contest (18./19. February) SO. QSLs via homecalls,

direct only, LoTW.

JW, Svalbard:

Torkel, LA6VJA, announced an activity on February 11th as JW6VJA on

Spitzbergen (EU-026, WLOTA 0125). In Arktic night probably only low

bands will be useful. QSL via LA6VJA, LoTW.

http://www.bitwrap.no/web/index.php?id=5

KH0, Mariana Islands:

On February 12th through 16th Sosho, KH0/JA4JWD, will be active on 80 -

6 meters using SSB, digital modes and perhaps some CW. QSL via homecall.

KH2, Guam:

Find Take, KH2/JS6RRR, again on Guam (IOTA OC-026, USI GU003S, WLOTA

L-0064) February 10th - 14th on 160 - 6 meters using CW, SSB, FM, RTTY,

and PSK31. QSL via JS6RRR.

T5, Somalia:

Darko, J28AA, will be active from Hargeisa (WW Loc. LJ29an) February 10th - 20th. He will get his call on arrival. Equipment is an FT-857D with multiband vertical for 40 - 10 meters. he intends to train locals on ham radio and found a local club during his stay. He will leave an IC-735 with antenna for them. QSL via K2PF or E77E. Als on QRZ.com

T8, Palau:

T88WG will be the call of Takeshi, JH1WGP, on the West Plaza at the Sea Hotel on Koror Island (OC-009, WW Loc. PJ77fi) 9th - 15th February. Look for him on 80 - 10 meters using CW, SSB, and digital modes. QSL via homecall.

Palau Rental Shack will be the home for Kazu, JA1IST, and Masami, JA9BFM, during their activity as T88ZO bzw. T88ZT 10th - 20th February from Koror Island (OC-009) on CW, SSB, and RTTY. Kazu will listen 3-10 kHz up and requests full calls and insists that you respect his instructions, otherwise you might be blacklisted. QSL T88ZT via JA3HZT, T88ZO via JA1IST.

TR, Gabon:

Sebastien, F4EIH, is in Gabon for about 3 years starting February 1st and plans to be on SSB, PSK31, and JT65, also on VHF (EME and Satellites). There was no information about his call.

V2, Antigua:

Tom, AA9A, and Bob, W4OWY, will be V25AA resp V25WY February 13th - 22nd on 160 - 6 meters with CW, SSB, and RTTY. Tom will be in the ARRL DX CW Contest (18./19. February). QSLs via homecalls, V25AA also LoTW.

V3, Belize:

Find an activation of St. George's Island (NA-073) by Jeff, K0UU, as V31SG on 40 - 10 meters, CW only 11th - 20th February and in ARRL DX CW Contest (18./19. February) Single-OP/QRP. QSL via

homecall, direct only, LoTW.

V4, St. Kitts:

Jon, W5JON, will be active again as V47JA February 8th - March 28th from Calypso Bay, (NA-104, WW Loc. FK87SG) on 80 - 6 meters. He will use TS-590S, FT-857D and SB200, antennas are multiband dipole, verticals and 3-element-Yagi for 6 meters. He will take part in ARRL International DX SSB Contest (3./4. March), and CQ WPX SSB Contest (24./25. March) SOAB. Now and then XYL Cathy (W5HAM) will operate as V47HAM. QSLs via W5JON, LoTW.

W, USA:

For Arizona's 100 years jubilee operators of "Central Arizona DX Association" (CADXA) will hit the air waves as K7UGA 13th through 19th February. K7UGA was the private call of Barry M. Goldwater, late Senior Senator, and Arizona native son. Find them on 160 - 2 meters using CW, SSB, RTTY, PSK31 and satellites. This activity was recognized by "Arizona Centennial Foundation" as "Special Event" and by "Arizona Historical Advisory Commission" as official "Centennial Legacy Project". QSLs via K7BHM, direct only.

http://www.cadxa.org

http://www.youtube.com/watch?gl=DE&hl=de&v=Zvx6ImOFDsA

XW, Laos:

Alex, NM5A, now is QRV as XW3DT. He was heard operating on 30, 12 and 10 meters with CW and SSB. There is no information about the length of his stay. QSL by operator's instructions.

Larry, XW0ZJZ (ex XW1A), will be in the CQWW WPX RTTY Contest (11./12. February) SOAB/LP from Vientiane. QSL via E21EIC, direct only.

South Pacific Tour:

Vincent, F4BKV, member of the VP6T team, continues his activities:

Rarotonga Island (OC-013), South Cook Islands, E51BKV, 9. Februar

Mangaia Island (OC-159), South Cook Islands, E51BKV, 10. - 15. February

Rarotonga Island (OC-013), South Cook Islands, E51BKV, 16. Februar

Ouvea Island (OC-033), New Caledonia. FK/F4BKV, 18. - 25. Februar

Noumea (OC-032), New Caledonia FK/F4BKV, 26. Februar

HL2/F4BKV, Seoul, 27. Februar

Find him on 40 - 10 meters using SSB and digital modes (RTTY/PSK31) from an Elecraft K3 and 500-Watt-PA, Monoband VDA (vertical dipoles array) for 17/15/12/10 meters and monoband verticals for 40/30/20 meters. QSL via homecall, OQRS, LoTW.

http://www.f4bkv.net/

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
30 January - 05 February 2012

Solar activity ranged from very low to low levels throughout the
period with two C-class flares observed. Region 1410 (N18, L=056,
class/area Cso/240 on 01 February) produced a C1 event at 0440Z on
30 January. The second event was also a C1 flare, at 0441Z on 01
February from Region 1408 (N06, L=132, Class/area Hax/120 on 21
January). Low level B-class activity dominated the remainder of the
period. As the summary period ended, there were only three spotted
regions on the visible disk, with Regions 1413 (N08, L=062,
class/area Csi/100) and 1410 the most pronounced.

The greater than 10 MeV proton event which began at 27/1905Z and
reached a maximum of 796 pfu on 28/0205Z, dropped below the 10 pfu
threshold and ended at 31/0635Z.

The greater than 2 MeV electron flux at geosynchronous orbit reached
high levels on 30 January at 1635Z. Predominantly background levels
prevailed with moderate levels observed from 03 - 04 February.

The geomagnetic field was at predominantly quiet to unsettled levels
during the past week. The geomagnetic field was quiet, until the
arrival of a glancing blow from the asymmetric halo CME that
occurred in association with the X1/1f flare on 27 January. The
transient passage was observed by the ACE spacecraft at 30/1554Z
with a solar wind speed increase from around 320 km/s to near 430
km/s. A weak sudden impulse measuring 8 nT was observed by the
Boulder magnetometer at 30/1624Z. The field increased to unsettled
levels following the shock but returned to quiet levels by 31/0000Z.
Quiet conditions prevailed on 31 January. On 01 February, a coronal
hole high speed stream became geoeffective with unsettled to minor
storm levels observed at high latitudes and predominantly quiet
levels observed at mid latitudes from 01 February through the end of
the summary period on 05 February.
```

Forecast of Solar and Geomagnetic Activity
08 February - 05 March 2012

Solar activity is expected to be at very low to low levels until 10 February, when old Region 1402 (N28, L=214) returns. An increase to low levels with a chance for M-class activity is expected as old Region 1402 transits the visible disk. A decrease to very low to levels is expected to prevail for the remainder of the period.

Energetic proton flux at geosynchronous orbit is expected to remain near background levels until old Region 1402 returns on 10 February. A slight chance exists for a proton event from 10 -24 February, as old Region 1402 transits the solar disk. A return to background levels is expected for the remainder of the period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels throughout the period.

The geomagnetic field is expected to remain at mostly quiet to unsettled levels through the forecast period. There is potential for active periods with isolated minor storm periods at high latitudes on 09-10 February, on 23 February, and again on 02-03 March, due to effects from coronal hole high speed wind streams.

118. [RAC-Bulletin] Agenda Item 1.23 Passes Committee, Moves to Plenary.

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-08 05:34:43 UTC
From: rac-bulletins@eton.ca
Message-ID: <4F32096B.4020903@rac.ca>
Source record: 3735

Agenda Item 1.23 Passes Committee, Moves to Plenary.
2012-02-07

On the afternoon of Tuesday, February 7 (Geneva time), Committee 4 of the 2012 World Radiocommunication Conference (WRC-12) approved Option 1 to satisfy Agenda Item 1.23, with minor editorial amendments to the text received from Working Group 4C. Option 1 calls for a worldwide secondary allocation to the Amateur Service at 472-479 kHz, with a power limit of 1 W EIRP, with a provision for administrations to permit up to 5 W EIRP for stations located more than 800 km from certain countries that wish to protect their aeronautical radionavigation service (non-directional beacons) from any possible interference. Option 2 was NOC (no change to the current rules).

In keeping with the rules of the Conference, Committee decisions must be read twice in Plenary session; the decision of the Conference is not final until after second reading in Plenary. According to ARRL Chief Executive Officer David Sumner, K1ZZ, quite a few additional administrations -- mainly in the former Soviet Union and Arab states -- will be adding their country names to the Footnotes prior to consideration in Plenary.

Iran proposed that the 800 km distance be changed to 2000 km, and have this cited in a Footnote, but there was no support. Both CEPT and CITEL, along with the Netherlands, opposed this change. Colin Thomas, G3PSM, is the CEPT spokesman and ARRL Technical Relations Specialist Jonathan Siverling, WB3ERA, is the spokesman for CITEL.

Footnotes offer an administration (a country) to "opt out" of the decision of a WRC, creating an exception to the table of frequencies in the Radio Regulations. For example, a country may say that it will not use a certain service in a portion of the spectrum that has been designated for that service by the WRC. Therefore, a footnote is created in the Radio Regulations for that portion of the spectrum, indicating a designated use is not available in that country, even though it may be available in many other parts of the world.

"Another issue we have been following closely is the introduction of allocations for HF oceanographic radars, which is Agenda Item 1.15," Sumner said. "It is now clear that there will be no impact on amateur allocations, including the 5 MHz channels we are allowed to use in the US".

Agenda Item 1.15 deals with oceanographic radar. "One of the candidate bands for the placement of oceanographic radar is 5.250-5.275 MHz,"

explained IARU Secretary Rod Stafford, W6ROD. "There have been a number of administrations that have granted amateurs access to spectrum around 5 MHz. In fact,one of the bands listed by IARU as a spectrum requirement for a future allocation is 5 MHz. If oceanographic radar is operating in the 5.250-5.275 MHz band, that may impact the ability of the amateurs to obtain an allocation in that area".

One of the responsibilities of each WRC is to set the agenda for the next Conference; WRC-12 delegates will therefore set the agenda for WRC-15. "Proposals for agenda items for WRC-15 are still in a state of flux," Sumner explained, "so there is as yet nothing concrete to report. The agenda item for an amateur allocation around 5300 kHz is still alive, but a positive outcome is by no means certain".

VIA the ARRL Web site.

****

** MMMonVHF Trophy: "Best VHF DX Expedition" of the Year 2011 **

The team of MMMonVHF is very proud to publish the results of the
"Best VHF DX expedition 2011"

The winners:

SECTION MS

1st place and "Best VHF MS expedition 2011" : C37MS
2nd place: 7P8EME
3rd place: US8ZAL/P

SECTION EME

1st place and "Best VHF EME expedition 2011" : C56EME
2nd place: 7P8EME
3rd place: 8P9DL / 8P9MS / 8P9HP

On behalf of the whole VHF-community, the team MMMonVHF is
congratulating the members of both expeditions with their title
of honour. This is our way to thank them for their efforts and
great expeditions.

But our thanks and respects are also going to all who went on
expeditions and spended time and money in giving us new DXCC's
and squares and we hope that many more are encouraged to do so also!

As always we also give an extra T-shirt to one of the voters that was
selected random. The winner of this T-shirt is Eene, PA3CEG.

The complete results are published om the MMMonVHF webpage:

http://mmmonvhf.de/trophy.php

****
HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: J5; square IK21DT; start 2012-03-23

Hello OM,
everything is ready for the J5 Guinea-Bissau DXpedition.
We finally received all the permits from the authorities in Bissau.
The calls J52EME for V-UHF and J52HF for HF are confirmed.
Two groups will operate simultaneously, with preference to the most
difficult communications, ie EME.
After much work we can announce that we'll be active on:
144 MHz with 2x8 xpol, preamplifier gift of WA2ODO, amplifier ITB
Colibrï¿½ 1kw.
432 MHz with 2 homemade LFA antennas 18 elements, yet to be found
preamplifier, amplifier ITB Colibrï¿½ 600w.
50 MHz, homemade LFA antenna 5 elements, amplifier ACOM 1000, homebuild
preamp MGF1302.
In the beginning was our intention to just operate 2m EME, but we have
received many requests for both 70cm and 6m, so we hope to please everyone.
In the first few days we'll be active on 144 MHz EME and HF, with some
jump on 6m Supertropo and ES. Then we'll pass on 430 and 50 MHz. We'll
try to satisfy everyone.
Just on arriving a group will start to create an internet connection
for the hospital, so we can use it too.
Frequencies:
144,130, 432.900 and 50.200. We'll call always in the even period.
Thanks for the help that you'll can give to our humanitarian/ham-radio
expedition.
Renato I3EJ we'll keep you informed during the DXpedition on our site:
http://www.ari.verona.it/veronadxteam/en/index.htm
and email questions to: veronadxteam@ari.verona.it

See you soon from J5 !

SOURCE: I3DLI to Moon-Net GG

** DXCC: 4U_ITU; square JN36BF; start 2012-03-23

After both C37MS and C56EME did win the trophy MMM expedition of the
year 2011 section MS and
EME, Chris and Rene where thinking to celebrate this by doing
something back for all those voters.

We will be QRV moonbounce 2 meter from the ITU building in Geneva as
4U1ITU.
4U1ITU counts as a separate entity for the DXCC award and has never
been activated in WSJT.

We will be there from March 23rd till March 25th 2012, so only 3 days!
Don't miss it.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)
If all ok we will have a small 6 meter and 70cm setup with us too.

We will be on N0UK for last minute freq change.

Welcome to website! http://www.emelogger.com/4u1itu

73 Chris PA2CHR, Johan PA3FPQ, Jurgen PE1LWT and Rene PE1L

USE or SUBSCRIBE: http://mmmonvhf.de/latest.php?id=4114

SOURCE: Rene, PE1L, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire (PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on
the equator.

The plan is to leave May 21st and build up the station before the weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit insecure but

we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We have to
come back as often as possible. We can't resist....

73 Rene PE1L and Eltje PA3CEE

** Macau, XX9 **

A team consisting of EA5BZ, EA5CEE, EA6DD, EB5BBM, F5VLY, EA1ACP,
EA5FX, EA7FTR and EB7DX will be active from Coloane Island, Macau
between May 17-23, 2012.

They plan to be active from 6 to 160 meters (include WARC) in CW,
SSB and RTTY with at least 3 stations simultaneously in different
bands and modes.

QSL via EB7DX.

** DXCC: ON; Square: several; start 2012-04-14

Special event station ON100TT qrv from up april 14th

UBA Sectie ON4EKO will activate the special event station ON100TT to
commemorate the Titanic Centenary between 14 April and 31 December,
2012. QRV on all HF and VHF bands, using all modes. QSL via ON4WDL,
direct (with SAE + 2 green stamps) or by the Bureau.

SOURCE: [UBA HF News]

** DXCC: G; Square: IO91; start 2012-04-10

Special Event Station GR100MGY will be activated between 10-15th April, 2012

The sinking of White Star Line's RMS Titanic on 15th April 1912 sent shock-waves
around the world and has touched our hearts ever since. To commemorate this
tragic event, special event station GR100MGY will be activated between 10-15th
April, 2012. Some fifteen operators will man two 400 watt transmitters on the
eight HF bands from 3.5 to 28 MHz, using directional antennas. Only CW will be
used except on the open days, 14-15th April, when SSB will help the public to
understand the operation. Activity on VHF is also planned. QSL information can
be found on QRZ.com. GR100MGY will be located at 0?37'18" West, 51?11'49" North,
Locator IO91QE: Charterhouse, Hurtmore Road, Godalming, Surrey, GU7 2DX, England
(EU-005, WLOTA 1841).

SOURCE:[dx-world.net]

** 3C0, ANNOBON ISLAND **

Operators Elmo/EA5BYP and Javier/EA5KM will once
again be active from Annobon Island (AF-039) and Bioko Island (AF-010,
DXCC - Equatorial Guinea) using the callsigns 3C0E and 3C6A, respectively.

According to their Web page they arrive at Malabo, Equatorial Guinea, by
the middle of February. (dates to be determined). In Malabo, they will
purchase all needed provisions as there are on stores on the island of
Annobon. A representative of the Ministry will also be traveling with
them to Annobon. If they have free time, they will have a active station
on the air on CW or SSB and RTTY using the callsign 3C6A from Malabo,
Bioko Island, Equatorial Guinea. Then they will travel to Annobon and
be active as 3C0E. Activity will be on 160-6 meters. Suggested frequencies

are:
CW - 1826.5 (*RX), 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 3785, 7075/7145, 14190, 18140, 21295, 24960 and 28480
RTTY - 3580, 7035, 10140, 14082, 18102, 21082, 24920 and 28080 kHz
6m - 50.104/CW and 50.145/SSB MHz
RX AS/OC 1821.5
RX EU/NA 1834.0
QSL both callsigns via EA5BYP: Elmo Bernabï¿½ Coll, P.O.Box 3097,
03080 Alicante, Spain. They are looking for sponsors for this very
expensive operation. For more details and updates, watch the Web page at:

** Malta, 9H

Zoli, HA5PP, will once again be active from the island of Malta
(EU-023, MIA MM-001, WLOTA 1113, CQ zone 15) as 9H3PP during the CQWW WPX CW
Contest (26-27 May, 2012). Plans are for a Single-Op/Single-Band entry, either
15m or 10m. After the contest Zoli will focus on some 6m and 12m activity. QSL
via home call.

SOURCE: [ICPO] ICPO Bulletin (03 - 10 February 2012)

** United Kingdom, G **

2O12L will be the callsign of the London ham radio station
celebrating the Olympic Games and Paralympics. Based at Eltham Palace (WW Loc.
JO01AK), which is in the Borough of Greenwich, England (EU-005, WLOTA 1841), one
of the six 'host boroughs' for the Games, five stations will be active
simultaneously, three on HF and two on VHF. Operation will cover the period of
the Olympics and Paralympics, and the two weeks in between (27 July to 9
September, 2012). In total they plan to make at least 60,000 contacts during the
seven week period. Visitors may view an exhibition about radio communications
and electronics, and sit down at the radio and make contact with amateur radio
operators right around the world. They are also offering 'bite-sized' talks
giving an overview of radio and its importance in the modern world. All hams who
visit the Olympics, from anywhere around the world, are encouraged to visit
2O12L. QSL via G4WNF, direct or Bureau. Please check website often, for updates
as the project progresses at: www.2o12l.com/

122. Nebraska State Convention: about a month away!

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-08 23:59:48 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20120208134020.36FFA2036B@bmail.arrl.org>
Source record: 3739
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

This is a reminder that the ARRL Nebraska State Convention will take
place on Saturday, March 17, 2012. The event starts at 8:30 am and
will run through 3 pm.

The Lincoln Amateur Radio Club has worked hard to make this a great
one. From an EOSS balloon launch through visiting with ARRL's Chief
Operating Officer, Harold Kramer, WJ1B, there will be plenty to do.
And when you're not in a forum or watching a launch, you can visit the
flea market to pick up a needed treasure.

This year, you can get a head-start on the registration process by
using a credit card or PayPal to prepay.

For more information and all the details, please visit
http://lincolnhamfest.org .

I'll be there. I hope you will join me.

RAC Bulletin 2012-008E - Amateur of the Year for 2011
2012-02-09

The RAC Board of Directors takes great pleasure in announcing the selection of Dr. Cezar Trifu, VE3LYC of Kingston, ON as the Canadian Radio Amateur of the Year for 2011. Dr. Trifu exemplifies the Canadian Amateur with numerous IOTA DXpeditions since 2008 covering Canadian Islands and recently overseas islands. He has raised the profile of Canadian Amateur operations world-wide with thousands of QSOs with DXCCs covering over six continents. His dedication to HF operations has been recognized with the DXCC Honor Roll, IOTA Honour Roll, IOTA Gold Level Awards, Canadian Islands Award and US Islands Award to name a short list of numerous awards. Cezar has also raised the national and international awareness of the Canadian Amateur scene with over twenty multi language articles in several amateur journals.

A presentation will be made to Dr. Trifu in the coming weeks with an article and more on his nomination to appear in the May-June 2012 issue of The Canadian Amateur magazine.

Paul Burggraaf, VO1PRB

==> + FCC NEWS: NEW RULES FOR 5 MHZ (60 METERS) TO GO INTO EFFECT MARCH
5

On November 18, the FCC released a Report and Order, defining new
rules for the 60 meter (5 MHz) band. These rules are in response to a
Petition for Rulemaking filed by the ARRL more than five years ago and
a June 2010 Notice of Proposed Rulemaking. In the February 3 edition of
the Federal Register, the FCC announced that these new rules will go
into effect on March 5, 2012. Read more here
<http://www.arrl.org/news/new-rules-for-5-mhz-60-meters-to-go-into-effect-mar
```

ch-5>.

==> + WRC-12: AGENDA ITEM 1.23 PASSES COMMITTEE, MOVES TO PLENARY

On the afternoon of February 7, Committee 4 of the 2012 World Radiocommunication Conference (WRC-12) approved Option 1 to satisfy Agenda Item 1.23, with minor editorial amendments to the text received from Working Group 4C. Option 1 calls for a worldwide secondary allocation to the Amateur Service at 472-479 kHz, with a power limit of 1 W EIRP, with a provision for administrations to permit up to 5 W EIRP for stations located more than 800 km from certain countries that wish to protect their aeronautical radionavigation service (non-directional beacons) from any possible interference. Option 2 was NOC (no change to the current rules).

In keeping with the rules of the Conference, Committee decisions must be read twice in Plenary Session; the decision of the Conference is not final until after second reading in Plenary. According to ARRL Chief Executive Officer David Sumner, K1ZZ, quite a few additional administrations -- mainly in the former Soviet Union and Arab states -- will be adding their country names to the Footnotes prior to consideration in Plenary. Sumner said that Agenda Item 1.23 should have its first reading in the Plenary on Friday, February 10, with its second reading sometime next week. Read more here <http://www.arrl.org/news/agenda-item-1-23-passes-committee-moves-to-plenary> .

==> + WRC-12: HOW ARE AGENDA ITEMS PROCESSED AT A WRC?

By IARU Secretary Rod Stafford, W6ROD

The procedures used by the International Telecommunication Union before and during a World Radiocommunication Conference seem complicated. They are somewhat complicated, but they are understandable with a bit of background. Each Agenda Item that will be decided at a WRC has been studied for at least three or four years leading up to a WRC. ITU Study Groups and Working Parties discuss the issues involved in the Agenda Item. Compatibility studies, sharing studies and experiments take place whenever needed, so that discussions and decisions can be made based upon facts, rather than opinions. Read more here <http://www.arrl.org/news/wrc-update-how-are-agenda-items-processed-at-a-wrc> .

==> + WRC-12: PROPOSED MARITIME MOBILE ALLOCATION GETS FIRST READING AT WRC-12 PLENARY SESSION

At the February 3 Plenary Session of the 2012 World Radiocommunication Conference (WRC-12), delegates heard the first reading and approved a worldwide exclusive allocation to Maritime Mobile of 495-505 kHz. There will need to be a second reading to finalize the allocation. According to ARRL Chief Executive Officer David Sumner, K1ZZ, discussion of this allocation to Maritime Mobile

"has been in the works throughout the conference preparation (i.e. since 2008) and was the reason why the MF amateur allocation could not be made in this band as some amateurs had hoped. That's why we [the Amateur Radio Service] had to look elsewhere and is what put us in conflict with aeronautical radionavigation."

==> + WRC-12: NOBEL LAUREATE JOE TAYLOR, K1JT, ADDRESSES PLENARY SESSION AT WRC-12, RECEIVES ITU GOLD MEDAL

On February 3, delegates and attendees at the 2012 World Radiocommunication Conference had the pleasure of listening Joe Taylor, K1JT, share his vision of the future of radiocommunication. Taylor -- an ARRL Member -- won the Nobel Prize in physics in 1993 <http://www.nobelprize.org/nobel_prizes/physics/laureates/1993/> for the discovery of a binary pulsar, a discovery which has opened up new possibilities for the study of gravitation. After the speech, International Telecommunication Union Secretary General Dr Hamadoun Tour&#65533;, HB9EHT, presented Taylor with the ITU Gold Medal in recognition of Taylor's outstanding contribution to the research in the field of radiocommunication.

Dr Tour&#65533; introduced Taylor to the Plenary. In his introduction, he told the audience that Amateur Radio led to Taylor's career as a radio astronomer, and ultimately to his winning the Nobel Prize: "I'm told that an early interest in Amateur Radio led Joe Taylor to an exciting career in radio astronomy, which then earned him the 1993 Nobel Prize in physics. I share his interest in Amateur Radio with passion, but will that lead me to a Nobel Prize? I'm working on it!"

Taylor began his speech by thanking the WRC-12 delegates for the job they were doing at the Conference. "I understand that you have come to Geneva from more than 150 of the ITU's Member States," he said. "You are here to do an important job, an essential one, for nearly all of humanity in today's world. You are charged to do your upmost to accommodate the wide variety of competing interests of all users of the radio frequency spectrum and its available orbits for Earth satellites. This is surely not an easy task. Most people give very little thought to the complicated issues that you face. Why should they, since for most of us, most of the time, the technologies that depend on these limited resources just seem to work. But I know, and each one of you knows, that much background work and many long negotiations are often necessary in order to make everything fit together and work in harmony."

Taylor noted new discoveries "that have fundamentally changed or expanded our understanding of nature's laws, or might do so in the near future." But, he said, these discoveries will not affect the ITU or future WRCs for "at least not for many decades to come. This is because our fundamental understanding of electromagnetism is already in a mature state. Maxwell's equations <http://en.wikipedia.org/wiki/Maxwell%27s_equations>, after all, have

been thoroughly tested now for 150 years. And in principle, they tell us everything we need to know in order to exploit the wonders of telecommunications at the speed of light. Our understanding of these laws of nature, including what they tell us is possible and not possible, is not likely to change, even in the more distant future. But of course we can still develop new and improved ways of generating, controlling and detecting electromagnetic radiation, as well as clever new ways of effectively sharing the spectral resources that we have. Such advances as these will surely continue, and perhaps they will even increase. The fundamental science may be mature, but technology's ability to exploit and build upon electromagnetic phenomena is still rapidly developing.

"It's interesting to comment in passing on the fundamental differences between the bounded radio frequency spectrum and the balance, for example, on accessible fossil fuels. Limitations of the radio spectrum are a result of fundamental laws of nature. Every nation on Earth, and indeed every person on Earth, has access, in principle, to the same spectrum as everyone else. The amount of accessible oil, on the other hand, depends on the much more complicated way on how the Earth formed and evolved over time, and fossil fuels are not evenly distributed over the Earth and they are expendable. When it's gone, there's none left. The electromagnetic spectrum, on the other hand, will always be there, whether or not we humans are around here to enjoy using it. Moreover, the spectrum can be shared by many users simultaneously, and shared use can be especially effective if adequate planning is done in advance. That planning, of course, is an essential part of your assignments here.

"Future technologies will surely make even better uses of wireless communication than we do today. I foresee plenty of scope for contributions for new technologies. Information and communication technologies have much to offer for the betterment of the human condition everywhere, and perhaps especially so in the developing world. It is extremely important to continue seeking the best efficiencies in the use of the spectrum. I wish you every success in your task of creating wise and fair guidelines for regulators and policy makers who must allocate the limited resources in the very best interest of all mankind."

You can view Taylor's speech on YouTube <http://www.youtube.com/watch?v=F028RKkLefI>, courtesy of Andy Clegg, W4JE.

==> ON THE AIR: THE 2012 ARRL INTERNATIONAL DX CW CONTEST TAKES TO THE AIR NEXT WEEKEND

CW DXing and contesting take center stage the weekend of February 18-19, as the 2012 ARRL International DX CW Contest takes to the airwaves. "After years of lackluster conditions on 15 and 10 meters, 2011 finally saw the propagation gods giving us a break," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "Since September 2011, the

high bands have been in excellent shape, with worldwide openings on 15 and 10 meters becoming an almost-daily occurrence. As a result, activity has spiked in almost every major contest, with hundreds more logs being submitted. If conditions hold -- and I don't see why they wouldn't -- we're in for another high-band treat in another week or so." Read more here <http://www.arrl.org/news/the-2012-arrl-international-dx-cw-contest-takes-to-the-air-next-weekend>.

==> ARRL HQ: SAVE THE DATE! TAKE A VIRTUAL TOUR OF W1AW ON FEBRUARY 12

Join W1AW Station Manager Joe Carcia, NJ1Q, on a virtual tour of W1AW, the Hiram Percy Maxim Memorial Station <http://www.arrl.org/w1aw-antenna-farm>, the Amateur Radio station at ARRL Headquarters in Newington, Connecticut. Carcia will lead this tour via a live webcast on Sunday, February 12 at 5 PM EST (2200 UTC). Anyone with an Internet connection will be able to watch the tour here <http://www.awecast.tv/channels/arrl/>.

"We want viewers of this live Internet tour to feel as if they are actually at W1AW," Carcia explained. "If you came to W1AW in person, you would see the same things that we are going to show on the virtual tour: The three operating stations, the W1AW workshop, the transmitter racks that we use to send out our bulletins and use for the code practice transmission, the control console and Old Betsy <http://www.arrl.org/images/view/web_008.jpg>, Hiram Percy Maxim's personal spark gap transmitter."

Al Petrunti, KA1TCH, of the New Day Group <http://www.newdayhd.com/>, will follow Carcia as he leads viewers through the station. ARRL Staff members, including Media and Public Relations Manager Allen Pitts, W1AGP, and Chief Operating Officer Harold Kramer, WJ1B, as well as local television weatherman Geoff Fox, K1GF <http://www.geofffox.com/>, will also be on hand at W1AW during the tour.

"Hams around the world know of W1AW, and thousands have made contacts with this impressive station -- but most hams never get to see it," Pitts said. "Thanks to Al Petrunti's group, we hope that folks enjoy seeing what's at the other end of the signals. As in all live broadcasts, you never know just what might happen. We invite you to join us." Pitts is producing the live web tour.

This is the second video that the New Day Group has made for the ARRL. In 2011, they created the HR 607 video <http://www.arrl.org/hr-607> that educated radio amateurs of a bill in Congress that addressed certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network using current Amateur Radio spectrum.

==> + ARRL FIELD DAY: 2012 FIELD DAY PACKET NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 23-24, 2012! ARRL's flagship operating event -- always

held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/fieldday> and include the complete rules, as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. A brief one-page flyer with basic "What is Field Day" information has also been included in this year's Field Day packet. Amateur Radio clubs and individuals are encouraged to reproduce this flyer as a handout for information tables.

==> SOLAR UPDATE

Tad "The Sun rolling high through the sapphire sky <http://www.youtube.com/watch?v=hSFKnYD5rp4>" Cook, K7RA, reports: Solar activity was down again this week -- this is the third week in a row with sunspot numbers lower than the week prior. On January 20, we reported an average daily sunspot number of 116.9 for January 12-18, 98.7 the next week, followed by 62 the week of January 26-February 1, and now 40.4 during the latest period. The solar flux forecast -- which roughly tracks sunspot numbers; we don't have access to any short term sunspot number forecast -- is also lower. The latest forecast from NOAA/USAF has solar flux at 100 on February 9-11, 105 on February 12, and 110 on February 13-24. The predicted planetary A index is 8 on February 9-10, 5 on February 11, 8 on February 12-13, 5 on February 14-22, 8 on February 23, and 5 from February 24 through the end of the month. Look for more information on the ARRL website on Friday, February 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Circle of Life <http://en.wikipedia.org/wiki/Circle_of_life> from The Lion King <http://en.wikipedia.org/wiki/The_Lion_King>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 10 -- NCCC Sprint Ladder
- February 11 -- FISTS Winter Sprint
- February 11-12 -- Louisiana QSO Party; New Hampshire QSO Party; CQ WW RTTY WPX Contest
- February 12 -- North American Sprint (SSB); SKCC Weekend Sprint
- February 12-13 -- Classic Exchange (Phone)
- February 13-17 -- ARRL School Club Roundup <http://www.arrl.org/school-club-roundup>
- February 14-15 -- PODXS 070 Club Valentine Sprint (local time)
- February 15 -- NAQCC Straight Key/Bug Sprint; AGCW Semi-Automatic Key Evening

Next week:

- February 17 -- NCCC Sprint Ladder
- February 17-18 -- Russian PSK WW Contest
- February 18 -- Feld Hell Sprint
- February 18-19 -- ARRL International DX Contest (CW)
<http://www.arrl.org/arrl-dx>; AWA Amplitude Modulation QSO Party
- February 20 -- Run for the Bacon QRP Contest
- February 22 -- SKCC Sprint
- February 22-23 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> BE A STAR! DEADLINE FOR SECOND ANNUAL ARRL VIDEO CONTEST IS FEBRUARY 29

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its Second Annual Video Contest! Here's a chance to put that video camera to use: Shoot a ham radio-related video and send it our way. All videos must be postmarked by February 29, 2012. Burn your video to a CD or DVD using the appropriate software and mail it to ARRL Video Contest, 225 Main St, Newington, CT 06111. Do not attempt to send it via e-mail, as our e-mail system cannot accommodate large files. Read more here <http://www.arrl.org/news/be-a-star-deadline-for-second-annual-arrl-video-contest-is-february-29>.

==> + SILENT KEY: FORMER ITU-R DIRECTOR DICK KIRBY, W0LCT/HB9BOA (SK)

Richard "Dick" Kirby, W0LCT/HB9BOA, passed away on January 26. He was 89. In 1974, Kirby -- an ARRL Life Member -- was elected Director of the International Telecommunication Union's International Radio Consultative Committee; he served as Director until his retirement in 1995. In 1992, under Kirby's tenure as Director, the Committee became the ITU Radiocommunication Sector (ITU-R). One of three sectors at the ITU, ITU-R is responsible for matters concerning radio communication. Its role is to manage the international radio-frequency spectrum and satellite orbit resources, and to develop standards for radiocommunication systems with the objective of ensuring the effective use of the spectrum. While at the ITU, Kirby also served as President of the International Amateur Radio Club, 4U1ITU, the Amateur Radio station at ITU Headquarters in Geneva, Switzerland. Read more here <http://www.arrl.org/news/former-itu-r-director-dick-kirby-w0lct-hb9boa-sk>.

==> + SILENT KEY: ASTRONAUT JANICE VOSS, KC5BTK (SK)

NASA astronaut Janice Voss, KC5BTK, of Houston, Texas, passed away on February 7 from cancer. She was 55. One of only six women who have flown in space five times, Voss' career was highlighted by her work and

dedication to scientific payloads and exploration. Voss participated in making ham radio contacts from space via the Space Shuttle Amateur Radio Experiment (SAREX), the precursor to the Amateur Radio on the International Space Station (ARISS) program. Read more here <http://www.arrl.org/news/astronaut-janice-voss-kc5btk-sk>.

==> SILENT KEY: WORLDRADIO FOUNDER ARMOND NOBLE, N6WR (SK)

Armond Noble, N6WR -- the founder of WorldRadio magazine and its publisher for 37 years -- passed away February 1 in Sacramento, California after a short illness. He was 77. WorldRadio was published monthly in printed form from July 1971 until the end of 2008, when Noble sold the magazine to Hicksville, New York-based CQ Communications Inc. With its February 2009 edition, the publication was renamed WorldRadio Online and became the first online-only major Amateur Radio publication . Read more here <http://www.arrl.org/news/em-worldradio-em-founder-armond-noble-n6wr-sk>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 10-12 -- ARRL Northern Florida Section Convention <http://www.arrl.org/hamfests/northern-florida-section-convention-orlando-hamcation-1>,
Orlando, Florida
- February 17-18 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-1>,
Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention <http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie, Arkansas
- February 25 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>,
South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention <http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest>,
Del Rey Oaks, California; ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-2>,
Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>,
Birmingham, Alabama
- March 9-10 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana-hamfest>,
Rayne, Louisiana; ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-green-country-hamfest-1>,
Claremore, Oklahoma
- March 10-11 -- ARRL Roanoke Division Convention

<http://www.arrl.org/hamfests/roanoke-division-convention-charlotte-hamfest-t
m>,
Concord, North Carolina
- March 17 -- ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest
>,
Lincoln, Nebraska; ARRL Southern Florida Section Convention
<http://www.arrl.org/hamfests/southern-florida-section-convention-2>,
Stuart, Florida; ARRL West Texas Section Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-57th-annual-st-pa
trick-s-day-hamfest>,
Midland, Texas
- March 23-24 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

WIANEWS WEEK COMMENCING FEBRUARY 12 2012.

WRC-12 Day 16 - 7 February 2012 - 500KHz YES!

Perth City of Light, the Hills Amateur Radio Group Event.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 12 2012.

HACK THE TUBE - A TRIP TO THE EDGE OF SPACE BY TEEN HAM ERIN KING, AK4JG

Erin King, AK4JG, of Columbia, Georgia, may only be a teenager but she has
already left a very positive imprint in our world of amateur radio.
Cheryl Lasek, K9BIK, has the details on Erin's magic carpet ride to the
edge of space and the video that is taking the ham radio community by storm:

Erin King, AK4JG has posted a video of her recent
amateur radio high altitude balloon mission for
the 'Hack the Tubes' project. This, for the
Massachusetts Institute of Technology's class of
2016's early admissions program. And when you
see it you will find it hard to believe that both
the flight and the video are the work of a very, very talented teen.

According to AK4JG, she decided to send her Tube to the edge of space by turning it into an amateur radio high-altitude ballooning project. To accomplish this, Erin used two GPS and APRS-equipped transmitters for payload tracking. One of these signed the call AK4JG-11 and the other beaconed her fathers call sign of K4ETY-11. Each one sent out position packets from the Tube so Erin could follow it on the ground.

Also on board the tube-shaped payload was an Earth viewing GoPro Hero camera shooting high definition video. And capture some breathtaking video of the entire flight it did.

Erin's payload was carried aloft by a Helium filled 800 gram weather balloon. Take-off took place on January 16th at around 1 P.M. Eastern time from Lumpkin, GA. The entire flight from launch to landing lasted about 2 hours. That is all compacted to 8 minutes during which Erin's video takes you from initial payload assembly of the trackers to the edge of space at over 90,000 feet and to recovery of the payload from where it landed in a pine tree.

The video is set to the music of "Circuit" by Sonic Adventure Project. There is no narration. Instead Erin and her very professional video editing skill lets the pictures tell the entire story. You can see it for yourself by taking your web browser to tinyurl.com/AK4JG-balloon-video.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

Again, you will find Erin's video on-line at tinyurl.com/AK4JG-balloon-video

Go take a look. You will be glad that you did. AND it begs the question whatever happened to the VKs from 5 and 2 that used to experiment with ballooning?

To mark the 50th Anniversary of the Perth City of Light, the Hills Amateur Radio Group will make an ARISS contact. Taking resources from around the globe to make this possible.

In the middle of the night Dick (AH6NM) and Mike (N6GOZ) will be running their ARISS tracking station, pointing their antennas at the International Space Station and directing the feed across the globe to Perth, where we'll be sitting in the shade of the big-screen at the Northbridge Piazza.

Mike tells us that he's going to be fine with our Aussie slang, since he was born in Bris Vegas (Brisbane) and went to school in Tumby (Toowoomba). He also knows his station inside out, since he was one of the HAMs responsible for building the tracking facility. He's had a bit of Hawaii rub off on him,

he's been there since the late 70's, so we will have the best of both worlds.

Welcome aboard! Or as Mike put it, 73 and aloha

February 20th. Festivities start from 5pm on the Northbridge Piazza

(Onno VK6FLAB)

FROM RSGB.ORG WEBSITE - WRC-12 Day 16 - 7 February 2012 - YES!

Agenda Item 1.23 - 500kHz

Progress through Committee 4 (COM4) was a little easier than expected and the frequency band 472-479kHz will be allocated to the amateur service, on a Secondary basis. This is subject to no further objections being received during the two final readings through the plenary meetings

Agenda Item 1.15 - Oceanic Radar

It seems that tidying up the paperwork was not part of the intent when the sub-working group reconsidered these proposals. The entry for 5250-5275kHz remains in a footnote as a Primary user in Region 2 and Secondary in Regions 1 and 3. This paper has been elevated to Working Group 4A and could be considered by COM4. As the spectrum for this issue covers now extends to 42MHz, the references to HF have been removed.

Agenda Item 8.2 - Future Agenda Items

5MHz

Text for this proposal should have been agreed between Cuba and the US, seems that specific reference to the amount of spectrum required has been removed, as Cuba wanted 50kHz and the US offered 15kHz. The latter is of course less than US amateurs have under current arrangements. This is before the proposal even gets considered as a Future Agenda Item-

10GHz

There is a proposal for an allocation at 10GHz for the Earth Exploration Satellite Service for WRC-15. Initial investigations show there could be a small threat to the amateur services so this is being closely followed.

77GHz

Another likely agenda item for WRC-15 is "Allocation of the band 77.5-78.0 GHz to the radiolocation service to support automotive short-range high-resolution radar operations", otherwise known as anti-collision radar. This frequency band is currently allocated to the amateur services on a Primary basis

For updates on the above which is sourced to the RSGB go to http://www.rsgb.org

Twitter telegraph a reality

Just when you think you know about technology convergence along comes the simple Arduino project.

It involves a Morse code key, somewhat an old switch, with a new use in the form of modern Twitter.

Becoming a Tworse key you can send standard Twitter messages through a LAN cable and decoder.

The Arduino project includes the source code, hardware schematics and building instructions.

Check out @tworsekey on Twitter to read some examples sent from the actual device.

Or visit Google at https://code.google.com/p/tworsekey/

(Jim Linton VK3PC)

Virtual tour of ARRL HQ station

On 12th February, amateurs worldwide will be able to enjoy a virtual tour of the station at ARRL HQ in a live webcast starting at 22.00 GMT.

W1AW, the Hiram Percy Maxim Memorial Station, at ARRL Headquarters in Connecticut has appeared in many logs. Anyone with an internet connection will be able to watch the tour at www.awecast.tv/channels/arrl/

BUNYA MTS HAMFEST, MACLAGAN. SATURDAY.

Always good to hear how activity goes at events publicised here through VK1WIA

This report from the VK4 Wine and Ham Fest actually came from our good friends at Summerland, where a number of SARC members attended this very enjoyable Hamfest up in VK4.

Maclagan is 83 kms NW of Toowoomba, and about 400 kms from Lismore.

A very good day was had with 76 visitors logged and about 11 exhibitors.

Great hall, variety of gear there, incl wine tasting, catering etc.

Showing was a video of a lot of hard work building the 1989 Bunya Mts repeater.

Pic att of a general view, more at http://www.ourphotos.net.au/albums.php?album=3272

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news
Email Address : r_demkiw@yahoo.com.au

For those in northern Sydney, this Tuesday evening, the 14th is the first informal HADARC meeting for 2012. The Hornsby and Districts Amateur Radio Club meet at the Mount Colah Community Centre, near the Northern end of Pierre Close, Mt Colah, from 8:00pm. Their main meeting on the 28th will include a talk on small loop antennas by Jim VK2LC.

Website: http://www.hadarc.org.au/
Twitter: http://twitter.com/VK2MA

(Julian Sortland, VK2YJS)

As I'm sure all will understand the CCARCs activities this month are filled with preparation for our field day at Wyong racecourse in just two weeks time however this does not stop other club activities completely.

In the amateur TV world we are now transmitting regular test broadcasts on 444.250 MHz These consist of educational material and are well worth a look. For those in the Central Coast area point your horizontally polarised 70cm beam towards Kariong and connect up your normal TV set each Monday and Tuesday from 7:30pm for an hour of interesting video then call in at 9pm on VK2RAG on 146.725 to give your reception report. This is an important action prior to our upgrading the VK2RTG repeater to digital TV output.
The terrestrial digital transmitter will be on display at the field day and then installed into operation soon thereafter.

Another repeater action is also well in progress. The CCARC six metre repeater is just awaiting the final updates to the controller software and then it will come on air from our newly extended repeater station building at Somersby and promises to cover a large area from its high location. This repeater will have the ability to be linked to one of our 70cm repeaters to allow cross band operation for Standard and Advanced calls.

On the HF bands the clubs tri-bander and rotator are down for maintenance but will soon be back up again, higher than before so VK2AFY, the clubs base call sign, will be stronger than ever.

The club has recently taken part in the VHF-UHF Field Day contest and plans to enter the John Moyle contest in March.

Preparations for the International Lighthouse and Lightship Weekend in August are also well in hand with our location of Nobbys Head lighthouse in Newcastle booked.

For all details about what is happening at the Central Coast Amateur Radio Club, please refer to the clubs two websites;

CCARC.ORG.AU for all club news and FIELDDAY.ORG.AU for all you could want to know about the CCARC Field Day at Wyong racecourse.

73 - this is Ed VK2ARE on behalf of the CCARC.

DISCUSSION POINT

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Recently I had a discussion with a Foundation Licensed amateur who told me that he'd had some limited success making contacts using 10 Watts, but that he longed to have more power to get out and make better contacts.

While I understand the sentiment, I know from personal experience that it just isn't true. You don't need oodles of power to smack the audio against the receiver at the other end.

What you need is propagation and you need a set-up that works.

Now I'd be the first to admit that propagation is a bit of a mystery to me at the best of times, but my solution to that is to sit tight, listen and when lots of stations turn up at my door-step as it were - that is, I can hear lots of people calling - I've got a great chance at getting through.

What was a little more baffling to me was that this amateur, as I said, an F-Call had not really found a way to discuss his issues with any other amateurs. He'd been pretty isolated and only in discussing the issue with other F-Calls did he start investigating further.

I'd like to encourage you to ask around. Look who else is on air near you and talk to them about what you're seeing. The more people you talk to, the more you learn and the more you have a chance of getting to the magic point where you can get those elusive contacts on HF using your F-Call.

As I've said in the past, and I'll continue to say, power is not the answer, what you do with what you have is what makes the difference. Low power operation does not need to be a frustrating exercise in futility, QRP stations are doing this all the time.

Mostly it's a matter of attitude. Don't be shy. The amateurs around you who have their standard or advanced license needed to learn their craft too.

I'm Onno, VK6FLAB

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Cradle Coast Amateur Radio Club assessors have conducted amateur exams in Burnie. The end result is that a new member has passed the foundation licence Rachel Rawlings has passed the foundation licence and applied for the call VK7FRMR.

Please make Rachel welcome when you hear her on air in the near future.

Any person wishing to acquire a foundation or other licence, or upgrade, can contact the club's learning organiser, Keith Winkler, VK7KW. He will be able to assist with your learning requirements and organise an exam at a mutually agreeable time. Contact details for Keith are available on both the CCARC's

website and the www.wia.org.au site, radio club page, North West Tasmania.

(vk7news)

INTERNATIONAL NEWS With thanks to IARU, RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Central Philippines earthquake.

The amateur radio emergency communication activity has been well established on VHF and HF servicing Mondays earthquake and landslide hit areas.

The 6.9-magnitude quake killed 50 when it struck the heavily populated islands of Negros and Cebu, in the country's central region. Up to 100 are missing. There have been 900 aftershocks.

Chief Operating Officer for IARU society PARA, Eddie Valdez DU1EV said that Ham Emergency Radio Operations (HEROs) has activated on 2-metres and 7.095 MHz

Their command centre is on board the Philippine Coast Guard search & rescue vessel BRP Davao del Norte.

HEROs have been busy forwarding traffic from the disaster areas to Cebu and Manila.

Among the active HEROs are RJ DU7RJA, Roy DU7DDJ, DW7XKS and DW7RDX.

As landlines and mobile phones have been erratic, amateur radio has provided a vital link.

Alvin DU1AJ/7 has set up his station to relay with the HEROs in the stricken areas.

In Manila, HEROs operatives Butch DU1RP and Lito DU1PA have set up at the National Disaster Risk Reduction Management Council under the Department of Defence.

The Philippines suffered its worst earthquake in 1990 when a 7.7-magnitude tremor killed nearly 2000 people on the northern island of Luzon.

(Jim Linton VK3PC Chairman, IARU Region 3, Disaster Communication Committee).

ARRL VOLUNTEER TOUR GUIDES.

When you visit ARRL Headquarters in Newington, Connecticut, the first smiling face you're likely to see is a tour guide. ARRL's Tour Guide program now includes 19 volunteers who donate thousands of hours of their free time per year, giving tours to hundreds of visitors.

ARRL's tour guides are an integral part of the ARRL. When not giving tours, they are busy accomplishing tasks in various HQ departments -- sorting QSL cards, working on special projects in the lab, updating the periodicals archive, and much, much more.

NEWS FROM ARNEWSLINE USA

VLA TO BE RENAMED KARL G JANSKY VLA

The world's most famous radio telescope will become the Karl G. Jansky
Very Large Array on March 31st. This, to honour the founder of radio
astronomy which is the study of the universe using radio signals naturally
emitted by objects in space.

The National Radio Astronomy Observatory
announced the new name for the National Science
Foundation's Very Large Array at the American
Astronomical Society's meeting in Austin,
Texas. The new name will become official at a
rededication ceremony at the radio telescopes site in New Mexico.

The new name was selected from among 23,331
suggestions submitted by 17,023 people from more
than 65 countries. The National Radio Astronomy
Observatory had asked the public and the
astronomical community to suggest names that
reflected both the proud heritage and the future
promise of the telescope array.

More is on-line at tinyurl.com/jansky-vla.

INTRUDER WATCH: INTERNATIONAL COOPERATION TAKES WHITE NOISE OFF 40 METERS

Interference from All India Radio to the 40 meter band has been eliminated.
Amateur Radio Newsline's Cheryl Lasik, K9BIK, has the details:

Wolfgang Hadel, DK2OM, in Siegbach, Germany,
reports via the I-A-R-U Region 1 website that
back last December 1st he and Peter Jost HB9CET
of Zurich, Switzerland, noticed a band of white
noise like interference on 40 meters. This from
6 dot 960 to 7 dot 040MHz and also on 7 dot 820
MHz and showing up every evening.

Calculation by DK2OM showed the centre of the
spurious emissions was expected to be on the
centre 7 dot 410 MHz. From this point the German
and Swiss Departments of Post and Telecommunications became involved.

Both offices filed official complaints to their
counterpart in India. VU2GMN assisted by filing
a personal complaint. On January 13th the
transmitter located near the city of New Delhi
was reported as having been repaired, and all
traces of this source of interference to 40 meters was gone.

For the amateur Radio Newsline, I'm Cheryl Lasik, K9BIK, in Zion, Illinois.

More on this story is on-line at www.iaru-1.org

LOGBOOK OF THE WORLD TO SUPPORT CQ OPERATING AWARDS

CQ Communications and ARRL have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World electronic confirmation system. CQ's awards will be the first non-ARRL awards supported by Logbook of the World and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow.

The target date for beginning Logbook of the World support for WPX is April 1st. Amateurs will be able to use Logbook of the World logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard Logbook of the World credit fees and CQ award fees will apply.

The ARRL's Logbook of the World system is an interactive database recording contacts between radio amateurs was created in 2003 and has been adopted by 47,500 radio amateurs worldwide. It already has records of 400 million contacts and grows weekly.

A GLOOMY FUTURE FOR DXPEDITIONS TO JAN MAYEN ISLAND

Jan Mayen Island could soon head to the top of the DX worlds most wanted this. This as the result of a recent decision by the Norwegian government that declared most of Jan Mayen a Nature Reserve and banned landings and camping on most of the island. This means that tour operators can no longer visit since the main landing area is part of the Reserve.

The only places left on the island which could be used as landing and camp sites are in the very extreme southern part of Jan Mayen which suffers from extreme weather conditions. Amateur radio operations may still be possible from the two locations but both are difficult to get to due to stormy seas and other severe weather conditions. As such it now appears that the recent JX5O operation was probably the last major DXpedition to Jan Mayen for many years to come.

There is the chance that hams who might be assigned as staff members at the islands Olonkin base will be able to activate Jan Mayen. Late word is that LA9JKA, is to be there beginning

March 22nd and is expected to stay until March
2013 but what plans he has to operate from the
island at this point are unknown.

YAESU HINTING IT WILL BRING OUT C4FM DITIAL VOICE GEAR FOR AMATEUR RADIO

Yaesu is hinting that they will be coming out with new digital amateur
radios in 2012.

A new pamphlet discussing amateur digital radios
shows the new Vertex Standard APCO P-25
commercial radios, as well as new amateur radios
based on the C4FM FDMA digital audio system commonly known as MotoTrobo.

The pamphlet makes it appear that Yaesu will be
offering amateur gear based on the MotoTrobo
digital standard sometime this. The new vertex
radios look identical to their Motorola counterparts.

Our guess is that any launch of such a project would likely take place at the
Dayton Hamvention mid-May.

SARL Leap Year Challenge

You are invited to take part in the Leap Year Challenge on Wednesday
29 February 2012 and make as many contacts as you can on this day.

This challenge has been published around the globe but we are not sure if
it is opens to hams worldwide or just South Africa, however it is a
"challenge" and looks great fun!

Central African Time (CAT) on the 29th, all bands with phone, CW and digital
activity.

Work a station once only regardless of band, mode or call sign.

Submit your log by e-mail to zs4bfn@netactive.co.za by midnight
Friday 2 March 2012.

AWARDS

RSGB Commonwealth Century Club Jubilee Award 2012

2012 is the Queen's Diamond Jubilee and mindful that the Queen is the head of the Commonwealth of Nations we are pleased to announce a new operating award for 2012.

To qualify for an attractive certificate all you need to do is to work as many different countries and call areas on the Commonwealth Century Club list during 2012.

Certificates will be awarded for working 60 and 100 different call areas.

Use any mode or bands you like and QSL cards are not required.

Score sheets and full details can be downloaded from
www.beru.org.uk/CCCaward/CCCindex.html

BROADCAST MONITORING SWL AND SCANNER NEWS

NHK to sell analogue transmitter facilities

Japans NHK is in talks to sell some 1,050 analogue broadcasting stations it no longer uses to Softbank Mobile Corp.

The mobile phone service provider will use the stations - rendered obsolete by the nationwide switch to digital broadcasting last July - mostly as cell towers in mountainous areas because of complaints about reception in rural areas, the sources said on Thursday.

By improving its network, the carrier hopes to gain an advantage in the competition for radio bands for next-generation, high-speed data communications that might be allocated by the Internal Affairs and Communications Ministry later this month, they added.

The public broadcaster put the facilities up for bid in December and found Softbank Mobile was the only bidder, the sources said. The deal is estimated to be worth several hundred million yen.

SUMBANDILASAT AMATEUR RADIO OPERATION MAY RESUME!

Ingenuity and innovation by the SumbandilaSat ground control team has resulted in bringing the satellite back to life with a real possibility that Amateur Radio communication may resume while the satellite is in sunlight.

The ground stations at SANSA Space operations at Hartbeeshoek and the Electronic Systems Laboratory at Stellenbosch University are receiving telemetry when the satellite's solar panels are illuminated by the sun.

Johann Lochner, ZR1CBC, said that in early June 2011, for an unknown reason (but probably related to a major radiation event on 7 June), the primary controller on the power distribution unit (PDU) powering the On-Board Computer (OBC) stopped responding to commands from the ground station.

It later appeared that the battery had failed and nothing was heard from the satellite for some time. The ground segment software to monitor the passes over South Africa and to contact the satellite to initiate the recovery procedure was automated. After a month contact was made again. This was mid November. "We set in place a planned recovery procedure and within 3-4 days we came to the conclusion that the main battery had failed", Johann said. With SumbandilaSat responding when it is in full sunlight Johan Lochner is confident that some operations will be restored even to the point where it may be possible to do some imaging and have the amateur radio transponder back in operation.

More on recovery efforts are on line at www.amsatsa.org.za

(sarl news)

A CONFLICTING REORT SAYS THAT SUMBANDILLASAT FAILS ON-ORBIT

South Africa's Defence Web reports that the
nations second satellite, SumbandilaSat also
known as SO-67 is no longer fully operational.

Rob Olivier is the head of Business Development
at SunSpace. He told Defence Web that although
contact can still be made with the satellite, it
cannot capture images. As such it is no longer fulfilling its main purpose.

Oliver added that chances of repairing the
satellite on-orbit are virtually none. As such
SunSpace has moved on to other projects.

SumbandilaSat was damaged during a solar storm in the June of 2011.
The power supply to its on-board computer stopped
working and the satellite stopped sending back images.

In addition to its primary mission SumbandilaSat
also carried an radio payload as well. This
consisted of a voice beacon, a store and forward
parrot repeater and VHF to UHF FM repeater.

Vega student satellite launch.

Vega is now scheduled to launch Tomorrow, Monday, February 13, at 1000 UT
with eight student built amateur radio satellites.

The launcher will first deploy the main payload, LARES, the Laser relativity
Spacecraft and will then make an additional firing of the final AVUM stage
before deploying the secondary cubesat payloads.

Student Amateur Radio Satellites on Vega

Again as we said at top of news, in northern Sydney, this Tuesday evening, the 14th is the first informal HADARC meeting for 2012. The Hornsby and Districts Amateur Radio Club meet at the Mount Colah Community Centre, near the Northern end of Pierre Close, Mt Colah, from 8:00pm. Their main meeting on the 28th will include a talk on small loop antennas by Jim VK2LC.

Website: http://www.hadarc.org.au/
Twitter: http://twitter.com/VK2MA

(Julian Sortland, VK2YJS)

Hi, This is Ed VK2ARE from the Central Coast Amateur Radio Club to remind you it is just two weeks until Amateur Radio's big day out at Wyong on Sunday the 26th. of February.

All preparations are going well and it promises to be another great event with traders, exhibitors, seminars and the "great unknown" of the bargain you will find in the flea market.

This year we have a purpose built car parking area with its entrance off Rose Street which will be clearly signposted upon your arrival.

If this is your first time heading to the big event we also have talk-in using the clubs 2 Metre repeater VK2RAG on 146.725 under the call sign of VK2WFD, that's VK2 Wyong Field Day.

No one can predict the weather at the moment. We are hoping for a sunny day but rain or shine the event will go ahead.

So here's looking forward to a memorable day - see you there!

73 from Ed and the CCARC.

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only

be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Amateur Radio Newsline(tm) Report 1800 - February 10 2012

Amateur Radio Newsline report number 1800 with a release date of February 10th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio activates after a killer earthquake hits the Philippines; some good news out of WRC 12; new rules about United States ham radio operation on 60 meters take effect on March 5th and CQ Magazine's Editor says that ham radio use of the Morse Code is still alive and well in an era of no-code licensing. Find out the details are on Amateur Radio Newsline(tm) anniversary report number 1800 coming your way right now.

(Billboard Cart Here)

RESCUE RADIO: HAM RADIO RESPONDS TO PHILIPPINE QUAKE

Rescuers assisted by armed forces are hard at work searching for survivors in the quake hit central Philippines. The 6.8 temblor shook the country on Monday, February 6th. At least 56 are confirmed dead and thousands are homeless. And soon after the shaking ended ham radio operators were asked to provide what appears to be a first response effort. We have more in this report:

--

Most of the information to date comes from Jim Linton, VK3PC, who is the Chairman of the IARU Region 3 Disaster Communication Committee. Jim reports that the after effects continue across the central Philippines after the magnitude 6.8 earthquake struck triggering numerous landslides and other devastation.

Linton notes that Eddie Valdez, DU1EV, is the Chief Operating Officer for IARU society PARA. Valdez says that ham radio operators are now active in communications assistance, especially those near the quakes epicenter in the DU7 and DU6 call areas. They have chosen to mainly use the VHF and UHF bands for in-country communications. With phone communications cut, the services they are providing include message handling, reporting on widespread power outages as well as other infrastructure damage.

Meantime Radio Amateurs of Canada reports getting a message from a shortwave listener in Taiwan. He notes that 7 point 095 MHz on 40 meter Lower Sideband is also in use for emergency communications into

and out of the Philippines.

This latest disaster come on the heels of a series of typhoons that swept the Southern Philippines last December. Those storms brought with them a heavy loss of lives and severe property damage. In that scenario, radio amateurs were called on to become that nations communications front line.

For the Amateur radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles. Jim.

--

As we go to air aftershocks are continuing and the Philippine ham radio community remains on the job as an important first line of search, rescue and quake relief communications. (VK3PC, DU1EV, RAC)

**

RADIO LAW: A HAM RADIO ALLOCATION AT 500 KHZ COMES A STEP CLOSER

A ham radio allocation neat 500 KHz has taken another step closer to becoming a reality. According to several reports out of WRC 12 being held in Geneva, Switzerland, Working Group 4 has approved an agenda item that calls for a worldwide secondary allocation to the Amateur Service from 472 to 479 kHz and has sent it on to the full assembly called the Plenary for its consideration.

There are some restrictions which come with this action. Power output is limited to an effective one watt but would permit nations that are more than 800 Kilometers from an Aeronautical Service non-directional beacon to permit hams up to five watts effective radiated. Either way, ham radio operators must not interfere with any other spectrum user holding a primary status in that band.

Hat said, this is far from a done deal. Next up is two separate presentations or readings of this proposal before the Plenary session of all nations taking part in the world wide communications law making process. There, footnotes to the proposal can be added by any administration that has a representative at the conference.

While there is still a lot of work to take place before WRC 12 ends, at least near 500 KHz, there appears to be some light at the end of the proverbial tunnel in the matter of a new super low frequency ham radio band. We should know for certain by this time next week. (Various WRC 2012 Reports)

**

RADIO LAW: NEW 5 MHZ RULES GO INTO EFFECT ON MARCH 5

In the United States, word that the new rules governing ham radio operations in the 5 MHz or 60 meter spectrum take effect on March 5th. This after a notice to that affect appeared in the February 3rd edition

of the United States Federal Register.

As previously reported, last November the FCC released a Report and Order detailing new rules for the 5 MHz Amateur Radio band.

The announcement brought with it a number of changes for 60 meter operators. This included substituting a channel at 5 point 358 point 5 MHz for 5 point 368 MHz previously authorized. The effective radiated limit in the 60 meter band will be raised by 3 dB to 100 Watts Peak Envelope Power relative to a half-wave dipole. Also, three additional emission types are authorized. These are Data, RTTY and CW.

Currently, amateur radio in the United States holds a secondary allocation for 5 MHz and ham radio operations must not cause any interference to the primary users of that band. These include fixed service, as well as mobile stations authorized by the telecommunications regulators of other sovereign nations. Access in the United States to the channelized 60 meter spectrum is limited to holders of General class or high FCC license grants. You can read the entire Federal Register item explaining the 5 MHz changes at tinyurl.com/6wzsfjm (FCC)

**

HAM RADIO IN SPACE: SUMBANDILASAT MAY LIVE AGAIN

>From South Africa comes word that the SumbandilaSat amateur radio payload may resume operation in the near future. This according to the South African Radio League which says that a combination of ingenuity and innovation by the satellite payloads ground control team has resulted in bringing the ham radio functions back to life. Amateur Radio Newsline's Norm Seeley, KI7UP, has the latest:

--

A statement issued by South Africa AMSAT and released by the South African Radio League says that there is a real possibility that communication through SumbandilaSat may resume next month while the satellite is in sunlight. Here's the back story:

According to Johann Lochner, ZR1CBC, last June the primary controller on the power distribution unit for the On-Board Computer stopped responding to commands from the ground. While the exact cause has never been determined it appears likely that this failure was related to a major solar radiation event on June 7th.

It later appeared that the battery had also failed and nothing was heard from the satellite for some time. In the meantime the ground station operation to monitor for SumbandilaSat on passes over South Africa and to begin any recovery procedure was automated.

After a month of trying contact was made with SumbandilaSat. That was last November and the control team set in place a planned recovery procedure. It took about 4 days to discover that the main battery had

indeed failed with SumbandilaSat responding only when it's solar panels were in full sunlight.

The ground stations at the South Africa National Space Agency's operations center at and the Electronic Systems Laboratory at Stellenbosch University are now receiving telemetry when the satellite's solar panels are illuminated by the sun. As a result, Lochner is confident that some operations will be restored even to the point where it may be possible to have the amateur radio transponder back in operation within a reasonable time frame.

The bottom line is that while the overall space-frame has been written off by South Africa's SunSpace, the SumbandilaSat ham radio payload may be usable whenever the bird is illuminated by the Sun. In the world of ham radio space operations having that kind of service is far better than having nothing at all.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdle, Arizona.

--

More on SumbandilaSat recovery efforts are on line at www.amsatsa.org.za. (SARL)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including radio station CHNW on 88.7 FM serving the city of Westminister, near Vancouver, British Columbia, Canada.

(5 sec pause here)

**

RADIO LAW: PROPOSED MOBILE CELLPHONE LAW COULD END HAM RADIO MOBILE OPERATIONS IN ILLINOIS

Proposed laws introduced into both houses of the Illinois legislature could severely impact on mobile operation by hams, C-B operators and even long-haul truckers passing through that state. Matthew Chambers, NR0QQ, has the details:

--

New legislation has been introduced into the Illinois House that will have a significant impact on the mobile use of amateur radio transceivers within the state.

House Bill 3970 introduced by Democrat Representative Karen May would ban use of all electronic communication devices with the limited exceptions of those in a hands-free or voice-activated mode and for

law-enforcement and operators of emergency vehicles or parked vehicles.

Not included in that bill is any exceptions for two way radios or amateur radios. That would in effect ban all amateur and CB / GMRS / FRS activity in vehicles in Illinois.

Also introduced into the Illinois House is House Bill 3972 by Democrat Representative John D'Amico that is identical to HB 3970.

As the legislative sessions are getting into full swing across the nation, here at the Amateur Radio Newsline we will be watching closely as more cell phone bills are being introduced that may effect the mobile use of amateur transceivers.

For the Amateur Radio Newsline, I'm Matthew Chambers NR0Q.

--

As we go to air, efforts are being made from within the amateur radio community to obtain exclusion for mobile ham radio operations, but the wording of the two measures may make that very hard to accomplish. (NR0Q)

**

ENFORCEMENT: COLLEGE STATION GIVES UP LICENSE FOR NET ONLY OPERATION

Yet another college radio station has gone QRT. Amateur Radio Newsline's Stephen Kinford, N8WB, reports:

--

Paul Smiths College in Adirondack Park, New York, has relinquished its Class D FM broadcast license for its campus radio station WPSA FM. The school had been facing problems keeping it on the air that came from a series of FCC Monetary Forfeiture Orders over the late renewal of the station license in 2006 as well as lack of interest from the student body in the stations operation.

WPSA reportedly operated at around 10 watts with a service radius of two miles that covered little more than the campus. Its problems began when its license was cancelled by the FCC and the call sign deleted. Two years later, the college filed a Petition for Reconsideration and had it reinstated. Following the late renewal in 2006, the FCC issued a Notice of Apparent Liability for Forfeiture in the amount of $7,000 fine for unauthorized operation of a radio station after the license had expired.

Adding to the situation was a seeming loss of interest by its potential audience. According to the schools coordinator for student activities, students were part of the decision to give up the broadcast license. She said that no one wanted to participate in it and that it had very few listeners.

The spokesperson added that it appears the trend these days is that the students are on-line rather than listening on the airways.

For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB, reporting.

--

WPSA will live on but without a transmitter or antenna. Current plans are to bring it back to life, but as a strictly online entity. (RW)

COMMUNICATIONS LAW: FCC CHAIRMAN EMBRACES DIGITAL TEXTBOOKS

FCC Chairman Julius Genachowski has joined Secretary of Education Arne Duncan to discuss the state of digital learning in American schools.

At the first-ever Digital Learning Day Town Hall held recently in Washington, D.C., the Digital Textbook Collaborative presented them with the "Digital Textbook Playbook." This is a plan to help Kindergarten through 12th grade schools transition to digital textbooks. The Collaborative also helped the FCC and the Department of Education update the School 2.0 bandwidth planner to help schools plan for their connectivity needs.

At the meeting, Chairman Genachowski challenged state leaders and the digital textbook industry ecosystem to make national adoption of digital textbook a reality. He also announced a meeting for March with CEOs of companies in the digital learning space to drive national adoption of digital textbooks in the next five years.

The complete FCC press release that details the agency's plans to help facilitate the conversion to digital textbooks is available on-line at tinyurl.com/fcc-digital-textbooks. (FCC)

LIGHT SQUARED VS GPS: GOVERNMENT REPORT SAYS THERES NO WAY FOR THE TWO TO CO-EXIST

More problems for LightSquared in its bid to construct a 4 G network in spectrum adjacent to that used by the GPS navigation system. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

A joint panel of representatives from nine federal agencies says that it has determined that there are no practical solutions that would allow LightSquared's proposed broadband service to operate without significantly interfering with the Global Positioning System or GPS that operates in adjacent spectrum.

The report was made in a January 13th letter from the National Executive Committee for Space-Based Positioning, Navigation, and Timing to the National Telecommunications and Information Administration. It said that over the past year it has closely worked with LightSquared to

evaluate its original deployment plan, and subsequent modifications, to address interference concerns. It said that substantial federal resources were expended and diverted from other programs in testing and analyzing LightSquared's proposals. The report added that no further tests are warranted, as LightSquared has not demonstrated any means that would prevent such interference from occurring.

As previously reported, numerous tests over the past year have shown that signals from LightSquared's proposed 4G network held the potential to interfere with the weaker signals from space used by global positioning system receivers. As a result, In December 2011, the company offered to limit its signal to lower frequency spectrum farthest away from the bandwidth used by GPS in exchange for immediate access to that spectrum. Then as reported last week LightSquared lashed out at the GPS industry in a Federal Communications Commission filing, claiming poor design of GPS units is solely to blame for the problem.

Not surprisingly, LightSquared immediately issued its own press release calling for the FCC and NTIA to retake the lead on conducting tests of its network, claiming the committee report demonstrated bias and inappropriate collusion with the private sector. LightSquared noted a director for Trimble GPS, whom is called an outspoken LightSquared opponent, served as Director of the Advisory Board. It also claims that government testing has become unfair and shrouded from the public eye.

With the latest on this seemingly never ending story, Im Bruce Tennant, K6PZW, in Los Angeles.

--

With the committee decision now on the books, a final ruling from the FCC on whether LightSquared will be allowed to go ahead with its plans to turn on its 4 G could come at any time. (Various News Reports)

NAMES IN THE NEWS: W9GKA WANTS JANUARY VHF CONTEST E-SKIP INFO

Some names in the news. First up is Kevin Kaufhold, W9GKA, of Belleville, Illinois. He says over the VHF Reflector that he is looking for log data on the E-skip conditions in this year's January VHF Sweepstakes. W9GKA says that he is writing an article on the e-skip QSO's in the contest, and would like to include as much information as possible. If you can assist, please send the log information on your e-skip contacts to him at kaufhold (at) yahoo (dot) com. (W9GKA)

**

NAMES IN THE NEWS: G0SFJ RELEASES NEW NOVEL INVOLVING MORSE CODE

A new novel featuring Morse code and radio is now available for purchase on the internet. Of Martian Lines was written by Andy Thomas, G0SFJ. It's plot is set on the Mars and in modern Russia and the Ukraine of two generations in the future. The book is described as a blend of cosmology, radio, space technology and Russian literature.

This is the second novel in the "Dmitri" series that explores the first Russian colony on Mars, and the lies and tensions the first Cosmonaut colonists from Earth bring with them. Of Martian Lines is available for sale on-line at www.createspace.com/3739192 (Southgate)

HAM HAPPENINGS: SARL NATIONAL CONVENTION

The 2012 South Africa Radio League's National Convention will be held in Pinetown from April 20th to the 22 at the Premier Hotel in Pinetown. The event kicks off with a buffet type supper at the Highway Clubhouse on Friday evening featuring a presentation highlighting how South Africa's electronic industry found it's origin in Pinetown and the local development off SSB.

The South Africa Radio League's Annual General Meeting will be held on Saturday morning at the hotel venue followed by two presentations covering VHF antennas and Logbook of the World. An awards banquet will also be held at the Premier Hotel. The full program and booking details are available on-line at www.sarl.org.za. (SARL)

**

HAM HAPPENINGS: HAMVENTION 2012 QCWA DINNER MAY 18

The 2012 QCWA Banquet will take place on Friday May 18th at the Dayton Ohio Airport Holiday Inn simultaneously with the Dayton Hamvention. The gathering will begin at 7:30 p.m. Eastern time with nature photography expert John Lemker as the featured after dinner speaker. For more information or to make reservations please contact Jerry Ragland, WA8BOB, at his Callbook or QRZ.com address.

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: WORLDRADIO FOUNDER ARMOND NOBLE, N6WR - SK

The changing of the guard in amateur radio continues with the sad news that Armond Noble, N6WR, founder and publisher of WorldRadio Magazine

for 37 years has become a silent key. According to Les Cobb, W6TEE, Noble died February 1st in Sacramento, California after a short illness.

The print version of WorldRadio was published monthly from July 1971 until the end of 2008, when N6WR sold the magazine to Hicksville, New York-based CQ Communications, Inc.

Armond Noble had a long and distinguished career in communications and the media. From 1953 to 1955 he served in the U.S. Army with a VHF radio relay unit. He went on to positions at commercial radio and TV stations around the United States. These included KTWO-TV and KATI in Casper, Wyoming; KOOK-TV, Billings, Montana; KTVB, Boise, Idaho; KERO-TV, Bakersfield, California, WOOD-TV, Grand Rapids, Michigan, and KCRA Radio in Sacramento.

During the Vietnam War, Noble was a reporter and photographer for TIME magazine and the Milwaukee Journal. He also served in the TIME-LIFE bureau in Sacramento, California.

Armond Noble, N6WR, was reportedly hospitalized about two months ago. As we go to air memorial services have not been announced. (W6TEE, W6FJ, CQ Publishing)

**

WORLDBEAT: RSGB WANS HAMS ABOUT UNAUTHORIZED USE OF OLYMPIC LOGOS

The Radio Society of Great Britain is warning that although telecommunications regulator Ofcom has granted permission for that nations radio amateurs to use special prefixes over this summer, this permission does not extend to use of the various logos associated with the London Olympic games on QSL cards or elsewhere.

The RSGB notes that these logos, or Games Marks as they are called in the UK, are strictly controlled by the London Organizing Committee of the Olympic and Paralympic Games. As such they are not free for individuals and organizations to use without express permission..

There is so far only one exception. Project ECHO which is concerned with the two main special event stations has been granted permission to use the games Inspire logo, but only in a limited way.

More information about the use of the Olympic logos and their use can be found in the at the Frequently Asked Questions on the www.london2012.com website. (RSGB)

**

DX

In DX, HA0NAR and HA0SR will be active as FW0NAR from Uvea Island through February 20th. The plans were to have two stations active on 160 through 6 meters using CW, SSB and RTTY, with a focus on the lower

bands. However, this may change since they lost the third operator who was to make the trip. QSL FW0NAR via HA0NAR.

SP5APW is expected to visit Phu Quoc Island between March 7th and the 12th. He has applied for the callsign 3W4JK. Operations will likely be holiday style on 40 through 10 meters using SSB, PSK31 and RTTY, with possible operations on 6 meters. QSL as directred on the air.

Lastly, well placed reports indicate that an international group of 10 operators will activate St. Paul Island during the middle part of 2012. More details should be forthcoming in future Amateur Radio Newsline reports.

(Abve from various DX News Sources)

**

THAT FINAL ITEM: CQ SAYS MORSE IS ALIVE AND WELL

Finally this we we take a trip back to February of 2007. Thsats when the Federal Communications Commission took action to eliminate Morse Code testing as a requisite requirement to obtain any class of Amateur Service license in the United States. Now, five years later, CQ Magazine Editor Rich Moseson, W2VU, has published a very pointed editorial where-in he notes that both ham radio and use of the Morse code are alive, well and growing. This despite the ney-sayers who predicted the abandoning of Morse testing would bring a sudden end to the hobby.

In his editorial titled "No-Code Plus Five Years: An Assessment", W2VU, states that ham radio is still here. CW is still here and despite the fears of many CW supporters the universe did not implode on February 23, 2007.

Rather his article was prepared based on research that checked on signs of the state use of Morse by today's ham radio community. It did this by asking manufacturer of keys and paddles about sales, talking to the FISTS Morse preservation group, looking at CW contest results and overall United States licensing statistics. And says W2VU, the article has already brought some interesting response:

--

W2VU: "We've gotten a lot of good feedback from readers on this already and any ofb them are agreeing with the comment that we had at the end that the only real hiccup that we see and that was pointed out by Nancy Kott, WZ8C, is a difference in the conversion of CW learners to comfortable CW operators. That a lot of the newer hams that are learning the code do not yet feel comfortable on the air with it."

--

Moseson adds that ham radio has a long tradition of lending a helping hand to newcomers in need of assistance:

--

W2VU: "The best way to deal with this of coarse is the way that hams have dealt with learning experiences for decades which is to hook up experienced people with newcomers and helping them one-on-one, either on the air or off to be more comfortable as code operators and they will find a lot more enjoyment in it."

--

Without giving away all the findings in the article, W2VU does note that Morse has a bright future in amateur radio, despite or perhaps because of the elimination of the code test requirement. You can judge for yourself by reading Rich Moserson's complete article. You will find it on-line in Adobe PDF format at tinyurl.com/6rreyxy (ARNewsline(tm), VK3PC)

**

A VER SPECIAL NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, I just want to say a word of thank you to all of you who listen in each week to these Amateur Radio Newsline bulletins. As we end this 1800th consecutive week of bringing these newscasts to you, we want to pause for a moment and look back to 1977 when Jim Hendershot, WA6VQP, and Bill Pasternak, WA6ITF, produced and issued the first Westlink Radio Network bulletin. It was devoted entirely to repeater deregulation and only heard by those in the Los Angeles area with a transceiver set to 223.5 MHz simplex. Likely no more than two dozen people or so. Now just a few months shy of 35 years later, Amateur Radio Newsline, which is the successor name to Westlink Radio, is heard on thousands of repeaters world wide and by tens of thousands over the Internet. And as it was back in 1977, so it remains a free listener supported service to the ham radio by your fellow radio amateurs.

Yes, there are many people to thank, but we will limit it to three who were part of the original 1970's core group and who sadly have become Silent Keys. So as we end Newscast 1800 we lift up our imaginary glass to toast the lasting memory of our original Production Coordinator Bill Orenstein KH6QX. We also salute the master wordsmith and anchor Alan Kaul, W6RCL. Last but by no means lest, we remember our guiding light of many years and the man who made it possible for Astronauts to take ham radio into space. Of coarse we are referring to one of the world's greatest news reporters, producers and anchors, the late Roy Neal, K6DUE, of NBC Network News. All three may no longer be with us in the

flesh, but they will never be forgotten here in the Amateur Radio Newsline studios. What they helped to pioneer in the 1970's 1980's and 1990's is the reason you are hearing this 1800th newscast right now.

For now, with Bill Pasternak, WA6ITF, at the editors desk, and for all of the Amateur Radio Newsline volunteers the world over, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening all of these years. You are an important part of the Amateur Radio Newsline family and we would not be here if not for you.

I received this from Allen Pits, W1AGP. Allen is the Media and PR
Manager for the ARRL.

A major opportunity came up today, and you can take part in it....

SATURDAY Feb 11 at 4-10 PM CENTRAL

YOU ARE INVITED TO SHARE THE MAGIC OF AMATEUR RADIO AND HF BROADCASTING
TO A WORLD WIDE LISTENING AUDIENCE.

FROM 4 – 6 PM / 2200 - 2400 UTC THE FREQUENCY IS 9990 KHZ

FROM 6 – 10 PM / 2400 - 0400 UTC THE FREQUENCY IS 5085 KHZ

THE CALL IN NUMBER IS 615-547-9520

Call in and talk about:

WHAT YOU LOVE ABOUT AMATEUR RADIO,
YOUR FAVORITE MODES,
YOUR LOCAL AMATEUR RADIO CLUB AND ITS ACTIVITIES,
YOUR PERSONAL ACCOMPLISHMENTS IN AMATEUR RADIO

It is not very often that you can hear a new HF shortwave radio station
sign on the air. WTWW a new International Shortwave Radio facility just
outside of Nashville, TN is launching a new transmitter this Saturday
with a broadcast we are calling “This Is Only A Test” starting at 4
pm Central Standard Time. This is a 100,000 watt (wow!) transmitter
running into a full size rhombic antenna! They need to test it -and
while they are at it Ted Randall has set things up for hams to talk
about Amateur Radio.

This is a global radio event with radios being tuned in all over the
world.

The QSO radio show has requested hams to call in as a amateur radio
event to promote amateur radio along with shortwave listening. Why?
Well, the shortwave listening audience is huge and the typical
shortwave radio listener is a great potential candidate for amateur
radio. There are more than 1.5 billion shortwave receivers in use
worldwide, the BBC estimates that at any given moment, over 200 million
sets are tuned to shortwave broadcasts.

This is the second time WTWW has allowed us to conduct this kind of
broadcast on a powerful new shortwave facility. The purpose of this
broadcast is to demonstrate HF communications … and to put radio
amateurs on the air to a worldwide audience to tell their story.

By the way… this particular broadcast is not a commercial venture in any way. Maybe later it will be (they hope!) but not yet J So spread the word and call in on Saturday to “This Is Only A Test” and talk to the world about Amateur Radio!

Allen w1agp

Is it correct that this station is being run from Mannion's home? I believe
that under the terms of an SES the event must be open to the public, so
what's his address so we can all pop round?

:-)

| Is it correct that this station is being run from Mannion's home? I believe
| that under the terms of an SES the event must be open to the public, so
| what's his address so we can all pop round?
|
| :-)
|

I'm Sure DHJ could supply that

After all he's a nodding acquaintance of Rob

He may even like to pop in and have a bevy on his frequent forays South of the
border

I wonder if that is still a requirement? They keep moving the goalposts with amateur radio licence conditions to confuse the previously well informed.

I'm sure Rob would make you most welcome, he's in the book. I have an open invite, I think Jimbo has as well. :-)

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1049
BID: $OPDX.1049
February 13, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & ARRL DX, NG3K & ADXO, W3UR & The Daily DX, WK3N,, K4FW, N4AA & QRZ DX, N4JF, W4DXX, W4VQ, N5JB, WF5E, KH6BZF, W6NV, WB6RSE, K8GI, K8YSE, W8GEX (60m News), W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G0IAS, I1HYW, I1JQJ/IK1ADH & 425 DX News, JS6RRR, LY5W, OZ6OM & 50 MHz DX News, RSGB IOTA Web Site, VA3RJ & ICPO, VE3DX, VHF-DX-Portal and VU2DSI for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-February, through Sunday, 12th-February there were 226 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FW, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3C0 & 3C6, ANNOBON ISLAND and EQUATORIAL GUINEA (Update to OPDX.1047). Operators Elmo/EA5BYP and Javier/EA5KM will once again be active from Annobon Island (AF-039) and Bioko Island (AF-010, DXCC - Equatorial Guinea) using the callsigns 3C0E and 3C6A, respectively. The official

dates have been announced this past week. The whole DXpedition will take place between February 22nd and March 11th. Operations will take place from the following islands:
3C6A - Bioko Island; between February 22-26th
3C0E - Annobon Island (Pagalu); between February 28th and March 11th

QSL both callsigns via EA5BYP: Elmo Bernab&#65533; Coll, P.O.Box 3097, 03080 Alicante, Spain. They are looking for sponsors for this very expensive operation. For more details and updates, watch the Web pge at: http://www.gdgdxc.net/3c0e/index.php

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.kf5eyy.com

4W, TIMOR-LESTE (Update/QRT). Vlad, UA4WHX, is now QRT as 4W0VB. According to QRZ.com, Vlad states [edited]: "Now, 4W0VB went off the air. US5ETV and WA4WHX have been around, helping as much as they could. Great thanks to both of them! If you worked 4W0VB - you worked OC-148 (main island of East Timor - between January 11th-February 2nd and February 6-8th). If 4W0VB/p has been logged - you got OC-232 (Atouro Island - February 3-5th) for yourself. All the valid QSOs have been uploaded to LoTW. If you need a paper QSL, I would suggest you request it rather directly than via the buro. USD cash in an envelope is a very bad idea. IRCs are better than USDs. PayPal is perfect - my choice. Use E-mail payment-at-svezhyveter.ru for Pay Pal. A few QSOs are perhaps not in the log, either pirates or QRM, we will never know now. We could have busted your call, it may have happened. Feel free any time to ask if that may be the case, do not hesitate at all." Vlad's E-mail address is listed on QRZ.com, as well as pictures he took from 4W.

6O, SOMALIA. By the time you read this, Darko, J28AA/E70A, is expected to be active (on Monday, February 13th) from Hargeisa until February 20th. Mixed reports about his callsign indicate that he will probably use 6O3A and not 6O0DX as first announced. Also, reports indicate that he will return to the Minister of Telecom on Monday to give a live demonstration of operating (probably on 15 or 20 meters SSB), whereby his license and callsign will be granted. Using a FT-857D into a multi-band vertical antenna, Darko will be active on 40-10 meters using CW and SSB. While there Darko will also try to teach and demostrate amateur radio to the locals in Hargeisa and possibly establish a radio club by donating an IC-735 transceiver with an antenna. QSL via K2PF.

6V, SENEGAL. Vladimir, RK4FF, will be active as 6V7S from Le Calao in Ngaparou between now and February 22nd. Activity is on 80/40/20/15/10 meters using CW, SSB and RTTY. QSL via RK4FF.

6Y, JAMAICA. Yuri, VE3DX, will be active as 6Y2T during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band entry. He will be on Jamaica between February 14-21st. Activity outside of the contest will

be on 160-10 meters, including the 30/17/12 meter bands and using CW, SSB and RTTY. QSL via VE3DZ.

9TH AAW ACTIVITY.....
* How in its ninth year, the Antarctic Activity Week (AAW) now boasts over 40 special event stations world-wide. All for the purpose of promoting awareness of the important work done by the scientific community and its associated amateur operators who delve out QSOs when their work schedule permits. The February 2012 QST has a great article on the AAW.

* "Scotty", WK3N, (WAP 192) is now in his third year of contributing. He will be passing out QSOs between February 20-26th. His special AAW QSL and associated links to awards can be see on QRZ.com (under WK3N). His QSL card displays a rare October 1956 photo taken on the first days of the construction of the South Pole Station showing parachutes dropping construction materials. WK3N's special event QSL has even made its way to the South Pole station where it is on display. QSL is via the Bureau or direct with SASE or SAE and one IRC.

* Look for three Italian National Antarctic Museums to be activate during the upcoming 9th Antarctic Activity Week (AAW), from three different cities between February 20-26th. Stations will be operating from inside the museums and will be active on all bands and modes. Look for the following stations to be on the air:
II1MNA (WAP-60) - The National Antarctic Museum of Genova. QSL via I1UP. No E-QSL. The log will be available online at: http://www.arigenova.it/antartic%20activity.htm
Other info available at: http://www.arigenova.it
http://www.mna.it
II3MNA (WAP-205) - The National Antarctic Museum of Trieste. QSL via IQ3TS.
IO5ANT (WAP-210) - The National Antarctic Museum of Siena. QSL via IW5EFX.

More detailed information can be found on QRZ.com under the museum's callsign. Also, info about the AAW event can be found on the WAP Web site at: http://www.waponline.it

AH0, MARIANA ISLANDS. Masa, JI1DSO, will be active as AH0/AE6YW from the Saipan (OC-086) Rental Shack between February 29th and March 6th. Activity will be on 80-6 meters including the satellites. QSL via JA6GMC.

A2, BOTSWANA (DXpedition Update). Operators Frosty/K5LBU (A25CF), Keith/ VE7MID, Don/VE7DS (A25DS) and another operator to be named later will be active from the Lotsane Safari Lodge between March 18-27th. The group plans to be active in the CQWW WPX SSB Contest (March 24-25th) as A25HQ. They will have about 3 rigs and a log periodic plus wire antenna covering 160 meters and up. Look for more details to be forthcoming.

AU2, INDIA (Special Event). By the time you read this, you may have a day or two (expected QRT is February 13th) to work this unique 'Ham Radio

Expedition' that will be carried out at 'LOTHAL' in the Gujarat state, which is an Indian historic place (one of the most prominent cities of the ancient Indus valley civilization, dating from 2400 BC). Operators will sign AU2LOH. Activity will be on CW, SSB and STV. Their suggested frequencies are 7035, 7070, 7150, 14150, 14220, 21310, 21280 and 28550 kHz. Operators mentioned are: VU2ZNN, VU2EXP, VU2BGH, VU3RID, VU3KDG, VU3HRX, VU2DSI, VU2JGI, VU2CPV, VU3APY, VU3DJT, VU3IKI, VU3UTG, VU3VDC, VU2AGJ, VU3SEG (and his XYL Shikha), VU3BUT, VU2WWX, VU2XX, VU2VMJ, VU3PMU, VU2QBX, VU3TPN and SWL Suhash. QSL via VU3SYB. More details about LOTHAL can be seen at: http://en.wikipedia.org/wiki/Lothal

CR3/CT9, MADEIRA ISLANDS. Operators Ulrich/DJ2YA, Falk/DK7YY, Ulf/DL5AXX, Tom/DL5LYM and Frank/DL8WAA will be active as CR3L from Santana, Madeira Island (AF-014) during the ARRL DX CW Contest (February 18-19th) as a Multi-2 entry. QSL via DJ6QT. Operators will be active as CT9/homecall before and after the contest. QSL via their home callsigns. Check out the CR3L station's Web page at: http://www.cr3l.de

CT8, AZORES. Mario, DL2UX (ex-TY1JB), will be active as CT8/DL2UX from Graciosa Island (EU-175, DIP AZ-004, PIP AC-004, WLOTA 0113) between February 14-22nd. He is calling this a "Training Dxpedition" -- training Persistence (biking, running, swimming and pile up; Triathlon and Ham Radio). Activity will be on CW and SSB, and the HF bands testing antennas for 20, 40 and 80m. He will use an IC706 MKIIG or something better. QSL via his home callsign, direct or by the Bureau.

CY9, ST. PAUL ISLAND (Press Release #1 [edited]): "St. Paul Island is called the Graveyard of the Gulf and that is where an international, seasoned team of DXers will be heading to later this year.
Plans are well under way for a 10-man team to activate this now wanted DXCC entity which was last on air in 2005. When you consider most needed entities (perhaps out with the Top 10) are activated every five years or so, it is now time to mount a serious effort from CY9.
Most operators will be unaware that in 2010, St. Paul Island became the highest mover on DX Magazines most wanted list; from #77 to #47. Today, according to that list and ClubLog, CY9 is needed more than entities such as Tokelau (ZK3) or PY0T (Trindade & Martim Vaz).
The team consists of Mike/AB5EB, Oscar/EA1DR, George/EA2TA, Christian/EA3NT, Simon/IZ7ATN, Col/MM0NDX, Bjorn/SM0MDG, Vicky/SV2KBS, Steve/VA3FM and Kevin/VE3EN.
From late July to early August, IOTA Contest included, the group will be active all bands, modes (160-2m) with special attention on 6m and 160m, if propagation allows.
A Web site is currently under construction and will be ready in a few short weeks where much more info can be found. The QSL Manager for the expedition is M0URX."

D4, CAPE VERDE. Rick, N6KT, will be active as D44TRS from Cape Verde between March 17-29th. Details of activity were not provided, but he will be active as D4A during CQWW WPX SSB Contest (March 24-25th). QSL via KU9C.

E5, SOUTH COOK ISLANDS (Update). John, N5JB, will be active as E51NJB from the Rarotonga Islands (OC-013) starting February 13th and depart on the 25th. John informs OPDX, "The Rarotonga Beach Bungalows resort I will be staying at is on the East side of the Island, so my path to the USA will slightly favor the East coast over the West coast. I will have a mountain between me and Asia. I expect to operate all bands, but I will be there with my wife, and I am operating holiday style. I will be doing some [activity] on the night time bands, but more on the daytime bands. I will probably operate a lot of CW, but I think there may be a need for phone because E51NNV (I think that was the call) did such a good job on CW and probably reduced the CW need by quite a bit. Maybe a good contest style phone operation would have a good rate. I will test both [modes] and see which plays best." Activity will include the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or N5JB.

H40, TEMOTU PROVINCE. Just a reminder that German operators Peter/DG1FK and Sigi/DK9FN will once again return to Temotu Province for a third time and be active as H40FK (PSK/RTTY) and H40FN (CW), respectively. Activity will again be from Lata Motel on Nendo Island (OC-100) between February 7-20th. Operations will probably be on 160-6 meters depending on the band conditions. QSL H40FN via HA8DD, and H40FK via DG1FK.

IOTA NEWS.....
AF-042. Members of the "Invoker Team" will be active as EG3INT/7 from Albor&#65533;n Island (WLOTA 1061, ARLHS SPA-145, DIE S-001, DME 04013, WW GRID IM85LW), an island half-way between Europe and Africa, between February 16-20th. The team plans to have up to 3 simultaneous stations on air, covering most HF bands in order to give a fair chance to all operators world-wide who need this IOTA reference, working mostly on SSB and CW modes. Operators mentioned are Jordi/EA3ATM, Jaume/EA3DW, Christian/ EA3NT, Ramon/EA3OR and Raul/EA5KA. QSL via EA5KA. To read the complete press release, go to QRZ.com (under EG3INT/7).

EU-039. Keith, G3TTC, will be active as F/G3TTC from Chausey Island (DIFM MA-004, DDFM 50, DPF 04, WLOTA 0424) between June 16-22nd. Activity will be holiday style probably on 80/40/20/15 meters SSB. QSL via his home callsign, direct or by the RSGB Bureau.

EU-127. Operators Max/DJ4EL, Alex/IZ4AMS, Enrico/IK2FIL, Joerg/DJ1JB, Ben/DO1BEN and Enrique/XE2AA will be active as DD4T from Helgoland Island (GID/DID N-014, WLOTA 0518) between June 3-10th. Activity will be on 160-10 meters using all modes. QSL via IZ4AMS, by the Bureau or direct.

EU-137. Lars, SM6CUK, will once again be active as SA6G/7 from Ven Island (WLOTA 0780) between July 25-30th. Activity will include an entry in the RSGB IOTA Contest (July 28-29th). QSL via his home callsign, direct or by the Bureau.

NA-213. Operators Allan/KV4T, Steve/KI4GGJ, John/AJ4T, Gaston/W4CCF and Nicholas/KJ4AVG will be active as homecall/p from Dauphin Island (USI AL002S, Mobile County, Alabama), between June 22-25th. KV4T/p will be on 17 meter CW and AJ4T/p on 20 meter SSB. The others operators will activate the other bands, depending on the propagation. QSL via the individual operator's home callsign.

J5, GUINEA-BISSAU. The Verona Section of A.R.I. (Italian Radioamateurs Association) is organizing by the means of a group of its members called "Verona DX Team" a DXpedition [with a humanitarian and amateur radio purposes] to Guinea-Bissau -- one of the poorest countries in the world. Guinea-Bissau is "most wanted", especially on CW, RTTY and the Digital modes, and has never been activated on EME. The EME operations are scheduled to take place between March 24th and April 6th. In addition to the VHF, they will try to be operative on UHF and 6 meters too. The callsign will be J52EME, and the location will be in the Cumura Mission (WW. Locator IK21DT). The suggested frequencies are: 144.130, 432.090 and 50.200 MHz. Simultaneously, they will also be active as J52HF with two stations on the HF bands, 80-6 meters using all modes. The suggested frequencies are:
CW - 3520, 7020, 10105, 14020, 18075, 21020, 24895 and 28020 kHz
SSB - 3780, 7065/7160, 14150, 18150, 21300, 24945 and 28430 kHz
RTTY - 3580, 7050, 10140, 14080, 18100, 21080, 24920 and 28080 kHz
6m - Skeds only for both CW and SSB (See Web page for details.)

Operations will be based mainly on RTTY and CW modes, but that doesn't mean that they will not be active on SSB. They will be present in the CQWW WPX SSB Contest (March 24-25th). Operators mentioned are Lucio/I3LDP (Team Leader, SSB, RTTY, 6m), Silverio/IK3IUL (CW, SSB, RTTY), Livio/IZ3BUR (SSB, RTTY), Walter/I3VJW (CW, SSB, RTTY), Libero/IK3RBE (SSB, RTTY, 6m), Enzo/ IK2VVD (SSB, CW), Milena/IK3VZJ (RTTY, SSB), Tony/IK3ESB (SSB, CW, RTTY, 6m) and Ilario/IZ3STA (SSB, RTTY, 6m). QSL via I3LDP, direct or by the Bureau. See the Web page for more details about QSLing. For more details and updates, visit the J52 DXpedition Web page at:
http://www.ari.verona.it/veronadxteam/en/index.htm

JW, SVALBARD. Operators Mitko/LZ1UQ and Andy/LZ2HM will be active as JW/homecall from Svalbard between February 15-21st. Activity will be on all HF bands using CW, SSB and possibly RTTY. They also plan to be in the ARRL DX CW Contest (February 18-19th). QSL via their info on QRZ.com.

KH2, GUAM (Update). Operators Takeshi "TAKE"/JS6RRR and Akihiko "AKI"/AB0IH are now active as KH2/JS6RRR and AB0IH/KH2 from Guam Island (OC-026, USI GU003S, WFF KFF-110, WLOTA 0064 and Grid Loc. QK23) until 0300z, February 14th. Activity will be on 160-6 meters using CW, SSB, FM, RTTY and PSK31. QSL AB0IH/KH2 via JI3BAP and KH2/JS6RRR via JS6RRR. Please check QRZ.com for details.

KH2, GUAM. Hisashi, JF2SKV, will be active as NH0S/KH2 during the ARRL DX SSB Contest (March 3-4th) as a Single-Op/All-Band/High-Power entry. QSL via JF2SKV.

VRY DIS - Very Disturbed Severe Storm K�9 100-400

KH0, MARIANA ISLANDS. Masashi, JL1FUQ, will be active as W2GJ/KH0 from Saipan (OC-086, USI NI002S, WLOTA 1333, WW Loc. QK25UF) between April 29th and May 3rd. Activity will be on 80-10 meters using all modes. There is a possibility of some 6 meters operations. QSL via his home callsign.

LX, LUXEMBOURG. Operators Lars/DF1LON, Gerd/DF9TS, Norbert/DJ7JC, Wil/PA0BWL and Philippe/LX2A will be active as LX7I during the ARRL DX CW Contest (February 18-19th) as a Multi-Single entry. QSL via LX2A. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

LY16, LITHUANIA. Look for special event station LY16W to be on the air until February 29th. Activity is to celebrate "The Act of Independence of Lithuania". This is the first time ever that the LY16 prefix is being used on the air! Activity will be on all bands, 160-10 meters, using CW, BPSK, SSB and RTTY. QSLs are welcome via the Bureau, eQSL, LoTW and direct via LY5W. This is a good chance to confirm a new prefix for the many WPX awards. Check out the LY5W prefixes trophies corner at:
http://rk.vdu.lt/lt/ly-wpx-trophy
http://rk.vdu.lt/lt/ly-wpx-trophy-honor-roll
http://rk.vdu.lt/lt/baltic-states-wpx-trophy

M5, ENGLAND (Special Contest Station). Look for the special contest station M5E to be active in the ARRL DX CW Contest (February 18-19th) from the historical site of Marconi's original trans-Atlantic tests in Cornwall. Operators from the Wireless Contesters Olof/G0CKV, Kazu/JK3GAD, Oliver/W6NV and Seppo/OH1VR will operate as a Multi-2 entry. Special QSLs will commemorate contacts on multiple bands. QSL to G0CKV. Read more about M5E on QRZ.com.

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the ARRL DX CW Contest (February 18-19th) as a Single-Op/High-Power entry. QSL via N4AO.

OH0, ALAND ISLAND. Operator Tomi, OH6EI, will once again be active as OH0Z, but this time during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/High-Power entry. QSL via W0MM.

P3, CYPRUS. Jack, R2AA (ex-RW3QC), will be active as P3N during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via RW3RN.

PJ4, BONAIRE. Operators Martin/W1MD, Charles/K1XX and possibly others will be active as PJ4X during the ARRL DX CW Contest (February 18-19th) as a Multi-2 entry. QSL PJ4X via LoTW or direct to W1MD. Operators will be active outside of the contest with their own individual callsigns. QSL via their home callsign.

PJ4, BONAIRE. Four stateside operators from Georgia will be going to the K2NG rental QTH on Bonaire (SA-006, WLOTA LH-1279) for CQWW WPX SSB Contest in March. They will travel down on March 20th and return on March 27th. The team should be active as PJ4/homecall between March 21-27th and in CQWW WPX SSB Contest (March 24-25th), they will use the contest callsign PJ4Z as a Multi-2/High-Power entry. Operators are John/K4BAI, Fred/WW4LL, Brian/NA4BW and Eric/W4DXX. Their activity will be on CW, RTTY, and SSB, outside the contest using their PJ4/homecalls. They have ordered photo QSLs and all five callsigns should be QSLed via K4BAI. Requests for bureau cards may be sent to <k4bai@att.net>. The PJ4Z logs will be uploaded to LoTW and probably some of the non-contest logs too.

PJ7, SINT MAARTEN. By the time you read this, Gary, AK4GP, should be active as PJ7/AK4GP from Sint Maarten (NA-105, WLOTA 383, DIFO FS-001) until February 17th. Activity will be QRP CW on 40 and 20 meters using an Elecraft KX1. QSL via LoTW.

LAST CHANCE TO GET 7Q7HB AND 7Q7RM QSLS. QSL Manager Allan, G0IAS/7Q7AH, announced this past week, on behalf of Elaine the widow of Harry, 7Q7HB, thanks to all who sent their condolence messages to Elaine, she has asked

him to say a 'BIG THANK YOU' to all who did. He also announced that at this time the following: "On the anniversary of Harry's death, 12th DECEMBER 2012, I will CEASE to answer ANY QSL Cards for 7Q7HB. I have ALL the logs of ALL Harry's QSOs from 7Q7, if people NEED a card they have until the 12th DECEMBER to send for one. After that date ALL cards will be ignored and returned. It is VERY stressing and depressing to answer cards for a Guy who has been your best pal for 50 years...I am also seriously thinking of doing the same with 7Q7RM's cards. Ron has now been "SK" for 6 years and I still get cards for him. Neither he nor Harry require QSLs now... so I guess after the 12th December I should stop replying to cards for either station..... If anyone has any questions, my E-mail is good at QRZ.com, I will reply to ANY questions." If you need a 7Q7HB and 7Q7RM QSL, remember to ONLY QSL DIRECT to G0IAS: Allan Hickman, The Conifers, High Street, Elkesley, Retford, DN22 8AJ, England.

HK0NA UPDATE AND OQRS NOW ACTIVE. The HK0NA Online QSL Request System (OQRS) is now active as of Monday, February 5th, at about 1500 UTC. Also, the HK0NA QSL Manager Bob, N2OO, informs: "Just uploaded the separate 'Fab Four' (HK1N, HK1T, HK1MW and HK6F) Malpelo logs to ClubLog <http://www.clublog.org> for anyone who wants to search their QSOs. They are listed as homecall/HK0M. For example, HK1MW/HK0M."

PJ4C LOG. Bernard, F9IE, QSL Manager for the past PJ4C Dxpedition, reported this past week mistakes have been fixed to the PJ4C log and have been uploaded to Clublog <http://www.pj4c.com/pj4c/joomla/online-log>.
There will be, if necessary, a new log upload to Clublog, at the end of February. LoTW uploading is scheduled but not for several months. They request patience.

TO3J OQRS NOW ACTIVE via ClubLOG at: http://www.clublog.org/charts/?c=TO3J
TO3J QSL information: http://www.qrz.com/db/to3j

UZBEKISTAN QSLS. Les, WF5E, from the DX-QSL Service, reports: "I just received about 600 mixed QSLs from Uzbekistan. These are for USA stations, and I will forward them shortly to various bureaus and some directs. Some are 'Thanks QSLs' and some 'PSE QSLs'."

VP6T OQRS NOW ACTIVE. The VP6T Team has announced that just one week after the end of the VP6T Pitcairn DXpedition over 23,000 QSOs [41%] of the 56,300 QSOs have already been "QSLed" on LoTW. If you would still like a direct QSL or a Bureau QSL you can now request them via the OQRS facility on ClubLog. Go to ClubLog. Find your QSOs, and press "Request QSL". QSL cards can also be requested in the traditional way (letter for direct or E-mail for Bureau) via the QSL Manager Nigel, G3TXF. However, if you have already received your LoTW "QSLs" and do not specifically require a traditional paper QSL, you are still welcome to make a small "thank you" donation to the VP6T operation via the VP6T Website donate button at: http://www.vp6t.org
Additional photos will be posted on this web site once the team is back home. Meanwhile, there are some pictures on the following Web pages:

Travelling to Pitcairn: http://www.g3txf.com/dxtrip/VP6T/VP6T.html
The VP6T station: http://www.g3txf.com/dxtrip/VP6T/VP6T-station.html
You can click directly from one page to the other (at the top).

QSL RECEIVED VIA LoTW: 4W0VB, 4W0VB/P, 9A2EU, A25NW, A65BP, C21HA, CR6K, CR8K, D2QV, DG5LAC, DH3MIT, DKL5WL, EA8TL, EA9IE, ES2MC, F1MWV, G6SFP, HG6N, JA0FVU, KH6MB, KL7J, LS1D, LX1EA, M0BSV, OD5PY, OK1FIM, OK1GU, PU5AAD, PZ5RA, RA1QY, SN7Q, SP3DKH, ST2AR, SV7LNK, T32LJ, TN2T, TX6T/p, UX2KA, V44KAI, VE3CGR, VE3KB, VE3RZ, VE5MX, VP6T, Z21BB and ZC4LI

QSLS RECEIVED VIA MAIL: 3B8CF, 4Z5ML, 5N6/YL2SW, 5R8X, 5V7SI, 5W1SA, 6W1SJ, 6W7SK, 8Q7DV, 9M2/KM9D, 9N7MD, BU100, C5A, C50A, CR2X, E51MAN, E51NOU, FK8GX, HL3ERJ, HV0A, JY5HX, KA0XTT, KH2L, OJ0B, OJ0X, T32C, TA7/RA9CKQ, TL0CW, TU2T, TX7M, UA3AP, UA9CUA, XF4IH and ZL8X

QSLS RECEIVED VIA THE BUREAU: 3DA0EL, 5N0OCH, 5R8WW, 9N7AN, A25SL, BA7IO, C56E, H40FN, IS0R, OJ0W, S9DX, SV9/DJ7RJ, T31A, TO5SM, TO7RJ, V5/DK1CE, V63MCA, V73QQ and YJ0MM

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO from the Helmand Province (Grid MM21) during the ARRL DX CW Contest (February 18-19th) as a Single-Op entry. Activity will be mainly on 40 and 20 meters only using 100 watts into a OCF dipole at 30 feet. Check during his sunrise and sunset. QSL via LoTW or to K9GY (see QRZ.com) direct or by the Bureau.

TG, GUATEMALA. Bill, W0OR, will be active as TG8/W0OR from Quetzaltenango between now and March 26th. He is there studying Spanish, but will have some free time and plans to operate mostly CW, but some SSB as time permits. He will also be in the ARRL DX Contest. He will try to get on 160m, if possible. Space is somewhat restricted. QSL via W0OR.

TI, COSTA RICA. Operators Robert/N6OPR and Terry/N0TW will be active as TI5/K6MQ between August 1-8th. Their activity will include the 10-10 Summer QSO Party (August 4-5th). QSL via N0TW.

V7, MARSHALL ISLANDS (Update). Jim, K4FW, will once again be heading to Kwajalein Island (OC-028) in March because of his job with the Orbital Sciences Corporation. He works with the Pegasus launch vehicle. More specifically, as the Launch Panel Operator (LPO) and is part of the flight crew on the Orbital's L-1011. Jim informs OPDX that he will be using the Kwajalein club station (V73AX) on the southern most side of the island and hopes to once again sign V73FW (application was sent in), if not then he will probably use V7/K4FW and not the club callsign. Activity will be after his work hours for the day on Kwajalein. He states, "I'm taking a Ten Tec Eagle out with me to use and plan to do SSB on any band that's open and use whatever V73AX has for antennas. I recently updated the information on QRZ.com for V73FW." QSL via K4FW, direct or by the Bureau.

VK0H, HEARD ISLAND (DXpedition Cancelled!). The "DX-World.net" announced this past week that the February 2013 DXpedition to Heard Island has been cancelled. No other details were provided. OPDX has sent an E-mail to Jim Linton/VK3PC, Publicist for the Heard Island 2013 DXpedition to find out why, but we have not received an answer yet. However, there is

some hope. The "DX-World.net" also mentioned that Daniel Kelton of Sydney,
will be sailing solo to Heard Island to attempt to climb its mountain
and kayak around its shores. David, states, "I understand that Heard
Island is a much sought after destination for DX and HAM radio operators.
I would be very happy to transmit from there but would need a lot of advice
and guidance about HAM radio." David does have a Blog page with all
his information about his plans and would also be very happy to answer
questions about his upcoming expedition. His Blog page is at:
http://www.heard-island-solo.com/p/expedition.html

ZD8, ASCENSION ISLAND. Operators Jim/N6TJ and Rick/N6ND will be active
as ZD8Z and ZD8R, respectively, from Ascension Island (AF-003) between
February 13-28th. Jim is expected to be in the ARRL DX CW Contest (February
18-19th) as a Single-Op/All-Band-High-Power entry. QSL ZD8Z via AI4U,
direct or by the Bureau. QSL ZD8R via N6ND.

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during
the CQ 160 Meter SSB Contest (February 24-26th) as a Single-Op/High-Power
entry. QSL via K6AM, direct or by the Bureau or LoTW.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 12th February 2012

IRTS 80th Anniversary AGM & Rally

Tickets for the AGM dinner on Saturday April 21st are selling fast. The event this year is hosted by Dundalk Amateur Radio Society, www.ei7dar.com. Dinner tickets are just 32, this is a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. As dinner tickets and rooms are distributed on a first come first served basis, you are encouraged and advised to act now to avoid disappointment. The annual rally, on Sunday April 22nd, will also have its favourites and many new and novel exhibitors. This is a must attend event in the 80th Anniversary year of your national society, www.irts.ie.

Dinner tickets can be bought now by contacting Thos, EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. The Fairways Hotel can be contacted on 042 9321500 or www.fairways.ie.

IRTS Request for Return of Trophies

It is time once again to recall all trophies presented at the 2011 IRTS, AGM in Limerick.

Trophies and Cups can be returned to the IRTS Stand at the Phoenix Radio Club Rally in Coolmine on Sunday 12th February. or to any IRTS Committee Member before end of February 2012.

This will allow for engraving to be done and allow for repairs if necessary.

Early return will be appreciated. Peter EI4HX at ei4hxperimental /at/ eircom /dot/net

Nominations For Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS Trophies that are required from within the membership, this includes the awards for, 1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2 Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Jim EI4HH, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental /at/ eircom /dot/ net

Closing date for nominations is 29th February 2012.

Phoenix Amateur Radio Rally

Phoenix Amateur Radio Rally takes place today, Sunday February 12th, Coolmine Community School, Blanchardstown, doors open at 11am. All welcome.

South Dublin Radio Club

South Dublin Radio Club will be launching the new Dublin Television repeater at today's Phoenix Rally, along with displaying the required equipment needed for reception.

There will also be a live demonstration this Tuesday 14th February at the club for those who are let out on Valentines night and probably most Tuesdays for the following few weeks. Equipment on loan, including a tiny portable LCD television will be available to check coverage at your own qth at a first come, first served basis each week.

The Annual General Meeting of the club will take place Tuesday 13th March. All members are requested to attend.

South Eastern Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place on Monday 27 February at 8:00 p.m. in the Roanmore GAA Club, Cleaboy Road, Waterford. Members are asked to attend and as always, visitors are welcome.

Please note that membership renewals for 2012 are now due. Membership costs 30 Euro and is available at a reduced rate of 20 Euro for pensioners, students and the unemployed. Please pass your payment on to any committee member or you can renew at the AGM on 27 February. Those who paid in November or December are fully paid up for 2012.

For information about the group, visit www.searg.com and you can also follow SEARG on Facebook and Twitter.

Cork Radio Club

The special call sign EI100T has been issued for the year 2012 to commemorate the 100th sinking of the Titanic and Cork Radio Club members will operate the station from Cobh throughout the year. The main Titanic event will happen over the weekend of April 13/14th and everyone is encouraged to visit the special event station in Cobh. Information on EI100T from Cormac EI4HQ QTHR. Further information on Cork Radio Club is available from Jeremy EI5GM on 083-3317710.

Galway VHF Group

Craggy Island Dxpedition Group.

A number of members of the Galway VHF Group have recently formed the "Craggy Island Dxpedition Group". The group is waiting for an appropriate callsign before the activities begin. Weather permitting, it is hoped that there will be frequent excursions to offshore Islands over the coming year. It should be noted that working an offshore Island does contribute towards the Worked All Ireland Award Scheme and where possible, there will be operation from all squares on each Island. Ample notice will be given via the IRTS News service and do take a look at the Galway VHF Group News page at www.galwayvhfgroup.com which will also be regularly updated with forthcoming plans.

Galway VHF Group News

The Galway VHF Group continue to hold regular meetings with demonstrations of test equipment for the Hamshack. At a recent meeting there was a discussion and demonstration of the Oscilloscope. Other meetings have demonstrated the use of the Signal Generator, and Sinadder and their uses when performing conversions of PMR radio equipment for the VHF Amateur Bands. It is surprising how easy it is to tweak the receiver sensitivity of such rigs using the aforementioned equipment. At the next meeting there will be a practical demonstration covering the building blocks of an AM/FM receiver. After measuring parameters of each stage, the receiver will then be tuned up with a signal generator and Oscilloscope. AREN operations will be busy over the coming year with 7 activities planned so far. These operations will cover Cycling, Walking, Rowing, and Marathon activities undoubtedly there will be many more before the year is out.

Classes for the Amateur Radio Examination are being organised by Steve, EI5DD, for anyone interested from the Galway Area. If there are insufficient numbers for a class it will be possible to organise tuition on a one to one basis if this is preferred. Details may be found on the Galway VHF Group Website at www.galwayvhfgroup.com

---

West Tyrone Amateur Radio Club

WTARC is running a course for the Intermediate Exam which will take place on Tuesday 3rd April 2012.

The course will be on the following Saturday afternoons... Saturday 18th & 25th February, 10th, 24th 31st March, we will not be accepting any registrations after Wednesday 15th February, cost of the course is £65 which includes all materials needed for the course and the exam fee.

A registration form can be downloaded from our website at www.wtarc.co.uk

---

DX News

DK9FN is active from Temotu Province in the Solomon Islands until 24 February. Temotu Province counts as a separate DXCC entity. His callsign is H40FN and QSL Manager is HA8DD. The IOTA reference number for this rare one is OC-100

A group of American operators will visit the Bahamas from 13 - 23 February. Look out for the callsigns C6ABB, C6ALC and C6APX.

Other activity in the Caribbean in the coming week will see W4OWY and AA9A signing V25WY and V25AA respectively from the island of Antigua.

Will AA4NC is QRV from Belize from 16 - 26 February using the call V31RR. He will be on 160 - 10m using RTTY, CW and SSB. QSLs go via AI4U.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

145. Bunnell flameproof key mushiness

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-12 23:58:06 UTC
From: davidmylastname@acm.org
Message-ID: <jh9jmeuj1@frotz.eternal-september.org>
Source record: 3662

I've been playing around with two Bunnell flameproof code keys. One of them has a great feel to it. The other one moves with a slight, but annoying, amount of mushy resistance. What's the correct way to remedy this? The mushy one appears a bit newer than the good-feeling one. Also, I'm not sure how to go about disassembling these keys beyond taking the bottom plate off. Removing the screw I immediately see upon removing the plate doesn't seem to loosen anything.

SARL NEWS - SUNDAY 12 FEBRUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the keys of two radio amateurs became silent recently. They are:

The key of Walter Arnold, or Art, ZS5SU, went silent on the 10th January 2012 after a short illness. Art had been living in London, UK for the past decade or so. His other interest was astronomy and he was also an amateur magician.

The key of Janse van der Merwe, ZS4IQ, on Monday 6 February. Janse was 92 years old. He leaves his YL Annie behind.

We extend our condolences to the families and friends of the deceased.

(PAUSE)

In the news today:

AMATEUR RADIO ALLOCATION AROUND 500 kHz ANOTHER FEW STEPS CLOSER

DISCOUNT FOR RAE STUDENTS UNDER 26

CQ SAYS MORSE IS ALIVE AND WELL

SARL NATIONAL CONVENTION BOOKING NOW OPEN

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

AMATEUR RADIO ALLOCATION AROUND 500 kHz ANOTHER FEW STEPS CLOSER

There was a good deal of support for Agenda item 1.23 at WRC12 among administrations at the SWG level for a secondary allocation to Amateur Radio just below 500 kHz; however, there was strong resistance by several administrations to the allocation, based upon a stated concern that amateur operation in that portion of the spectrum could cause interference to Non-Directional Beacons.

SWG 4C3 (the SWG dealing with Agenda Item 1.23) met 12 times over a period of ten days trying to arrive at a consensus. Finally, a consensus was achieved on the issue by adding various footnotes dealing with the allocation that satisfied most of the administrations opposing the allocation. At the end of the day, there were still a couple of administrations opposing the allocation. As a result, the SWG elevated the issue to the Working Group level with two options to satisfy the agenda item.

A secondary allocation to the amateur service in the band 472-479 kHz with certain operating conditions set forth in footnotes to the allocation, or No Change (in other words, no amateur allocation).

The proposal that has been agreed to by most administrations that support the amateur allocation calls for a worldwide secondary allocation to the Amateur Service at 472-479 kHz with a power limit of 1 W EIRP, but with a provision for administrations to permit up to 5 W EIRP for stations located more than 800 km from certain countries that wish to protect their aeronautical radio navigation service (non-directional beacons) from any possible interference. Proposed footnotes provide administrations with opportunities to opt out of the amateur allocation and/or to upgrade their aeronautical radio navigation service to primary if they wish to do so. In addition to these protections for aeronautical radio navigation, the Amateur Service must avoid harmful interference to the primary maritime mobile service.

At the Working Group meeting, there was no shifting of positions, so the matter was elevated to the next level: to Committee 4 with the same two options.

DISCOUNT FOR RAE STUDENTS UNDER 26

Students under 26 planning to write the class A Radio Amateur examination will get a discount off the examination fee of R100. The fee will be R350 which includes the license application fee and license fee to 31 March the following year. For details visit www.sarl.org.za.

CQ SAYS MORSE IS ALIVE AND WELL

Five years after the USA dropped the Morse code requirement, CQ Magazine Editor Rich Moseson, W2VU, has published a very pointed editorial where-in he notes that both amateur radio and use of the Morse code are alive, well and growing. This despite the ney-sayers who predicted the abandoning of Morse testing would bring a sudden end to the hobby.

In his editorial titled "No-Code Plus Five Years: An Assessment", W2VU, states that amateur radio is still here. CW is still here and despite the fears of many CW supporters the universe did not implode on February 23, 2007.

Rather his article was prepared based on research that checked on signs of the state use of Morse by today's amateur radio community. It did this by asking manufacturer of keys and paddles about sales, talking to the FISTS Morse preservation group, looking at CW contest results and overall United States licensing statistics.

CW was dropped as a license requirement in South Africa on 1 April 2011 when the ZR license was converted to a full class A license on a par with ZS.

ARRL & CQ SIGNED AGREEMENT

ARRL & CQ Signed an agreement to provide ARRL's Logbook of The World support for CQ's awards and ARRL - the national association for Amateur Radio, have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World (LoTW) electronic confirmation system.

CQ's awards will be the first non-ARRL awards supported by LoTW and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow. The ARRL's LoTW system, an interactive database recording contacts between radio amateurs was created in 2003 and has been adopted by 47 500 radio amateurs worldwide. It already has records of 400 million contacts and grows weekly. The target date for beginning LoTW support for WPX is April 1, 2012. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply.

ARRL Chief Executive Officer David Sumner, K1ZZ, observed that this step gives radio amateurs throughout the world an inexpensive and convenient means of gaining credits toward CQ's popular operating awards. "LoTW has significantly increased interest and participation in the ARRL's DXCC, Worked All States and VUCC awards programs. We anticipate a similarly positive response to the addition of the CQ WPX award. Amateurs will be able to spend more time operating and less time chasing QSL cards."

SARL NATIONAL CONVENTION BOOKING NOW OPEN

Book now for the SARL National convention which will be held in Pinetown from 20 22 April 2012. Get all the details at www.sarl.org.za and link from the home page.

SAAMSAT TO UPDATE ON KLETSKOUS CUBESAT ON SUNDAY

Listen to Amateur Radio Today for an interview with Hannes Coetzee, ZS6BZP, reporting on the progress made on SA AMSAT's KletsKOUS CubeSat project, or download the audio mp3 version from www.amsatsa.org.za.

CLUB NEWS

With reference to last week's item about the ZS6KTS repeater, this repeater was put on the air by the Kempton Park Amateur Radio Technical Society on 145,162 5/145,762 5 MHz in Birchleigh for a test period.

Please comments/reports to vubandplanning@sarl.org.za and also to vivdold@bestwebs.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. Fortunately a new sunspot is rapidly growing in the south-eastern quadrant of the sun.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 47.

All the bands from 20 to 10 m and especially 15 m will provide lots of DX fun with 10 m only opening sporadically due to the low solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

11 - 12 February - SARL Field Day contest 19 February - last day for submitting logs for SARL field day contest 20 February - Last day for submission of logs for Antique Wireless Association CW activity day. 29 February - Leap year Challenge from 00:01 till 23:59. 21 March - ZS6ERB construction day. 20 - 22 April SARL Convention in Pinetown.

Remember, nominations for SARL awards, which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM may still be submitted. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

GB2RS NEWS

Sunday 12th February 2012

The news headlines:

* RSGB launches two consultations

* Warrington club gains Olympic callsign

* Dominican Republic amateurs get 5MHz allocation

The RSGB will shortly be introducing two new consultations to draw Members into the RSGB policy creation process. Some topics will also be open to non-Members. The processes are being piloted on two issues and we hope that many people will feel able to contribute. The first consultation looks at the RSGB's Spectrum Strategy. The second seeks views on how we could celebrate the Queen's Diamond Jubilee with some form of QSO Party.

The proposed Spectrum Strategy is being developed by the RSGB Spectrum Forum. It will take into account the outcomes of the current World Radiocommunication Conference, which is due to end on 17 February. It is expected that the Spectrum Strategy consultation will commence on 1 March. All UK amateurs are invited to read and comment on the proposals and post their responses online.

The Queen's Diamond Jubilee QSO Party consultation uses a different approach. People will be invited into an internet discussion list to seek a consensus on a proposed draft for the QSO Party. We have called this approach a Litmus Test. The QSO Party Litmus Test will go live on Wednesday 15 February.

Further information and access to the consultations can be found at www.rsgb.org.uk/consultations.

Warrington Amateur Radio Club has been granted the Olympic call sign GB2012MV, for Manchester Venue. The station will be located at the Salford University campus and will operate on VHF, HF and D-STAR. Old Trafford will be a venue for the Olympic football competition.

Amateur Radio operators in the Dominican Republic have recently been granted permission to use seven 5MHz channels. These are the same channels as used in the UK. Modes currently permitted are SSB and CW.

Following the recent earthquake in the Central Philippines, communications have been set up on HF as the emergency activity of

amateur radio becomes established in the earthquake and landslide hit areas. Eddie Valdez, DU1EV, Chief Operating Officer for IARU society PARA, said that Ham Emergency Radio Operations (HEROs) has activated the emergency frequencies of 144.740MHz and 7.095MHz.

And now for the details of rallies and events for the coming week

The Harwell Radio & Electronics Rally will take place today, 12 February, at Didcot Leisure Centre, Mereland Road, Didcot. Doors open at 10.30am and there is plenty of free car parking. Admission is £2.50, with accompanied under 12s free. There will be trade stands and a flea market as well as special interest groups at the event. More details from Ann, G8NVI on 01235 816 379.

The Northern Cross Rally will take place at Thornes Park Stadium, Horbury Road Wakefield WF2 8TY today, Sunday 12 February. The usual mix of traders and groups will attend, including the RSGB bookstall and a local wind up mast manufacturer. Entrance is £3 per person and refreshments are available. Doors open at 10.30am. You are advised NOT to park on the road outside as it has double yellow lines on it, but use the available car parks. For more information, contact Ken 2E0SSQ on 07900 563117, before 8pm hours please. The organisers of the Swansea Rally, planned for 26 February, have been obliged to cancel it. They hope to be able to re-schedule it later in the year. Details from Roger, GW4HSH, on 01792 404 422.

Bournemouth Radio Society regrets to announce that, due to circumstances beyond their control, it has been necessary to cancel this year's sale, originally scheduled for Sunday 11 March. Please contact John, G0HAT on 07719 700 771 with any enquiries.

Now for the news of special events

On 18 February, the Surrey Radio Contact Club is activating a Thinking Day On The Air station. Using the callsign GB4ADD for the 4th. Addiscombe Girl Guides, the station will be in the Church Hall at Christ Church Methodist, 114, Lower Addiscombe Road, Croydon, Surrey, CR0 6AD. They will be there from around 10.30am and expect to stay for around three hours. There is ample on site parking.

Itchen Valley Amateur Radio club is helping Girlguiding Chandlers Ford Division celebrate World Thinking Day, over the weekend of 18 and 19 February, with the callsign GB0CFG. Visitors are always welcome at the Scout Hut, Brickfield Lane, Chandlers Ford. Further details from Liz, M0ACL, on 02380 254 599.

And now the HF DX news compiled from 425 DX News and other sources

Francois, F8DVD will be active as TM8AAW until 26 February, including the 9th Antarctic Activity Week of 20 to 26 February. He will operate on 10 to 40 metres, mostly SSB, from his home QTH in Macon, France. QSL via home callsign, direct or bureau.

Jean-Pierre, F6ITD will operate SSB and digital modes on the HF bands from Guadeloupe, which is IOTA reference NA-102, until 13 March. Look him for as FG/F6ITD from Basse-Terre until 19 February and then from La Desirade. QSL via his home callsign, direct or via the bureau.

Al, W6HGF will be active as FP/W6HGF from Miquelon Island, IOTA reference NA-032, until 20 February. Operation is planned to be focused on digital, mostly RTTY, including an entry in the CQ WW WPX RTTY contest. QSL via W6HGF, either direct or via the bureau.

Now the contest news

The first of this year's CQWW WPX contests is RTTY, which takes place for the entire 48 hours of the weekend of the 11th and 12th. There are categories for QRP, low and high power, single or multi-operator stations, various numbers of transmitters and even single-operator stations where the operator has been licensed for less than three years. With the HF bands now in good shape, 10m could well be busy for long hours. The exchange is signal report and serial number.

For 24 hours this weekend, the PACC Contest will be running on CW and SSB. Work as many Dutch stations as possible per band, giving RST and serial number. Dutch stations give RST + two-letter Province abbreviation, of which there are twelve in all. The multiplier is the number of provinces worked per band and, once again, there are numerous entry categories.

The RSGB 432MHz UK Activity Contest takes place on 14 February between 2000 and 2230UTC. Using all modes the exchange is signal report, serial number and locator. The following day, 15 February, the RSGB 80m club championships data leg takes place between 2000 and 2130UTC. The exchange is signal report and serial number. The ARRL International DX Contest takes place for the whole 48 hours of the weekend of 18 and 19 February. This event has a loyal band of followers in the UK and is a great one in which to build up your list of States contacted, if you are working towards the Worked All States Award. On the final weekend of the month there are two major international SSB events, but no clash of bands. Using CW only, the exchange is signal report and transmit power, although W stations send their State and VE stations send their Province.

And now the solar factual data for the period from Friday the 3rd to Thursday the 9th of February, compiled by Neil Clarke, G0CAS on the 10th of February.

There were fewer sunspot groups visible during the period with only 3 groups visible on the 5th and the 6th. On the remaining days only 2 groups were visible. Solar activity declined to very low levels for the first three days but then, on the 6th, an M1 class solar flare took place unexpectedly. Solar flux levels, as expected, declined from 111 units on the 3rd to 97 by the 8th. This is the first time that the solar flux levels were below the 100 mark since August last year. The average was 105 units. The 90 day solar flux average on the 9th was 136

units, that's five units down on last week. X-ray flux levels averaged B2.3 units, which is well down compared to previous weeks. Geomagnetic activity started at quiet levels, but on the 7th and the 8th a weak coronal hole disturbance took place with an Ap index of 15 and 10 units respectively. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 390 kilometres per second on the 3rd to 540 by the 7th. Particle densities were low every day. Bz varied between minus and plus 5 nanoTeslas on the quiet days and between minus and plus 7 nanoTeslas during the most disturbed day.

And finally the solar forecast. This week the more active side of the Sun is expected to be looking our way. However, looking at the latest images from the STEREO Behind spacecraft, this side of the Sun is not as active now compared to the last rotation. Therefore, solar activity is expected to be at low levels, with only a small chance of activity increasing higher than that. Solar flux levels should be around the 120's. Geomagnetic activity is expected to be quiet every day unless a coronal mass ejection heads our way. MUFs during daylight hours at equal latitudes should be around 28MHz for the south and 25MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 22MHz. The best time to try this path will be between 0900 and 1300 hours.

And that's all for this week from the propagation team.

Next, the Local News:

transmission.]

NEWS FOR THE MIDLANDS On Monday 13 February Gloucester Amateur Radio & Electronics Society is closed for the school holidays. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 13 February South Birmingham Radio Society is making plans for the rally season, including Wythall in March. Contact Don, on 01214 581 603.

On Monday 13 February Stratford Upon Avon District Radio Society is having an introduction to the loop fed VHF Yagi by Terry, G3MXH. Contact G0CHO, on 01608 664 488.

On Tuesday 14 February Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to

radio@dadars.org.uk.

On Tuesday 14 February Eagle Radio Group is having a presentation by Ian Hole, G0OUG, entitled renew your body. Contact John, M6JMS, on 01754 873 926.

On Tuesday 14 February Lincoln Short-Wave Club is taking part in the 432MHz UK AC from 8pm at the shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 14 February Loughborough & District Amateur Radio Club is looking at computer maintenance & use with Andrew, G8SEG. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 14 February Worcester Radio Amateurs Association is having a talk and demonstration on Echolink. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 14 February Wythall Radio Club is holding a committee meeting. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 15 February Lincoln Short-Wave Club is putting G5FZ on the air for the 3.5MHz CC Data contest and having a video night. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 15 February Midland Amateur Radio Society is on the air, discussing rally visits and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 15 February Telford & District Amateur Radio Society is taking part in the UKAC contests with Dave, G0CER. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 16 February Lincoln Short-Wave Club is holding its club simplex net on 145.375 MHz from 8pm. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 16 February Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk. On Thursday 16 February South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 17 February Coventry Amateur Radio Society is holding a skittles night. Contact John, G8SEQ, on 07958 777 363.

On Friday 17 February Melton Mowbray Amateur Radio Society is having a talk on the work of the Leicestershire Repeater Group by G4AFJ. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 17 February South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 18 February Lincoln Short-Wave Club is in the shack from nine `till noon 09.00 &#65533; Noon. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND We start with advance notice that Southport and District Amateur Radio Club will be running its next Intermediate Licence course from 17 March. This will lead to the exam on 21 April. The programme is by distance learning plus tutor support, a practical training session and a theory revision session, followed by the exam. The club still has some places available. Any Foundation licensees wishing to upgrade their amateur radio licence should contact the course administrator, Rob Harwood G0HRT on 07413 937 075 or via rob@g0hrt.co.uk ASAP. The venue is Ormskirk, Lancashire.

On Sunday 12 February Wakefield & District Radio Society is at the Northern Cross Rally, Thornes Park Athletics Stadium, Horbury Road, Wakefield, WF2 8TY. Contact Ken, 2E0SSQ, on 07900 563 117.

On Monday 13 February Angel of the North Amateur Radio Club is having a talk on parasitic oscillation by Chris Herring. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 13 February Sheffield Amateur Radio Club is having the third part of its contest workshop, looking at handling pile ups and weak signals. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 13 February Thornton Cleveleys Amateur Radio Society is having a talk on geography and travel by M3ZPN. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 14 February Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 14 February Halifax & District Amateur Radio Society is on the air. Details from Anthony Vinters, G0WFG, on 01422 822 636.

On Tuesday 14 February Morecambe Bay Amateur Radio Society is holding a committee meeting. Contact Sheila, on 07867 516 836.

On Wednesday 15 February Denby Dale Radio Club is having a talk on search and rescue dog training by Ken Sloan. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 15 February Hambleton Amateur Radio Society is preparing for TDOTA. More information from Tony Wilson, G3MAE, on 01609 881 530.
On Wednesday 15 February Hornsea Amateur Radio Club 80m is taking part in the CC Data and watching a DVD. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 15 February Maltby & District Amateur Radio Society is holding its pre-AGM discussion. More information from Keith, G1PQW, on 07801 156 678.

On Wednesday 15 February Mid-Cheshire Amateur Radio Society is having an HF data night. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Wednesday 15 February Sheffield Amateur Radio Club is taking part in the 80m CC Data from the club station, G3RCM. More information from

Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday 16 February South Manchester Radio and Computer Club is having an international quiz night with John, SA3BRB. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 16 February Wakefield & District Radio Society is on the air and holding a committee meeting. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 17 February East Cleveland Amateur Radio Club is having a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 17 February Tynemouth Amateur Radio Club is putting G0NWM on the air and running Morse tuition. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND West Tyrone Amateur Radio Club is running a course for the Intermediate Exam. The course runs on the afternoons of Saturday 18 & 25 February, 10, 24 and 31 March. The exam will take place on Tuesday 3 April. The cost of the course is £65 which includes all materials and the exam fee. The last date for registrations is Wednesday 15 February. A registration form can be downloaded from www.wtarc.co.uk.

NEWS FOR SCOTLAND On Tuesday 14 February Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946 192.

On Wednesday 15 February Glenrothes & DRC is having a talk on switched-mode power supplies. Details from Laurie, MM0LJA, by email to mm0ljasecgr@btinternet.com.

On Thursday 16 February Aberdeen Amateur Radio Society is having a beginners guide to contesting by Norman Mackenzie, GM3WIJ. Details from Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 16 February Paisley Amateur Radio Club is having a talk on SOTA by MM6ANL. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

On Friday 17 February Cockenzie & Port Seton Amateur Radio Club is having a radio check night with John, MM0JXI. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with advance notice that Reading & District Amateur Radio Club is holding its first Foundation Licence course from 16 to 24 March. Apply to Eric Curling by email to m0luv@radarc.org or visit the club website at www.radarc.org.

On Monday 13 February Coulsdon Amateur Transmitting Society is having a talk on contest logging by G0KZT. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 13 February Norfolk Amateur Radio Club is holding its Club net from 19.30 on repeater GB3NB, 145.625MHz output. Everyone is welcome. Details from Chris Danby, G0DWV, on 01603 898 678.

On Monday 13 February Swale Amateur Radio Club is having a talk on repeaters by Ian, G6DUI. Non-club members are welcome to attend the meeting. Details from Phil, G0JBA, on 01233 330 127.

On Monday 13 February West Kent Amateur Radio Society is having a presentation by Keith, G4JED, on the history of RAYNET, its developments over the years, and the current operations of RAYNET in Kent. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 14 February Bedford and District Amateur Radio Club is looking at PSK31. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 14 February Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 14 February Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 14 February Harwell Amateur Radio Society is holding its annual construction contest. Contact Malcolm, G8NRP, on 01235 524 844.

On Wednesday 15 February Chelmsford Amateur Radio Society is holding a committee meeting. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 15 February Lymington Community Centre Radio Club is starting a new Foundation class from 7pm to 9.30pm at the Lymington Community Centre. Contact M0LCC on 01590 672 337.

On Wednesday 15 February Norfolk Amateur Radio Club is taking part in the RSGB 80m CC Data and holding an informal meeting. The shack will be open and the workshop will be available. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 15 February Worthing & District Amateur Radio Club is having a discussion evening and putting GX3WOR on the air. Contact John, G8FMJ, on 01273 593 232.

On Thursday 16 February Chelmsford Amateur Radio Society is holding a Foundation exam. Contact Martyn, G1EFL, on 01245 469 008.

On Thursday 16 February Colchester Radio Amateurs are hearing about J6/G0DVJ. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday 16 February Cray Valley Radio Society is having a club meeting. Details from Malcolm Bryan, G8MCA, on 07906 433 965. On Thursday 16 February Horndean & District Amateur Radio Club is having a presentation by the British Association for Immediate Care, Hampshire division. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 16 February Horsham Amateur Radio Club is having a social evening at The Limeburners, Newbridge, RH14 9JA. Details are on the web at www.harc.org.uk.

On Thursday 16 February Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 16 February Shefford & District Amateur Radio Society is having a talk on DIY ADS-B by Don, G4LOO. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday 16 February Sutton & Cheam Radio Society is having a talk on Heathkit refurbishment and home construction techniques by Bob Burns, G3OOU. Details from Darren, M0PRV, on 07525 753 702.

NEWS FOR THE SOUTH WEST On Monday 13 February Exeter Amateur Radio Society is having a club night at the Moose Centre. Contact Nick, 2E0NRJ, on 01363 775 756.

I am pleased to let you know that there was a great article about Mike Nickolaus, NF0N, in the February 9 issue of the Dakota County Star. Mike is the Nebraska Section Traffic Manager. The article not only included Mike's history as a ham, but included several positive remarks about our hobby.

You can read the article at the paper's website:
http://tinyurl.com/nf0n-news

Congratulations, Mike! I know I speak for a whole bunch of hams when I say we're proud of you!

73, Art K0AIZ

ARRL Nebraska Section
Section Manager: Arthur I Zygielbaum, K0AIZ

152. Fifth Anniversary of rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-13 17:37:21 UTC
From: "rec.radio.amateur.moderated Admin" <rram@panix.com>
Message-ID: <jhbhlt$i8q$1@reader1.panix.com>
Source record: 3669
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

The Usenet newsgroup rec.radio.amateur.moderated will be five years old this month, having been created on February 22, 2007.

Sometimes the most powerful motivator to succeed is being told that something can't be done. When a group of us decided to try to create a new Usenet group, we were told:

- Usenet is dying, and a new newsgroup will not succeed.

- On-line discussion of sometimes contentious issues about amateur radio can't be done without degrading into personal attacks.

- Moderators can't be fair and unbiased, or promptly attentive to the submission queue.

Five years later, we're happy to have proven those assumptions wrong. Our newsgroup appears at most major (and minor) news server sites, including Google Groups and Radio Banter. We have a modest readership and over 5,000 articles approved (an average of about 3 per day). We have been able to approach sometimes controversial issues about amateur radio without degrading into incivility. Whatever required editorial control and oversight has proven to be light, with nearly all contributors willing to abide by fair and simple rules of engagement. The moderation software we adapted, Secure Team-Based Usenet Moderation Program (STUMP), made our newsgroup secure and reliable, with prompt article turnaround. In fact, it has worked so well that we have provided our adapted configuration of STUMP to several other successful radio-related moderated newsgroups, including rec.radio.info, rec.radio.broadcasting, and ba.broadcast.moderated.

If you haven't participated on Usenet in a while -- either by reading or posting -- please consider rejoining us. If you've never been on Usenet, we invite you to give it a try!

Usenet is still very much alive, and can be a useful venue for many topics, including amateur radio. The long-standing advantages of Usenet newsgroups still remain, and include:

- The user can control the interface (choices of newsreader software)

- killfiles

- threading

- unified, but distributed, discussion on specific topics

- efficient use of bandwidth

- rugged, distributed transport system that has been in place for decades

More information about rec.radio.amateur.moderated and rec.radio.info can be obtained from:

http://www.panix.com/~rram/

More information about access to newsgroups can be obtained from:

http://www.big-8.org/wiki/News_Service_Providers

More information about newsreader software can be obtained from:

http://www.big-8.org/wiki/Newsreaders

Many radio-related newsgroups can also be accessed via the following free web sites:

rec.radio.* newsgroups on Google Groups (http://groups.google.com/groups/dir?sel=usenet%3Drec.radio)

RadioBanter (http://www.radiobanter.com)

Additional thanks, and credit for our success, go to:

- The Big-8 Management Board for Usenet, including Marty Moleski and Tim Skirvin

- Public Access Internet and Unix, NYC (Panix)

- Igor Chudov, author of STUMP

Here's hoping for at least five more successful years.

Just had a look on application form on Ofcom site. It reads "The Special
Event Station permitted to be set up by Radio Amateurs under the terms of
the Notice of Variation must be in support of an event which is of special
significance, being in support of a celebration or demonstration and will be
open to viewing by members of the public".

Is PW's 80th birthday "an event which is of special significance" I wonder!

Dave S.

Name one other monthly radio magazine which has been going for so long.
[Bulletin/RadCom doesn't count because it changed its name.]

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

Please accept our apologies for the non-receipt of the bulletin for 12th February. This was due to changes made by our service provider to tighten up on spam email. The missing news bulletin appears below.

SARL NEWS - SUNDAY 12 FEBRUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the keys of two radio amateurs became silent recently. They are:

The key of Walter Arnold, or Art, ZS5SU, went silent on the 10th January 2012 after a short illness. Art had been living in London, UK for the past decade or so. His other interest was astronomy and he was also an amateur magician.

The key of Janse van der Merwe, ZS4IQ, on Monday 6 February. Janse was 92 years old. He leaves his YL Annie behind.

We extend our condolences to the families and friends of the deceased.

(PAUSE)

In the news today:

AMATEUR RADIO ALLOCATION AROUND 500 kHz ANOTHER FEW STEPS CLOSER

DISCOUNT FOR RAE STUDENTS UNDER 26

CQ SAYS MORSE IS ALIVE AND WELL

SARL NATIONAL CONVENTION BOOKING NOW OPEN

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

AMATEUR RADIO ALLOCATION AROUND 500 kHz ANOTHER FEW STEPS CLOSER

There was a good deal of support for Agenda item 1.23 at WRC12 among administrations at the SWG level for a secondary allocation to Amateur Radio just below 500 kHz; however, there was strong resistance by several administrations to the allocation, based upon a stated concern that amateur operation in that portion of the spectrum could cause interference to Non-Directional Beacons.

SWG 4C3 (the SWG dealing with Agenda Item 1.23) met 12 times over a period of ten days trying to arrive at a consensus. Finally, a consensus was achieved on the issue by adding various footnotes dealing with the allocation that satisfied most of the administrations opposing the allocation. At the end of the day, there were still a couple of administrations opposing the allocation. As a result, the SWG elevated the issue to the Working Group level with two options to satisfy the agenda item.

A secondary allocation to the amateur service in the band 472-479 kHz with certain operating conditions set forth in footnotes to the allocation, or No Change (in other words, no amateur allocation).

The proposal that has been agreed to by most administrations that support the amateur allocation calls for a worldwide secondary allocation to the Amateur Service at 472-479 kHz with a power limit of 1 W EIRP, but with a provision for administrations to permit up to 5 W EIRP for stations located more than 800 km from certain countries that wish to protect their aeronautical radio navigation service (non-directional beacons) from any possible interference. Proposed footnotes provide administrations with opportunities to opt out of the amateur allocation and/or to upgrade their aeronautical radio navigation service to primary if they wish to do so. In addition to these protections for aeronautical radio navigation, the Amateur Service must avoid harmful interference to the primary maritime mobile service.

At the Working Group meeting, there was no shifting of positions, so the matter was elevated to the next level: to Committee 4 with the same two options.

DISCOUNT FOR RAE STUDENTS UNDER 26

Students under 26 planning to write the class A Radio Amateur examination will get a discount off the examination fee of R100. The fee will be R350 which includes the license application fee and license fee to 31 March the following year. For details visit www.sarl.org.za.

CQ SAYS MORSE IS ALIVE AND WELL

Five years after the USA dropped the Morse code requirement, CQ Magazine Editor Rich Moseson, W2VU, has published a very pointed

editorial where-in he notes that both amateur radio and use of the Morse code are alive, well and growing. This despite the ney-sayers who predicted the abandoning of Morse testing would bring a sudden end to the hobby.

In his editorial titled "No-Code Plus Five Years: An Assessment", W2VU, states that amateur radio is still here. CW is still here and despite the fears of many CW supporters the universe did not implode on February 23, 2007.

Rather his article was prepared based on research that checked on signs of the state use of Morse by today's amateur radio community. It did this by asking manufacturer of keys and paddles about sales, talking to the FISTS Morse preservation group, looking at CW contest results and overall United States licensing statistics.

CW was dropped as a license requirement in South Africa on 1 April 2011 when the ZR license was converted to a full class A license on a par with ZS.

ARRL & CQ SIGNED AGREEMENT

ARRL & CQ Signed an agreement to provide ARRL's Logbook of The World support for CQ's awards and ARRL - the national association for Amateur Radio, have signed an agreement to begin providing support for CQ-sponsored operating awards by the ARRL's Logbook of the World (LoTW) electronic confirmation system.

CQ's awards will be the first non-ARRL awards supported by LoTW and will be phased in, beginning with the CQ WPX award. Additional CQ awards will follow. The ARRL's LoTW system, an interactive database recording contacts between radio amateurs was created in 2003 and has been adopted by 47 500 radio amateurs worldwide. It already has records of 400 million contacts and grows weekly. The target date for beginning LoTW support for WPX is April 1, 2012. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply.

ARRL Chief Executive Officer David Sumner, K1ZZ, observed that this step gives radio amateurs throughout the world an inexpensive and convenient means of gaining credits toward CQ's popular operating awards. "LoTW has significantly increased interest and participation in the ARRL's DXCC, Worked All States and VUCC awards programs. We anticipate a similarly positive response to the addition of the CQ WPX award. Amateurs will be able to spend more time operating and less time chasing QSL cards."

SARL NATIONAL CONVENTION BOOKING NOW OPEN

Book now for the SARL National convention which will be held in Pinetown from 20 22 April 2012. Get all the details at www.sarl.org.za and link from the home page.

SAAMSAT TO UPDATE ON KLETSKOUS CUBESAT ON SUNDAY

Listen to Amateur Radio Today for an interview with Hannes Coetzee, ZS6BZP, reporting on the progress made on SA AMSAT's KletsKOUS CubeSat project, or download the audio mp3 version from www.amsatsa.org.za.

CLUB NEWS

With reference to last week's item about the ZS6KTS repeater, this repeater was put on the air by the Kempton Park Amateur Radio Technical Society on 145,162 5/145,762 5 MHz in Birchleigh for a test period.

Please comments/reports to vubandplanning@sarl.org.za and also to vivdold@bestwebs.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. Fortunately a new sunspot is rapidly growing in the south-eastern quadrant of the sun.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 47.

All the bands from 20 to 10 m and especially 15 m will provide lots of DX fun with 10 m only opening sporadically due to the low solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

11 - 12 February - SARL Field Day contest 19 February - last day for submitting logs for SARL field day contest 20 February - Last day for submission of logs for Antique Wireless Association CW activity day. 29 February - Leap year Challenge from 00:01 till 23:59. 21 March - ZS6ERB construction day. 20 - 22 April SARL Convention in Pinetown.

Remember, nominations for SARL awards, which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM may still be submitted. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73. /EX

156. Weekly Highlights of Solar and Geomagnetic Activity, 06 - 12 February 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-14 23:00:08 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20120214230003.32F6733C3C@panix2.panix.com>
Source record: 3673

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Feb 14 2216 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
06 - 12 February 2012

Solar activity began the week at moderate levels due to an M1/Sf
flare produced by Region 1410 (N18, L=056, class/area Cso/240 on 01
February) at 06/2000 UTC. Activity levels decreased to very low to
low levels for the remainder of the week. Noteworthy events include
a long duration C7 limb event from Region 1410 at 07/2219 UTC, and a
CME associated with a filament eruption at 10/1154 UTC. Region 1410
produced a long duration C7 limb event at 07/2219 UTC.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit started
the period at normal background levels, increased to moderate levels
on 07 February, and reached high levels on 08-09 February. The
electron flux returned to moderate levels for the remainder of the
period.

The geomagnetic field was at mostly quiet levels for the majority of
the period. There were a few periods of unsettled to active
conditions at mid-latitudes with active to minor storm conditions at
high latitudes, early in the week on 7 and 8 February. This activity
was associated with solar wind speeds between 450-500 km/s and
periods of southward Bz. Mid-day on 09 February, unsettled to active
periods were observed at high latitudes due to the arrival of a
co-rotating interaction region followed by a weak coronal hole high
speed stream. From late on 09 February until the end of the period,
mostly quiet conditions prevailed.

Forecast of Solar and Geomagnetic Activity
15 February - 12 March 2012

Solar activity is expected to be low with a slight chance of M-class
activity until Region 1419 rotates off the visible disk on 26
February. Very low to low levels are expected to prevail for the
remainder of the period.
```

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at low to moderate levels.

Geomagnetic field activity is expected to be at mostly quiet levels throughout the period, with the exception of any currently unanticipated future CME events. Increased field activity due to recurrent disturbances is expected on 18-19 February, 23 February, 2-3 March, and 7 March.

** Attention** Beginning Monday, March 12, 2012, the Weekly bulletin will now be issued and available on the SWPC web page every Monday morning by 1500 UTC.

157. [DXNL] DXNL 1767 (Feb 15, 2012)

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-14 23:27:26 UTC

DXNL 1767 - Feb 15, 2012

DX Newsletter

a free and weekly service of

DARC Committee "DX and HF contesting"

(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB

(e-Mayl: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV

(e-Mayl: dj5av@darc.de)

3C, Annobon: (Update):

The timeframe of the activation announced in last DXNL is now available

on their webside as:

3C6A 22. - 26. February

3C0E 28. February - 11. March

http://www.gdgdxc.net/3c0e/news.php

3D, Swaziland:

Phil, G3SWH, and John, G3OLU / EA5ARC, intend an activation of Hawane

Resort February 21st - 29th. The equipment there will be K3, IC2KL PA,

A4S on 24m, and A3WS on 20m of hight, 4 Square for 40 meters, and

verticals for 80 meters, owner is Daniel, ZS6JR, and "CQ-DX African

Safaris". Find them on 80 - 10 meters, CW only, preferred frequencies

3.505, 7.005, 10.105, 14.025, 18.083, 21.025, 24.895, and 28.035 kHz,

+/- QRM and split 1-3 kHz up. They hope to exceed 15.000 QSOs. QSL via

G3SWH, (OQRS), LoTW.

http://www.g3swh.org.uk/3da0pw.html

3V8, Tunisia:

Clubstation 3V8SS will be activated by Ash, KF5EYY, for the ARRL DX CW Contest, (18./19. February) SOAB-LP. QSL via LX1NO, LoTW.

http://www.kf5eyy.com/

6V, Senegal:

6V7S is operated by Vlad, RK4FF, through February 22nd from Le Calao in Ngaparou on 80/40/20/15/10 meters, CW, SSB, and RTTY.QSL via homecall.

6Y, JaMayca:

Look for VE3DZ in ARRL DX CW Contest as 6Y2T SOAB. QSL via homecall.

C6, Bahamas:

Also in ARRL DX CW Contest M/S C6ANM will be presented by Tom, N1GN, and Bill, NE1B, from Nassau (Gambier Village), New Providence Island (NA-001, WLOTA 1115, WW Loc. FL15gb). QSL via WA2IYO, direct only, and by LoTW.

CO, Cuba:

Luis, CO6LP, will operate from Santa Clara (NA-015, WLOTA 0032) in ARRL DX CW Contest SO/SB (160m). QSL via EA5GL, direct only.

DL, Germany:

This year the federal state of Anhalt activates special event station DM800ANH for their 800 years jubilee.

http://www.darc.de/uploads/media/Diplomausschreibung_Anhalt_800.pdf

G, England:

For the event of 50 years jubilee of Keighley & Worth Valley Railway Jack, G0FQN, will operate special call GB50WVR through December 2012. QSL via 2E1HQY.

Olof, G0CKV, Kazu, JK3GAD, Oliver, W6NV, and Seppo, OH1VR, will hit the airwaves from the place of Marconi`s `transatlantic tests in Cornwall as M5E in ARRL DX CW Contest M/2. QSL via G0CKV.

J8, St. Vincent:

The call J88DR is presented by Dave, G3TBK, February 15th through March 14th including ARRL DX CW Contest and ARRL DX SSB Contest

(3./4. March) operating SOAB-LP as well as RSGB's 74rd Commonwealth Contest (11./12. March). He will use all bands with a focus on 30/17/12 meters and use CW, SSB, and RTTY. QSL via homecall.

JW, Svalbard:

Look for Mitko, JW/LZ1UQ, and Andy, JW/LZ2HM, February 15th through 21st from WLOTA 0125 incl. ARRL DX CW Contest. QSLs via homecalls.

KH0, Mariana Islands:

Find Naoki, JS3LSQ, operating from Saipan Island (OC-086, USi NI002S, WLOTA 1333, WW Loc. QK25UF) as KH0WJ on 80 - 10 meters, maybe 6 meters also, from February 16th through 21st. QSL via homecall.

KP2, Virgin Islands:

Yuriy, N2TTA, will be in the ARRL DX CW Contest SOAB-LP using the call KP2MM. QSL via LoTW.

http://www.n2tta.info/

KP4, Puerto Rico:

Al, WP3C, will be active in ARRL DX CW Contest SOAB-LP. QSL via W3HNK, direct only.

http://www.wp3c.qth.com

Felipe, NP4Z, will also be in the ARRL DX CW Contest, SOAB.

QSL via N4AO.

LX, Luxemburg:

LX7I will be presented by the group of DF1LON, DF9TS, DJ7JC, PA0BWL, and LX2A in ARRL DX CW Contest. QSL via LX2A.

http://www.lx2a.com

LY, Lithunia:

An additional special prefix will be presented through February 29th by special call LY16W for "The Act of Independence of Lithuania" on 160 - 10 meters using CW, BPSK, SSB, and RTTY. QSLs via buro, eQSL, LoTW and direct via LY5W.

http://rk.vdu.lt/lt/ly-wpx-trophy

http://rk.vdu.lt/lt/ly-wpx-trophy-honor-roll

http://rk.vdu.lt/lt/baltic-states-wpx-trophy

OH0, Aland Is.:

OH6EI will pesent OH0Z SOAB-HP in ARRL DX CW Contest. QSL via W0MM.

http://www.oh0z.net/

P4, Aruba:

Also in ARRL DX CW Contest look for Andy, AE6Y, as P49Y in Pos Chiquito on Aruba (SA-036, WLOTA 0033) SOAB. QSL via homecall, direct only, and by LoTW.

PJ4, Bonaire:

W1MD, K1XX, and others will operate PJ4X in ARRL DX CW Contest M/2. QSL via W1MD, direct only, LoTW. Outside of contest the operators will use their personal calls.

PJ7, Sint Maarten:

Gary, PJ7/AK4GP, is operating QRP with Elecraft KX1 on CW February 11th through 17th on 40 and 20 meters. QSL by LoTW.

PZ, Suriname:

Members of "Rochester DX Association" (RDXA) Redd, AI2N, Ken, N2ZN, and Dave, WJ2O, will present PZ5RO February 16th - 21st from the home of Ramon, PZ5RA, west of capital Paramaribo (WW Loc. GJ25ku) in the ARRL DX CW Contest also. QSL via AI2N.

http://www.wj2o.com/

T5, Somalia (Update):

6O3A is the call of Darko, J28AA, in Somalia.

http://bhome callc.ba/news/74

T8, Palau:

T88KF, that is Al, JA9APS, February 17th through 21st holiday style on 40 - 6 meters using SSB, CW, and RTTY with TS-570S and R8 vertical. QSL via homecall, LoTW.

TG, Guatemala:

William, TG8/W0OR, is in Quetzaltenango for an educational trip through

March 27th operating CW mostly with some SSB. Look for him also in ARRL DX CW Contest. He will look for a possibility for 160m but space is limited for him. QSL via homecall, direct only.

UT, Ukraine:

For 80 years jubilee of Kiew Region special event stations will be on the air through February 29th:

EM80UKO (QSL via UR7UC) EM80UU (QSL via US7UU)

EM0UBC (QSL via UR4UXD) EO0UD (QSL via UR7UT)

V3, Belize:

February 16th - 25th AA4NC is operating V31RR on 160 - 6 meters using CW, SSB, and RTTY wt focus on RTTY, low bands, and 6 meters, if propagation. Look for him in ARRL DX CW Contest SOAB and NAQP RTTY Contest. QSL via AI4U, direct only, and by LoTW.

VP5, Turks and Caicos:

N7OU, W7YAQ, K7AR, and NE7D wuill operate VP5/ February 15th - 22nd on 160 - 10 meters with CW, SSB, and RTTY. They will be in ARRL DX CW Contest as VP5OU. QSL fuer VP5OU via N7OU, direct only, and LOTW, others via homecall.

VP9, Bermuda:

Find Kurt, VP9/W6PH, in ARRL DX CW Contest SOAB-LP operating from Tarrafal Apartments in Hamilton Parish on Bermuda (NA-005). QSL via homecall, direct only.

XW, Laos:

Bruce, XW4XR (ex XW1B), has announced his participation in ARRL DX CW Contest SOAB-LP. QSL via E21EIC.

YA, Afghanistan:

Look for Eric, K9GY, as T6MO SOLP in ARRL DX CW Contest. QSL via homecall.

ZD8, Ascension Island:

Find Jim, N6TJ (ZD8Z), and Rick, N6ND (ZD8R) from AF-003 February 13th through 28th. QSL ZD8R via N6ND, ZD8Z via AI4U.

ZF2, Cayman Is.:

John, K6AM, will present ZF2AM in ARRL DX CW Contest SOAB-HP from Savannah on Grand Cayman Island (NA-016, WLOTA 1042). Antennas: 17 el Log Periodic at 100 ft, C3 at 50 ft, 2 el 80 at 90 ft, Pro 67 at 60 ft. QSL via homecall, LoTW.

Emergency Traffic:

Due to an earth quake in the Philippines there are activities on amateur radio. Eddie ValDec, DU1EV, Chief Operating Officer for IARU society PARA reports about activities on HF bands and VHF. Aboard a ship of the Coast Guard they are operating a communications center for news to Cebu and Manila. Mainly they deal with search and report mails about persons missed. With phone communications cut and widespread power outages ham radio became an important means. Another ham operator is Alvin, DU1AJ/7, who uses his ham station to handle news on HF, VHF, Echolink, and even on Facebook in internet. Operators Butch, DU1RP, and Lito, DU1PA, have erected a station at the "National Disaster Risk Reduction Management Council", NDRRMC and operate a link on HF between the struck area and the NDRRMC Operating Center in Manila. The earth quake with a magnitude of 6,8 in a narrow strait between the heavily populated island provinces of Negros and Cebu hit the area around lunchtime on Monday, February 6th. There have been many aftershocks, some nearly as strong causing further panic.

New Band?

At the WRC-12 in Geneva ham radio representatives are working for a consensus on an allocation to the amateur service in the region of 500 kHz. 472 kHz through 479 kHz currently is regarded as most suitable band. Expect a decision on February 17th close to the end of WRC.

Linux-Logger:

Petr, OK2CQR, developed a MySQL-based logging program for LINUX. Find version 1.3.0 at:

http://www.cqrlog.com/

Online-Callbook:

Petr, OK2CQR, is also testing an online callbook with informations about more that 1,3 Million stations.

http://www.hamqth.com/

QSLs from printer:

Bill, VK4FW, reports QSL cards for 3D2T and T2T finally arrived from the printer. He is sorry about the delay and will need about another 2 months' work to complete them by hand.

QSL-Watch:

Freddy, J28RO (http://j28ro.blogspot.com), and Yan, XV4Y, (http://xv4y.radioclub.asia), present an online webside concerning QSL politics: http://www.qslwatch.com/

Log updated:

The PJ4C-DXpedition have corrected their online log. LoTW will follow.

qsl.pj4c@orange.fr

http://www.pj4c.com/pj4c/joomla/online-log

WAP

Gianni, I1HYW, presents informative text and many pictures, QSLs, and informations online at: www.waponline.it

Silent Key:

NASA astronaut Janice Voss, KC5BTK, passed away on 7th February at 55 years of age. She flew on space five times between 1993 and 2000, and participated in making amateur radio contacts via the "Space Shuttle Amateur Radio Experiment" (SAREX), the precursor of the ARISS program.

Richard "Dick" Kirby, W0LCT (HB9BOA), passed away on 26th January. He was 89. In 1974 he was elected Director of the ITU's "International Radio Consultative Committee" (since 1992 ITU-R) and served as a Director until his retirement in 1995. While at ITU he also served as President of the "International Amateur Radio Club" (4U1ITU).

Other recently reported Silent Keys include James Corney (G0ICQ) and

Vladislav A. Krasavin (RX4HZ).

Our condolences and compassion to the families and friends.

UPCOMING CONTESTS

17./18.2. Russian WW PSK Contest

18./19.2. ARRL International DX Contest

IOTA compiled by Klaus, DL7UXG (e-Mayl: iota@dxhf.darc.de)

Island activities:

AF-004; EA8; Canary Islands:

Luis/EA8AY uses special call EF8USA on Teneriffa(DIE S-012, WLOTA 1276,

EAA TF) in ARRL DX CW Contest (SOAB).

QSL via LoTW only. http://www.ea8ay.com/ef8x/

AF-014; CT3; Madeira Archipelgio:

Several stations are announced to be in ARRL DX CW Contest

(18./19. February) active on Madeira:

Look for CR3A operated by Tibor/OM3RM from Funchal (DIP MA-001,

PIP MD-001, WLOTA 0053). Before contest he uses CT9/OM3RM on all HF-

bands. QSL CR3A via CT3EE. QSL CT9/OM3RM via homecall (d/B).

Uli/DJ2YA, Falk/DK7YY, Ulf/DL5AXX, Tom/DL5LYM, and Frank/DL8WAA will

sign CR3L in contest (Multi-2). They operate from Santana, Ilha

da Madeira (DIP MA-001, PIP MD-001, WLOTA 0053). QSL via DJ6QT(d/B).

http://cq3l.de/viewpage.php?page_id=1

Julius, CT9/OM7JG will also be on SOAB LP from Madeira (AF-014,

DIP MA-001, PIP MD-001, WLOTA 0053). QSL via homecall (d/B).

AF-042; EA9; Alboran Island:

EA3ATM/Jordi, EA3DW/Jaume, EA3NT/Christian, EA3OR/Ramon, and EA5KA/

Raul will go to Alboran Island (DIE: S-001, FEA: E-0086, WLOTA: 1061,

ARLHS: SPA-145, DME: 04013, GRID: IM85LW) February 16th through 20th.

They will operate 3 stations on HF for CW and SSB to let all IOTA collectors have a chance. Callsign will be EG3INT/7. The IOTA-Directory presents the island as EA9. In 2006 the island was allocated to the province of Almeria, therefor the call EG3INT/7 was defined by the Spanish administration. IOTA comitee was informed about the change but did not change the directory. So also IOTA allocation AF-042 will be used. QSL via EA5KA (d/B).

EU-002, OH0; Aland Islands:

Also in ARRL DX CW Contest (SOAB) find OH0X by Pekka/OH2TA on Brando Island. QSL via OH2TA (d/B).

EU-021, TF; Iceland:

Siggi/TF3CW will be in ARRL DX CW SOSB from Seltjarnarnes (WLOTA 2975). QSL, direct only, via LX1NO.

EU-175; CU3-7; Central group:

14. through 22. February Mario/DL2UX will be on Graciosa Island (DIP AZ-004, PIP AC-004, WLOTA 0113). He will be engaged in triathlon and as CT8/DL2UX on the HF bands to train operating a pile up. QSL via homecall (d/B).

NA-045; XE3; Quintataroo State North group:

Keith, XE3/K5ENS, operates on Mujeres Island (WFF XEFF-020, WLOTA 1716, ARLHS MEX-139) through April 1st, 2012 mainly in his evening hours on 14.260 +-QRM. For a paper QSL send to the address on Mujeres (QRZ.COM). He will upload his QSOs to LoTW and eQSL.

SA-064; CE7; Aisen Region Centre group:

Marco/CT1TBN will be active from Huichas Islands February 18th - 20th with a focus on SSB (and some CW) on 20, 15 and 10m. QSL via homecall (d/B).

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

February 15, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Come One, Come All - ARRL DX CW
- Top of the Phone Band - CQ WW 160 SSB
- Ontario Divided - New RAC Sections
- W5ZL and W5AE - Silent Keys
- History of Early Ham Radio
- Solar Stereo - Crank it Up!
- New ARRL Jan VHF SS Author
- Custom Headphone Electronics
- Web Java Tutorials and Applets
- Something Old

NEW HF OPERATORS - THINGS TO DO

In the ARRL DX contests, DX stations must work the US and Canada - so
grab your key and load up on DX contacts! You can also get another dose
of digital contesting in the North American QSO Party sponsored by NCJ
magazine <http://www.ncjweb.com/> or even try phone on 160 meters in
the CQ WW 160 Meter SSB weekend.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

No slip-ups noted in the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Feb 18-19

- ARRL Int'l CW DX Contest
- NAQCC Monthly QRP Sprint--CW (Feb 15)
- Semi-Automatic Key Evening (Feb 15)
```

- Russian WW PSK Contest (Feb 17)
- Feld-Hell Annual WAS Sprint
- AM QSO Party
- Run For the Bacon--CW

Feb 25-26

- North American QSO Party--Digital
- CQ WW 160 Meter SSB (Feb 24)
- REF Contest--SSB
- UBA Contest--CW
- Mississippi QSO Party
- North Carolina QSO Party
- CQC Winter QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

On February 6, Radio Amateurs of Canada (RAC) issued a statement on their web site that the Ontario Section would be split into four new RAC Administrative Sections, effective September 1, 2012. The reason given for the restructure was "...to create a management model that better communicates with, and represents the interests of, the overall Ontario Amateur population." The Ontario Section will be dissolved and be replaced with four new RAC Sections: Ontario North, Ontario South, Ontario East, and the Greater Toronto Area. The new section abbreviations will be announced when final. For ARRL contests that use ARRL/RAC sections as multipliers - the November Sweepstakes, and 160 Meter Contest - there will be an overall increase of three available multipliers. ARRL contests that use US states and Canadian provinces as multipliers - the RTTY Roundup, ARRL DX Contest and the ARRL 10 Meter Contest - are unaffected by this change. ARRL VHF+ contests and the IARU HF Championships are also unaffected by this change. The first contest to be affected by the RAC administrative change will be the 2012 ARRL November Sweepstakes, which will now require 83 multipliers to achieve a Clean Sweep. ARRL Field Day does not use multipliers, but Ontario stations will send new section abbreviations as part of their exchanges. News of the administrative change can be read on the RAC website <http://www.rac.ca/en/news/bulletins/2012/7/> and there is more in this ARRL website report <http://www.arrl.org/news/rac-to-split-ontario-into-four-sections>. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The ARRL Rookie Roundup <http://www.arrl.org/rookie-roundup/> rules have changed to create a Multioperator category and a team competition of up to five Single-operator Rookies. A number of clubs have asked for these changes to help "Elmer" new HF operators. In addition, recognizing the lack of interest in 6 meters for this contest, that band has been dropped. Watch for more information in the April issue of QST.

Amateurs have a new MF (Medium Frequency) allocation from 472-479 kHz as a result of the WRC-12 World Radio Conference (WRC)

<http://www.arrl.org/news/amateur-radio-gets-secondary-mf-allocation-at-wrc-12>
in Geneva, Switzerland. Don't start purchasing surplus broadcast towers
just yet - the allocation doesn't take effect until 1 Jan 2013 and the
FCC has to incorporate it into the Part 97 rules. Hams will be a
secondary allocation and able to use from 1 to 5 watts EIRP depending
on location and what is approved by their country's telecommunication
authority. (Thanks, Tom K1KI)

Tony WA8RJF invites weak signal VHF, UHF and microwave enthusiasts to
the 17th VHF Weak Signal Group banquet to be held on Friday evening
May18th, 2012 at the Dayton Grand Hotel (Formerly the Doubletree Dayton
Downtown Hotel) at 11 South Ludlow Street, Dayton, OH 45402.
Reservations are required at $35 per person. For more information you
can contact Tony by email <WA8RJF@ARRL.net>.

EDN magazine asked the engineering profession, "Why did you become an
engineer?
<http://www.edn.com/blog/Voice_of_the_Engineer/41598-5_Engineers_Why_did_you_become_an_engineer_.php?cid=NL_UBM+Electronics>"
The responses are wide-ranging and interesting, some funny, some
thoughtful. One might see parallels to the question, "Why did you
become a ham?"

Here's a great resource for planning your contest weekend and tracking
down the "who's who?". Bill NG3K <http://www.ng3k.com/> has been
tracking upcoming contest expeditions and provides many other resources
on his "one-stop-shop" website.

Field Day planning is under way across the land and the bonus points
for a satellite contact are often on the list of things to do. This
year will present more challenges because of the final shutdown of
AO-51 and gradual degradation of several other smaller satellites. From
the AMSAT <http://www.amsat.org/> ANS-036 bulletin comes word that,
"The congestion on FM LEO satellites was so intense in prior years that
we must continue to limit their use to one-QSO-per-FM-satellite. This
includes the International Space Station. You will be allowed one QSO
if the ISS is operating Voice. You will also be allowed one digital QSO
with the ISS or any other digital, non-store-and-forward, packet
satellite (if operational)." AMSAT goes on to recommend using the
linear transponders on lesser-populated birds such as VUSat
OSCAR-52,Fuji-OSCAR 29 (which may or may not be operational), and even
the venerable AMSAT-OSCAR 7.

How do you type symbols like 0 in Microsoft Word? If you happen to know
the character's four-digit numeric code, you can use the ALT key to
enter it directly. Otherwise, use the Alt-i "Insert" menu. With the
cursor at the point where you want the symbol, type Alt-I, then type s
for symbol. A symbol entry window will appear. You can find most of the
interesting symbols hams need by selecting the Symbol font and
scrolling up and down.

This has been an exceedingly rare occurrence - three newsletters during the same month and that month being February!

Gary W5ZL and Jerry W5AE both joined the list of Silent Keys this past week. Gary was the President of the Central Texas DX and Contest Club and a frequently heard call in contests. He also served as a referee for the WRTC-2010 competition in Moscow. Jerry was a founder of Communications Specialists and Decibel Products - both household names in Amateur Radio. He was honored for his service and leadership in the wireless industry at last year's Radio Club of America meeting. (Thanks, Marv N5AW and Tim K3LR)

Web Site of the Week - ARRL PR Manager, Allen W1AGP spotted an excellent history of early Amateur Radio <http://tinyurl.com/7qkbx75> by Mark W0BG. Has it really been 100 years?

WORD TO THE WISE

Hams put up antennas but insects have antennae. Just thought you'd like to know!

==> SIGHTS AND SOUNDS

What will the solar future bring? Now that we can see nearly all of the Sun's surface thanks to the NASA STEREO <http://stereo.gsfc.nasa.gov/> solar monitoring satellites, we can look at what's "comin' around the bend". If the sunspots headed our way pump a little UV into the ionosphere, conditions could be pretty good for the ARRL DX CW contest this weekend!

Be sure to post a few photos of your ARRL DX CW operations on the ARRL Soapbox <http://www.arrl.org/soapbox> web page! It's a great way to let everybody else know how much fun you had and the writeup authors always appreciate the material. If you have a really good story - contact ARRL DX CW writeup author Nate N4YDU <n4ydu@yahoo.com>.

Wow - here's a thorough history of a BIG antenna - the Wahiawa CDAA <http://www.navy-radio.com/rcvrs/frd10/frd10-hawaii.pdf> (Circularly Disposed Antenna Array). The downloadable paper includes the context of this antenna in the broader HF DF community, too. A photograph of the array is on Google Maps, enter 21.52228 N, 158.01135 W in the Google Maps <maps.google.com> search box - no, that's not a crop circle! (Thanks, Frank W3LPL)

Another big antenna lived in Christmas Valley, Oregon not far from the QTH of Lee K7TJR. A "woodpecker" over-the-horizon (OTH) radar <http://www.k7tjr.com/lees_radio_page.htm>, as Lee says, "at 1 megawatt transmit power I am glad they
did not operate this one near here." I guess so!

Operating from a rural site in the CQ WW 160 contests makes for low noise but a cold shack. Take a look at the Field Day-style operation <http://ok5z.rajce.idnes.cz/CQ_WW_160M_CW_2012> in January's CW contest by Ludek OK2ZC and friends as OK5Z!

Here's another monster tower
<http://en.wikipedia.org/wiki/Hillsboro_wireless_tower> and one of the
earliest remote station installations. It was located near Hillsboro,
Oregon and one of the largest towers in its day, second only to the
Eiffel Tower in Paris. The station broadcast programming sent over a
special link from Portland, OR. (Thanks, Keven K7ZS)

==> RESULTS AND RECORDS

The ARRL Contest Branch welcomes Kevin W9GKA as the results author for
the January ARRL VHF Sweepstakes. We are fortunate to have Kevin's
experience as a VHF+ focused on the writeups. Kevin is collecting
anecdotes and photos for the article - post yours on the ARRL soapbox
<http://www.arrl.org/soapbox> page today!

IOTA Contest Manager, Don G3XTT writes, "I am pleased to announce that
the final results of the 2011 IOTA Contest now appear online
<http://www.iotacontest.com/contest/iota/2011/finalScore.php>. You will
find Soapbox, Photographs, etc. via the results page. A list of trophy
winners will be published shortly. Trophies are normally awarded at the
RSGB Convention (October) and, for those not able to attend, mailed
after that. We are planning some rule changes for the 2012 contest to
bring the emphasis back to working island stations. Once we have
finalised the rules they will be posted on the RSGB Contest Committee
website <http://www.rsgbcc.org/>."

WRTC-2014 standings are now updated to include the official results
from IARU HF 2011. The standings show a number of new leaders in their
Selection Areas! Updated Excel spreadsheets for each Selection Area are
posted <http://www.wrtc2014.org/competitors/qualification-standings/>
online. There is a calendar of qualifying events on the WRTC-2014
website
<http://www.wrtc2014.org/competitors/team-selection/qualifying-event-calendar/>.
Updates will continue to appear periodically as various contest results
are made public. (Thanks, WRTC-2014 Team Selection Director, Dan K1TO)

Lots of BIG scores were posted in the CQ WPX RTTY contest last weekend.
With activity up and conditions improving, records were falling like
tenpins! And receivers were crunching like granola! RTTY contests used
to be low-key (so to speak) affairs with plenty of elbow room - no
longer. Certainly, some expectations will have to adjust but let's also
use the tools we have at our disposal. Tighter DSP filtering, moving
out of the 080-100 region of the bands, making sure we are not
overmodulating and splattering, and using the many receiver gain
controls - all are great techniques to "drive in traffic."

OPERATING TIP

"What a difference a year makes....!
What a difference a mild winter makes...!
What a difference a rotor makes....!
What a difference adding a new band makes....!
A difference from 5460 pts to 28,764 pts!"

- Joe, KC2TN in the Mount Airy VHF Radio Club
<http://www.packratvhf.com/> "Cheese Bits" newsletter

==> TECHNICAL TOPICS AND INFORMATION

EDN magazine for 2 Feb 2012
<http://www.edn.com/archive/2012/20120202.php> had a very interesting
project with applications in the contester's shack. "Implement an
Audio-Frequency Tilt-Equalizer Filter" by Francesco Balena also
referenced "Designing A Pocket Equalizer For Headphone Listening
<http://gilmore2.chem.northwestern.edu/projects/showfile.php?file=equal_prj.htm>"
by Chu Moy. Both could be put to use on headphone audio out of a
contest radio, particularly to compensate for hearing loss or frequency
roll-off.

Math fans will want to check out the Math Monday column by George Hart
on the Make magazine website
<http://blog.makezine.com/tag/MathMonday/>. There are 100 columns with
all sorts of interesting and often visually arresting projects. Check
out the ball of binder clips, for example!

If you aren't getting the ARRL Propagation Bulletin by Tad K7RA,
there is a lot more to it than just solar indices. Tad spices up the
discussion with background on solar events, stories from readers, and
great links to online resources. Log into the ARRL web site
<http://www.arrl.org> and click "Edit Your Profile" - you'll find the
bulletin on the "Edit Email Subscriptions" tab.

Given the amount of paper ham shacks and workbenches tend to attract,
this do-it-yourself design from the Instructables web site that
combines paper storage with shelf space
<http://www.instructables.com/id/IKEA-Hack-Mail-Rack/> should be
attractive to many readers.

There is lots of interest in the "spray-on antenna
<http://www.youtube.com/watch?feature=player_embedded&v=4efE_gO9lFo>"
recently demonstrated in this "Solve for X" video. Somehow, I don't see
this stuff winning the big contests but for putting patch antennas
here, there, and everywhere - it has potential! (Thanks, Scott N7SS)

Bob W9KNI wrote in with a positive review
<http://www.eham.net/reviews/detail/10204> of a very useful tool - this
time a cable cutter
<http://www.harborfreight.com/10-inch-cable-cutter-40507.html> from
Harbor Freight. This cutter is cheap and does an super job cutting
RG-213 or the like to prepare for installing a PL-259 - clean as a
whistle and no deformation of the cable.

How are we doin' on that solar cycle? This graph of sunspot indices
<http://sidc.oma.be/html/wolfjmms.html> shows long- and short-term
variations in the cycle. It looks like a lot of up-and-down, which is
typical of a cycle starting out. (Thanks, Mike W4EF)

Every ham needs these ten "electro-commandments <http://www.eng.auburn.edu/%7Etroppel/tencom.html>" in the shack! (Thanks, Bill N2BC)

Technical Web Site of the Week - The website Amanogawa <http://www.amanogawa.com/> has many nice online electromagnetic engineering Java applets that open in separate windows for circuits, antennas, transmission lines, EMC/EMI, and a very interesting Smith Chart tutorial <http://www.amanogawa.com/archive/docs/G-tutorial.pdf>.

==> CONVERSATION

Something Old

I was poking around in my toolbox and junk box and rooting through parts bins recently when I came across a little box marked "Crystals". Oh yeah, I recalled - I had picked these up from various hamfests and whatnot when one caught my eye. My rack of crystals from my Novice days was long gone but I'd never gotten over that feeling of plugging in an FT-243 and pounding some brass, seeing the needles jump, and just maybe hearing my call come back over the headphones.

Having several crystals was important if you wanted to call a station that might be several kHz away and not make them tune the whole band to find your 3-by-3-by-3 plea for attention. Of course, with the broad-as-the-side-of-a-barn receivers most of us used in those days, being a little off frequency wasn't the handicap it is today...you just had to squint!

I enjoy holding a crystal now - if it happens to be on a useful frequency, so much the better, but that's not the story. The point is the feel of it and the way it was manufactured and used. Those old crystals - from JAN, Texas Crystals, International Crystal, and many, many other companies from the back pages of QST - were hand-assembled and had attractive logos and text engraved into the crystal holders. Each one was an advertisement for the manufacturer and many were miniature works of art in their own right. Some were even hand-labeled as the Bliley crystal in the photo.

Everybody ought to have one little thing from 'back then' - maybe a tube or a key or a meter or an insulator. Hold it in your hand and think about how many different meanings that artifact has had throughout its history. At first, it might have been cutting-edge technology, then a more ordinary commodity, finally to be dropped into a junk box as obsolete. Someday, someone like me spies and buys it for a pittance - like a lucky radio buckeye, polished and rounded and comfortable in my pocket or drawer.

If the item Is truly fortunate, its new owner may go home and put it on the air once again. I am reminded of many childhood stories of forgotten toys that were rescued from an attic or basement to find new purpose. I have a soft spot for crystals, obviously, but you might find a tool or connector equally evocative. "Old" is subjective - perhaps all we mean is just "from a period preceding mine". These visitors from

era gone by help connect us to the traditions of radio. Like grandparents, they connect us to history and might be no farther away than the next hamfest or swap meet, in a little box marked "Crystals".

73, Ward N0AX

==> CONTESTS

15 February through 28 February

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL International CW DX Contest--CW, from Feb 18, 0000Z to Feb 19, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, state/province or power. Logs due: Mar 21. Rules <http://www.arrl.org/contests>

North American QSO Party--Digital, from Feb 25, 1800Z to Feb 26, 0600Z. Bands (MHz): 3.5-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/sprintrules.php>

NAQCC Monthly QRP Sprint--CW, from Feb 15, 0130Z to Feb 15, 0330Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

Semi-Automatic Key Evening--CW, from Feb 15, 1900Z to Feb 15, 2030Z. Bands (MHz): 3.5. Exchange: RST, serial, first year of bug use. Logs due: Mar 15. Rules <http://www.agcw.de/>

Russian WW PSK Contest--Digital, from Feb 17, 2100Z to Feb 18, 2100Z. Bands (MHz): 1.8-28. Exchange: RST and oblast code or serial. Logs due: 15 days. Rules <http://www.qrz.ru/contest/detail/384.html>

Feld-Hell Annual WAS Sprint--Digital, from Feb 18, 2000Z to Feb 18, 2200Z. Bands (MHz): 1.8-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

AM QSO Party--Phone, from Feb 18, 2300Z to Feb 19, 2300Z. Bands (MHz): 3.5-14. Exchange: RS, name, and S/P/C. Logs due: 4 weeks. Rules <http://www.antiquewireless.org/>

Run For the Bacon--CW, from Feb 19, 0200Z to Feb 19, 0400Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

CQ WW 160 Meter SSB--Phone, from Feb 24, 2200Z to Feb 26, 2200Z. Bands (MHz): 1.8. Exchange: RST and state/province or CQ zone. Logs due: Mar 31. Rules <http://www.cq160.com/>

REF Contest--Phone,CW, from Feb 25, 0600Z to Feb 26, 1800Z. Bands (MHz): 3.5-28. Exchange: RS and French dept or serial. Logs due: 30 days. Rules <http://www.ref-union.org/>

UBA Contest--CW, from Feb 25, 1300Z to Feb 26, 1300Z. Bands (MHz): 3.5-28. Exchange: RS, serial, and ON province. Logs due: 2 weeks. Rules <http://www.uba.be/en/hf/contest-rules>

North Carolina QSO Party--Phone,CW, from Feb 26, 1700Z to Feb 27, 0300Z. Bands (MHz): 3.5-28. Frequencies: CW 3.54,3.74,7.04,7.14,14.04,21.04,21.14,28.04,28.14, Phone 3.86,7.26,14.26,21.36,28.36. Exchange: RS(T) and NC county or S/P/C. Logs due: Apr 1. Rules <http://www.w4nc.com/>

CQC Winter QSO Party--Phone,CW, from Feb 27, 0100Z to Feb 27, 0259Z. Bands (MHz): 3.5-14. Frequencies: 3.560, 7.040, 14.060. Exchange: RS(T), S/P/C, name, CQC nr or power. Logs due: 30 days. Rules <http://www.cqc.org/>

VHF+ CONTESTS

Mississippi QSO Party--Phone,CW, from Feb 25, 1500Z to Feb 26, 0300Z. Bands (MHz): 3.5-28, 50-432, Frequencies: CW 3.545,7.045,14.045,21.045, 28.045;Phone 3.857-862-867,7.238,14.275,21.375,28.375;VHF 50.13,144.22,146.55,446. Exchange: RS(T) and MS county or S/P/C. Logs due: Mar 31. Rules <http://www.arrlmiss.org/>

Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

RAC Bulletin 2012-010E - Good News from WRC12 &#65533; A New Band at 600 metre
s.
2012-02-14

At its Plenary meeting held 14 February 2012 in Geneva the World Radiocommunication Conference approved a new secondary frequency allocation to the Amateur Radio Service at 472 to 479 kHz. Having passed First and Second Readings it is normally a formality that this change be included in the WRC-12 Final Acts when the Conference concludes February 17th. The Table of Frequency Allocations would then be amended accordingly.

The new band at 600 metres will represent the return of amateurs to the medium waves - an area of spectrum we have not had access to since the earliest days of radio regulation.

As a secondary user, amateur radio shares 472 - 479 kHz with the Maritime Mobile Service who are the primary user in all three ITU Regions and with the Aeronautical Radionavigation Service who are a Secondary user except as noted in the following.

The new allocation to the amateur service is accompanied by several footnotes including, i) a number of countries will identify their intent to elevate the status of their Aeronautical Radionavigation Service to Primary as a step in ensuring protection from secondary users, and ii) the power which radio amateurs may use in 472 to 479 kHz will be limited to 5 watts (e.i.r.p.) except for amateur stations within 800 km of the borders of a number of countries - principally Russia, many of the former Soviet bloc and the Arab states. For those affected amateurs the limit will be 1 watt.

It is, of course, up to individual administrations to authorize use of the band by their amateurs. In the case of Canada, it seems certain that such authorization will be forthcoming; however, the process which has to be followed may take some time.

Canadian radio amateurs have played a central role in arriving at this successful outcome. The documents submitted through the ITU in support of this allocation were largely authored by Canadian amateurs - as was the important work done in assessing the efficiency of the antennas radio amateurs would likely use. Canadian amateurs have been present at ITU meetings in Geneva since 2009 to advance the cause of this allocation. Our regulator, Industry Canada, has been outstanding in their support of our work and in ensuring today's success. Finally,

our colleagues in the IARU, ARRL, RSGB, and DARC have all played major
roles.

Bryan Rawlins, VE3QN
Amateur Representative on the WRC12 Canadian Delegation

==> TWISTERS PROMPT ARKANSAS SKYWARN RESPONSE

Arkansas SKYWARN was activated by the National Weather Service's Little Rock Forecast Office on the afternoon of Sunday, January 22, at 4:30 PM. The day began with areas of dense fog and drizzle and at 6 AM temperatures were mostly in the 30s to lower 40s. The forecast had been calling for a severe weather setup later in the day, but many residents were curious as to how such an event would be possible given the daylong conditions.

Around 4 PM the fog began to lift and temperatures quickly rose as storms began to form in the central part of the state. Around the same time Arkansas SKYWARN Program Coordinator Danny Straessle, KE5WLR, received a call from the Little Rock Forecast Office and Arkansas SKYWARN was activated. Straessle is responsible for scheduling net control operator shifts at the Little Rock office and quickly summoning a team, headed for the facility. En route, around 5:30 PM, Daryl Stout, AE5WX, brought up the Weather Watch Net, which is a pre-net for Arkansas SKYWARN. A few severe thunderstorm warnings were issued and Stout took several check-ins as certified Amateur Radio storm spotters began to deploy.

By the time the Arkansas SKYWARN net control team was in place shortly before 6:00, the first tornado warning was issued and a quick and seamless transition was made from one net to the other. At the mic were Straessle, and Shane Lee, KF5FBR, assisted by Mona Blacklaw, KM5ONA. Darkness fell as activity picked up, most of which was south and east of Little Rock in less dense populated areas of the Delta region of the state. Because of this it was extremely difficult to see storm development and dangerous to try to spot it.

Troy Singleton, N5ARK, was the most valuable player of the entire night. Singleton was raised in southeast Arkansas and knew the area like the back of his hand, which was instrumental in his safe navigation of the farm roads in the area to safely spot developing tornadic supercells. At times this was the only information coming from that area of the state and the NWS Little Rock Forecast Office was thankful to have reports come in from Singleton.

Also in the area and a little further to the east in Arkansas County were members of the Grand Prairie Amateur Radio Club. Weather reports were collected through a simplex net and relayed to club president Randy Geater, K5NDX, who in turn relayed them to Arkansas SKYWARN at the National Weather Service.

At one point a rain-wrapped tornado headed toward Geater and his crew and they took shelter in the county Sheriff's bunker for about 20 minutes. It was completely rain-wrapped and all they could see was power flash after power flash as the tornado took down high-voltage transmission lines.

The storms moved out of the Little Rock County Warning Area fast and exited the state around 10:00 PM. The Arkansas SKYWARN net was brought to a close shortly before then. In summary, almost 60 certified Amateur Radio storm spotters checked into the net. And while the storms tracked through areas of the state in counties where the Amateur Radio population is practically nil, those from neighboring areas stepped up to the plate and provided a public service when it was needed most. The following day a damage assessment team from the NWS rated at least one of the several tornadoes as an EF2.

The Arkansas SKYWARN net is streamed live <http://www.radioreference.com/apps/audio/?feedId=5167> on a RadioReference feed provided by the Central Arkansas Radio Emergency Net (CAREN) Club. Accounts of the role Amateur Radio played during this severe weather event were chronicled on the Arkansas SKYWARN Facebook Fan Page <https://www.facebook.com/arkskywarn>. Although there are numerous social media sites in the state covering weather, Arkansas SKYWARN <http://www.arkskywarn.org/> takes an approach that not only serves Amateur Radio operators but exists to educate the general public about the role we play in saving lives and property. -- - Danny Straessle, KE5WLR, Arkansas Section PIO; Central District Emergency Coordinator; Arkansas SKYWARN Program Coordinator

==> ECAC REPORTS PROGRESS ON ARES, NTS STUDIES

Last June, the ARRL Emergency Communications Advisory Committee (ECAC) was tasked with recommending improvements to ARES® and NTS so that the amateur service can better serve the public in providing emergency communications. Specific topics included: ARES and NTS objectives and organizational structures; integration of ARES and NTS; training, certification, and credentialing; and relationships with served agencies. Chairman Dale Williams, WA8EFK, former Michigan Section Manager and new Vice Director of the Great Lakes Division, reported to the ARRL Board of Directors last month.

Williams reported that to "develop a solid foundation of where both the ARES and NTS stand in the minds of today's field leadership, the ECAC designed two field surveys. Included in the ARES survey were all Section Managers and Section Emergency Coordinators. The NTS survey included the NTS leadership, TCC Staff and Region Net Managers plus SMs and their Section Traffic Managers. Multiple detailed questions relating to all four of the above major tasks were included in the surveys."

ECAC members are now carefully reviewing and analyzing the results, and then will develop recommendations. Williams reported that it would be premature to offer comment about potential conclusions at this point. Williams thanked the respondents for their thoughtful and candid responses.

Several respondents' comments were included in Williams' report as a sampling. From the ARES Survey: "The best emergency communications system is the one you use everyday. ARES and NTS should be highly integrated, not independent as now!"

"NIMS/ICS compatibility is urgently needed, and should be required. ARES should work from the local level up, as NIMS/ICS does. ARRL ARES could learn a lot from NIMS/ICS."

"There needs to be a standard for type acceptance of services so that when an agency calls for a 'strike team' it is the same response regardless of location. (The name 'strike team' is just an example, there could be several layers of organization, but there needs to be a standard.)"

"We need to build credibility from the top down and bottom up with government served agencies. Need more visibility in their training materials and plans. Need national ID approved by FEMA with background check and minimum training. We also need to make sure if All Else truly fails, the system is flexible enough that non-accredited operators can be used in some capacity."

"More national help to local and regional ARES organizations around the country. Questions above could also be applied to RACES. FEMA needs to kill the program and replace with ARES or a new combined ARES/RACES organization."

>From the NTS Survey: "Get the idea out that traffic is central to effective ARES action. EMCOMM is traffic. Too much distance now between interest in 'ARES' and 'Traffic'."

"NTS has a great reputation and past. I'd like to see the end to the junk messages from the few senders who do that. We've lost members due to them. In these days, it's ever more difficult to accomplish a level of participation, let alone deal with all the garbage messages. We pass them all here, but members just don't come back to the net. Also can't understand how some states can simply refuse to handle traffic from other states!"

"NTS nets and ARES/RACES are integrated in our section. More traffic of all kinds would help to exercise the system. More involvement of ARES members in day-to-day NTS operations would be very good training. Some ARES members do not understand the need for the NTS or for traffic-handling training."

Williams vacated the ECAC chairmanship on January 1 to assume the post of Great Lakes Division Vice Director. He thanked committee members for their outstanding service, and also the PSC and the Board for this opportunity to have served.

[Editor's note: We wish Dale the best of success in his new post. He served the ECAC exceptionally well during his tenure as chairman, bringing a spirit of cameraderie and a good work ethic to accomplish much, despite the sometimes diverging opinions of its members. Jim Cross, WI3N, the Section Manager of the Maryland/DC Section, has been appointed as new ECAC Chairman. -- K1CE]

==> NEW HAMPSHIRE ARES® ACADEMY TO BUILD ON SUCCESS

Planning for the second annual New Hampshire ARES ® <http://www.nh-ares.org/> Academy program is underway. Last year, the state's ARES leaders wanted to test the concept of a major ARES training program, and the response was fantastic. A full house (100 people) attended and the same number is expected for this year's academy. The program offered four courses, and all attendees took all four, 25 at a time. Courses included message handling, net control skills, introduction to NBEMS, and go-kits and personal preparedness.

This year, a basic track, an advanced track, and a series of workshops will be offered -- all in the same four classrooms and one auditorium. More courses will be introduced in future years. A big new offering will be the two-hour Emcomm Boot Camp workshop for new licensees. This resulted from discussions during the recent NH-ARES winter leadership meeting.

The opening session in the auditorium last year featured speakers from each of three key served agencies: the New Hampshire Homeland Security and Emergency Management Chief of Communications John Wynne; Red Cross's Ian Dyer; and NWS's Scott Reynolds, KC2JCB. During the day, the Director of HSEM, Chris Pope, stopped in to say hello, and this year he

has been asked to be sole keynote speaker. We also have a wrap-up session at which SM/SEC Al Shuman, K1AKS, and Dave Colter, WA1ZCN, Assistant SEC for Operations and Training, take a few minutes to give a final pep talk and hear any kudos or gripes about the program.

Colter develops a basic outline for each of the courses, then finds a qualified instructor. They work together to develop a curriculum and presentation materials. The courses are taught to the standards established by the ARECC courses and state/section ARES procedures and plans.

The use of the State Fire Academy as academy venue is free because of the fine relationship ARES enjoys with the state. Colter said "We also take the opportunity to shoot ID photos for those who need them, both during morning registration and after the closing session. After the event, they are uploaded to the Section's online database so the ECs can access them for card printing. We're just starting up with a new professional card bureau to produce very high quality plastic cards. Everyone pays for their own ($8.75) and cards are mailed directly to the member within 24 hours. No more laminating! -- Dave Colter, WA1ZCN, ASEC - Operations, Training, NH-ARES <http://www.nh-ares.org/>; and ARRL Emergency Communications Advisory Committee New England Division Representative

==> LESSONS LEARNED: OREGON ARES® SHAKE EX 2011 SOLUTIONS

The story of Oregon's major earthquake exercise SHAKE EX 2011 was covered in March QST, Public Service column. Here is more discussion on the lessons learned and options for solutions to some of the problems the exercise leaders experienced.

On April 9, 2011, one month after the disastrous Japanese earthquake and tsunamis, Oregon ARES® volunteers conducted a statewide simulated emergency test (SET) to test their readiness to respond to just such a disaster. The SHAKE EX 2011 SET was designed to test the ability of ARES® units to exchange very high volumes of written messages between the county Emergency Managers and the Oregon Emergency Management (OEM) office in the state capitol, Salem. Much of the radio traffic exchange occurred over the Oregon ARES® Digital Network (OADN), which uses Winlink HF and VHF radio systems funded by the State of Oregon following the major windstorms of 2007. In addition to State-level, statewide communications activities, many counties held their own local drills in coordination with their local Emergency Managers, medical facilities and Community Emergency Response Teams (CERT). The local drills typically included establishment of HF radio systems at remote locations using portable Field Day-style antennas. Local drills included the transmission of photographs by radio to county and state EOCs and relaying simulated damage reports between stations.

Lessons Learned

During a disaster of the scale anticipated during this SET, there will likely be an overwhelming volume of emergency written and tactical traffic being exchanged between emergency managers. At such times, it is essential that the flow of messages from ARES® radio operators to and from these officials be accurate, efficient and timely. Although the technology used by ARES® units to get the message delivered worked quite well, it soon became apparent that the flood of messages being received at many EOCs simply overwhelmed anyone's ability to methodically log, manage and distribute them. Several options have been proposed to deal with this data management issue, and they are discussed below:

1. ARES operational procedures and training are needed to minimize the volume of unnecessary traffic generated by overuse of the "Reply All" option in the Winlink Airmail 3 software. While helpful in appropriate situations, such overuse dramatically slowed reception of other perhaps more important messages at some EOCs.

2. Efficiencies are also needed within the EOCs themselves to improve on the "print and stack" methods of dealing with message overload. Although the best way to handle this problem may be electronic distribution to the Served Agency Emergency Managers, solutions will likely vary between agencies.

3. There has been interest within Oregon Served Agencies of developing the ability to transmit damage assessment photo images using Amateur Radio. This SET was an opportunity to test operational procedures using Winlink HF Pactor peer-to-peer and VHF RMS connections for this purpose. SET instructions were to limit image size to about 10 Kb (240 x 180 resolution) to avoid excessive file transfer time. Pre-SET testing suggested that HF Pactor transmission time would vary from about 4 to 10 minutes depending on signal strengths or about 3 minutes by VHF Winlink packet to an RMS gateway. Four county EOCs successfully transmitted images via 40 meter Winlink Pactor peer to peer, demonstrating the feasibility of providing this service. Operators noted, however, that photo image transmission disrupted their handling of written traffic. In such cases, Emergency Managers may need to set message transmission priorities. Nevertheless, the ability of Oregon ARES units to transmit damage assessment photos, even low resolution images, has been of great interest to Oregon Emergency Managers.

4. Since existing antenna systems would likely be destroyed in a real event, the ability to set up portable, emergency powered stations "Field Day-style" would be mission critical. -- Vincent Van Der Hyde, K7VV, Oregon Section Emergency Coordinator, K7VV@arrl.net; John Core, KX7YT, Oregon Section ARES® SET Coordinator, KX7YT@arrl.net

==> NATIONAL HURRICANE CONFERENCE NEXT MONTH IN ORLANDO

The 2012 National Hurricane Conference, "the nation's forum for education and professional training in hurricane and disaster preparedness," will be held March 26-29 at the Hilton Orlando, Florida. A robust Amateur Radio presence and forums are always on tap. The

primary goal of the National Hurricane Conference is to improve hurricane preparedness, response, recovery and mitigation in order to save lives and property in the United States and the tropical islands of the Caribbean and Pacific. In addition, the conference serves as a national forum for federal, state and local officials to exchange ideas and recommend new policies to improve Emergency Management. To accomplish these goals, the annual conference emphasizes:

* Lessons Learned from Hurricane Strikes.

* State of the art programs worthy of emulation.

* New ideas being tested or considered.

* Information about new or ongoing assistance programs.

* The ABC's of hurricane preparedness, response, recovery and mitigation -- in recognition of the fact that there is a continual turnover of emergency management leadership and staff.

Greg Sarratt, W4OZK, hosting ARRL Southeastern Division Director, reports that there will be several Amateur Radio activities going on during the week. "The National Hurricane Conference (NHC) leadership continues to recognize the valuable contributions of Amateur Radio and again invited us to participate with two sessions," Sarratt said. Forums are:

NHC Session #1: Monday, March 26, from 1:30 PM to 5:00 PM, the main Amateur Radio session titled, "Amateur Radio Training Sessions: Disaster Communications Before, During and After Hurricanes."

NHC Session #2: Tuesday, March 27, from 8:30 AM to 10:00 AM, at the National Hurricane Conference (NHC), there will be an Amateur Radio session designed for Emergency Management agencies called "Amateur Radio Rap Session --The Emergency Manager's Hidden Resource."

On Monday, March 26, 2012 from 7:00 PM to 9:00 PM, the ARRL Southeastern Division and the Orange County EOC will host an interactive free NHC Workshop for all ARES-interested Amateur Radio operators at the Orange County Emergency Operations Center, 6590 Amory Court, Winter Park, Florida. You will be able to meet other like-minded hams and the presenters of the Hurricane Conference Amateur Radio sessions. The agenda will be: introductions, conference presenters summarize the NHC Amateur Radio presentations, emergency communications discussion, questions & answers and door prizes.

All hams are invited at no cost to attend the National Hurricane Conference Amateur Radio sessions and Orange County EOC Workshop. For additional information:

National Hurricane Conference <http://www.hurricanemeeting.com/>

http://www.southeastern.arrl.org/2012NationalHurricaneConferenceActivities.pdf

ARRL Southeastern Division <http://www.southeastern.arrl.org/>

Hurricane Conference presenters are:

Julio Ripoll, WD4R, WX4NHC Amateur Radio Assistant Coordinator, National Hurricane Center <http://www2.fiu.edu/orgs/w4ehw/>

John McHugh, K4AG, Coordinator for Amateur Radio, National Hurricane Center, WX4NHC

Rob Macedo, KD1CY, Director of Operations for the VoIP Hurricane Net <http://www.voipwx.net/> and ARRL SEC, Eastern Massachusetts

Mike Corey, KI1U - ARRL Emergency Preparedness Manager

Greg Sarratt, W4OZK - ARRL Southeastern Division Director

Sarratt said "We encourage you to visit all the activities you can, learn more about Amateur Radio emergency communications and meet the folks doing it. Hope to see you there!"

==> ARRL DIGITAL TECHNOLOGY FOR EMERGENCY COMMUNICATIONS COURSE

"This course is a great starting point for anyone interested in the public service applications of digital communications technology." -- Steve Ford, WB8IMY, course author and QST Editor/ARRL Publications Manager

In this course, the student will be introduced to all the ways Amateur Radio operators are using digital technology as a valuable emergency communications tool. The topics discussed during the course include: Packet radio; APRS; Winlink 2000; IRLP; EchoLink and WIRES-II; D-STAR; APCO25; HF sound card modes; Automatic Link Establishment (ALE). The course will help answer questions such as: Can you transfer supply lists or personnel assignments between emergency operations sites? Can you get critical e-mails to the Internet if a connection goes down? Can you relay digital images of damage at specific locations? Can you track the locations of emergency personnel and display them on computer maps?

Illustrations, screenshots, Internet links and audio files are used to demonstrate transmission modes and equipment configurations. Bite-sized learning units and interactive knowledge checks make learning interesting and fun.

See supplemental material and product support for The ARRL Digital Technology for Emergency Communications Course. <http://www.arrl.org/notes/CD/DigEmComm08/> Self-study. CD-ROM, version 1.1.

==> LETTERS: MANAGEMENT OF VOLUNTEERS MODALITIES

I am the Administrative Assistant Emergency Coordinator for the Hendricks County, Indiana ARES under Ronald Burke, KB9DJA, county EC. Burke and the rest of our ARES leadership have been discussing new ways to enhance our emergency response capability. We have 40 members.

I read your article in February QST "Putting Amateur Radio in Context in the EOC," about Flagler County's volunteer auxiliary E-COMM unit. Our ARES organization does recognize the FEMA ICS/NIMS protocols. We have 15 members who have taken the ICS 100, 200, 700,and 800 courses. We also offer SKYWARN training, net control training, NTS training, as well as various other training classes/workshops throughout the year. We have a group of net control operators that runs our SKYWARN nets when severe weather approaches or when the NWS activates us.

If you could give us more insight into how your organization's program works, we may be able to start one here. Our county emergency management director supports Amateur Radio, and he may be interested in the Flagler model to enhance Amateur Radio's response capability accordingly. -- Kenneth A. Kayler, Sr., KC9SQD, Hendricks County, Indiana ARES Assistant EC

[Ken, here <http://www.flagleremergency.com/pages.php?pid=75> is a link to complete information on the Flagler Emergency Management Volunteer program, including application form and comprehensive program manual. - K1CE]

==> K1CE FOR A FINAL

There has been extensive discussion on training and certification lately; for example, in the March issue of QST, Public Service column. In the February issue, an article on the contemporary EOC environment spoke briefly to the topic. The same EOC "types" or classifies its volunteers by their experience levels, and their training and certifications. Here is the matrix the emergency manager uses to select volunteers for specific duties during emergency or disaster situations. It provides some guidance to us as radio amateurs on training to take, and certifications to obtain, to make ourselves more valuable to the EOC professionals. This matrix is used by the Flagler County, Florida, emergency services department:

CertificationsType IVType IIIType IIType IIS-100 Introduction to ICS X X X XIS-200 ICS for Single Resources X X XIS-700 NIMS, An Introduction X X X XIS-800.B National Response Framework X X XIS-230 Principals of Emergency Management X X XIS-235 Emergency Planning XIS-240 Leadership and influence XIS-241 Decision Making and Problem Solving XIS-242 Effective Communications X XIS-244 Developing and Managing Volunteers X XIS-288 The Role of Volunteer Agencies X XI-300 Intermediate ICS X XI-400 Advanced ICS XI-701 NIMS Multiagency Coordination Systems XI-703 NIMS Resource Management XCERT X XHam Radio license or GMRS X XCPR X XVolunteer Experience: - Less than 6 months X - 6 Months X - 1 year X - 2 Years X

** MMMonVHF Newsletter / No.1 - WEEK 07/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-02-15
We try to distribute our Newsletter, once a week on thursday;
if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER

** FUN DONGLE at 144 MHz EME **

Some of you have made good experiences with the FUN DONGLE at EME. I was
testing the dongle at my 2x 12el yagis and didnt find a real advancement
for my small station (only seen stations stronger -24 db, maybe due to
my high city noise level) - so will give it out again. If any interest,
you can obtain the FUN DONGLE (including USB cable). Price 125,- Euro
(excl. packing/transport) Please do contact me via
nw_ebw"at"MMMonVHF"dot"de - sorry only one dongle is available here...
Guido DL8EBW

** DXCC: J5; square IK21DT; start 2012-03-23

Hello OM,
everything is ready for the J5 Guinea-Bissau DXpedition.
We finally received all the permits from the authorities in Bissau.
The calls J52EME for V-UHF and J52HF for HF are confirmed.
Two groups will operate simultaneously, with preference to the most
difficult communications, ie EME.
After much work we can announce that we'll be active on:
144 MHz with 2x8 xpol, preamplifier gift of WA2ODO, amplifier ITB
Colibrï¿½ 1kw.
432 MHz with 2 homemade LFA antennas 18 elements, yet to be found
preamplifier, amplifier ITB Colibrï¿½ 600w.
50 MHz, homemade LFA antenna 5 elements, amplifier ACOM 1000, homebuild
preamp MGF1302.
In the beginning was our intention to just operate 2m EME, but we have
received many requests for both 70cm and 6m, so we hope to please everyone.
In the first few days we'll be active on 144 MHz EME and HF, with some
jump on 6m Supertropo and ES. Then we'll pass on 430 and 50 MHz. We'll
try to satisfy everyone.
Just on arriving a group will start to create an internet connection
for the hospital, so we can use it too.
Frequencies:
144,130, 432.900 and 50.200. We'll call always in the even period.
Thanks for the help that you'll can give to our humanitarian/ham-radio
expedition.
Renato I3EJ we'll keep you informed during the DXpedition on our site:
http://www.ari.verona.it/veronadxteam/en/index.htm
and email questions to: veronadxteam@ari.verona.it

See you soon from J5 !

** DXCC: 4U_ITU; square JN36BF; start 2012-03-23

After both C37MS and C56EME did win the trophy MMM expedition of the
year 2011 section MS and
EME, Chris and Rene where thinking to celebrate this by doing
something back for all those voters.

We will be QRV moonbounce 2 meter from the ITU building in Geneva as
4U1ITU.
4U1ITU counts as a separate entity for the DXCC award and has never
been activated in WSJT.

We will be there from March 23rd till March 25th 2012, so only 3 days!
Don't miss it.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)
If all ok we will have a small 6 meter and 70cm setup with us too.

We will be on N0UK for last minute freq change.

Welcome to website! http://www.emelogger.com/4u1itu

** DXCC: F; square IN99; start 2012-04-07

>From April 7 to 21, 2012, the North Contentin area ARC, F6KFW,
will be active all bands and mods as TM5MGY.
This project is part of the official Commemoration activities ,
lead by the Cherbourgand neighbour cities , for the 100th anniversary
of the HMS TITANIC stopover , on April 10, 1912, a few days before
its shipwreck.
Cherbourg was usually, until the 60s, the last stopover from England
for the British lines before the Atlantic crossing to America.
Demo Amateur stations HF, VHF, SHF, operating in CW/SSB/Datas,
will be set up in the City de la Mer, in Cherbourg.,
Among the CW tools, a Titanic telegraph key copy of that used by
Harold Bride and Jack Philips in 1912 will be put in service.
The suffix of the special callsign TM5MGY has been choosed in
souvenir of " MGY" which was the TITANIC callsign, in the Marconi
ships radio system.

QSL via F6KFW, direct or bureau. Tks Jean-Yves, F8LDX

SOURCE: tnx to Maurice, F5NQL, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire (PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on
the equator.

The plan is to leave May 21st and build up the station before the weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit insecure but
we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We have to
come back as often as possible. We can't resist....

**St. Paul Isl., CY9 **

qrv HF and 50/144 MHz

St. Paul Island is called the Graveyard of the
Gulf and that is where an international, seasoned team of DXers will be heading to later this year. Plans are well under way for a 10-man team to activate this now wanted DXCC entity which was last on air in 2005. When you consider most needed entities (perhaps out with the Top 10) are activated every five years or so, it is now time to mount a serious effort from CY9. Most operators will be unaware that in 2010, St. Paul Island became the highest mover on DX Magazines most wanted list; from #77 to #47. Today, according to that list and ClubLog, CY9 is needed more than entities such as Tokelau (ZK3) or PY0T (Trindade & Martim Vaz). The team consists of Mike/AB5EB, Oscar/EA1DR, George/EA2TA, Christian/EA3NT, Simon/IZ7ATN, Col/MM0NDX, Bjorn/SM0MDG, Vicky/SV2KBS, Steve/VA3FM and Kevin/VE3EN. From late July to early August, IOTA Contest included, the group will be active all bands, modes (160-2m) with special attention on 6m and 160m, if propagation allows. A Web site is currently under construction and will be ready in a few short weeks where much more info can be found. The QSL Manager for the expedition is M0URX.

** Bahamas, C6 **

Qrv HF and 50 MHz.

Operators George, K4IIO/GM0IIO, will be active as C6AZZ between March 1-8th. Activity will be on 160-6 meters, mainly CW with some SSB. His activity will also include the ARRL DX SSB Contest (March 24-25th). QSL via K4IIO.

SOURCE: Ohio/Penn DX Bulletin #1048

** Malta, 9H **

Island of Malta qrv on HF and 50 MHz

Zoli, HA5PP, will once again be active from the island of Malta (EU-023, MIA MM-001, WLOTA 1113, CQ zone 15) as 9H3PP during the CQWW WPX CW Contest (26-27 May, 2012). Plans are for a Single-Op/ Single-Band entry, either 15m or 10m. After the contest Zoli will focus on some 6m and 12m activity. QSL via home call.

SOURCE: [NG3K] via ICPO Bulletin (03 - 10 February 2012)

** Swaziland, 3DA0 **

In all likelihood I will be operating from Swaziland - 3DA0 from KG53ms from 10 to 13 April 2012.

As part of my preparation for the trip I need to know which local radio amateurs needs the country and or grid square on 6 metres.

This will help me in determining what equipment I need to take.

If there is no local need, then I can concentrate my efforts on afternoon and evening TEP only.

If there is local interest I will consider operating with WSJT and higher power during the early mornings thus enabling some MS and possibly some weak

signal Tropo contacts.

We will be living and operating from horse stables, what wont we do fun ...

I can be contacted at: ZS6A@icon.co.za

Kind Regards.

Pierre ZS6A

** Belize, V3 **

Will, AA4NC, will once again be QRV from Placencia Village (WW Loc.EK56TM), Stann Creek District, Belize, from 16-26 February, 2012. He will also participate as a Single-Op/All-Band entry in the ARRL DX CW Contest (18-19 February). Outside the contest activity will be on all HF bands, CW, RTTY and SSB. He will also be monitoring 6 metres for any openings (50W; 4el wide spaced beam). QSL via AI4U.

SOURCE: [NG3K]via ICPO Bulletin (10 - 17 February 2012)

** Macau, XX9 **

A team consisting of EA5BZ, EA5CEE, EA6DD, EB5BBM, F5VLY, EA1ACP, EA5FX, EA7FTR and EB7DX will be active from Coloane Island, Macau between May 17-23, 2012.

They plan to be active from 6 to 160 meters (include WARC) in CW, SSB and RTTY with at least 3 stations simultaneously in different bands and modes.

QSL via EB7DX.

Website: http://www.adxg.org/xx9/

** DXCC: ON; Square: several; start 2012-04-14

Special event station ON100TT qrv from up april 14th

UBA Sectie ON4EKO will activate the special event station ON100TT to commemorate the Titanic Centenary between 14 April and 31 December, 2012. QRV on all HF and VHF bands, using all modes. QSL via ON4WDL, direct (with SAE + 2 green stamps) or by the Bureau.

SOURCE: [UBA HF News]

** DXCC: G; Square: IO91; start 2012-04-10

Special Event Station GR100MGY will be activated between 10-15th April, 2012

The sinking of White Star Line's RMS Titanic on 15th April 1912 sent shock-waves around the world and has touched our hearts ever since. To commemorate this tragic event, special event station GR100MGY will be activated between 10-15th April, 2012. Some fifteen operators will man two 400 watt transmitters on the eight HF bands from 3.5 to 28 MHz, using directional antennas. Only CW will be used except on the open days, 14-15th April, when SSB will help the public to understand the operation. Activity on VHF is also planned. QSL information can be found on QRZ.com. GR100MGY will be located at 0?37'18" West, 51?11'49" North, Locator IO91QE: Charterhouse, Hurtmore Road, Godalming, Surrey, GU7 2DX, England (EU-005, WLOTA 1841).

SOURCE:[dx-world.net]

** 3C0, ANNOBON ISLAND **

Operators Elmo/EA5BYP and Javier/EA5KM will once
again be active from Annobon Island (AF-039) and Bioko Island (AF-010,
DXCC - Equatorial Guinea) using the callsigns 3C0E and 3C6A, respectively.

According to their Web page they arrive at Malabo, Equatorial Guinea, by the middle of February. (dates to be determined). In Malabo, they will purchase all needed provisions as there are on stores on the island of Annobon. A representative of the Ministry will also be traveling with them to Annobon. If they have free time, they will have a active station on the air on CW or SSB and RTTY using the callsign 3C6A from Malabo, Bioko Island, Equatorial Guinea. Then they will travel to Annobon and be active as 3C0E. Activity will be on 160-6 meters. Suggested frequencies

are:
CW - 1826.5 (*RX), 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 3785, 7075/7145, 14190, 18140, 21295, 24960 and 28480
RTTY - 3580, 7035, 10140, 14082, 18102, 21082, 24920 and 28080 kHz
6m - 50.104/CW and 50.145/SSB MHz
RX AS/OC 1821.5
RX EU/NA 1834.0
QSL both callsigns via EA5BYP: Elmo Bernabï¿½ Coll, P.O.Box 3097,
03080 Alicante, Spain. They are looking for sponsors for this very
expensive operation. For more details and updates, watch the Web page at:

Zoli, HA5PP, will once again be active from the island of Malta
(EU-023, MIA MM-001, WLOTA 1113, CQ zone 15) as 9H3PP during the CQWW WPX CW
Contest (26-27 May, 2012). Plans are for a Single-Op/Single-Band entry, either
15m or 10m. After the contest Zoli will focus on some 6m and 12m activity. QSL
via home call.

SOURCE: [ICPO] ICPO Bulletin (03 - 10 February 2012)

** United Kingdom, G **

2O12L will be the callsign of the London ham radio station
celebrating the Olympic Games and Paralympics. Based at Eltham Palace (WW Loc.
JO01AK), which is in the Borough of Greenwich, England (EU-005, WLOTA 1841), one
of the six 'host boroughs' for the Games, five stations will be active
simultaneously, three on HF and two on VHF. Operation will cover the period of
the Olympics and Paralympics, and the two weeks in between (27 July to 9
September, 2012). In total they plan to make at least 60,000 contacts during the
seven week period. Visitors may view an exhibition about radio communications
and electronics, and sit down at the radio and make contact with amateur radio
operators right around the world. They are also offering 'bite-sized' talks
giving an overview of radio and its importance in the modern world. All hams who
visit the Olympics, from anywhere around the world, are encouraged to visit
2O12L. QSL via G4WNF, direct or Bureau. Please check website often, for updates
as the project progresses at: www.2o12l.com/

[IARU-R2-News 162] Special WRC Report Number Three - The Amateur Radio Service Gains A Band Near 500 kHz
2012-02-15

[Editors note: Subject to approval by Industry Canada, operation on this band is not permitted in Canada at this time. Radio Amateurs of Canada will be working with Industry Canada through the Radio Advisory Board of Canada (RABC) to work out the various details on amateur usage of this band in Canada.]
472-479 kHz. The worldwide amateur radio service has a new frequency band, 472 to 479 kHz. It is a secondary allocation. There are other services in that portion of the spectrum that must not be interfered with by the amateur operation.

The aeronautical radionavigation service is a primary service in the band 415-495 kHz in the following areas: Australia, China, the French overseas communities of Region 3, Korea (Rep. of), India, Iran (Islamic Republic of), Japan, Pakistan, Papua New Guinea and Sri Lanka.

The aeronautical radionavigation service is a primary service in the band 435-495 kHz in the following areas: Armenia, Azerbaijan, Belarus, the Russian Federation, Kazakhstan, Latvia, Uzbekistan and Kyrgyzstan.

The amateurs are allowed to use the band so long as it does not cause interference to this primary service or the maritime mobile service operating in the 472-479 kHz band. There are some countries that will not allow amateur radio operation in the 472-479 kHz band. The use of the frequency band 472-479 kHz in Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Mauritania, Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia, Sudan, Tunisia and Yemen is limited to the maritime mobile and aeronautical radionavigation services. The amateur service shall not be used in the above-mentioned countries in this frequency band, and this should be taken into account by the countries authorizing such use.

The ITU Radio Regulations provide that radio amateurs are limited to 1 watt (e.i.r.p.) however administrations whose territory is beyond 800 kilometers from the borders of the following countries may increase the operating power to 5 watts (e.i.r.p.): Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iran (Islamic Republic of),

Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Morocco, Mauritania,
Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia,
Sudan, Tunisia, Ukraine and Yemen.

The change becomes effective with the adoption of the Final Acts of
the Conference. Of course, it will be determined by each
administration around the world as to what modes and bandwidths will
be used in this portion of the spectrum and when hams in that country
will have access to the spectrum.

More activities from the WRC-12 will be reported at the end of the
WRC. The WRC continues until 17 February. There is an effort underway
to place an amateur radio agenda item on the agenda for the next WRC
which will take place in 2015.

WIANEWS WEEK COMMENCING FEBRUARY 19 2012.

cq polio

top hat mast of 3WV

Field day BBQ cookbook published

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 12 2012.

WIA PRESIDENT VK3KI REPORTS

The ITU's 2012 World Radiocommunication Conference (WRC-12) is now winding
to a conclusion in a cold Geneva on Friday night, last Friday night by the
time this is broadcast.

The WIA has nominated and supported Dale Hughes VK1DSH as a member of the
Australian delegation to WRC-12, and Dale has been reporting on a daily basis
to the Board.

The item of particular interest to amateurs has been agenda item 1.23,
a proposal to allocate a small band around 500 kHz to the amateur service on
a secondary basis.

The process of a WRC is tortuous and confusing. A proposal to satisfy an agenda item is dealt with by a committee with working groups and sub working groups, and becomes part of the treaty after it is read a second time and approved at Plenary meetings.

Dale has reported that the Plenary meeting of WRC-12 has now approved the allocation of the band 472-479 kHz across all three ITU regions to the amateur service on a secondary basis.

The primary service in the band is maritime mobile, with aeronautical radionavigation also a secondary service, though in some countries, including Australia, it is a primary service.

The allocation is subject to a 1 watt e.i.r.p. power limit, though administrations with territory more than 800 kilometres from the borders of certain named countries may allow the higher power of 5 watts e.i.r.p in that territory.

There is also an "opt-out" footnote for countries not wishing to allow amateurs to operate in this band.

Obviously, how this will be implemented for Australia will be a matter for the Australian administration.

Given the opposition of some countries, in particular Iran, the result has been a great result for the amateur service.

There may be other matters of importance to the amateur service decided before the WRC concludes, including agenda items for future conferences.

Dale, who was also the spokesman for the Asia Pacific Telecomunity, the APT, (the regional telecommunications organisation of countries in Region 3) on the amateur agenda item, has attended two of the APT preparatory meetings for WRC 12 as well as an ITU Study Group Meeting all at the expenses of the WIA.

A number of people participating in WRC-12 have paid tribute to Dale's contribution.

The IARU and a number of national amateur societies have contributed particularly to the successful representation of the amateur service at WRC-12.

The WIA is proud to have been one of them.

And guess what?

Agenda for next WRC now includes an amateur allocation around 5 MHz

At 4.20 in the morning of 16 February 2012 the Plenary of WRC12, which had been sitting for 9 hours without a break, passed a Resolution entitled "Possible allocation to the amateur service on a secondary basis at around 5 300 kHz."

The Resolution arose from a proposal submitted by Cuba, and noted that amateur stations are regularly used for emergency communications, and also says that "an allocation of an appropriate amount of spectrum, not

necessarily contiguous, to the amateur service at around 5 300 kHz would be adequate to better satisfy its needs associated with use for providing communications in disaster situations and during relief operations".

The effect of the Resolution is to invite studies, including sharing studies, before WRC-15 and to put on the agenda for WRC 15 an item to consider, based on the results of the ITU R studies, the possibility of making an allocation of an appropriate amount of spectrum, not necessarily contiguous, to the amateur service on a secondary basis within the band 5 250-5 450 kHz.

The WIA has had a continuing interest in this part of spectrum for many years particularly in support of emergency communications. So much so, that the WIA has taken out several land mobile system licences to enable the use of such frequencies.

Accordingly, the WIA is delighted that the issue has become an agenda item for WRC-15.

Still gracing the airwaves at age 101

WIA Front Page News (wia.org.au) reports on Darcy Hancock VK5RJ who last December had been a licensed radio amateur for 84 years.

The report says:

VK5RJ Darcy Hancock has lived through the birth of television and several wars but despite the innovation of modern communication, 84 years on from receiving his transmitter's licence, his voice can still be heard over the airwaves.

ABC releases video on 'top hat' mast of 3WV Dooen

When it comes to beaming radio waves across vast distances, the Dooen transmitter in VK3 is world class. Standing 201 metres tall with a 19 metre wide capacitive 'top hat', the 3WV mast in western Victoria stands out in the vast flat landscape that stretches below it.

Celebrating 75 years of service it must've been a big undertaking in 1936 to build it because cranes and things that are about today weren't even heard of," says long time Horsham resident James Heard.

In fact 594 AM has even been heard as far as Canada, Japan and South Africa.

The staggering reach is aided by the distinctive 'top hat' and the low frequency on the AM band. While obviously a success, the antenna was the first of its kind in Australia and acted as a prototype for other services.

"It was also the first solid-state 50 kW broadcast transmitter installed for the ABC and it was the test bed for the installations across the rest of the country," says Tim Hughes, Transmission Coordinator for ABC Victoria.

Watch a 3 minute video about the 3WV mast Google it on your ABC site.

(SouthGate)

SPACE

Bringing together the resouces of the WA State Records office, the WA Museum and the City of Perth, Amateur Radio is making a name for itself in Western Australia and across the globe.

Here's Onno VK6FLAB with an update for the ARISS contact tomorrow.

Monday February 20 at 0900 UTC the City of Perth will be celebrating the 50th Anniversary of the Orbit of John Glenn which he made on the 20th of February 1962. During the celebrations the International Space Station will be live on stage with students from across Western Australia asking questions to an astronaut in space.

Thanks to the dedicated efforts of the ARISS team, NASA and the Hills Amateur Radio Group, the general public will be introduced to Amateur Radio and its role in providing Earth contacts between the crew of the International Space Station and schools, amateurs and others.

There will be trackers from Muchea and Carnarvon, Amateurs from around the state, and a host of dignitaries on hand to make this an event worthy of John Glenn's achievement. John Glenn will be part of the celebrations with a message for the people of Perth and Rockingham.

If you're unable to make it to Northbridge in Western Australia, you can listen in using IRLP, Echolink and a web-stream. Details are available on the WA Museum City of Light web-site

http://museum.wa.gov.au/city-lights

and the Hills Amateur Radio Group web-site

harg.org.au/ariss

The cast to pull this off is enormous and we'll be adding a list of credits to the HARG site in coming days. Next week we'll have a report on how it all went down, needless to say it's getting very exciting, T-1 day and counting.

(Onno VK6FLAB)

The WIA National Field Day Saturday the 14th and Sunday the 15th of April is where Amateur Clubs and radio enthusiasts across Australia activate public relations demonstration stations in prominent locations.

This will raise public awareness and showcase the hobby.

This WIA National Field Day activity, now in its third year, will be a good opportunity to break out your field day equipment, demonstrate emergency preparedness, but most importantly engage the public.

(wia front page news wia.org.au)

MAGIC BAND

Despite Channel 0 analogue TV transmitters being progressively taken off air as part of the VK digital switchover, the ACMA reminds all Advanced Licence holders of the existing Licence Condition Determinations LCDs.

Work to amend the LCD will start after the switchover is completed at the end of the year. If affects Queensland, New South Wales, the ACT and Victoria

The LCD prohibit operation in the band at a place that is less than 120kms from a main Channel 0 station or 60kms from a translator using this channel.

The main Channel 0 transmitter and several translators located in southern Queensland (VK4) were switched off last December. Both the north and south of New South Wales will close this year.

For full details refer to the LCD or visit the ACMA at http://engage.acma.gov.au/amateur-licence-conditions-in-force-during-dig

(ARVICTORIA)

AGM PARTY

Have you registered to attend to the WIA Annual Conference being held in Mildura over the weekend 25th - 27th May?

This action packed weekend of activities kicks off Friday evening with a meal at the at the Mildura Settlers Club. The Settlers Club has to be one of Mildura's best known historic icons, with a history dating back to its formation 1893, were its members were typically professionals, and the more successful property owners of the area. Yet after nearly a decade of operation, in the early 1990's the club ran into financial difficulties and was forced to close. Down but not out, with one extreme makeover and some genuine TLC it has again become one of Mildura's most successful function centres renowned for its quality meals and relaxed atmosphere, yes that very same relaxed atmosphere it offered back in the 1800s. After the evening meal, Alan Cameron one of Mildura's well known successful businessman, a balloon pilot and a marriage celebrant will provide an entertaining and informative talk entitled "Sunraysia - Past, Present and Future".

The following morning, Saturday the 26th, the WIA will conduct its Annual General Meeting and open forum in the ballroom of Mildura's Grand Hotel. The AGM will commence at 9:00am sharp and will be followed by the presentation of a range of awards. The Open Forum will commence with reports of the various WIA activities that took place over the last year being presented. The open forum is an ideal opportunity for those present to offer comment or raise any issue desired.

But that's just the start, the beginning of a very special weekend of activities, and there is much more in store that we will be sharing with you in upcoming broadcasts. Oh! and do keep an eye out in the next AR magazine for our full colour conference brochure and don't forget the registration page on the WIA Website.

Up up and away, see you in Mildura

The Annual General Meeting of the Wireless Institute of Australia New South Wales Division (trading as Amateur Radio New South Wales), will be held on Saturday the 21st of April 2012.

At the AGM a new council is to be appointed.

Nominations are now open for those members who wish to be on the council for the year 2012 and 2013. Nomination forms are now available from the divisional office also available for download from the website www.arnsw.org.au

Nominations close at midday on Saturday the 10th of March 2012.

(Advised by Peter O'Connell VK2EMU Divisional Returning Officer)

What am I?

The number of notes in the traditional Western Major Scale

The original diameter (in inches), of the 45rpm gramophone record.

The number of cervical vertebrae in almost all mammals

The atomic number of nitrogen

The latest release of the Windows series of operating systems.

What am I?

I am the number of days to go until the Central Coast ARC Field Day at Wyong - 26th February 2012

Seven days until Amateur Radio's Big Day Out.

Flea market from 6.30am
Traders and Exhibitors from 9am

Entry $12 - Under 17 free

Talk in on the Club repeater 146.725

Remember - No exit from the car park until after 10am - if you need to leave before 10am, please park outside

For more information, please got to www.fieldday.org.au

I'm Rod, VK2FVRJ from the CCARC - see you at the Field Day

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Next Sunday being the annual Central Coast field day at Wyong racecourse will see ARNSW assessors providing all grades of assessments. These will commence at 8.30 am under the grandstand. Candidates are reminded to bring with them a passport size photo and identification.

These exams are ideal for those in regions of the country where there are few - if any assessors. Inquiries can be emailed to education@arnsw.org.au

Next weekend VK2WI News will provide a Saturday evening transmission at 7.30 pm in place of the usual Sunday morning session - all the broadcast team operators will be at the field day.

5 th March ARNSW will commence its Standard and Advanced upgrade course each Monday evening at the Dural property

INTERNATIONAL NEWS With thanks to IARU, RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

WRC-12: NOBEL LAUREATE JOE TAYLOR, K1JT, ADDRESSES PLENARY SESSION AT WRC-12, RECEIVES ITU GOLD MEDAL

Delegates and attendees at the 2012 World Radiocommunication Conference had the pleasure of listening as Joe Taylor, K1JT, shared his vision of the future of radiocommunication.

Taylor, an ARRL Member won the Nobel Prize in physics in 1993 for the discovery of a binary pulsar, a discovery which has opened up new possibilities for the study of gravitation. After the speech, the International Telecommunication Union Secretary General, HB9EHT, presented Taylor with the ITU Gold Medal in recognition of Taylor's outstanding contribution to the research in the field of radiocommunication.

In the introduction to Taylor a the Plenary the audience was that Amateur Radio led to Taylor's career as a radio astronomer, and ultimately to his winning the Nobel Prize.

Taylor began his speech by thanking the WRC-12 delegates for the job they were doing at the Conference. "I understand that you have come to Geneva from more than 150 of the ITU's Member States," he said. "You are here to do an important job, an essential one, for nearly all of humanity in today's world. You are charged to do your upmost to accommodate the wide variety of competing interests of all users of the radio frequency spectrum and its available orbits for Earth satellites.

This is surely not an easy task. Most people give very little thought to the complicated issues that you face. Why should they, since for most of us, most of the time, the technologies that depend on these limited resources just seem to work. But I know, and each one of you knows, that much background work and many long negotiations are often necessary in order to make everything fit together and work in harmony.

Future technologies will surely make even better uses of wireless communication than we do today. I foresee plenty of scope for contributions for new technologies. Information and communication technologies have much to offer for the betterment of the human

condition everywhere, and perhaps especially so in the developing world. It is extremely important to continue seeking the best efficiencies in the use of the spectrum. I wish you every success in your task of creating wise and fair guidelines for regulators and policy makers who must allocate the limited resources in the very best interest of all mankind."

You can view Taylor's speech on YouTube

13cm threat in Sweden

The 2300-2450 MHz band in Sweden is under threat.

As part of the consultation process the Swedish national society, SSA, has submitted its response to the regulator, the PTS.

SSA argues that the amateur service should remain in the 2.3 GHz band.

Wideband digital systems are becoming less sensitive to narrowband signals, which improves the possibilities for band-sharing.

SSA believes that communication with amateur satellites in the band 2400-2450 MHz should continue to be permitted. SSA is requesting to meet the PTS to discuss the technological basis for continuing the amateur service in the band.

Read the full response in Google English at
http://tinyurl.com/SSA2300MHzResponse

SSA in Google English
http://tinyurl.com/SwedenSSA

Bedford researchers use Medium Waves for power

The BBC report that researchers in Bedford, UK, have created a system to use medium wave frequencies to replace batteries in small everyday gadgets like clocks or remote controls.

Prof Ben Allen and his team at the University of Bedfordshire Centre for Wireless Research, believe it to be a world first that could eventually eliminate the need for conventional batteries.

The new technique uses the "waste" energy of radio waves and has been developed as part of the university's research into "power harvesting".

VK4WIT at the John Moyle Field Day 2012

theTARCinc will be active during this years John Moyle Field Day
alongside the mighty Burdekin River at Bivouac Junction near Macrossan.

Friday March 16 to Sunday March 18.

It's easy to get to Bivouac Junction, just take to the Flinders Highway
between Townsville and Charters Towers and take the right hand turn off
just before heading across the Burdekin River.

Head upstream for about 2km and you are there!

The site is only 20km away from Charters Towers for any shopping trips.

Irish Radio Transmitters Society 80th Anniversary

IRTS will be celebrating its 80th anniversary this year 2012.

Details of a worldwide contest - CQIR - to take place on Saint Patrick's Day,
Saturday 17th March 2012 have been announced and full rules and information
are available on the irts website.

www.irts.ie/cqir

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Heard Island DXpedition cancelled

The DX Community is advised that the trip to VK0/H Heard Island has been
put on hold until further notice.

The co-organisers, Chris Dimitrijevic VK3FY and Steve Chamberlain VK6IR,
said the decision came in part due to the current global financial situation,
the extremely high financial cost and it would take an estimated USD$500,000
for such an expedition.

Both Chris VK3FY and Steve VK6IR both wish to proceed to Heard Island about
4100 kms south west of Perth in Western Australia, but the financial risks
are far too great at this time.

Earlier it was announced that planning was underway for a DXpedition in
February 2013 involving two weeks, on what was number five of the most
wanted DX Entities worldwide.

BROADCAST MONITORING SWL AND SCANNER NEWS

New HF shortwave radio station sign

It is not very often that you can hear a new HF shortwave radio station sign on the air. WTWW, a new International Shortwave Radio facility just outside of Nashville, TN has launched a new transmitter with a broadcast called 'This Is Only A Test'.

WTWW is a 100,000 watt transmitter running into a full size rhombic antenna.

There are more than 1.5 billion shortwave receivers in use worldwide, the BBC estimates that at any given moment, over 200 million sets are tuned to shortwave broadcasts.

Field day BBQ cookbook published

We all love ham radio that's why we're part of this site, a lot of us also take part in field days and other events that require us to set up radio stations in various places be it a field for a contest over a weekend or at a church fete to promote the hobby etc.

We all also need to eat, so M0MVB has combined a love of doing field days and food by writing a BBQ cook book aimed at the ham radio operator.

It has over 100 recipes as well as covering what's the best bbq to take on field days and loads of other help.

The book A Dot of Butter and a Dash of Spice can be previewed and ordered at http://www.lulu.com/product/paperback/a-dot-of-butter-and-a-dash-of-spice/18881119?productTrackingContext=search_results/search_shelf/center/1

CQ SAYS MORSE IS ALIVE AND WELL

Five years after the USA dropped the Morse code requirement, CQ Magazine Editor Rich Moseson, W2VU, has published a very pointed editorial where-in he notes that both amateur radio and use of the Morse code are alive, well and growing.

This despite the naysayers who predicted the abandoning of Morse testing would bring a sudden end to the hobby.

In his editorial titled "No-Code Plus Five Years: An Assessment", W2VU, states that amateur radio is still here. CW is still here and despite the fears of many CW supporters the universe did not implode on February 23, 2007

Rather his article was prepared based on research that checked on signs of the state use of Morse by today's amateur radio community. It did this by asking manufacturer of keys and paddles about sales, talking to the FISTS Morse preservation group, looking at CW contest results and overall United States licensing statistics.

EA7GSU, Pertti is the President of ROAR, Rotarians Of Amateur Radio.

Pertti's Rotary District Governor has asked him to be on the air on Thursday the 23rd of February.

This is the day of the birth of Rotary and the purpose is to remind the world of Rotary's campaign to 'Stop Polio Now'.

Please note that EA7GSU will be QRV the whole day on:-

3994kHz, 7118kHz and 14293kHz +/- qrm.

He will be calling "cq polio" and telling about the project.

Pertti would welcome everybody to contact him.
A special QSL card will be printed.

As a result of his commitment to highlight Rotary's campaign to 'Stop Polio Now' other ROAR members around the world have also committed to participate.

In Australia VK2IWT, Noel and VK4ZD, Bill hope to be on air at least part of the day.

Vega launch success - satellite signals heard

The first Vega, flight VV01, lifted off at 1000 UT February 13 from the ESA Spaceport in the Caribbean carrying eight student built amateur radio satellites and the LARES Laser Relativity Satellite into orbit.

At 1153 UT, shortly after the satellites had been deployed, Drew Glasbrenner KO4MA reported hearing signals as they went past Florida.

Signals were first heard in the United Kingdom at around 1207 UT.

In Germany Mike Repprecht DK3WN copied the satellites at an elevation of just 3 degress at 1209 UT.

In Sudan Nader ST2NH received signals from AlmaSat-1 and Masat-1.

All the Vega amateur radio satellite project teams used the IARU amateur satellite frequency coordination panel service. The great benefit of IARU coordination was that all the different UHF satellite signals could be simultaneously captured within the typical 192 kHz bandwidth of modern Software Defined Radios.

PW-Sat is the only satellite with a downlink in the 145 MHz band.
Its 1200bps BPSK signal on 145.900 MHz is receiveable with an SSB radio and an omni-directional antenna. When PW-Sat has finished its primary scientific mission it will be reconfigured as a 435/145 MHz FM to DSB transponder for general amateur radio communications. The FM to Double Sideband transponder was first pioneered by amateurs on satellite AO-16.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

==> + WRC-12: AMATEUR RADIO GETS SECONDARY MF ALLOCATION AT WRC-12

It's official -- delegates attending the 2012 World
Radiocommunication Conference (WRC-12) have approved a new
7-kilohertz-wide secondary allocation between 472-479 kHz for the
Amateur Radio Service. Agenda Item 1.23 had both its first and second
readings in Plenary Session on Tuesday, February 14; to become part of
the ITU's Radio Regulations, each Agenda Item must be read twice in
Plenary Session. While the Final Acts will be signed on Friday,
February 17 at the close of the Conference, the new allocation will not
take effect until it is entered into the Radio Regulations on January
1, 2013. In any case, no amateur can use the band until his or her
```

national regulations are revised to implement the allocation. Read more here <http://www.arrl.org/news/amateur-radio-gets-secondary-mf-allocation-at-wrc-12>.

==> WRC-12: IARU VICE PRESIDENT OLE GARPESTAD, LA2RR, CHATS WITH ITU

IARU Vice President Ole Garpestad, LA2RR, sat down for a video interview with the ITU Press Office at 4U1ITU (operating as 4U1WRC), the Amateur Radio station at ITU Headquarters in Geneva. During the interview, IARU Region 1 President Hans Blondeel Timmerman, PB2T, operated CW in the background. Garpestad discussed Agenda Item 1.23 and what it means to the Amateur Radio Service, what the IARU does at the WRC, the future of Amateur Radio, and what the Amateur Radio Service and the IARU are doing for the next WRC. Watch the video here <http://www.youtube.com/watch?v=eaxLAem_YMA>.

==> + WRC-15: WRC-12 DELEGATES PLACE POSSIBLE 5 MHZ ALLOCATION ON AGENDA FOR NEXT WRC

One of the responsibilities of each WRC delegation is to set the agenda for the next WRC. WRC-12 delegates approved an Amateur Radio-related agenda item for the upcoming WRC-15: To consider the possibility of making an allocation of an appropriate amount of spectrum, not necessarily contiguous, to the Amateur Service on a secondary basis within the band 5250-5450 kHz. This will be Agenda Item 1.4 at WRC-15.

"It is always a challenge to have items placed on the agenda for future WRCs," IARU President Tim Ellam, VE6SH, told the ARRL. "I am pleased that we were successful in having an Agenda Item for a potential allocation at 5 MHz on a secondary basis. There will be much work to do over the next ITU study group cycle. Much appreciation is owed to the IARU and the national delegation teams in Geneva for their hard work on this issue."

According to ARRL Chief Executive Officer David Sumner, K1ZZ, the original 5 MHz proposal came from Cuba. "The IARU team worked hard to line up support," he explained. "The factor that worked most in our favor was that at WRC-07, a proposal for a 5 MHz agenda item for WRC-12 failed to gain enough support, so there was a feeling that the Amateur Service deserved better treatment this time around. We did have active support from a number of administrations in Latin America which helped a lot, but a lot of others also had to agree to get it on the agenda. The coordinators of future Agenda Items on behalf of the regional telecommunications organizations, such as CITEL and CEPT, eventually agreed on a package of Agenda Items that included ours." Read more here <http://www.arrl.org/news/wrc-12-delegates-place-possible-5-mhz-allocation-on-agenda-for-next-wrc>.

==> +ON THE AIR: ARRL 500 KHZ EXPERIMENTAL GROUP SPARKED INTEREST IN MF OPERATION

In September 2006, the FCC's Office of Engineering and Technology granted a Part 5 experimental license -- WD2XSH -- to the ARRL on behalf of a group of radio amateurs who were interested in investigating spectrum in the vicinity of 500 kHz. Called the ARRL 500 kHz Experiment, this group of hams -- led by Fritz Raab, W1FR -- received permission to experiment and do research between 505-510 kHz using narrowband modes at power levels of up to 20 W effective radiated power (ERP), using CW and PSK31.

<http://www.arrl.org/images/view/News/Feb2012_600MeterStations.jpg>
The original 500 kHz license called for 23 discrete fixed sites across the US: at Raab's QTH in Vermont, as well as at sites in Arkansas, California, Colorado, Illinois, Louisiana, Massachusetts, Minnesota, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oregon, Rhode Island, Tennessee, Texas and Virginia. In 2008, the FCC expanded the scope of the experimental license, allowing for more frequencies, more stations and portable operations: The group could now operate between 495-510 kHz, the number of stations increased from 23 to 42 and participants could now operate within 50 km of their designated stations.

At the 2012 World Radiocommunication Conference (WRC-2012), delegates approved an amateur secondary MF allocation between 472-479 kHz. The ARRL would like to acknowledge the contributions of the participants in the ARRL 500 kHz Experiment to the recent approval of a new amateur secondary MF allocation, and to thank them for their efforts. Read more here
<http://www.arrl.org/news/arrl-500-khz-experimental-group-sparked-interest-in-mf-operation>.

==> + ON THE AIR: RAC TO SPLIT ONTARIO INTO FOUR SECTIONS

On February 6, Radio Amateurs of Canada (RAC) issued a statement on their website that the Ontario Section would be split into four new RAC Administrative Sections, effective September 1, 2012. The reason given for the restructure was "...to create a management model that better communicates with, and represents the interests of, the overall Ontario amateur population." The Ontario Section will be dissolved and be replaced with four new RAC Sections: Ontario North, Ontario South, Ontario East and the Greater Toronto Area. The new section abbreviations will be announced when final. Read more here
<http://www.arrl.org/news/rac-to-split-ontario-into-four-sections>.

==> + AMATEUR RADIO IN SPACE: NASA SELECTS AMSAT FOX SATELLITE TO JOIN PROGRAM

Project ELaNa -- NASA's "Educational Launch of NanoSat" managed by the Launch Services Program at the Kennedy Space Center -- announced on February 10 that the AMSAT Fox-1 CubeSat has been selected to join the program. NASA will work with AMSAT in a collaborative agreement for NASA to cover the integration and launch costs of satellites deemed to have merit in support of their strategic and educational goals. Read more here

<http://www.arrl.org/news/nasa-selects-amsat-fox-satellite-to-join-program>.

==> AMATEUR RADIO IN SPACE: TEXAS HAMS MAKE WORLD RECORD BALLOON ATTEMPT

A group of Amateur Radio operators hopes to establish a world distance record for an unmanned helium-filled balloon. The BLT-28 balloon will undertake a journey across the Atlantic and the Mediterranean, and then on to Nanjing, China. The South Texas Balloon Launch Team released the balloon at 3 PM (CST) on February 11 from Katy, Texas, just outside of Houston.

During the trans-Atlantic crossing, when out of range of shore based stations, the balloon's APRS beacon will operate on the International Space Station (ISS) packet digipeater frequency of 145.825 MHz. The balloon payload package weighs only about 5 ounces and contains a high altitude GPS tracking system and a 144 MHz FM APRS Amateur Radio transmitter. To conserve weight and battery life, no camera equipment will be on board. The maximum altitude is expected to be above 19 miles, with horizontal speeds between 100 and 150 miles per hour. Read more here <http://www.arrl.org/news/world-record-balloon-attempt>.

==> AMATEUR RADIO IN SPACE: NEW SATELLITES REACH ORBIT

On February 13, a European Space Agency Vega rocket lifted off from Kourou, French Guiana on its inaugural flight. It carried the Laser Relativity Spacecraft to orbit along with eight student-built MicroSats and CubeSats. The student satellites will transmit telemetry in the VHF, UHF and microwave amateur bands, with one satellite also including a voice repeater. Read more here <http://www.arrl.org/news/new-satellites-reach-orbit>.

==> SOLAR UPDATE

Tad "Certain as the Sun rising in the east <http://www.youtube.com/watch?v=oeoPtz0F2Ck>" Cook, K7RA, reports: We are more than halfway through the winter season, as Sunday, February 5 was 45 days after the winter solstice. Propagation should improve as we approach the vernal equinox on March 20. Solar activity is still in the temporary doldrums, with sunspot numbers below 100. But the weekly average of daily sunspot numbers rose this week by over 15 points to 55.6. There was a geomagnetic storm on Wednesday, February 15 (UTC). Early in the UTC day (Tuesday night in North America), the planetary K index went to 5, and the planetary A index was 22. The College A index in Fairbanks was estimated at 46, which is quite high. The disturbance was probably from a CME a few days earlier. Aurora in North America was seen as far south as Minnesota. The latest forecast has solar flux about 55-60 points lower than last month's prediction for the ARRL International CW DX Contest <http://www.arrl.org/arrl-dx> this weekend. Latest predicted flux values are 105 on February 16, 110 on February 17-20, 105 on February 21-22, 110 on February 23, and 115 on February 24-26. The predicted flux values bounce around from 105-110 from

February 27-March 13, then go back to 115 on March 14-16 and again on March 20-24. The predicted planetary A index for February 16-23 is 10, 5, 8, 8, 5, 5, 5 and 9, then 5 on February 24-March 1. Look for more information on the ARRL website on Friday, February 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Disney's Beauty and the Beast <http://en.wikipedia.org/wiki/Beauty_and_the_Beast_%281991_film%29>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 17 -- NCCC Sprint Ladder
- February 17-18 -- Russian PSK WW Contest
- February 18 -- Feld Hell Sprint
- February 18-19 -- ARRL International DX Contest (CW) <http://www.arrl.org/arrl-dx>; AWA Amplitude Modulation QSO Party
- February 20 -- Run for the Bacon QRP Contest
- February 22 -- SKCC Sprint
- February 22-23 -- CWops Mini-CWT Test

Next week:

- February 24 -- NCCC Sprint Ladder
- February 24-26 -- CQ 160 Meter Contest (SSB)
- February 25-26 -- Mississippi QSO Party; North American QSO Party (RTTY); REF Contest (SSB); UBA DX Contest (CW)
- February 26 -- High Speed Club CW Contest; SARL Digital Contest
- February 26-27 -- North Carolina QSO Party
- February 27 -- CQC Winter QSO Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ARRL HQ: ARRL HEADQUARTERS TO CLOSE IN OBSERVANCE OF PRESIDENTS DAY

ARRL Headquarters will be closed in observance of Presidents Day on Monday, February 20. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, February 21 at 8 AM Eastern Standard Time. We wish everyone a safe Presidents Day holiday.

==> + BE A STAR! DEADLINE FOR SECOND ANNUAL ARRL VIDEO CONTEST IS FEBRUARY 29

If you've ever wanted a way to show the world how exciting Amateur
Radio can be, here's your chance: The ARRL is sponsoring its Second
Annual Video Contest! Shoot a ham radio-related video and send it our
way. All videos must be postmarked by February 29, 2012. Burn your
video to a CD or DVD using the appropriate software and mail it to ARRL
Video Contest, 225 Main St, Newington, CT 06111. Do not attempt to send
it via e-mail, as our e-mail system cannot accommodate large files.
Read more here
<http://www.arrl.org/news/be-a-star-deadline-for-second-annual-arrl-video-con
test-is-february-29>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 17-18 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-1>,
Yuma, Arizona
- February 18 -- ARRL Arkansas Section Convention
<http://www.arrl.org/hamfests/arkansas-section-convention-1>, Hoxie,
Arkansas
- February 25 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-2>,
South Burlington, Vermont
- March 3 -- ARRL Santa Clara Valley Section Convention
<http://www.arrl.org/hamfests/santa-clara-valley-section-convention-radiofest
>,
Del Rey Oaks, California; ARRL South Texas Section Convention
<http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-
hamfest-2>,
Rosenberg, Texas
- March 3-4 -- ARRL Alabama Section Convention
<http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest-1>,
Birmingham, Alabama
- March 9-10 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana
-hamfest>,
Rayne, Louisiana; ARRL Oklahoma State Convention

167. NZART Headquarters Infoline issue 245

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-17 09:00:04 UTC
From: ZL1AMW <zl1amw@gmail.com>
Message-ID: <5331119B2DE447D4970416404DA0CA44@AlanLaptop>
Source record: 3684
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

NZART Headquarters Infoline Issue 245

17 February 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Proposed changes affecting the 130 to 190 kHz Amateur
Band – Outcome

· IARU update from WRC 2012

· ARLHS request for articles

· Variable Z0Yagi Paper

· Back to the Future:Amateur Radio 2012

Debby Says…NZART Council will be at Wellington airport this
weekend for a one day face to face meeting. Included in the items to be
discussed are the remits for the upcoming AGM to be held in Nelson over
Queens birthday weekend. These remits will be published in Break In, in
the March April issue. No remits will be forwarded separately to
branches for discussion until this time.

Subscription reminder notices will be sent out to all non-financial
members of NZART for the 2012 year. If you are not sure you have paid
your membership, please contact me, however if your received the
January/February issue of Break In, you have definitely paid your subs.
Please remember we can accept regular payment options, contact me for
more details.

>From time to time, I need to remind members of a few small details. Some
that irk me slightly are:

a) I am the only person present in this office, how I wish there
was a team of me!

b) I do need to leave the office usually on a daily basis to
collect mail, post and bankings etc, sometimes I divert my phone to my
personal cellphone so I do not miss your calls, however I may have
missed you if you have come to the office. It may be easier to ring me
before you intend to visit so I can make sure I will be here.

c) I am and have always been a female, this sounds petty, but I would like not to be called ‘Sir’ or
‘OM’. I am quite shocked at times to find long standing members refer to me in this manner.

d) Lastly, I do like to get visitors, however the hours I spend here have been finely tuned so as not to waste Association funds, therefore if you have just ‘popped in’ for a chat, I would appreciate if your stay is brief. Sorry folks I like a catch up like anybody, but it usually means I may get behind in my duties and serving you in the best and most cost effective way.

Thanks for not taking this too personally.

Talk soon…Debby ZL2DL

Proposed changes affecting the 130 to 190 kHz Amateur Band - Outcome

Members may recall that we put in a submission late last year (see in HQ Infoline 31s on 16 December) commenting on changes the MED were proposing to make that would affect part of our 130 – 190 kHz Amateur band.

The Ministry has now posted their decision on the RSM website at http://www.rsm.govt.nz/cms/policy-and-planning/projects/proposed-power-increase-for-short-range-devices together with a summary of the submissions.

As expected, the Ministry has approved the change, agreed that the current compliance and radio standards regime should continue (the system that has replaced “type approval”) but decided not to take up our suggestion that a warning against modification be included with the devices as this “could add an unreasonable cost to industry for low volume, low risk activity”.

Don Wallace, ZL2TLL, NZART Administration Liaison Officer

WRC 2012 - The Amateur Radio Service Gains A Band Near 500 kHz

472-479 kHz. The worldwide amateur radio service has a new frequency band, 472 to 479 kHz. It is a secondary allocation. There are other services in that portion of the spectrum that must not be interfered with by the amateur operation.

The aeronautical radionavigation service is a primary service in the band 415-495 kHz in the following areas: Australia, China, the French overseas communities of Region 3, Korea (Rep. of), India, Iran (Islamic Republic of), Japan, Pakistan, Papua New Guinea and Sri Lanka.

The aeronautical radionavigation service is a primary service in the band 435-495 kHz in the following areas: Armenia, Azerbaijan, Belarus, the Russian Federation, Kazakhstan, Latvia, Uzbekistan and Kyrgyzstan.

The amateurs are allowed to use the band so long as it does not cause interference to this primary service or the maritime mobile service operating in the 472-479 kHz band.

There are some countries that will not allow amateur radio operation in the 472-479 kHz band. The use of the frequency band 472-479 kHz in Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Mauritania, Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia, Sudan, Tunisia and Yemen is limited to the maritime mobile and aeronautical radionavigation services. The amateur service shall not be used in the above-mentioned countries in this frequency band, and this should be taken into account by the countries authorizing such use.

The ITU Radio Regulations provide that radio amateurs are limited to 1 watt (e.i.r.p.) however administrations whose territory is beyond 800 kilometers from the borders of the following countries may increase the operating power to 5 watts (e.i.r.p.): Algeria, Saudi Arabia, Azerbaijan, Bahrain, Belarus, China, Comoros, Djibouti, Egypt, United Arab Emirates, the Russian Federation, Iran (Islamic Republic of), Iraq, Jordan, Kazakhstan, Kuwait, Lebanon, Libya, Morocco, Mauritania, Oman, Uzbekistan, Qatar, Syrian Arab Republic, Kyrgyzstan, Somalia, Sudan, Tunisia, Ukraine and Yemen.

The change becomes effective with the adoption of the Final Acts of the Conference. Of course, it will be determined by each administration around the world as to what modes and bandwidths will be used in this portion of the spectrum and when hams in that country will have access to the spectrum.

More activities from the WRC-12 will be reported at the end of the WRC. The WRC continues until 17 February. There is an effort underway to place an amateur radio agenda item on the agenda for the next WRC which will take place in 2015.

Rod Stafford W6ROD

IARU Secretary

The IARU E-Letter is published on behalf of the Administrative Council of the International Amateur Radio Union by the IARU International Secretariat. Editor: Rod Stafford, W6ROD, IARU Secretary. Material from The IARU E-Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The IARU E-Letter and The International Amateur Radio Union.

Articles Needed

The ARLHS newsletter, The Lighthouse Lens,
needs articles for the next issue. Send us anything related to light beacons or maritime communications or with a nautical theme.

Have you activated a light? Tell us about
your experience! Any suggestions for settig up a portable station?
How about equipment? Recommendations? Memories of past friends, QRV
locations, members, or mentors.

Don't worry about grammar, spelling, or
punctuation. We have editors for that. And don't try to get fancy with
layout or design or use a processor, like WORD. Our typesetting
programs are specially designed for graphics. We do, however, prefer
receiving your manuscript in TXT format and photos or illustrations in
JPG.

Send contributions or inquiries via e-mail
to: ARLHS@inbox.com If you prefer "snail mail" send to: ARLHS, 114
Woodbine Ave, Merchantville, NJ 08109 USA.

73,

Jim Weidner, K2JXW

Editor & Publisher

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 10th-February, through Friday, 17th-February there were 223 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5V, 5W, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2M, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2011 CQ DX MARATHON NEWS (High Claimed Scores). John, K9EL, DX Marathon Administrator, reports: "High Claimed scores for the 2011 DX Marathon sponsored by CQ Magazine are now available on the DX Marathon Web site <www.dxmarathon.com>. Thanks to everyone for the big increase in participation. Final scores will be published later this year in CQ Magazine."

2012 RWWPSKC. Most operators will be active in the ARRL DX CW Contest this weekend, but we just wanted to remind you that the Russian World-Wide PSK Contest is also this weekend between 2100z Friday, February 17th, and 2100z Saturday, February 18th. Types of modulation are: BPSK31, 63 and 125. The output power should not exceed 10 watts on 160 meters and 100 watts on other bands. Only one transmitted signal is permitted at any time. Bands: 160, 80, 40, 20, 15 and 10 meters. Read more about the rules of the contest at:
http://www.epc-ru.ru/index.php?option=com_content&task=view&id=72&Itemid=2
Adjustment of MixW for Russian WW PSK Contest:
http://www.epc-ru.ru/index.php?option=com_content&task=view&id=78&Itemid=2

3DA, SWAZILAND (Update from G3SWH). Just a reminder that Phil, G3SWH, and John, G3OLU (aka EA5ARC), will be active as 3DA0PW from the Hawane Resort in western Swaziland between February 21-29th. The Hawane Resort has a well equipped station with Elecraft K3 transceivers, ICOM IC2KL amplifiers, an A4S at 24m, an A3WS at 20m, a wire 4 square for 40m and a vertical for 80m complete with 30 x 20m long radials. Activity will be on CW only on all bands 80-10 meters. There will be no 160, 60, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and hope to make at least 15,000 QSOs. QSL via G3SWH, either by the OQRS facility on Phil's web site <www.g3swh.org.uk> (preferred), direct with SAE and adequate return postage, or by the Bureau. Subject to a good InterNet connection, there will be an online log on Phil's Web site and on Clublog as well as daily uploads to LoTW. There is more information available at: http://www.g3swh.org.uk/3da0pw.html

5P, DENMARK (Contest and Special Event). Operators Joergen/OZ0J and Daniel/OZ5BD will be active as 5P12EU during the ARRL DX CW Contest (February 18-19th) as a Multi-Op/Single-TX entry. QSL via OZ0J. This special event callsign is to celebrate that Denmark is the Chairman of the European Union between January 1st and June 30th, 2012. There are 27 countries presently in the European Union. This special callsign will be used between the above dates. For more details, see the following Web page at: http://www.5p12eu.dk

6O, SOMALIA (Update). By the time you read this, Darko, J28AA/E70A, who was active as 6O3A this past week from Hargeisa, will be going QTH on February 20th. Last Wednesday, Darko installed a station in the Ministry of Post and Telecommunication that will have the callsign 6O3SL (the suffix "SL" stands for SomaliLand). He will also train some local amateur radio operators for future operations. The club station was equipped with

a donated Icom IC-735 and wire antennas. Look for 6O3A to take part in the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/Lower-Power entry. QSL via K2PF. For updates (under news), online, and pictures, check out the Bosnia and Herzegovina Contest Club's Web page [BHCC] at: http://bhcc.ba

9M0, SPRATLY (Update). Members of the Malaysian Amateur Radio Transmitter Society (MARTS) and the 9M4SDX Team will be active as 9M0L from Pulau Layang Layang Island (Swallow Reefs - AS-051) near Sabah, East Malaysia, between April 10-24th. The current team consists of Tex-san/9M2TO (Project Coordinator), Neoh/9M2CLN (Team Leader Malaysia), Tack-san/JE1CKA (Team Leader Japan), Hajime/7K4QOK, Takuto/9M2/JE1SCJ, David/9M2PX, Yasuma/9M8YY, Nigel/G3TXF, Joe/JA1LZR, Naoyuki/JK1FNL, Hiroyuki/JP1TRJ and Yutaka/JQ2GYU. QSL direct to 9M2TO: 9M0L TEAM PENANG, PO BOX 125 GPO 10710, Penang Island, MALAYSIA or by the Bureau to Malaysian Amateur Radio Transmitter's Society (MARTS). More details will be forthcoming. A Web page is up but still under constructions at: http://9m0l.legendchew.com

A2, BOTSWANA (DXpedition Update). Operators Frosty/K5LBU (A25CF), Keith/VE7MID (A52KW), Don/VE7DS (A25DS) and Joel/N5JR (A25JR) will be active from the Lotsane Safari Lodge between March 18-27th. The group plans to be active in the CQWW WPX SSB Contest (March 24-25th) as A25HQ. They will have about 3 rigs and a log periodic plus wire antenna covering 160 meters and up. It was also mentioned that they would use an inverted L with amp and a beverage antenna. Look for more details to be forthcoming.

E5, SOUTH COOK ISLANDS. Look for the E51M DXpedition that is going to North Cook Islands to also be active as E51MCW from Rarotonga, South Cook Islands, between April 11-14th, after their operation on Manihiki (see OPDX.1044). Activity will be on all bands, including 60m, using CW, SSB and the Digital modes. QSL via DJ8NK, direct or by the Bureau. Online QSL Requests Service (OQRS) for the Bureau and direct cards can be made after April 20th. For more details, see the E51M Web page at: http://www.manihiki2012.de

EF8, CANARY ISLANDS. Juan, EA8CAC, will be active as EF8R during the ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band entry. QSL via LoTW.

FO, FRENCH POLYNESIA. Operators Fred/AB1OC and XYL Anita/AB1QB will be active as FO/homecall from Bora Bora, French Polynesia (OC-067, DIFO FO-003, WLOTA 0430), between February 18-24th. Fred states, "This is not a formal DXpedition, it is just some time to relax and do some operating in 'vacation mode'." Fred and Anita will have an Icom 7000, a couple of vertical antennas and a 2 element beam for 10 and 12 meters. They plan to be active on all bands from 40-10 meters, including 30/17/12m, conditions permitting. Operations will be on PSK, RTTY, SSB and JT65HF. QSL via LoTW, eQSL or their home callsigns.

HI, DOMINICAN REPUBLIC. Operators Edwin/HI3K, Tino/HI3CC, Franky/HI3TT, Ezequiel/HI3EPR and Yukon John/KL7JR will be active in the ARRL DX SSB Contest as HI3K (March 3-4th) as a Multi-Single entry from Lomas del Toro

in Santiago (Lomadeltoro Contest Team's HI3CCP station):
http://www.lomadeltoro.com
QSL via KB2MS. See QRZ.com for details.

IOTA DINNER BANQUET (Visalia Convention). The 17th annual Islands On The Air (IOTA) Dinner will be held in conjunction with the 63th annual Visalia International DX Convention on Friday, April 20th, in the Plaza Room of the Holiday Inn Hotel, 9000 W. Airport Drive, Visalia, CA 93277, phone: 559 651-5000. See the DX Convention Web site for details on the DX Convention at: http://dxconvention.org/
This dinner is open to all who are active in the IOTA program or want to see beautiful pictures of far away islands. If you do not wish dinner, you may sit and enjoy the IOTA program following the dinner.
The program agenda is as follows:
1730 - 1830 Doors open, socializing and eyeball QSOs
1830 Welcoming & Introductions by Rick, K6VVA
Dinner served, buffet style
1845 IOTA Programs/Speakers: RSGB IOTA Program Manager - Roger, G3KMA; Cezar, VE3LYC; Martin, G3ZAY; Rick, K6VVA and Mike, K9AJ.
2200 Closing
The dinner will be served buffet style in the Plaza Room at a cost of 33 USDs per person (service charge and tax included). The buffet menu will contain entr�e choice of beef or chicken along with salad, vegetables, dinner rolls, dessert, and a beverage (coffee, ice water, or ice tea). Vegetarian meal is available with two weeks notice. Wine and liquor can be purchased separately from hotel staff.
Reservations and advanced payment will be required this year. Prepayment must be received 10 days in advance; by April 10, 2012. Please send your check to N6VR's address below. He will confirm by E-mail receipt. At this time, buffet service is set for 50 persons. And, as in previous IOTA dinners, admission is free for those wishing to watch the programs without dinner. Paid attendees will have priority seating.
For additional information regarding this event, please contact:
Ray Benny, N6VR - IOTA Dinner Coordinator
462 South Reed Road, Chino Valley, AZ 86323
Phone: 928 848-2158
rayn6vr@cableone.net

Or, Will Costello, WC6DX
Phone: 831 375-8133
wc6dx@sbcglobal.net
As a note, the Holiday Inn has no rooms available. Check the NCDXC Website for other motels. You may ask the NCDXC Convention coordinators if they have any rooms reserved for foreign guests if you reside out of the USA.

IOTA NEWS.....
AF-042. (POSTPONED!) Members of the "Invoker Team" that were expected to be active as EG3INT/7 from Albor�n Island (WLOTA 1061, ARLHS SPA-145, DIE S-001, DME 04013, WW GRID IM85LW) this past week

announced on QRZ.com (February 14th) - "POSTPONED: The team
has just received a message from the authorities informing
the trip must be postponed due to the boat having to undertake
other priority commitments."

EU-029. Operators Dominic/ON4AZP, Michel/ON4CAQ, Francois/ON6VP,
Herman/ON7FH and Maurice/ON7KS will be active as 5P5Y from
Lolland Island (DIA SJ-015, WLOTA 2773) between April 29th
and May 5th. Activity will be on all HF bands and modes. QSL
via ON4AMM, direct or by the Bureau.

EU-047. Robert, DK2RO, will be active as DK2RO/p from Spiekeroog Island
between February 20-24th. Activity will be holiday style on all
HF bands, propagation permitting. QSL via his home callsign,
direct or by the Bureau. He plans to uploaded his log to LoTW.

EU-103. Members from the Papa Lima DX Group (EI0PL) will be active as
EJ0PL from Saltee Island during the second full weekend of
April. QSL via EI5JQ. More details will be forthcoming.

EU-127. (Update to OPDX.1049) The DD4T DXpedition to Helgoland Island
(GID/DID N-014, WLOTA 0518) between June 3-10th, now has a
Web page at: http://www.dd4t.eu

NA-189. (Update to OPDX.1048) A team of 10 operators, from the Aguas-
calientes Amateur Radio Club, will be active as XF1AA from
Isabel Island (in the Jalisco/Nayarit IOTA group) between
March 16-21st. Activity will be on 160-10 meters using CW, SSB
and the Digital modes. Operators mentioned are Enrique/XE2AA,
Ben/XE2AU, Ismael/XE1AY, Jorge/XE2AMS, Armando/XE2AMZ, Vertiz/
XE2AY, David/XE2AUD, Juan/XE2AI, Fidel/XE2ARM and Ramiro/XE2ARV.
QSL via IT9EJW.

J3, GRENADA. Harry, AC8G, will use the J37K callsign during a visit to the
island between March 1-4th. After some repairs to the beam, he should be
on by mid day on the 1st. Since he will be in the ARRL DX SSB Contest
during the weekend, he plans to work non-USA/Canadian stations on March
1st and 2nd. QSL to AC8G direct with SASE. Logs will be put in LoTW
shortly after his return to stateside.

J7, DOMINICA. Brian, K1LI, will be active as J7Y from Dominica (NA-101)
between February 25th and March 13th. Activity will mainly be focused on
the ARRL DX SSB Contest (March 3-4th). QSL via his home callsign.

LIGHTHOUSE ACTIVITY. Look for the following stations to be active during
the South America Lighthouse Weekend (February 24-26th):
3G3L - Faro Punta Lutrin (CHI-071)
CE1DY - Faro Concordia Directional (CHI-101)
XR1FC - Faro Punta Caldera (CHI-065)
XR2FPC - Faro Punta Caraumilla (CHI-014)
XR4AC - Baliza Alto Capellania (NORTE4, NAC-208B)
XR2BPA - Baliza Puerto Aldea (NAC-135)
XR4CA - Faro Cabo Carranza (CHI-005)
XR4LR - Baliza Espigon Puerto Rapel (NAC-208A)

For complete details about the South America Lighthouse Weekend,
go to: http://www.grupodxbb.com.ar/faros2012/index.htm

MJ0, JERSEY. Mat, F5SHQ, will be active as MJ0ASP during the ARRL DX CW
Contest (February 18-19th) as a Single-Op/Low-Power entry. QSL via LoTW.

KH2/NH2, GUAM. Dave, N2NL, will be active as NH2T from Guam (OC-026)
during ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band/
Assisted entry. He is expected to be here until the summer of 2013.
Dave will be active (outside of contests) as KH2/N2NL and during all
contests as NH2T. QSL via LoTW or via W2YC.

OA, PERU. Fred, DL1NL, is once again active as OA4/DL1NL from Lima,
Peru, until early March. Activity will be during his spare time on
160-10 meters CW, with some SSB, from the Radio Club Peruano station
(OA4O). QSL via DL1NL, by the Bureau or direct. No LoTW or eQSL.

OH0, ALAND ISLAND. Pekka, OH2TA, will be active as OH0X during the
ARRL DX CW Contest (February 18-19th) as a Single-Op/All-Band entry.
QSL via LoTW or to OH2TA.

P4, ARUBA (Update). Helmut, DF7ZS, will be active as P4/DF7ZS from Aruba
(SA-036) from P40V's QTH between March 21-27th. Activity will be casual,
but main operations will be during the CQ WPX SSB Contest (March 24-25th)
using the callsign P41P. QSL P4/DF7ZS via DF7ZS. QSL P41P via W3HNK.

Amateur Radio Newsline(tm) Report 1801 - February 17 2012

Amateur Radio Newsline report number 1801 with a release date of February 17th, 2012 to follow in 5-4-3-2-1.

The following is a QST. WRC 2012 ends and ham radio get a new 600 meter allocation. Also, the 2 Gigahertz band comes under attack in Sweden; ham radio gets an exclusion from a proposed Illinois distracted driving law; a high altitude ham radio balloon heading from Texas to China disappears over the Gulf of Mexico and spray on antennas become a reality. All this and more on Amateur Radio Newsline(tm) report number 1801 coming your way right now.

(Billboard Cart Here)

RADIO LAW: WARC 2012 ENDS - THE OUTCOME FOR HAM RADIO

The 2012 World Radiocommunications Conference, better known as WRC 12 has come to a close. Bill Pasternak, WA6ITF, is in the Newsroom with some good news for ham radio:

--

At its Plenary meeting held on February 14th, the World Radiocommunication Conference approved a new secondary frequency allocation to the Amateur Radio Service from 472 to 479 kHz. Having passed its First and Second Readings it is normally a formality that this change be included in the conferences Final Acts when the gathering concludes and the Table of Frequency Allocations would then be amended accordingly.

As a secondary user, amateur radio shares 472 to 479 kHz with the Maritime Mobile Service which is the primary user in all three ITU Regions and with the Aeronautical Radionavigation Service which is a Secondary user except as noted in the following footnotes:

One footnote reads that a number of countries will identify their intent to elevate the status of their Aeronautical Radionavigation Service to Primary as a step in ensuring protection from secondary users.

Also there is a footnote that says that the power which radio amateurs may use in 472 to 479 kHz will be limited to 5 watts effective radiated except for amateur stations within 800 km of the borders of a number of countries. These are principally Russia, many of the former Soviet bloc

nations and the Arab states. For those affected amateurs the power output limit will be 1 watt.

It is, of course, up to individual administrations to authorize use of the band by their amateurs. How long it will before the band is available to hams in the United States? That's up to the bureaucrats in Washington D.C.. At this point that is unknown.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The new band at 600 meters will represent the return of amateurs to the medium waves. This is an area of spectrum that hams have not had access to since the earliest days of radio regulation. More on WRC 12 in future Amateur Radio Newsline reports. (RAC)

**

RESTRUCTURING: SSA SAYS HAM RADIO AND BROADBAND CAN SHARE 13 CM

The 13 centimeter ham band is under threat of reallocation in Sweden. This as that nations Telecommunications regulator the Department of Post and Telecommunications has suggested that the 2300 to 2450 MHz spectrum be transferred for use by broadband systems. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

As part of the rule making process the Swedish national amateur radio society, the SSA, has submitted it's response to Sweden's telecommunications regulator on this matter. In it, the SSA argues that the nations amateur service should remain in the 2.3 GHz band and if needed share this spectrum with any other users.

SSA notes that wideband digital systems are becoming less sensitive to narrowband signals. This it says improves the possibilities for such a form of band sharing arrangement.

Among its position points the SSA believes that communication with amateur satellites in the band from 2400 to 2450 MHz should continue to be permitted.

The SSA is also requesting a meeting with the Department of Post and Telecommunications to discuss the technological basis for continuing the amateur service in the this band.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburg, PA.

--

More on the amateur radio response to the proposed reallocation translated into Google English is on-line at

tnyurl.com/SSA2300MHzResponse (Southgate, SSA)

RADIO SCIENCE: COMMUNICATIONS LOST WITH BLT-28 TEXAS TO CHINA HAM RADIO BALLOON

Communications with a high altitude amateur radio floating balloon that was launched from Texas with a final goal of reaching Nanjing China has been lost. BLT-28 transmitting callsign KT5TK-11 on APRS was lost at 00:50 hours UTC on February 12th. This was only 3 hours after the balloon was lofted skyward from Katy, Texas, just west of the city of Houston.

Signals were lost when the balloon was passing through the 45,700 feet over the Gulf of Mexico about 110 miles south of Holly Beach, Louisiana. This was possibly the coldest part of the journey to that time with the last telemetry reporting a temperature of -50 degrees Celsius.

There is some speculation that the lack of signals from the balloon may have been caused by the batteries freezing up. There is some hope that a so-called watchdog circuit will keep the electronics package alive until the batteries have rejuvenated, if they ever do.

There was some hope that BLT-28 may have actually crossed the Atlantic Ocean sometime Monday morning, February 13th, but that has yet to be confirmed either visually or by a resumption of electronic tracking. If the APRS transponder does return to life, it should be transmitting on 144.800 MHz and will eventually appear on various world wide APRS tracking websites such as aprs.fi.

BLT-28 was the latest in a long series of high altitude ham radio balloon launches sponsored South Texas Balloon Launch Team. Their website is in cyberspace at www.w5acm.net. (ARNewsline(tm), Southgate, WB5ITT)

RADIO LAW: ILLINOIS DISTRACTED DRIVING LAW WONT AFFECT HAM RADIO

Amateur radio as well as 11 Meter CB and several other services have won a complete exemption from a proposed Illinois state law aimed at curtailing the activities of distracted drivers on that states roads and streets. Amateur Radio Newsline's Matthew Chambers, NR0Q, has this follow-up report:

--

There were actually two proposed measures before the Illinois state legislature aimed at accomplishing the same thing. As originally written, both House Bill 3972 introduced by Representative John D'Amico and House Bill 3970 by Representative Karen May would have banned the use of all electronic communication devices with a very few limited

exceptions. These were the use of two-way radio by law-enforcement and operators of emergency vehicles; cellphones used in a hands-free or voice-activated mode or in parked vehicles. And that was it.

Now, after consultation with representatives of the Illinois ham radio community, Representative D'Amico has amended his proposal to exclude numerous types of two-way radio based communications from his measure. This, while leaving the original intent of the proposed law aimed which is primeraly aimed at curtailing texting or using a hand-held cellular telephone while ta vehicle is in motion.

Item 7 of the Amended D'Amico measure is the part that's important to the ham radio community. It states that a driver using two-way or citizens band radio services or twoway mobile radio transmitter or receivers for licensees of the Federal Communications Commission in the Amateur Radio Service are exempt from the proposed law. And that's good news for anyone with radio gear in their car driving in or through the state of Illinois.

For the Amateur Radio Newsline, I'm Matthew Chambers, NR0Q, reporting.

--

While this still leaves House Bill 3970 by Representative Karen May as active as originally written, it's believed that this measure will shortly be amended to follow the House Bill 3970, if this has not taken place already. (ARNewsline(tm), others)

WITH NEWSLINE: OUR NEW WEBSITE

Amateur Radio Newsline's new website with its all new look is now on-line and fully operational. One of the new features is that from

this week forward that all newscasts will remain on the very front page as an ongoing audio and text blog. This should make it easy for those who may have missed the previous week need not look anywhere else to find it.

Also, the Young Ham of the Year Award and its associated forms now have their own tab at the top of the front page. Click it and you are at the place where you can download the 2012 nominating form as well as learn about the award programs history.

For now, if you find you are having any problems reaching the site, you can use the temporary URL of arnewsline.squarespace.com. This is because it may take up to a week before all the Domain Name Servers around the world have update www.arnewsline.org to the new host.

Lots more changes will be coming soon to make the overall site easier to navigate. Our thanks to Robert Sudock, WB6FDF; Kevin Trotman, N5PRE and Dale Cary, WD0AKO, for spearheading the new design and for the smooth transition to our new web host Squarespace.

Please check www.arnewsline.org and let us know what you think. (ARNewsline(tm))

RADIO LAW: FCC SAYS IT WILL SEEK TO CANCEL LIGHTSQUARED PROPOSED BROADBAND NETWORK

The Federal Communications Commission says that it will seek public comment on revoking LightSquared's permit to build a proposed national high-speed wireless data network. This, after concluding that such a system held the potential in some cases jam personal navigation and other Global Positioning System or GPS devices.

According to news reports, the FCC had seen LightSquared's proposal as a way to make more spectrum available to feed the need of the public and industry for added broadband capability for a wide variety of fixed and mobile devices. But the manufacturers of GPS receivers and those who rely on them feared that GPS signals would suffer from adjacent spectrum interference caused by the proposed LightSquared network.

As previously reported here on Newsline, after conducting tests, the National Telecommunications and Information Administration said that it found interference with dozens of personal navigation devices and aircraft control systems that rely on GPS for positioning. The NTIA concluded that there's no way to eliminate the risk of interference with such GPS devices.

As we go to air, LightSquared, which is based in Reston, Virginia, had not made any comment to the press on this latest development.

ENFORCEMENT: FCC REDUCES STUDIO TO TRANSMITTER LINK FINE BY $800

The FCC has reduced a fine for Gila Electronics that was based on a studio-to-transmitter link violation two years ago. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

During a September 2009 inspection of KUKY - FM located in Wellton, Arizona, agents discovered what appeared to be a 950 MHz Studio to Transmitter or S-T-L that was relaying KUKY programming's main studio in Yuma to its transmitter site near Wellton.

Gila provided the agents with a copy of the license for the relay station which authorized operation on 956.65 MHz as a Private Operational Fixed Point-to-Point Microwave radio station. The licensed location was listed as Telegraph Pass, Arizona near Wellton but the microwave station was installed at the KUKY studio in Yuma, about 15 miles from the licensed location.

In January 2010, the San Diego Office issued a Notice of Apparent Liability for Forfeiture for $4,000 to Gila for failing to operate the relay at its authorized location and for providing a private carrier service not in accordance with the rules applicable to its particular radio service.

In its response, Gila had not disputed the facts. However it asked for a reduction because it said there were no interference reports from other licensees nor any substantial potential for interference to other users. This based on the sparsely populated desert terrain.

But the FCC was not persuaded by this argument. It noted that the absence of public harm is not considered a mitigating factor in a rule violation. However, the agency did give Gila a break based on the company's past good behavior, noting that the company has not received a prior violation during its more than 20 year history. That's why it cut the fine by $800.

I'm Jim Davis, W2JKD.

--

Gila was given the customary 30 days to pay the fine or to file a further appeal. (FCC)

PUBLIC SERVICE: HAMS NEEDED FOR BOSTON MARATHON COMMUNICATIONS

Bob DeMattia, K1IW, of the Marathon Amateur Radio Communications group tells Amateur Radio Newsline that his organization is still looking for approximately fifty more volunteers. This, to help on the ham radio team at the Boston Marathon.

This years run takes place on Monday, April 16th. Bob says that positions are available in Hopkinton, along the route, and in Boston

itself. If you are a ham living in that area or plan to be at the event, and if you are interested in volunteering, please visit marc.mmra.org on the World-WideWeb.(K1IW)

**

RADIO READING: BAY AREA RADIO

Arcadia Publishing is set to release "Bay Area Radio," detailing the key events and history of radio in the San Francisco Bay Area. The book highlights some of the area's early events, including Charles "Doc" Herrold's broadcasts in 1909 from his radio school in San Jose to a young NBC settling its West Coast headquarters in 1926.

"Bay Area Radio" was written by noted radio historian John F. Schneider with assistance from the California Historical Radio Society and the Bay Area Radio Museum. It goes on sale March 5.

(RW)

**

RADIO READING: A DOT OF BUTTER AND A DASH OF SPICE FIELD DAY COOKBOOK

And "A Dot of Butter and a Dash of Spice" is a new cookbook dedicated to Field Day culinary delights from UK amateur Steve Norman, M0MVB. In explaining his new work Norman says that as we all need to eat, he has combined his love of doing field day and of food by writing a BBQ cook book aimed at the ham radio operator. "A Dot of Butter and a Dash of Spice" contains over 100 recipes as well as covering what is the best BBQ to take on field days and loads of other help. Priced at £9.99 British Pounds or $15.75 US dollars, it can be ordered on-line in the United State from Amazon.com and other booksellers. (M0MVB)

NAMES IN THE NEWS: N6SL SAYS QCWA 40 METER CW NET SPPED LOWERED TO 15 WPM

Some names in the news. First up is Ben Russell, N6SL. He says via the Quarter Century Wireless Association's remailer that to encourage more participation the 40 meter QCWA 40 Meter CW Net hat the code speed has been reduced to approximately 15 words per minute. Russell, who is the Net Control Station, says that this net meets every Wednesday evening at 8 PM Eastern Time on 7 point 035 MHz +/- any QRM. Anyone interested in QCWA and its activities is invited to take part. (N6SL via QCWA Remailer)

**

NAMES IN THE NEWS: JIM LAPORTA, N1CC, NAMED NEW QCWA GENERAL MANAGER

Jim LaPorta, N1CC, of Marbank, Texas, has been selected as the new General Manager of the Quarter Century Wireless Association. He will

assume the position on or about March 26th. LaPorta replaces Chuck Walbridge, K1IGD, who will be terminating his current contract as General Manager on March 31st after seven years in that position. (N0UF)

**

HAM HAPPENINGS: HAPPY 5th BIRTHDAY TO REC.RADIO.AMATEUR.MODERATED

And a big happy birthday shout-out to the rec.radio.amateur.moderated Usenet newsgroup which will be five years old this month.

The group was founded on February 22, 2007. It was created as a moderated alternative to the chaotic problems on many of the un-moderated newsgroups of the time. Since then it has become a model that other hobby radio Newsgroups are attempting to emulate.

If you haven't participated on Usenet in a while you might want to take a look at rec.radio.amateur.moderated. Its quite a bit more mature than other hobby groups in the Usenet genre.

As an aside, Amateur Radio Newsline has been distributed on rec.radio.amateur.moderated almost since that Newsgroup was formed and we hope that we helped in some way in the group's long term success. (ARNewsline(tm))

**

HAM HAPPENINGS: SARL LEAP YEAR CHALLENGE

Hams are invited to take part in the South Africa Radio League-sponsored Leap Year Challenge on Wednesday February 29th. The challenge starts at 00:01 and ends at 23:59 South Africa Time. Modes acceptable include phone, CW and digital activity on all bands including HF, VHF, UHF and microwaves.

The objective is simply to make as many contacts as you can on this day. The rules permit you to work a station once only regardless of band, mode or call sign.

Logs go by e-mail to zs4bfn (at) netactive (dot) co (dot) za and must be received by midnight Friday March 2nd, 2012. A South Africa Radio League membership is up for grabs for the log received with the most QSO's made.

Also this reminder: If you do not take part, you will have to wait until 2016 to put the date February 29th into your logbook! (SARL)

EMERGING TECHNOLOGY: A SPRAY-ON ANTENNA

Ever found yourself without a signal and wished you could just spray one on like magic? Soon, you may be able to do just that. Michael Grebert, N4OZ is here with more:

--

Chamtech Enterprises, of Sandy, Utah, has developed a sprayon antenna material that it says is more lightweight and energy efficient than current technology.

Revealed at Google's inaugural "Solve for X" symposium, the company says than an antenna can be painted onto almost any surface including trees, walls and even on fabrics.

Chamtech says that it is already talking with governmentbased customers, and as such can't give too much detail on how it works. However it has released information that its material uses organic elements that have the ability to interact with magnetic and radio-frequency fields.

The company's Chief Technology Officer is Rhett Spencer. Spencer is quoted as saying the antenna could increase mobile energy efficiency by 10 percent. Also that it was found to work particularly well under water. Observers at the event say that being organic could make it ideal for subaquatic telecommunications infrastructure.

Prelimnary tests on current a generation cell phone showed that the product was able to boost signals by an impressive 20 dbm when painted over the standard internal antenna.

>From our point of view, for ham radio operators living in antenna restricted areas such as apartments or condominiums, the possibilities of a product such as this could be endless. All a ham might need is a bit of imagination and some of the spray-on antenna paint to get on the air with a signal much stronger than from the rubber duckie on his or her HT.

For the Amateur Radio Newsline, I'm Michael Grebert, N4OZ, not far from Music City, Nashville, Tennessee.

--

For more information about the Chamtech spray-on antenna material you can take your web browser to www.chamtechops.com. A video with a talk about the technology involved is on-line at tinyurl.com/spray-onantenna. (N4OZ, FutureTech)

**

HAM RADIO IN SPACE: ESA FIRST VEGA LAUNCH A SUCCESS

The maiden voyage of the European Space Agency's new Vega launch vehicle has successfully lofted a research satellite along with eight student built microsats into space.

The first Vega launch took place from the ESA spaceport in Korou, French Guiana at 10:00 UTC on Monday, February 13th. The primary payload was the Italian Space Agency's Laser Relativity Spacecraft. Its primary mission is the measurement of the Lense-Thirring effect, also known as frame-dragging. The satellite may also be used for measurements in the fields of Geodynamics and Satellite geodesy.

The secondary payload of the eight student-built MicroSats will transmit telemetry in the VHF, UHF and microwave amateur bands. One of the tiny birds named PW-Sat includes a voice repeater in addition to its telemetry transponder. Its uplink is at 435.020 MHz with its downlink at145.900 MHz. PW-Sat sends its telemetry using1200 baud packet as well as CW on 435.020 MHz. (ESA, AMSAT)

**

RADIO IN SPACE: RUSSIA SAYS RADIATION CAUSED PHOBOS-GRUNT FAILURE

Russia is blaming solar radiation for a computer glitch that doomed its Phobos-Grunt Mars moon mission, but space industry experts cast doubt on the findings of an investigation into the crash of what was to be Moscow's first deep space mission in two decades. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Phobos-Grunt spacecraft was stranded in Earth orbit after launch in November and crashed into the Pacific Ocean in January. Russian Space Agency Chief Vladimir Popovkin said that in the opinion of the commission, the most likely reason for the mishap was the local impact of heavily charged space particles that led to a failure in the memory of the main onboard computer in the second stage of flight.

Popovkin went on to say that foreign-made counterfeit or defective microchips were partly to blame for the failure of the $165-million spacecraft, designed to retrieve soil samples from the Martian moon Phobos. He said that a burst of space radiation caused the onboard computers to reboot and go into standby mode.

But others doubt this to be the case. Rather experts on spaceflight say that Moscow was blaming external factors for the loss of its ambitious Mars mission to distract from chronic failings with its

once-pioneering industry.

Alexander Zakharov, was the mission's lead scientist. He has been quoted as saying that even if this was the true which cannot be completely ruled out because it does happen, then there is some kind of problem with the flight system or the programming, which were not designed to guard against space radiation.

Another space industry source said potentially damaging bursts of radiation were highly unlikely in low-Earth orbit, where hundreds of satellites circle within the protective bubble of the planet's magnetic field.

But Russia's State News Agency has cited an industry source of its own. That unnamed source inferred that the critics are incorrect saying it was absurd to think that the PhobosGrunt had not been made to withstand cosmic rays on its two year interplanetary mission.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

The failure of the Phobos-Grunt spacecraft to leave Earth orbit was the latest in a series of mishaps that have plagued Russua's spavce program the past year. (Various published news reports)

**

WORLDBEAT: RADIO AUSTRALIA MAY BE BACK ON THE AIR FROM FIJI

Radio Australia may broadcast again from Fiji. Andy Sennit reports via the Media Network blog that Fiji's coup installed military government has signaled it is looking at allowing Radio Australia to broadcast inside the country again.

Power to the two transmitters, one in Nadi and the other in Suva, was switched off by the interim government in 2009, three years after the 2006 coup led by military commander Frank Bainimarama. But Fiji's permanent secretary of information, Sharon Smith Johns told Pacific Beat's Geraldine Coutts that she is looking at reversing the policy. (Media Network)

**

DX

In DX, Albania will be on the air during the 2012 CQ WPX SSB Contest. This with word that TA1HZ will operate from that nation as ZA1TC for the period of March 23rd to the 26th that includes the contest weekend. During his spare time outside the contest he will try to work some PSK31, especially on 30m band. Details and QSL info is on www.qrz.com.

Lastly, HA5PP will be active from Malta as 9H3PP

on May 26th and 27th during the CQ W W WPX CW

Contest as a SingleOperator Single-Band entry.

Activity outside of the contest will be on 6 and

12 meters, and possibly s 17 meters as well. QSL

via HA5PP.

(Above from various DX news sources)

THAT FINAL ITEM: COORDINATING THE SUPERBOWL

And finally this week, a tale of frequency coordination to the stars. Not the stars in the sky but those on the football field at this years Superbowl. It's also the story of the part played in the process by a number of Hoosier state radio amateurs. Here's Jack Parker, W8ISH:

--

INDY SUPER BOWL HAMS

Actuality Audio: "Check one two three four.This is about a team an organization.I've just gone from hotel to stadium..It was a great experience oversall."

--

>From mic checks to Manning to Madonna to the man on the street the airwaves around downtown Indianapolis were full of frequencies from over 3500 hundred transmitters. For two weeks prior to Super Bowl 46, and through the game itself, hundreds of radio and television stations were vying for radio spectrum in their efforts to cover the greatest show in professional football.

Keeping interference to a minimum is the job of the Super Bowl Frequency Coordination Committee. It is a team of 46 six, including 17 Amateur Radio operators from central Indiana. Their mission was to log, tag and tune all wireless transmitters from broadcast media from around the world.

As Super Bowl Sunday approached the job of preventing interference became a super task. The Indianapolis Super Bowl village, Lucas Oil Stadium and major hotels are located in a one mile square area. According to one volunteer, that is a lot of RF in a small area.

According to organizers the area of frequency control was expanded on game day stretching out about 30 miles into the suburbs of central Indiana.

The bottom line for all this effort, was to make sure the radio transmitters to each quarterback on the field was interference free throughout Super Bowl 46.

--

Actuality Audio: "Check one two..two..everyones good."

--

Reporting from Indianapolis, I'm Jack Parker, W8ISH.

--

Radio frequency coordination has become an important part of many broadcast sports, but few other than the Olympics require the amount of spectrum as does the Superbowl each year. (W8ISH)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm).
